J8-2354A	Canister House Powder Store	Powder room associated with 2354, Canister House Location determined from historical maps	SB-J8-2354A-01 through SB-J8-2354A-04	SB-J8-2354A-04 SB-J8-2354A-03	Sampling location SB-J8-2354A-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J8-2354A-03.	No New Jersey Soil Cleanup Criteria Exceedances
J8-8272	Store House	Bldg demolished- only evidence two larger than normal rail ties. Rail ties supported a canopy (area=100 sq ft).	SB-J8-8272-01 through SB-J8-8272-03	SB-J8-8272-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-36

Finishing Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J9-5	Finishing Area Substation	1,000 kV to 35 kV substation; recent construction; new insulators; No evidence of a release	SB-J9-5-01	SB-J9-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
K6-8273	Dynamite Store # 5	Bldg. demolished and left in pile-pile contains wood, metal, pipes and approximately 20 drums. Drums labeled as containing explosives (Trimethylolethane). Drums intermixed with debris-most have lids. No evidence of a release.	SB-K6-8273-01 through SB-K6-8273-04	SB-K6-8273-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-K6-8273-03	No New Jersey Soil Cleanup Criteria Exceedances

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-37

Ammonia-Nitrate NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersery

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H12-120	Lead Melting Pot	Bldg. Demolished-minor amounts of rubble present; No evidence of release	SB-H12-120-01 through SB-H12-120-03	SB-H12-120-03 SB-H12-120-02	Sampling location SB-H12-120-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-H12-120-02.	No New Jersey Soil Cleanup Criteria Exceedances
H13-2	Transformer	Three mounted to telephone poles. Recently installed. No evidence of release.	SB-H13-2-01 through SB-H13-2-03	SB-H13-2-01 SB-H13-2-02 SB-H13-2-03	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H13-3	Transformer	Three transformers mounted on telephone pole. Recently installed. No evidence of release.	SB-H13-3-01 through SB-H13-3-03	SB-H13-3-01 SB-H13-3-02 SB-H13-3-03	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H13-6	Safety Trailer	Portable aluminum sided trailer mounted on concrete block. Office use only, no evidence of release.	SB-H13-6-01 through SB-H13-6-04	SB-H13-6-01 SB-H13-6-04	Sampling location SB-H13-6-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-H13-6-04.	No New Jersey Soil Cleanup Criteria Exceedances
I11-2326	Platinum Gauge House	Bldg. demolished-only concrete footers remain; No evidence of release	SB-I11-2326-01 through SB-I11-2326-05	SB-I11-2326-04 SB-I11-2326-01	Sampling location SB-I11-2326-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I11-2326-01.	No New Jersey Soil Cleanup Criteria Exceedances
I11-3	Unknown Sump	Siemens induction motor pump. Two float switches and pressure indicator present on sump. No evidence of release.	TP-I11-3-01	SB-I11-3-01	Test Pit location was placed downgradient from the sump	No New Jersey Soil Cleanup Criteria Exceedances
I12-1	Unknown Concrete Pad	Square concrete pad with circular cast-in-place rebar. No evidence of release.	SB-I12-1-01 through SB-I12-1-04	SB-I12-1-04 SB-I12-1-02	Sampling location SB-I12-1-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-1-02.	No New Jersey Soil Cleanup Criteria Exceedances
I12-12	Propane Tank	Propane tank mounted on concrete footers; currently empty. No evidence of release.	SB-I12-12-01 through SB-I12-12-04	SB-I12-12-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-37

Ammonia-Nitrate NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I12-13	Propane Tank	Supported on two temporary metal supports-currently empty. No evidence of release.	SB-I12-13-01 through SB-I12-13-03	SB-I12-13-03	Sampling location was determined using an Expray Test Kit;Group C E&E materials were detected at SB-I12-13-03. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
I12-2011	Crystalizer House	Bldg. demolished-concrete and steel foundation remains. Large oven mounted on foundation. Area currently converted for use as a decontamination facility. Floor drain in W corner flow directed to WWTP. No evidence of release.	SB-I12-2011-01 through SB-I12-2011-04	SB-I12-2011-01 SB-I12-2011-04	Sampling location SB-I12-2011-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-2011-04.	No New Jersey Soil Cleanup Criteria Exceedances
I12-2012	Coating House Repair Shop	Bldg. demolished-concrete block foundation remains; No evidence of release (area=300 sq ft)	SB-I12-2012-01 through SB-I12-2012-03	SB-I12-2012-02 SB-I12-2012-03	Sampling location SB-I12-2012-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-2012-03.	No New Jersey Soil Cleanup Criteria Exceedances
I12-8	Transformer	Pole mounted. Housing appears intact. No evidence of release.	SB-I12-8-01	SB-I12-8-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I12-8271	Control Room	Control House for EQ WWTP; Concrete masonry block construction; Houses single blower/silencer; Stressed vegetation at SE corner	SB-I12-8271-01 through SB-I12-8271-04	SB-I12-8271-02 SB-I12-8271-01	Sampling location SB-I12-8271-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-8271-01.	No New Jersey Soil Cleanup Criteria Exceedances
I12-8581	Decontamination Facility Control Room	Wooden shed-houses oven controls and pressure washer; Small debris area (building debris) at S corner; No evidence of release	SB-I12-8581-01 through SB-I12-8581-04	SB-I12-8581-04 SB-I12-8581-01	Sampling location SB-I12-8581-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-8581-01.	No New Jersey Soil Cleanup Criteria Exceedances
I12-9	Transformer	Not mounted; on ground adjacent to telephone pole. Housing intact. No evidence of release.	SB-I12-9-01	SB-I12-9-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I12-9112	Nitric Acid Storage Tanks	Bldg. demolished-cradle removed footers remain; No evidence of release	SB-I12-9112-01 through SB-I12-9112-06	SB-I12-9112-04 SB-I12-9112-03	Sampling location SB-I12-9112-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-9112-03.	No New Jersey Soil Cleanup Criteria Exceedances

Storage Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J10-3	Electric Transformer	Corroded bottom, possible oil release	SB-J10-3-01	SB-J10-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J9-2	Stressed Vegetation	Soil with gray flakes of soft paper-like substance (area=50 sq ft)	SB-J9-2-01 through SB-J9-2-03	SB-J9-2-02	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-J9-2-02. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
J9-6	Smokeless Unloading	Minor amounts of concrete block, wood and steel siding; Location based on historical maps; No evidence of a release	SB-J9-6-01 through SB-J9-6-03	SB-J9-6-02 SB-J9-6-01	Sampling location SB-J9-6-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J9-6-01.	No New Jersey Soil Cleanup Criteria Exceedances
K7-2127	Rest House #6	Steel and wood structure; Two loading doors on E side, loading dock on E corner, possibly for narrow gauge railroad; No evidence of a release	SB-K7-2127-01 through SB-K7-2127-05	SB-K7-2127-03 SB-K7-2127-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
K7-3	Unknown Foundation	Foundation has been removed, only evidence is an old walkway; No evidence of a release (area=100 sq ft)	SB-K7-3-01 through SB-K7-3-03	SB-K7-3-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
K7-F5	Rest House #3 Scrap Shed	Scrap shed has been totally removed; All that remains is a flat area (area=100 sq ft)	SB-K7-F5-01 through SB-K7-F5-03	SB-K7-F5-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
K8-9212A	New Premix Storehouse Shed	Shed adjacent to K08-9212 with concrete foundation with wooden construction	SB-K8-9212A-01 through SB-K8-9212A-04	SB-K8-9212A-01 SB-K8-9212A-04	Sampling location SB-K8-9212A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K8-9212A-04.	No New Jersey Soil Cleanup Criteria Exceedances
K9-3	Discarded Drum	Drum has been removed with flag placed in former location; Area is currently covered with vegetation	SB-K9-3-01 through SB-K9-3-02	SB-K9-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
K9-9204	Shipping House #3	Brick foundation, corrugated sheet metal, wooden construction. Multiple loading areas with berm on N side. No evidence of release.	SB-K9-9204-01 through SB-K9-9204-08	SB-K9-9204-01 SB-K9-9204-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
L7-1	Debris	Most debris removed, all that remains is a piece of rebar, two chunks of steel siding and a narrow gauge rail section. No evidence of a release.	SB-L7-1-01 through SB-L7-1-03	SB-L7-1-03 SB-L7-1-01	Sampling location SB-L7-1-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L7-1-01.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-38

Storage Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
L7-2	Unknown Foundation	Foundation has been removed, only evidence is overturned soil; No evidence of a release (area=100 sq ft)	SB-L7-2-01 through SB-L7-2-03	SB-L7-2-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
L7-4	Discarded Drums	Drums and metal debris has been removed; No evidence of a release	SB-L7-4-01 through SB-L7-4-03	SB-L7-4-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
L7-5	Electric Transformer	Transformer corroded but looks intact; No evidence of a release	SB-L7-5-01	SB-L7-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
L7-6	Discarded Drum	Drum has been removed with no evidence of location. Location will be estimated.	SB-L7-6-01 through SB-L7-6-03	SB-L7-6-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
L7-8115	Magazine Office	Building completely removed. All that remains is a berm indicating its presence. No evidence of a release (area=400 sq ft).	SB-L7-8115-01 through SB-L7-8115-04	SB-L7-8115-02 SB-L7-8115-04	Sampling location SB-L7-8115-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L7-8115-04.	No New Jersey Soil Cleanup Criteria Exceedances
L7-9206	Cap Magazine	Steel structure on concrete pad, one door on E side; No evidence of a release (area=200 sq ft)	SB-L7-9206-01 through SB-L7-9206-04	SB-L7-9206-01 SB-L7-9206-02	Sampling location SB-L7-9206-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L7-9206-02.	No New Jersey Soil Cleanup Criteria Exceedances
L7-9315	Fuse Storage	Building completely removed; No evidence of a release (area=200 sq ft)	SB-L7-9315-01 through SB-L7-9315-03	SB-L7-9315-01 SB-L7-9315-02	Sampling location SB-L7-9315-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L7-9315-02.	No New Jersey Soil Cleanup Criteria Exceedances
L8-8215	Unknown	Vegetation covers former site with sand areas; Probable former scrap shed; No evidence of a release (area=100 sq ft)	SB-L8-8215-01 through SB-L8-8215-03	SB-L8-8215-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
L8-8235	Car Barrel Shed	Area presently covered with vegetation; No evidence of a release	SB-L8-8235-01 through SB-L8-8235-03	SB-L8-8235-01 SB-L8-8235-02	Sampling location SB-L8-8235-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L8-8235-02.	No New Jersey Soil Cleanup Criteria Exceedances
L8-9202	No. 5 Shipping	Brick foundation wood wrapped in corrugated sheet metal; Berm on SE side with rail loading area; Loading dock on NW corner; No evidence of a release	SB-L8-9202-01 through SB-L8-9202-07	SB-L8-9202-01 SB-L8-9202-07	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-38

Storage Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
M7-9205	Dynamite Magazine #1	Old wooden magazine surrounded on three sides by a wooden and earthen berm, with loading areas in the NW and SE corners, the SE loading dock is covered by a roof. No evidence of a release	SB-M7-9205-01 through SB-M7-9205-06	SB-M7-9205-01 SB-M7-9205-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
M8-9201	Dynamite Magazine #2	Old structure that had a barricade many years ago, the building has three doors and five loading docks, a narrow gauge rail serviced this building. No evidence of release	SB-M8-9201-01 through SB-M8-9201-10	SB-M8-9201-01 SB-M8-9201-10	Sampling location SB-M8-9201-01 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-M8-9201-10	No New Jersey Soil Cleanup Criteria Exceedances
N5-3	Former Store House	Pit in the ground with bermed sides, all remnants of former structure have been removed. No evidence of release.	SB-N5-3-01 through SB-N5-3-05	SB-N5-3-03 SB-N5-3-01	Sampling location SB-N5-3-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N5-3-01.	No New Jersey Soil Cleanup Criteria Exceedances
N5-533	Former Store House	Remains of former store house, only 21 cement footers and some old rusted metal siding remain. Building was thermally decontaminated. No evidence of a release.	SB-N5-533-01 through SB-N5-533-05	SB-N5-533-05 SB-N5-533-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 538 ppm at SB-N5-533-05. A confirmation sample was collected at SB-N5-533-01. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
N5-581	Former Store House	Old structure protected by an earthen berm, building has been removed and all that remains is the berm and its wooden support. No evidence of release.	SB-N5-581-01 through SB-N5-581-05	SB-N5-581-01 SB-N5-581-05	Sampling location SB-N5-581-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N5-581-05.	No New Jersey Soil Cleanup Criteria Exceedances
N6-580	Rest House #580	This former rest house is buried beneath the old landfill with no evidence of its location, location will be estimated			This remnant building is located within the landfill, therefore it will not sampled.	No New Jersey Soil Cleanup Criteria Exceedances
N6-9208	Shipping House #9	Old wooden structure with steel siding and roofing, large wooden. Berm filled with earth surrounding the structure, loading docks on the N and S sides. No evidence of release.	SB-N6-9208-01 through SB-N6-9208-06	SB-N6-9208-03 SB-N6-9208-04	Sampling locations were determined using an Expray Test Kit; Group B E&E materials were detected at SB-N6-9208-03/04. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
N7-394	Blender #2 Building 394	No debris remains of building, adjacent debris from former blender. Location based on historic maps. No evidence of release.	SB-N7-394-01 through SB-N7-394-03	SB-N7-394-01 SB-N7-394-03	Sampling location SB-N7-394-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N7-394-03.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-38

Storage Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
N7-4	Electric Transformer	Electric transformer on telephone pole, looks intact. No evidence of release.	SB-N7-4-01	SB-N7-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
N7-5	Stressed Vegetation	Area of stressed vegetation, possibly caused by fibrous, green flat pieces of material (area=100 sq ft).	SB-N7-5-01 through SB-N7-5-03	SB-N7-5-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
N7-571	Unknown	Building is destroyed with only some wood remaining, building is located on the edge of the pond. No evidence of release	SB-N7-571-01 through SB-N7-571-03	SB-N7-571-03 SB-N7-571-02	Sampling location SB-N7-571-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N7-571-02.	No New Jersey Soil Cleanup Criteria Exceedances
N7-574	Unknown	Former building has been removed, all that remains is a built up level area extending into a marshy area, some drums and scrap are nearby (area=800 sq ft).	SB-N7-574-01 through SB-N7-574-04	SB-N7-574-02 SB-N7-574-03	Sampling location SB-N7-574-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N7-574-03.	No New Jersey Soil Cleanup Criteria Exceedances
N8-389	Dry House	Building has been completely removed, all that remains is 12 concrete footers and some scrap metal. No evidence of release.	SB-N8-389-01 through SB-N8-389-05	SB-N8-389-05 SB-N8-389-04	Sampling location SB-N8-389-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N8-389-04.	No New Jersey Soil Cleanup Criteria Exceedances
O5-2	Former Store House	Building removed, all that remains is an earthen berm; No evidence of release (area=800 sq ft)	SB-O5-2-01 through SB-O5-2-04	SB-O5-2-01 SB-O5-2-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
O5-5	Former Store House	Man-made level section of ground cut out of a slope creating a bermed area, one piece of scrap metal remains. No evidence of release (area=300 sq ft).	SB-O5-5-01 through SB-O5-5-03	SB-O5-5-03 SB-O5-5-02	Sampling location SB-O5-5-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O5-5-02.	No New Jersey Soil Cleanup Criteria Exceedances
O5-534	Former Store House	Similar to N5-533, 18 footers and some steel siding remain; Building was thermally decontaminated; No evidence of a release	SB-O5-534-01 through SB-O5-534-05	SB-O5-534-04 SB-O5-534-02	Sampling location was determined using XRF screening; Results indicated a lead concentration of 430 ppm at SB-O5-534-04 A confirmation sample was collected at SB-O5-534-02. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
O5-537	Dry House #56	21 cement footers remain, building has been removed except for some pieces of steel siding, building surrounded on three sides by earthen berm supported with wood and steel. No evidence of release.	SB-O5-537-01 through SB-O5-537-05	SB-O5-537-05 SB-O5-537-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-38

Storage Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
O5-578	Rest House #12	Old bermed area, berm contains wood and steel reinforcing and has been partially destroyed. Building was thermally decontaminated and has been completely removed. No evidence of release (area=400 sq ft).	SB-O5-578-01 through SB-O5-578-04	SB-O5-578-04 SB-O5-578-02	Sampling location SB-O5-578-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O5-578-02.	No New Jersey Soil Cleanup Criteria Exceedances
O5-580.5	Store House	Former store house nearly completely removed, N side wooden berm remains, narrow gauge rail line runs through center of building. No evidence of release.	SB-O5-580.5-01 through SB-O5-580.5-05	SB-O5-580.5-02 SB-O5-580.5-05	Sampling location SB-O5-580.5-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O5-580.5-05.	No New Jersey Soil Cleanup Criteria Exceedances
O5-580.75	Rest House	Small bermed area, berm has wood and steel reinforcing bars, structure appears to have been thermally decontaminated. No evidence of release (area=500 sq ft).	SB-O5-580.75-01 through SB-O5-580.75-05	SB-O5-580.75-05 SB-O5-580.75-04	Sampling location SB-O05-580.75-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O05-580.75-04.	No New Jersey Soil Cleanup Criteria Exceedances
O5-6	Unknown	Associated with dry house #56 (05-534). Use unknown (area=800 sq ft).	SB-O5-6-01 through SB-O5-6-04	SB-O5-6-02 SB-O5-6-03	Sampling location SB-O5-6-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O5-6-03.	No New Jersey Soil Cleanup Criteria Exceedances
O6-1	Former Store House	Building nearly completely removed when a road was put in place, only remains is a single concrete footer, there is some plastic on the ground nearby. No evidence of release (area=100 sq ft).	SB-O6-1-01 through SB-O6-1-03	SB-O6-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
O6-3	Electric Transformer	Electric transformer on telephone pole, base looks to be corroding. There may have been a release.	SB-O6-3-01	SB-O6-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
O6-577	Rest House #11	All that remains is a hole in the ground, the bottom of the foundation is filled with water. No evidence of release (area=700 sq ft).	SB-O6-577-01 through SB-O6-577-04	SB-O6-577-03 SB-O6-577-01	Sampling location SB-O6-577-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O6-577-01.	No New Jersey Soil Cleanup Criteria Exceedances
O6-649	Blender #649	No remnants of former building; Former location estimated	SB-O6-649-01 through SB-O6-649-03	SB-O6-649-02 SB-O6-649-03	Sampling location SB-O6-649-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O6-649-03.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-38

Storage Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
O6-650	Blender #650	Building has been completely dismantled, there are no remains, Center of building estimated using historical maps	SB-O6-650-01 through SB-O6-650-03	SB-O6-650-03 SB-O6-650-01	Sampling location SB-O6-650-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-06-650-01.	No New Jersey Soil Cleanup Criteria Exceedances
O7-2	Unknown	Small cement foundation	SB-O7-2-01 through SB-O7-2-04	SB-O7-2-02 SB-O7-2-01	Sampling location SB-O7-2-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-2-01.	No New Jersey Soil Cleanup Criteria Exceedances
O7-391	Dry House 391	All remnants of building have been removed. Location based on historic maps. No evidence of release.	SB-O7-391-01 through SB-O7-391-03	SB-O7-391-03 SB-O7-391-02	Sampling location SB-O7-391-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-391-02.	No New Jersey Soil Cleanup Criteria Exceedances
O7-395	Blender House #3	Building completely dismantled, location based on historic maps and pack house footer. No evidence of release.	SB-O7-395-01 through SB-O7-395-03	SB-O7-395-02 SB-O7-395-03	Sampling location SB-O7-395-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-395-03.	No New Jersey Soil Cleanup Criteria Exceedances
O7-576	Unknown	All that remains is a part of the broken foundation; No evidence of a release (area=100 sq ft)	SB-O7-576-01 through SB-O7-576-03	SB-O7-576-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
O7-615E	Former Store House	Similar to 07-9319, only broken brick footers remain with considerable debris. Former building is buried under the debris.	SB-O7-615E-01 through SB-O7-615E-04	SB-O7-615E-01 SB-O7-615E-04	Sampling location SB-O7-615E-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-615E-04.	No New Jersey Soil Cleanup Criteria Exceedances
P5-2	Unknown	Associated with dry house #55 (P5-536), use unknown, all that remains is an earthen pit. No evidence of release. Both P5-2 and P5-3 are up slope from their respective dry house.	SB-P5-2-01 through SB-P5-2-04	SB-P5-2-01 SB-P5-2-03	Sampling location SB-P5-2-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-P5-2-03.	No New Jersey Soil Cleanup Criteria Exceedances
P5-3	Unknown	Associated with dry house #54 (P5-535), use unknown, all that remains is a depression in the ground. No evidence of release (area=800 sq ft).	SB-P5-3-01 through SB-P5-3-04	SB-P5-3-02 SB-P5-3-01	Sampling location SB-P5-3-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-P5-3-01.	No New Jersey Soil Cleanup Criteria Exceedances
P5-536	Dry House #55	Same as 05-537 except berm is more intact, there is a 0.5 inch pipe going into ground at NE corner.	SB-P5-536-01 through SB-P5-536-06	SB-P5-536-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 602 ppm at SB-P5-536-01. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-38

Storage Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
P7-575	Blending Tower 575	Circular structure with inner foundation, may be tank like. Immediately N of inner circle is a sump like pit. Building completely removed. Two pipes entering the ground W of the sump. No evidence of a release.	SB-P7-575-01 through SB-P7-575-07 TP-P7-575-08	SB-P7-575-01 SB-P7-575-04 TP-P7-575-08	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling. Test Pit location placed downgradient from the sump.	No New Jersey Soil Cleanup Criteria Exceedances
Q4-2	Stressed Vegetation	White material in this S.V. Area (area=25 sq ft)	SB-Q4-2-01 through SB-Q4-2-03	SB-Q4-2-03	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
Q6-1	Burn Pad #1	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.		SB-Q6-1-01	This AOC to be closed by Alliant Tech Systems.	No New Jersey Soil Cleanup Criteria Exceedances
Q6-2	Burn Pad #2	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.	No New Jersey Soil Cleanup Criteria Exceedances
Q6-3	Burn Pad #3	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.	No New Jersey Soil Cleanup Criteria Exceedances
Q6-4	Burn Pad #4	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.	No New Jersey Soil Cleanup Criteria Exceedances
Q6-5	Burn Pad #5	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.	No New Jersey Soil Cleanup Criteria Exceedances
Q6-583	Kerosene Storage	Two 220 gal kerosene tanks placed on a cement pad in a cement basin and a small galvanized steel shed. No evidence of release.	SB-Q6-583-01 through SB-Q6-583-04	SB-Q6-583-01 SB-Q6-583-02	Sampling location SB-Q6-583-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-Q6-583-02.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-38

Storage Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
Q6-584	Unknown	Small building associated with P6-9225 that has been removed, No evidence of a structure, former location estimated	SB-Q6-584-01 through SB-Q6-584-03	SB-Q6-584-02 SB-Q6-584-01	Sampling location SB-Q6-584-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-Q6-584-01.	No New Jersey Soil Cleanup Criteria Exceedances
Q6-6	Burn Pad #6	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.	No New Jersey Soil Cleanup Criteria Exceedances
Q6-7	Burn Pad #7	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.	No New Jersey Soil Cleanup Criteria Exceedances
Q6-9311	Unknown		SB-Q6-9311-01 through SB-Q6-9311-03	SB-Q6-9311-03 SB-Q6-9311-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-Q6-9311-01.	No New Jersey Soil Cleanup Criteria Exceedances
R6-1	New Burning Ground Command Post	Building used to watch and manage the burn area. No hazardous materials present. No evidence of a release.	SB-R6-1-01 through SB-R6-1-04	SB-R6-1-01 SB-R6-1-02	Sampling location SB-R6-1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-R6-1-02.	No New Jersey Soil Cleanup Criteria Exceedances
R6-11	Unknown		SB-R6-11-01 through SB-R6-11-03	SB-R6-11-02 SB-R6-11-03	Sampling location SB-R6-11-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-R6-11-03.	No New Jersey Soil Cleanup Criteria Exceedances
S6-1	Unknown		SB-S6-1-01 through SB-S6-1-05	SB-S6-1-05 SB-S6-1-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Miscellaneous/Offsite Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Description	Unrestricted Use Exceedances
D16-1	Administration Building	Wooden/siding construction over concrete block foundation Ceramic catch pipe on SE corner. No evidence of release.	SB-D16-1-01 through SB-D16-1-05	SB-D16-1-01 SB-D16-1-02	Sampling location SB-D16-1-02 was determined using professional judgement Sampling location SB-D16-1-01 was determined using VOC screening Results indicated a PID reading of 25 ppm and an FID reading of 40 ppm Analytical results did not detect elevated VOC concentrations	No New Jersey Soil Cleanup Criteria Exceedances
D16-3	Barracks	Bldgs demolished; No evidence of release	SB-D16-3-01 through SB-D16-3-05	SB-D16-3-05 SB-D16-3-04	Sampling location SB-D16-3-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D16-3-04	No New Jersey Soil Cleanup Criteria Exceedances
E15-8560	Sprayfield/Chlorine House # 1	Large sprayfield with PVC pipe present; concrete catch box on E side; chlorinator house on W side with concrete gutter to adjacent stream; sandy sprayfield, reduced vegetation present (area= 22,000 sq ft).	SB-E15-8560-01 through SB-E15-8560-27	SB-E15-8560-01 through SB-E15-8560-27	Each sampling location was screened for metals and E&E materials, none were found	No New Jersey Soil Cleanup Criteria Exceedances
H14-2	Debris Area	No evidence of former debris area; glassware removed; No evidence of release (area=100 sq ft)	SB-H14-2-01 through SB-H14-2-03	SB-H14-2-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J14-2	Unknown Foundation	Minimal evidence of foundation; significant amount of stone present (probably granitic). No evidence of release.	SB-J14-2-01 through SB-J14-2-03	SB-J14-2-03 SB-J14-2-02	Sampling location SB-J14-2-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J14-2-02	No New Jersey Soil Cleanup Criteria Exceedances
M11-1	Unknown Former Foundation	Building demolished, location determined from historic maps. No evidence of a release.	SB-M11-1-01 through SB-M11-1-03	SB-M11-1-02 SB-M11-1-01	Sampling location M11-1-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M11-1-01	No New Jersey Soil Cleanup Criteria Exceedances
N13-5	Electric Transformer	Mounted to telephone pole with minimal discoloration on housing. No evidence of release.	SB-N13-5-01	SB-N13-5-01	Sample was collected at base of pole	No New Jersey Soil Cleanup Criteria Exceedances
O13-4	Unknown	Large concrete foundation with 6" steel pipe extending up from foundation for 6', and a 2' x 2' steel plate bolted to pad. No evidence of release.	SB-O13-4-01 through SB-O13-4-04	SB-O13-4-02 SB-O13-4-01	Sampling location SB-O13-4-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O13-4-01	No New Jersey Soil Cleanup Criteria Exceedances
O13-7	Unknown Pit	Posted as confined space entry pit. Concrete block structure with asphalt roof. No evidence of release. Sump associated with the building.	SB-O13-7-01 through SB-O13-7-04 TP-013-7-05	SB-O13-7-03 SB-O13-7-01 TP-O13-7-05	Sampling location SB-O13-7-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O13-7-01. Test Pit location placed downgradient from the sump.	No New Jersey Soil Cleanup Criteria Exceedances
O13-8	Transformers	Three fairly new gray transformers; No evidence of release	SB-O13-8-01 through SB-O13-8-03	SB-O13-8-01 SB-O13-8-02 SB-O13-8-03	Samples were collected directly under transformers	No New Jersey Soil Cleanup Criteria Exceedances
O13-8577	Chlorinator House/ Generator	Concrete block building with eyewash station in front. Adjacent concrete pad with emergency generator, transformer and No. 2 fuel oil tank. No evidence of release.	SB-O13-8577-01 through SB-O13-8577-04	SB-O13-8577-02 SB-O13-8577-03	Sampling location SB-O13-8577-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O13-8577-03	No New Jersey Soil Cleanup Criteria Exceedances
O13-8604	Well No. 2	Small brick well house; No evidence of release	SB-O13-8604-01 through SB-O13-8604-04	SB-O13-8604-01 SB-O13-8604-03	Sampling location SB-O13-8604-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O13-8604-03	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-39

Miscellaneous/Offsite Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Description	Unrestricted Use Exceedances
O14-1	Unknown	Building demolished, steel mesh, concrete rubble, steel pipe, wood, rubber, and general building debris present. No evidence of release.	SB-O14-1-01 through SB-O14-1-03	SB-O14-1-01 SB-O14-1-03	Sampling location SB-O14-1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O14-1-03	No New Jersey Soil Cleanup Criteria Exceedances
O14-8603	Well No. 1	Small brick well house. Utility box in front containing a pump and a totalizing flow meter. No evidence of release.	SB-O14-8603-01 through SB-O14-8603-04	SB-O14-8603-02 SB-O14-8603-04	Sampling location SB-O14-8603-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O14-8603-04	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-40

TNT Area FA Justification
Phase I - Site Investigation
Kenvil Works, Kenvil, NJ

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
A11-1	Mononitrator #2	Mononitrator # 2 demolished; debris scattered around a basement on W side; catch tank on SE corner of bldg with two pipes 2-4 ft. S of catch tank; no stressed vegetation	SB-A11-1-01 through SB-A11-1-07	SB-A11-1-01 SB-A11-1-04	Sampling locations were determined using XRF screening Results indicated a lead concentration of 609 ppm at SB-A11-1-01 and 728 ppm at SB-A11-1-04	Metals, E&E, SVOCs
A11-2	Mixed Acid Storage #3	Mixed Acid Storage # 3 50-60 ft. E of A11-7 contains tank cradles and a lower level for tank storage; pipe in S foundation no stressed vegetation (area 900 sq. ft.)			Reserved for Remedial Investigation due to the presence of lead	Metals
A11-4	Acid Fortifier #2	Rectangular, overgrown foundation with catch tank on N side; NW corner has transite piping and vessels; no environmental impacts			Reserved for Remedial Investigation due to the presence of lead	Metals
A11-5	Bi/Trinitrator #2	Old, overgrown foundation with pipes going into the ground at each corner no stressed vegetation			Reserved for Remedial Investigation due to the presence of lead and E&E materials	Metals, E&E
A11-504	Weak Acid Storage Tanks	Weak Acid Storage Tank; several old pits along E side of former bldg. Possibly catch tanks			Reserved for Remedial Investigation due to the presence of lead	Metals
A11-570	Change House	Stone foundation up slope from A11-504; level, vegetated area; 4 inch pipe in ground on E corner about 3 ft. from bldg; no stressed vegetation	SB-A11-570-01 through SB-A11-570-05	SB-A11-570-05 SB-A11-570-01	Sampling location SB-A11-570-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-A11-570-01	SVOCs
A11-7	Nitric Acid Storage #2	Concrete footers overgrown; two small areas less than 10 ft. in diameter of stressed vegetation approximately 15 ft. from footers SE stressed vegetation contained lead both have slag present			Reserved for Remedial Investigation due to the presence of lead	Metals
A11-8	Mixed Acid Storage Tanks #4	Three 1.5'x 12' foundations with an equipment pad to the S; Pad is 12' x 12' with supports; No stressed vegetation (area 300 sq.ft.)	SB-A11-8-01 through SB-A11-8-04	SB-A11-8-03 SB-A11-8-02	Sampling location SB-A11-8 -03 was determined using E&E screening Group B E&E materials were detected using an Expray Test Kit. A confirmation sample was collected at SB-A11-8 -02	E&E
A11-9	Rock Quarry	Large several hundred foot depression formerly used as a rock quarry; broken ground and discarded drums,containers, and ceramic pipe (area 19,000 sq.ft.)	SB-A11-9-01 through SB-A11-9-20	SB-A11-9-03 SB-A11-9-04	Sampling location SB-A11-9-04 was determined using professional judgement Sample location SB-A11-9-03 was determined using XRF screening Results indicated a lead concentration of 917 ppm at SB-A11-9-03	Metals
A12-1	TNT in Soil	Small area S of A11-6; numerous chunks of TNT measuring several inches across;discarded terra cotta pipe and overturned soils (area 300 sq. ft.)	SB-A12-1-01 through SB-A12-1-03		Reserved for Remedial Investigation due to the presence of TNT chunks on the ground	E&E
A12-426	Block Breaker	Bldg. Demolished; adjacent to rail spur some brick present, but mostly a concrete foundation; rail spur overgrown	SB-A12-426-01 through SB-A12-426-05		A subsurface layer of NC was found along the SW corner of the foundation during screening activities. This AOC has been reserved for the Remedial Investigation	E&E

Table 5-40

TNT Area FA Justification
Phase I - Site Investigation
Kenvil Works, Kenvil, NJ

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
A12-7	Neutralizer/Pelletizer #2, associated Catch Tank	Neutralizer/Pelletizer Catch Tank with thick walls; overgrown; no obvious environmental impact; old drum 50 ft. S of this feature (area 300 sq. ft.)	SB-A12-7-01 through SB-A12-7-04	SB-A12-7-03 SB-A12-7-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	E&E, SVOCs
A12-8	Debris Area	Thermally decontaminated; brick foundation remains within berm; metal bracing along berms; no stressed vegetation	SB-A12-8-01 through SB-A12-8-05	SB-A12-8-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 454 ppm at SB-A12-8-05 Group A E&E materials were also detected at SB-A12-8-05 using an Expray Test Kit	Metals, E&E
A13-1	Filter House #3 Sump	Rectangular vegetated foundation with pit on one side; no environmental impact (area 600 sq. ft.)	SB-A13-1-01 through SB-A13-1-04	SB-A13-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E
A13-625	Filter House #2	Thermally decontaminated building with half of former berm destroyed; metal debris remaining; no stressed vegetation			Reserved for Remedial Investigation due to the presence of E&E materials	E&E
B10-2	TNT in Soil	Piles of dirt that contain waste TNT not much vegetation in area; appears to radiate out from unknown structure possibly a catch tank to the north			Reserved for Remedial Investigation due to the presence of arsenic and E&E materials	Metals, E&E
B10-20	Former Water Tank	25 ft. diameter circular foundation made of concrete; center contains rusted, metal pails and one broken terra cotta pipe; small valve S of former tank presumably for the water tank (area 500 sq. ft.)	SB-B10-20-01 through SB-B10-20-04	SB-B10-20-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,845 ppm and a zinc concentration of 1,526 ppm at SB-B10-20-01	Metals, SVOCs
B10-5	Possible Catch Tank for B10-508/B10-509	Three small concrete foundations covered with burnt wood; pipes from bldgs. 508 and 509 aimed toward this building; potential for stressed vegetation			Group A E&E materials were found at this location using an Expray Test Kit. This AOC has been referred to the Remedial Investigation	E&E
B10-501	Nitric Acid Storage #1	Nitric Acid Storage Tanks; bldg. was burnt Bldg very degraded probably from acid; no vegetation in interior of bldg; process pipes and foundation not intact			Reserved for Remedial Investigation due to the presence of lead	Metals
B10-502	Mixed Acid Storage Tanks #1	Mi1ed Acid Storage Tanks; metal debris and drums present; thermally decontaminated pipes not intact; overgrown			Reserved for Remedial Investigation due to the presence of lead	Metals
B10-503	Mononitrator #1	Two story brick bldg burnt to thermally decontaminate the interior; bldg still standing S side very overgrown; SW side is a loading dock; SE side is a sump; discharge pipe present	SB-B10-503-01 through SB-B10-503-06 TP-B10-503-07	SB-B10-503-01 SB-B10-503-02 SB-B10-503-06 TP-B10-503-07	Sampling locations SB-B10-503-01/02 were determined using professional judgement; Sample location SB-B10-503-06 was determined using XRF screening; Results indicated a lead concentration of 692 ppm at SB-B10-503-06. Test Pit location was placed downgradient from the sump. Analytical results did not detect elevated lead concentrations.	SVOCs, E&E
B10-505	Acid Fortifier	Overgrown foundation of Acid Fortifying House thermally decontaminated;pipes inside bldg.			Reserved for Remedial Investigation due to the presence of lead	Metals

Table 5-40

TNT Area FA Justification
Phase I - Site Investigation
Kenvil Works, Kenvil, NJ

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
B10-506	Absorption Tower #1	Absorption Tower # 1; Three columns standing; sump on S side; roofing and pipe debris on W side; thermally decontaminated, no stressed vegetation	SB-B10-506-01 through SB-B10-506-06 TP-B10-506-07	SB-B10-506-02 SB-B10-506-04 TP-B10-506-07	Sampling location SB-B10-506-02 was determined using XRF screening Results indicated a lead concentration of 460 ppm. A confirmation sample was collected at SB-B10-506-04. Test Pit location was placed downgradient from the sump. Analytical results did not detect elevated lead concentrations.	SVOCs, E&E
B10-508	Bi/Trinitrator #1	Binitrator bldg burnt; large amount of debris and piping in center of bldg.; E of SE corner is left over brine coils			Reserved for Remedial Investigation due to the presence of lead and E&E materials	Metals, E&E
B10-509	Neutralizer/Pelletizer #1	Neutralizer/Pelletizer Bldg has very high berms; piping and machinery in bldg. vegetated			Reserved for Remedial Investigation due to the presence of lead	Metals
B10-6	TNT in Soil	Small area 25 ft. S-SE of bldg. 508 with stressed vegetation; one piece of TNT found here; more possible			Reserved for Remedial Investigation due to the presence of arsenic and E&E materials	Metals, E&E
B10-656	Nitric Acid Storage Tanks	Nitric Acid Storage Tanks No foundations only disturbed earth	SB-B10-656-01 through SB-B10-656-03	SB-B10-656-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	E&E
B11-513	Crude Screening House, associated sump	Thermally decontaminated bldg. Some brick foundation remains; scrap metal debris and pipes; no evidence for release	SB-B11-513-01 through SB-B11-513-05	SB-B11-513-02 SB-B11-513-05	Sampling location SB-B11-513-02 was determined using XRF screening Results indicated a lead concentration of 618 ppm at SB-B11-513-02 Group A E&E materials were detected at SB-B11-513-05 using an Expray Test Kit Analytical results did not detect elevated lead concentrations	E&E
B11-523	Change House	Rectangular bldg currently vegetated; no environmental impacts (area 900 sq. ft.)	SB-B11-523-01 through SB-B11-523-04	SB-B11-523-03 SB-B11-523-01	Sampling location SB-B11-523-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B11-523-01	SVOCs
B11-602C	Reservoir	Large, deep foundation with trees growing in it; pipe extends from N to E; smaller area in W corner with two valves and pipe extending to N; pipe on E corner going into ground; no stressed vegetation	SB-B11-602C-01 through SB-B11-602C-08	SB-B11-602C-07 SB-B11-602C-08	Sampling location SB-B11-602C-08 was determined using XRF screening Results indicated a lead concentration of 445 ppm at SB-B11-602C-08 Group B E&E materials were detected at SB-B11-602C-07 using an Expray Test Kit	Metals, SVOCs, E&E
B11-663	Graining House #2, associated sump	Graining House # 2 surrounded by a berm foundation inside berm overgrown, broken into three tiers; several holes where pipes once were located; no stressed vegetation	SB-B11-663-01 through SB-B11-663-06	SB-B11-663-04 SB-B11-663-06	Sampling location SB-B11-663-04 was determined using E&E screening Group A E&E materials were detected using an Expray Test Kit. A confirmation sample was collected at SB-B11-663-06	E&E, SVOCs

Table 5-40

TNT Area FA Justification
Phase I - Site Investigation
Kenvil Works, Kenvil, NJ

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
B12-1	Perchlorate Grinder	Undocumented structure very similar to Perchlorate Grinder; two large concrete foundations and a few pieces of old metal no evidence of environmental impact (area 400 sq. ft.)			Group A E&E materials were found at this location using an Expray Test Kit. This AOC has been deferred to the Remedial Investigation	E&E
B12-234	Filter House #1 Sump	Rectangular shaped sump house for Filter House # 1; pit filled with water; no stressed vegetation			Reserved for Remedial Investigation due to the presence of E&E materials	E&E
B12-237	Filter House #1	Filter House # 1 most intact of demolished filter houses; rusted metal in base of bermed are that is intact; thermally decontaminated	SB-B12-237-01 through SB-B12-237-05	SB-B12-237-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 529 ppm, a copper concentration of 603 ppm and a zinc concentration of 1,870 ppm at SB-B12-237-01	Metals, SVOCs, E&E
B12-3	Culvert	Culvert 32 inches in diameter with 8-12 inch pipes; probably carried waste from B12-234 and B12-237; two inlet pipes to the N and a drain to the S toward B13-1; no evidence of contamination	SB-B12-3-01 through SB-B12-3-02	SB-B12-3-01 SB-B12-3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	E&E, SVOCs
B12-450	Perchlorate Grinder	Perchlorate Grinder SW of B12-237 adjacent to rail spur; two large concrete foundations adjacent to rail spur slight depression in center filled with water no environmental impact	SB-B12-450-01 through SB-B12-450-05	SB-B12-450-03	Reserved for Remedial Investigation due to the presence of E&E materials	E&E, SVOCs
B13-1	Settling Pond	Depressed area with a ditch entering from NW ditch originated at A13-625 Filter House # 2; 8-12 inch terra cotta pipe enters from the W possibly from A13-7543 Filter House # 3 area of brown stressed vegetation			Reserved for Remedial Investigation due to the presence of beryllium, lead and thallium	Metals
B13-682	Weak Liquor House	Foundation overgrown with vegetation; tank cradle set and two floor drains; one drain exits foundation in NE of foundation; other drain exists to catch tank in SE corner; no apparent environmental impact	SB-B13-682-01 through SB-B13-682-06	SB-B13-682-03 SB-B13-682-04 SB-B13-682-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
B13-724	Ether Still House	Building dismantled except for three parallel foundations 45 ft. long and 5 ft. high: area vegetated; no apparent environmental impacts; debris 30 ft. north of foundation	SB-B13-724-01 through SB-B13-724-05	SB-B13-724-05 SB-B13-724-01	Sampling location SB-B13-724-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B13-724-01	SVOCs, E&E
B13-757	Mother Liquor House	Foundation with grass growing on it; concrete debris with rebar along south side of foundation; parking barriers north of foundation	SB-B13-757-01 through SB-B13-757-05	SB-B13-757-04	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 106 ppm at SB-B13-757-04 Analytical results did not detect elevated arsenic concentrations	E&E, SVOCs

Table 5-40

TNT Area FA Justification
Phase I - Site Investigation
Kenvil Works, Kenvil, NJ

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
B13-8	Filter House #2 Sump	Rectangular foundation with a water filled pit pipe near SE corner goes underground no environmental impact evident	SB-B13-8-01 through SB-B13-8-05 TP-B13-8-06	SB-B13-8-04 SB-B13-8-05 TP-B13-8-06	Sampling location SB-B13-8-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B13-8-05. Test Pit location was placed downgradient from the sump.	E&E
B9-2	Water Supply Building	Two parallel foundations and several mounds with bolts protruding	SB-B9-2-01 through SB-B9-2-05	SB-B9-2-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,913 ppm at SB-B09-2-05	Metals, SVOCs
C10-432	Unknown	Three 10x1.5 foot cement foundations; 12 inch diameter terra cotta pipe entering ground W of central footer; old process pipe associated with this bldg.	SB-C10-432-01 through SB-C10-432-03	SB-C10-432-02 SB-C10-432-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-C10-432-01	E&E, SVOCs
C10-439	Weak Acid Storage Tanks	Old foundation; recently cleared here slight stressed vegetation on W side of ground; internal catch basin associated with tank cradles; several small pipes			Reserved for Remedial Investigation due to the presence of lead	Metals
C10-440	Waste Acid Storage Tanks #2	Same as C10-439 in layout; pipes entering ground within foundation east of bldg.; between this and C10-439 visible pipes cannot locate or follow due to vegetation	SB-C10-440-01 through SB-C10-440-06	SB-C10-440-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,153 ppm at SB-C10-440-02	Metals
C10-466	Unknown	No foundation; building located based on Roux map and shallow rooted vegetation	SB-C10-466-01 through SB-C10-466-03	SB-C10-466-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,966 ppm at SB-C10-466-02	Metals
C8-1	Discarded Cans	Approximately 2 dozen 1-2 gallon steel cans on ground; some contained gray material (area 100 sq.ft.)	SB-C8-1-01 through SB-C8-1-03	SB-C8-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls

TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector

XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot

" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-41

Dynamite Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
B13-262A	Gel Mix House #2	Old corrugated siding covering floor area Debris west of berm Slight stressed vegetation southwest of building	SB-B13-262A-01 through SB-B13-262A-05	SB-B13-262A-01 SB-B13-262A-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	E&E, SVOCs
C12-274	Talley Gel Mix House #1	Bermed enclosed structure, only broken foundations remain; Two areas of green oxidized lead, 3" pipe enters ground in NE corner; Stressed vegetation in center	SB-C12-274-01 through SB-C12-274-06	SB-C12-274-01 SB-C12-274-05	Sampling locations were determined using XRF screening Results indicated a lead concentration of 1,432 ppm at SB-C12-274-01 and 396 ppm at SB-C12-274-05	Metals, E&E, SVOCs
C12-275	Unknown	Foundation with rubble (area=400 sq ft)	SB-C12-275-01 through SB-C12-275-04	SB-C12-275-02 SB-C12-275-01	Sampling location SB-C12-275-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C12-275-01	E&E, SVOCs
C12-3	Stressed Vegetation A	Stressed vegetation center (area=200 sq ft)	SB-C12-3-01 through SB-C12-3-03	SB-C12-3-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 21,330 ppm at SB-C12-3-03	Metals
C12-4	Stressed Vegetation B	Center of stressed vegetation B (area=700 sq ft)	SB-C12-4-01 through SB-C12-4-03	SB-C12-4-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 3,570 ppm at SB-C12-4-01	Metals
C12-418	Unknown	Center of stressed vegetation B (area=700 sq ft)	SB-C12-418-01 through SB-C12-418-04	SB-C12-418-04 SB-C12-418-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-C12-418-01	E&E, SVOCs
C12-5	Stressed Vegetation C	Center of stressed vegetation C (area=200 sq ft)	SB-C12-5-01 through SB-C12-5-03	SB-C12-5-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
C13-1	Thirty Acres Area	Contains various scrap metal; No evidence of a release (area=136,000 sq ft)	SB-C13-1-01 through SB-C13-1-20	SB-C13-1-01 SB-C13-1-08 SB-C13-1-11 SB-C13-1-17	Three sample locations, SB-C12-8229-01/08/11, were determined using professional judgement; Group A E&E materials were detected at SB-C12-8229-17 using an Expray Test Kit	E&E
C13-262B	Gel Mix House #1	Thermally decontaminated building; Two old drum hulks within area of former building; Slight stressed vegetation south of berm; Brick debris on northeast corner	SB-C13-262B-01 through SB-C13-262B-05	SB-C13-262B-01 SB-C13-262B-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals
C13-282B	Dynamite Mix House #2	Old bermed area almost completely dismantled; Center filled with water	SB-C13-282B-01 through SB-C13-282B-05	SB-C13-282B-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,635 ppm at SB-C13-282B-03	SVOCs, Metals, E&E
C13-666	Refined Graining House	Completely dismantled; TNT chunks scattered around ground			Reserved for Remedial Investigation due to the presence of TNT on the ground	E&E

Table 5-41

Dynamite Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
C14-1	Debris Area	5 Brine coils; 24 metal screens; No evidence of a release (area=3,000 sq ft)	SB-C14-1-01 through SB-C14-1-10	SB-C14-1-05 SB-C14-1-03	Sampling location SB-C14-1-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C14-1-03	SVOCs
C14-4	Store House	Very old stone foundation; No evidence of a release (area=400 sq ft)	SB-C14-4-01 through SB-C14-4-04	SB-C14-4-01 SB-C14-4-03	Sampling location SB-C14-4-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C14-4-03	SVOCs
D11-208A	Refuse Shed	All that remains are charred wooden posts; No evidence of a release (area=100 sq ft)	SB-D11-208A-01 through SB-D11-208A-03	SB-D11-208A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
D11-218C	RRP Storage	Building demolished; Only footers and an earthen mound remain; Two 2" pipes enter ground, unknown termination; No evidence of a release	SB-D11-218C-01 through SB-D11-218C-07	SB-D11-218C-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 413 ppm at SB-D11-218C-03	Metals, SVOCs
D11-B232	DNT Screening House	The former structure has been demolished; Five brick footers remain; Three 2-inch pipes extend into ground, termination unknown; The area is marshy and heavily vegetated; No evidence of a release	SB-D11-B232-01 through SB-D11-B232-07	SB-D11-B232-07 SB-D11-B232-06	Sampling location SB-D11-B232-07 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D11-B232-06	Metals, E&E, SVOCs
D12-209B	Blower House	Old foundation with rusting metal equipment; No evidence of a release (area=200 sq ft)	SB-D12-209B-01 through SB-D12-209B-03	SB-D12-209B-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
D12-282A	Dynamite Mix House #2	This building was previously thermally decontaminated; Some remnant footers, metal debris, and charred wood remain; The center of former building is marshy; No evidence of a release	SB-D12-282A-01 through SB-D12-282A-05	SB-D12-282A-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	E&E
D12-286A	Hall Pack House #1	Very old demolished building; Berm has been mostly removed; Concrete foundation chunks are on ground surface; No evidence of a release	SB-D12-286A-01 through SB-D12-286A-05	SB-D12-286A-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals

Table 5-41

Dynamite Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
D12-289	Gel Pack House	Former structure previously thermally decontaminated; Multiple concrete footers and some charred remains present; Some old pipes and machinery along southern berm; There is an old pump in the center of the former structure; No evidence of a release	SB-D12-289-01 through SB-D12-289-05	SB-D12-289-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs, E&E
D13-264A	Gel Cart House #1	Steep bermed area with brick foundation; No evidence of a release	SB-D13-264A-01 through SB-D13-264A-05	SB-D13-264A-05 SB-D13-264A-03	Sampling location SB-D13-264A-05 was determined using XRF screening; Results indicated an antimony concentration of 109 ppm, a copper concentration of 808 ppm, and a lead concentration of 886 ppm . A confirmation sample was collected at SB-D13-264A-03	Metals
D13-264B	Gel Cart House #2	Thermally decontaminated building; Old drive shaft present; Two small structures outside berm; associated with this building; Two 10' diameter areas of stressed vegetation NE of berm	SB-D13-264B-01 through SB-D13-264B-05	SB-D13-264B-03 SB-D13-264B-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	E&E, SVOCs
D13-265A	Unknown	Thermally decontaminated structure; Associated with D13-264A; Small 1" pipe enters ground at SE corner; Old drum hulk at southwest corner; No evidence of a release	SB-D13-265A-01 through SB-D13-265A-06	SB-D13-265A-06	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
D13-268	Shrader Cart House	Old stone foundation, marshy center; Pipe coming out of center and entering ground in West; No evidence of a release	SB-D13-268-01 through SB-D13-268-06	SB-D13-268-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 774 ppm at SB-D13-268-01	Metals
D13-273B	Hand Pack House	Building demolished; Two pipes that form a square are all that remain; No evidence of a release	SB-D13-273B-01 through SB-D13-273B-07	SB-D13-273B-02 SB-D13-273B-04	Sampling location SB-D13-273B-02 was determined using XRF screening; Results indicated a copper concentration of 2,450 ppm. A confirmation sample was collected at SB-D13-273B-04 Analytical results did not detect elevated copper concentrations	SVOCs
D13-3	Unknown	Burnt structure with electric motor in center (area=200 sq ft)	SB-D13-3-01 through SB-D13-3-04	SB-D13-3-04 SB-D13-3-02	Sampling location SB-D13-3-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D13-3-02	Metals, E&E

Table 5-41

Dynamite Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
D13-303F	Blower House	Several old foundations; Lead solder on pipe; No evidence of a release (area=100 sq ft)	SB-D13-303F-01 through SB-D13-303F-03	SB-D13-303F-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
D14-120	Waste Paper Store	Old stone foundation; Old metal screens and bricks 10' SE of foundation; No evidence of a release	SB-D14-120-01 through SB-D14-120-05	SB-D14-120-04 SB-D14-120-03	Sampling location SB-D14-120-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D14-120-02	SVOCs
D14-129	Powder Office	Old stone foundation; No evidence of a release	SB-D14-129-01 through SB-D14-129-05	SB-D14-129-05 SB-D14-129-03	Sampling location SB-D14-129-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D14-129-03	SVOCs
D14-204B	NC Dry House	Thermally decontaminated wooded structure; Stressed vegetation within area of former structure; Large amount of lead on ground (area=900 sq ft)	SB-D14-204B-01 through SB-D14-204B-04	SB-D14-204B-01 SB-D14-204B-04	Sampling locations were determined using XRF screening Results indicated an arsenic concentration of 521 ppm at SB-D14-204B-01 and 209 ppm at SB-D14-204B-04	Metals, E&E
D14-360	Filter Station	Multiple underground steel water pipes; Water supply lagoon; No evidence of a release	SB-D14-360-01 through SB-D14-360-04	SB-D14-360-03 SB-D14-360-01	Sampling location SB-D14-360-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D14-360-01	SVOCs
D14-6	Stressed Vegetation	Center of stressed vegetation (area=400 sq ft)	SB-D14-6-01 through SB-D14-6-03	SB-D14-6-01 SB-D14-6-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
D14-667	Refined Graining House	Large elevated concrete foundation; Second smaller foundation 30' E; The area is grass covered; No evidence of a release	SB-D14-667-01 through SB-D14-667-05	SB-D14-667-03	Sampling location was determined using XRF and E&E screening Results indicated a lead concentration of 614 ppm at SB-D14-667-03; Group A E&E materials were also detected at SB-D14-667-03 using an Expray Test Kit	Metals, E&E, SVOCs
E10-1	Former Pond	Very little evidence of former pond, extent of pond is estimated (area=36,000 sq ft)	SB-E10-1-01 through SB-E10-1-20	SB-E10-1-05 SB-E10-1-13 SB-E10-1-18	Sampling locations were determined using XRF and E&E screening Group B E&E materials were detected at SB-E10-1-05 and SB-E10-1-18 using an Expray Test Kit; Results indicated a lead concentration of 435 ppm at SB-E10-1-13 Analytical results did not detect elevated lead or E&E concentrations	E&E, SVOCs

Table 5-41

Dynamite Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
E11-12	Unknown	Very overgrown old foundation (area=600 sq ft)	SB-E11-12-01 through SB-E11-12-04	SB-E11-12-04 SB-E11-12-02	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-E11-12-02 using an Expray Test Kit Analytical results did not detect elevated E&E concentrations	Metals
E11-2064	Talley Mix House	Two wooden structures completely encased within 40' thick berm; The second wooden structure houses the motor house; Loading areas on SE and NE sides of building within berm; Truck loading area on the SW corner outside of berm; Catch tank on NE corner of main	SB-E11-2064-01 through SB-E11-2064-08	SB-E11-2064-01 SB-E11-2064-02 SB-E11-2064-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E
E11-218B	Unknown	Building demolished; Three concrete footers remain; No evidence of a release	SB-E11-218B-01 through SB-E11-218B-05	SB-E11-218B-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 424 ppm at SB-E11-218B-02	Metals
E11-52	General Storage	The structure is completely removed; Marked estimated location; No evidence of a release	SB-E11-52-01 through SB-E11-52-05	SB-E11-52-04	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-E11-52-04 using an Expray Test Kit Analytical results did not detect elevated E&E concentrations	SVOCs, Metals
E11-6	Tank Saddles	Series of three double tank saddle foundations	SB-E11-6-01 through SB-E11-6-04	SB-E11-6-02 SB-E11-6-04	Sampling locations were determined using E&E screening Group B E&E materials were detected at SB-E11-6-02/04 using an Expray Test Kit Analytical results did not detect elevated E&E concentrations	VOCs
E11-7	Unknown	Two footers with a 5' x 5' area of molten lead (area=100 sq ft)	SB-E11-7-01 through SB-E11-7-03	SB-E11-7-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 18,520 ppm, a copper concentration of 4,970 ppm, and a zinc concentration of 5,240 ppm at SB-E11-7-02	Metals
E11-R2	Talley Mix House Scrap Shed	Small 6' x 6' wooden structure; Knocked over on side; No evidence of a release (area=100 sq ft)	SB-E11-R2-01 through SB-E11-R2-03	SB-E11-R2-03	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 332 ppm at SB-E11-R2-03	Metals, SVOCs

Table 5-41

Dynamite Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
E12-286B	Hall Pack House #2	This structure was thermally decontaminated; The building looks to have been constructed of wood; The former structure was large approximately 125' x 125'; Small amount of debris present, the area is well vegetated; No evidence of a release	SB-E12-286B-01 through SB-E12-286B-05	SB-E12-286B-02	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 197 ppm at SB-E12-286B-02	Metals
E12-286D	Dynamite Cart House	Very large concrete foundation; Some metal debris within foundation walls; Three large entrances through concrete foundations; Potential stressed vegetation within 1' of concrete foundation	SB-E12-286D-01 through SB-E12-286D-08	SB-E12-286D-05 SB-E12-286D-07	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
E12-325B	Unknown	8' x 8' area, location based on historical maps	SB-E12-325B-01 through SB-E12-325B-03	SB-E12-325B-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs, Metals
E13-2074	Titan Cast Building	New looking building possibly renovated; Three potential loading doors; Loading dock with one loading area; No evidence of exterior catch tank; 3" PVC discharge pipe from building to ditch on north side of building	SB-E13-2074-01 through SB-E13-2074-09	SB-E13-2074-01 SB-E13-2074-06 SB-E13-2074-09	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E
E13-2076	Dynamite Blender	Small 15' x 15' cinder block structure; Loading door on NE side; No evidence of a release	SB-E13-2076-01 through SB-E13-2076-05	SB-E13-2076-02	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 185 ppm at SB-E13-2076-02	Metals
E13-325	Dynamite Storage	Very old wooden structure; No evidence of a release	SB-E13-325-01 through SB-E13-325-04	SB-E13-325-02	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-E13-325-02 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	Metals, SVOCs
E14-2020	Refuse Shed	Former structure destroyed; Small 10' x 10' pile of wood debris; No evidence of a release (area=100 sq ft)	SB-E14-2020-01 through SB-E14-2020-03	SB-E14-2020-03	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 816 ppm at SB-E14-2020-03	Metals
F11-54	Paint and Oil Store	Overgrown area, location determined from historical maps	SB-F11-54-01 through SB-F11-54-03	SB-F11-54-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals

Table 5-41

Dynamite Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
F12-2026A	Scrap Shed	Small 10' x 10' wooden structure; Loading door on west side; No evidence of a release	SB-F12-2026A-01 through SB-F12-2026A-05	SB-F12-2026A-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
F12-2039	Unknown	Completely removed no evidence of location; Estimated location; May have been removed for a drainage ditch; No evidence of a release	SB-F12-2039-01 through SB-F12-2039-03	SB-F12-2039-02 SB-F12-2039-01	Sampling location SB-F12-2039-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F12-2039-01	Metals
F12-2075	Former Dynamite Grinder	Appears to be a refurbished building; Three loading doors on north side; One loading door on south side; Loading dock with two loading spots on south side; No evidence of environmental impact	SB-F12-2075-01 through SB-F12-2075-10	SB-F12-2075-03 SB-F12-2075-05	Sampling location SB-F12-2075-05 was determined using professional judgement Group B E&E materials were detected at SB-F12-2075-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	Metals
F12-2075A	Blower House for F12-2075	This is a 10' x 20' wood structure; A large ventilation pipe connects to F12-2075; There is a loading door on the north side; Potential stressed vegetation at steam blow-out on north side	SB-F12-2075A-01 through SB-F12-2075A-05	SB-F12-2075A-03 SB-F12-2075A-04 SB-F12-2075A-05	Sampling location F12-2075A-05 was determined using professional judgement; Sample locations F12-2075A-03/04 were determined using XRF screening; Results indicated an arsenic concentration of 187 ppm at F12-2075A-03 and 135 ppm at SB-F12-2075A-04	Metals
F12-2221	Unknown	This is a very old brick structure; here is a loading door to the north; A drain pipe exits at the southwest corner; No evidence of a release	SB-F12-2221-01 through SB-F12-2221-06	SB-F12-2221-04 SB-F12-2221-05 SB-F12-2221-06	Sampling locations SB-F12-2221-05/06 were determined using professional judgement; Sample location SB-F12-2221-04 was determined using XRF screening; Results indicated an arsenic concentration of 272 ppm at SB-F12-2221-04	Metals, SVOCs
F12-8206	Mule Shed	Old barn; No evidence of a release	SB-F12-8206-01 through SB-F12-8206-05	SB-F12-8206-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 649 ppm at SB-F12-8206-03	Metals

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-42

Nitroglycerin Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
B10-511	Graining House #1	Cement foundation with large amount of debris scatterred on top of it; partially thermally decontaminated; internal motor pit on W wall; pipes and scrap metal present; No evidence of release	SB-B10-511-01 through SB-B10-511-04	SB-B10-511-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E, SVOCs
B10-7	TNT in Soil	An area of stressed vegetation N of B11-511 (Graining House # 1) TNT in soil and patches devoid of vegetation (area=3,600 sq ft)	SB-B10-7-01 through SB-B10-7-11	SB-B10-7-02 SB-B10-7-10	Sampling location was determined using XRF screening Results indicated a lead concentration of 578 ppm at SB-7-02 and a lead conentration of 1,404 ppm at SB-B10-7-10 Group A E&E materials were detected at all screening locations using an Expray Test Kit	E&E, SVOCs
B11-1	Acid Recovery Area	Large area of stressed vegetation; bricks, glass, lead pipe present. Not completely void of vegetation, but much is missing (area=3,600 sq ft)	SB-B11-1-01 through SB-B11-1-11	SB-B11-1-08 SB-B11-1-11	Sampling locations were determined using XRF screening Results indicated a lead concentration of 6,360 ppm at SB-B11-1-08 and a lead concentration of 4,076 ppm at SB-B11-1-11	Metals
B11-11	Absorption Tower	Bldg destroyed; area vegetated; No evidence of release	SB-B11-11-01 through SB-B11-11-05	SB-B11-11-05	Sampling locations were determined using XRF screening Results indicated a lead concentration of 3,786 ppm at SB-B11-11-05; Group B E&E materials were detcted at SB-B11-11-05 using an Expray Test Kit	Metals, E&E
B11-2044	Redford Paste House, Heater House Catch Tank	Currently standing-used until recently; cut into a slope creating a berm; electric from underground from C11-2; 2 loading doors in front of bldg; catch tank bldg may have sent waste to dynamite ditch to S. No evidence of release	SB-B11-2044-01 through SB-B11-2044-08	SB-B11-2044-03 SB-B11-2044-04 SB-B11-2044-05 SB-B11-2044-06 SB-B11-2044-08	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E
B11-2044C	Control House	Concrete and brick structure; former oil tank on eastern side; fill pipe hole in side of wall is evident; electric conduits on W side oil stain on W side; valve box NW of W corner	SB-B11-2044C-01 through SB-B11-2044C-07	SB-B11-2044C-01 SB-B11-2044C-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCS
B11-6	Tank Cradles	Two tall tank cradles E of B11-2044; Old trash drum between cradles. No evidence of release	SB-B11-6-01 through SB-B11-6-03	SB-B11-6-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 520 ppm at SB-B11-6-03	Metals
C10-10	Concrete Pipe	4' diameter concrete pipe; houses two small asbestos-wrapped pipeslook to be from mixed acid store (D10-211C); probably used so they could drive over the smaller pipes; No evidence of release	SB-C10-10-01 through SB-C10-10-03	SB-C10-10-01 SB-C10-10-02	Sampling location SB-C10-10-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C10-10-02	SVOCs

Table 5-42

Nitroglycerin Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
C10-12	Unknown	All that remains is an old stone foundation; There are many pipes coming from the TNT area; No evidence of a release	SB-C10-12-01 through SB-C10-12-05	SB-C10-12-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,488 ppm at SB-C10-12-03	Metals, SVOCs
C10-13	Debris	Small area of rusted drum, some concrete fragments, and 6-8" steel pipe partially buried; drum hulk contained a black,granular material: No stressed vegetation; No evidence of release (area=100 sq ft)	SB-C10-13-01 through SB-C10-13-03	SB-C10-13-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
C10-211C	Mixed Acid Storage	Concrete foundation; basin-like structure in center probably for containment; two areas of stressed vegetation appear to be associated; ~40' in diameter NE of bldg and an area ~30' in diameter W of the bldg; foundation overgrown with grass (areas=1600 and 900 sq ft, respectively)	SB-C10-211C-01 through SB-C10-211C-07	SB-C10-211C-04 SB-C10-211C-06 SB-C10-211C-07	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E, SVOCs
C10-5	Unknown	Concrete foundation with a destroyed berm; thermally decontaminated; area vegetated. No evidence of release (area=900 sq ft)	SB-C10-5-01 through SB-C10-5-04	SB-C10-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
C10-7	Concrete Footers	Three small concrete footers mostly covered with leaves and vegetation pipes in area, but need to be deferred there. No evidence of release	SB-C10-7-01 through SB-C10-7-05	SB-C10-7-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,004 ppm at SB-C10-7-01	Metals, E&E, SVOCs
C11-1	Former pond	Generally a flat area that appears to be flyash and a large number of bottles; bottles are mostly of household variety; two areas of stressed vegetation; old, broken tower in E; black powder storage is estimated to be at point 12 (area=28,000 sq ft)	SB-C11-4-01 through SB-C11-4-20	SB-C11-4-02 SB-C11-4-09 SB-C11-4-13 SB-C11-4-19 SB-C11-4-20	Sampling locations SB-C11-4-09/13/19/20 were determined using XRF screening; Results indicated a lead concentration of 1,493 ppm at SB-C11-4-09, 419 ppm at SB-C11-4-13, 2,349 ppm at SB-C11-4-19, and 419 ppm at SB-C11-4-20 ; Group B E&E materials were detected at SB-C11-4-02/09/13/20 using an Expray Test Kit	Metals, E&E, SVOCs
C11-10	Coal Pile	Old coal pile with no vegetation growing on two sections (area=600 sq ft)	SB-C11-10-01 through SB-C11-10-03	SB-C11-10-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,615 ppm at SB-C11-10-01	Metals

Table 5-42

Nitroglycerin Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
C11-12	Name Unknown	Very old rock and brick foundation; use unknown; probably associated with C11-10 (coal pile); possibly a power house. No evidence of release (area=900 sq ft)	SB-C11-12-01 through SB-C11-12-05	SB-C11-12-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,058 ppm at SB-C11-12-02	Metals, SVOCs
C11-15	Shot Bldg	Foundation ripped apart and strewn about; rebar bent; may have been a nitrator or neutralizer; area is vegetated. No evidence of release	SB-C11-15-01 through SB-C11-15-05	SB-C11-15-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
C11-18	Unknown	Rock foundation currently filled with some water; offset exit in SE corner. No evidence of release (area=500 sq ft)	SB-C11-18-01 through SB-C11-18-04	SB-C11-18-02 SB-C11-18-01	Sampling location SB-C11-18-02 was determined using XRF screening; Results indicated a lead concentration of 3,024 ppm. A confirmation sample was collected at SB-C11-18-01	Metals
C11-19	Catch Tank House	Small shed like structure with shingles for siding; housed outside catch tank; catch tank still present; entrance and exit for potential NG waste in the event of a spill; steam and water supplied to bldg. No evidence of release	SB-C11-19-01 through SB-C11-19-05	SB-C11-19-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 815 ppm at SB-C11-19-05	Metals
C11-2233	Neutralizer # 3	Completely covered with a soil berm; two walkways and an NG gutter, wastewater pumped out of the S gutter to the outside catch tank; interior looks to be lead floor; No evidence of release	SB-C11-2233-01 through SB-C11-2233-05	SB-C11-2233-01 SB-C11-2233-02 SB-C11-2233-03	Sampling locations SB-C11-2233-02/03 were determined using professional judgement; Sampling location SB-C11-2233-01 was determined using XRF screening; Results indicated a lead concentration of 476 ppm at SB-C11-2233-01	Metals
C11-2233D	A.C. House	Corrugated steel sided structure; housed AC for C11-2233; cinder block section on NE side; cannot determine utilities; E side contains steam sump and discharge pipe; 15' diameter of stressed vegetation to the W: steam sump discharge outlet covered with algae and a white precipitate	SB-C11-2233D-01 through SB-C11-2233D-06 TP-C11-2233D-07	SB-C11-2233D-05 SB-C11-2233D-06 TP-C11-2233D-07	Sampling location was determined using professional judgement Screening results did not warrant biased sampling Test Pit location was placed downgradient from the sump	E&E
C11-27	Unknown	Two footers on NE side (1' x1' x 2.5'); ground disturbed; No evidence of release	SB-C11-27-01 through SB-C11-27-05	SB-C11-27-02 SB-C11-27-03	Sampling location was determined using XRF and E&E screening Results indicated a lead concentration of 761 ppm at SB-C11-27-02; Group B E&E compounds were detected at SB-C11-27-03 using an Expray Test Kit. Analytical results did not detect elevated metal concentrations.	E&E, SVOCs

Table 5-42

Nitroglycerin Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
C11-30	Acid Recovery Bldg	Very old large foundation; just an area of stressed vegetation; foundation overgrown; No evidence of release	SB-C11-30-01 through SB-C11-30-09	SB-C11-30-01 SB-C11-30-05 SB-C11-30-06	Sampling location was determined using XRF screening Results indicated a lead concentration of 842 ppm at SB-C11-30-05 and 755 ppm at SB-C11-30-05	Metals
C11-4	Stressed Vegetation	Large area of stressed vegetation (area=142,000 sq ft)	SB-C11-1-01 through SB-C11-1-20	SB-C11-1-04 SB-C11-1-05 SB-C11-1-09 SB-C11-1-17	Sampling locations SB-C11-1-04/09 were determined using XRF screening; Results indicated a lead concentration of 12,190 ppm at SB-C11-1-04 and a lead concentration of 2,749 ppm at SB-C11-1-09; Group B E&E materials were detected at C11-1-05 using an Expray Test Kit	Metals, SVOCs, E&E
C11-7	Stressed Vegetation	Small area stained brown that contains stressed vegetation (area=100 sq ft)	SB-C11-7-01 through SB-C11-7-03	SB-C11-7-02	Sampling location was determined from the presence of E&E compounds at SB-C11-7-02 Group A E&E compounds were detected at SB-C11-7-02 using an Expray Test Kit	E&E, SVOCs
C11-8	Stressed Vegetation	Area stained brown that contains debris and very little plant growth; barren in most places (area=1,600 sq ft)	SB-C11-8-01 through SB-C11-8-06	SB-C11-8-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,870 ppm at SB-C11-8-05	Metals, SVOCs
C11-8572C	Storage Shed	Currently existing structure; aluminum sided with large loading/unloading door on E side; associated with nearby catch tank;contains old hoses for pumps. No evidence of release			Reverved for Remedial Investigation due to the presence of Group B explosives detected using an Expray Test Kit	E&E
C11-8572D	Instrument Room	Small shed with a meter that monitored the catch tank; aluminum siding. No evidence of release			Reverved for Remedial Investigation due to the presence of Group B explosives detected using an Expray Test Kit	E&E
C11-9	Unknown	Very old stone foundation; use of bldg unknown; No evidence of release (area=500 sq ft)	SB-C11-9-01 through SB-C11-9-05	SB-C11-9-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 8,360 ppm at SB-C11-9-04	Metals, SVOCs
D10-1	Stressed Vegetation	Small, 10' x 10', patch of ground where there is no vegetation. Slight brown staining (area=100 sq ft)	SB-D10-1-01 through SB-D10-1-03	SB-D10-1-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 3,029 ppm at SB-D10-1-02	Metals
D10-10	Brine Chiller	Square pad that contains the brine chiller; pad fairly new with secondary containment; valve to drain secondary containment at SW corner; equipment in good repair; structure covered. No evidence of release	SB-D10-10-01 through SB-D10-10-04	SB-D10-10-01 SB-D10-10-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs

Table 5-42

Nitroglycerin Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
D10-14	Air Handler	Small concrete pad that supports the air handler for the nitrate bldg; line of stressed vegetation ~3' wide extends from the air handler south.	SB-D10-14-01 through SB-D10-14-05	SB-D10-14-05 SB-D10-14-03	Sampling location SB-D10-14-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-14-03	SVOCs
D10-164B	Waste Acid House	Looks like D10-165B except there is pipe along S wall extending into ground (area=400 sq ft)	SB-D10-164B-01 through SB-D10-164B-04	SB-D10-164B-01 SB-D10-164B-02	Sampling locations were determined using XRF screening Results indicated a lead concentration of 3,132 ppm at SB-D10-164B-02 and 1,048 ppm at SB-D10-164B-01	Metals
D10-165B	Waste Acid House	Partial rock foundation remains;area disturbed and vegetated; No evidence of release (area=400 sq ft)	SB-D10-165B-01 through SB-D10-165B-04	SB-D10-165B-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,081 ppm at SB-D10-165B-02	Metals, SVOCs
D10-2007	NG Pilot Plant	Totally removed with very little evidence of its existence; overturned sheet metal shed (4' x 8') resides on location; could not locate lead on foundation; Roux claims it exists; possibly overgrown (area=400 sq ft)	SB-D10-2007-01 through SB-D10-2007-04	SB-D10-2007-02 SB-D10-2007-04	Sampling location SB-D10-2007-02 was determined using XRF screening; Results indicated a lead concentration of 547 ppm. A confirmation sample was collected at SB-D10-2007-04	Metals, SVOCs
D10-2041	Block House	Cinder block structure with steam and electric lines; 5' x 6' cement pad on SE side; possible stressed vegetation on SE side	SB-D10-2041-01 through SB-D10-2041-08	SB-D10-2041-03 SB-D10-2041-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
D10-2227	Nitrator No. 1 and No. 2	Supplied much if not all NG during operation; multiple NG gutters; two lines disconnected; multiple brine, glycerin and acid lines	SB-D10-2227-01 through SB-D10-2227-08	SB-D10-2227-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
D10-2230	Spent Acid House	Large structure used to handle spent acid; multiple brine and acid lines; one large brine tank and one removed brine tank on SW side. No evidence of release	SB-D10-2230-01 through SB-D10-2230-08	SB-D10-2230-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,148 ppm at SB-D10-2230-03 Group B E&E materials were also detected at SB-D10-2230-03 using an Expray Test Kit Analytical results did not detect elevated E&E concentrations	Metals
D10-2230A	Acid Scrubber	Wooden and houses the acid scrubber equipment for spent acid house; loading dock for soda at W corner; acid scrubber pipe on NW side of bldg to spent acid house. No evidence of release	SB-D10-2230A-01 through SB-D10-2230A-06	SB-D10-2230A-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals

Table 5-42

Nitroglycerin Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
D10-2231	NG Catch Tank	Small structure housed an NG catch tank; waste waters flowing into the catch tank where material was captured and water continued on; No evidence of release	SB-D10-2231-01 through SB-D10-2231-04	SB-D10-2231-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
D10-2349	Unknown	Bldg removed; area covered with grass; No evidence of release (area=100 sq ft)	SB-D10-2349-01 through SB-D10-2349-03	SB-D10-2349-02	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 736 ppm at SB-D10-2349-02	Metals
D10-241B	Nitrator	Bldg completely removed; No evidence of release	SB-D10-241B-01 through SB-D10-241B-05	SB-D10-241B-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
D10-251	Change House	Bldg removed; area covered with grass; No evidence of release (area=100 sq ft)	SB-D10-251-01 through SB-D10-251-03	SB-D10-251-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
D10-4	Sucrose Nitrator	Bldg demolished; constructed of concrete and brick; immediate area vegetated. No evidence of release (area=900 sq ft)	SB-D10-4-01 through SB-D10-4-04	SB-D10-4-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,120 ppm and an arsenic concentration of 353 ppm at SB-D10-4-01	Metals, SVOCs
D10-5	Scrap Pile	Small pile of old scrap pipes; some covered with what looks like asbestos insulation; area vegetated. Asbestos may have been released (area=100 sq ft)	SB-D10-5-01 through SB-D10-5-03	SB-D10-5-01	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 998 ppm at SB-D10-5-01	Metals
D10-6	Unknown	Concrete and brick foundation; entrance /exit in S; foundation vegetated. No evidence of release	SB-D10-6-01 through SB-D10-6-05	SB-D10-6-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 5,240 ppm at SB-D10-6-02	Metals, SVOCs
D10-8234	Parts Storage	Small steel shed with a cinder block base; bldg contains flanges some oil, and solvents (Triacitin). No evidence of release.	SB-D10-8234-01 through SB-D10-8234-04	SB-D10-8234-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,933 ppm and a zinc concentration of 8,070 ppm at SB-D10-8234-02	Metals
D10-8284	Unknown	Building completely removed. No evidence of release.	SB-D10-8284-01 through SB-D10-8284-04	SB-D10-8284-03	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 998 ppm at SB-D10-8284-01	Metals, SVOCs
D11-2031	DNT Heater House	Intact brick structure with elevated walkway; immediate area is vegetated; doesn't appear to be any vegetative impacts.			Reserved for Remedial Investigation due to the presence of DNT	E&E

Table 5-42

Nitroglycerin Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
D11-3	NG Wastewater Tank	8' x 10' wastewater tank and associated loading/unloading platform; received wastewater from the catch tank; No evidence of release	SB-D11-3-01 through SB-D11-3-03	SB-D11-3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
D9-4	Motor and Pump House	Small cinder block structure that contains a water main piping; motor and pumps have been removed; bldg sits low and is partially dug out of a hill. No evidence of release	SB-D9-4-01 through SB-D9-4-04	SB-D9-4-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
D9-8279	Unknown		SB-D9-8279-01 through SB-D09-8279-05	SB-D9-8279-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
D9-9108	Glycerin Storage	Earthen bermed area with four glycerin storage tanks; three tanks ~ 6' x 25' and another ~ 8' x 25'; many pipes along S side of tank feed into pump house; tank furthest to E is oldest and largest and out of service	SB-D9-9108-01 through SB-D9-9108-12	SB-D9-9108-01 SB-D9-9108-04 SB-D9-9108-07 SB-D9-9108-10	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs
E10-2169	Emulsifier House	Wooden structure on concrete footers; floor is lead	SB-E10-2169-01 through SB-E10-2169-04	SB-E10-2169-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 485 ppm and a copper concentration of 880 ppm at SB-E10-2169-03	Metals
E10-2169A	Emulsifier House Catch Tank	Brick structure used as a change house; looks like it has been converted to an office with parts around; septic tank ~ 20' SW of bldg (1 sludge sample taken during Single Phase Remediation effort). No evidence of release	SB-E10-2169A-01 through SB-E10-2169A-04	SB-E10-2169A-01 SB-E10-2169A-04	Sampling location SB-E10-2169A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E10-2169A-04	E&E, SVOCs
E10-2177	Shed	Bldg nearly completely removed; only evidence is a few rocks from the foundation, some metal debris, and burnt telephone poles; two areas of stressed vegetation one E and one W	SB-E10-2177-01 through SB-E10-2177-06	SB-E10-2177-06	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,723 ppm at SB-E10-2177-06	Metals
E10-4	Concrete Pads	Bldg demolished; three 1.5' x 1.5' footers remain; area vegetated. No evidence of release.	SB-E10-4-01 through SB-E10-4-04	SB-E10-4-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E, SVOCs
E10-5	Lime Pond	Currently one long line of stone along W side and a ditch along eastern side; area has been filled in and is vegetated. No evidence of release (area=5,500 sq ft)	SB-E10-5-01 through SB-E10-5-13	SB-E10-5-06 SB-E10-5-08	Sampling location was determined using XRF screening Results indicated a lead concentration of 5,330 ppm at SB-E10-5-06 and 2,547 ppm at SB-E10-5-08	Metals, SVOCs

Table 5-42

Nitroglycerin Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
E10-618A	NG Chemical Loading Station	Former chemical loading spot for tanker cars; ~ 150 gallon S.S. tank associated; scaffolding to get to top of tanker cars; safety shower; doesn't appear to be any vegetative impacts.	SB-E10-618A-01 through SB-E10-618A-04	SB-E10-618A-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs, E&E
E10-8277	Hose House	Brick foundation with wooden structure; two old NG pipes on E side; electric box on NW corner. No evidence of release	SB-E10-8277-01 through SB-E10-8277-04	SB-E10-8277-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 484 ppm at SB-E10-8277-01	Metals

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
WWTP = Wastewater Treatment Plant
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-43

PETN Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
B10-2178	PETN Blender	Old thermally decontaminated structure; large amount of metal scrap and drums present; lead present on the ground, and there is stressed vegetation where this occurs	SB-B10-2178-01 through SB-B10-2178-05	SB-B10-2178-03 SB-B10-2178-05	Sampling locations were determined using XRF screening Results indicated a copper concentration of 1,377 ppm and a zinc concentration of 2,550 ppm at SB-B10-2178-05 and a lead concentration of 7,430 ppm and a zinc concentration of 1,902 ppm at SB-B10-2178-03	Metals, SVOCs, E&E
C10-2	PETN Crystallizer Tank Saddles	Three concrete tank saddles; foundations are 1.5' x 10' separated by about 15'; all tanks removed; a lot of debris surrounding area; area vegetated; No evidence of release	SB-C10-2-01 through SB-C10-2-09	SB-C10-2-04 SB-C10-2-05 SB-C10-2-07	Sampling locations were determined using XRF screening Results indicated a lead concentration of 1,538 ppm at SB-C10-2-04, 1,000 ppm at SB-C10-2-05 and 1,502 ppm at SB-C10-2-07	Metals
C10-2176	PETN Crystallizer	Old foundation, broken with rubble around; pipe in interior of bldg. use is unknown. No evidence of release	SB-C10-2176-01 through SB-C10-2176-05	SB-C10-2176-01 SB-C10-2176-02	Sampling location SB-C10-2176-01 was determined using professional judgement; Group A E&E materials were detected and analyzed at SB-C10-2176-01 using an Expray Test Kit	Metals, E&E, SVOCs
C10-2179	PETN Nitric Acid Store	Three 1' x 7' concrete foundations; area has a slight potential berm; area is vegetated; two old drums E of the foundations; No evidence of release	SB-C10-2179-01 through SB-C10-2179-05	SB-C10-2179-03	Sampling location was determined using professional judgement screening results did not warrant biased sampling	Metals
C10-3	PETN Crystallizer Tank Saddle	Wooden tank cradle designed to hold one tank; tank removed; Great deal of debris adjacent to tank cradle; No evidence of release	SB-C10-3-01 through SB-C10-3-03	SB-C10-3-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 526 ppm at SB-C10-3-02	Metals, E&E
C10-4	PETN Storage	Large, old structure; series of three tank cradles in NE corner with a ceramic pipe to the ground between three additional footers; W side has three more ceramic pipes that go into the ground about one foot; look like steam sumps; three distinct levels to this structure as it moves up slope; No evidence of release	SB-C10-4-01 through SB-C10-4-07	SB-C10-4-02 SB-C10-4-07	Sampling locations were determined using XRF screening Results indicated a lead concentration of 720 ppm at SB-C10-4-02 and 500 ppm at SB-C10-4-07 Analytical results did not detect elevated metal concentrations	E&E

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
G6-2	Unknown	Building demolished, old stone foundation remains; Location of building corners estimated; No evidence of release	SB-G6-2-01 through SB-G6-2-03	SB-G6-2-03 SB-G6-2-02	Sampling location SB-G6-2-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G6-2-02	SVOCs
G6-3	Unknown Storage House	Dilapidated wooden structure. No evidence of former contents or content description. No evidence of release.	SB-G6-3-01 through SB-G6-3-04	SB-G6-3-01 SB-G6-3-02	Sampling location SB-G6-3-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G6-3-02	SVOCs
G6-8128	Surveillance Test Laboratory	Development laboratory, brick construction over concrete pad. Small surveillance room off W side with a weight on a drop string. No evidence of release	SB-G6-8128-01 through SB-G6-8128-04	SB-G6-8128-04	Sampling location SB-G6-8128-04 was determined using XRF screening; Results indicated a lead concentration of 1,637 ppm at SB-G6-8128-04	Metals, SVOCs
G6-8129	Vacuum Pump House	Brick and corrugated metal over wooden construction; Discharge pipe and lead pipe enter ground on W side; AST on W side. No evidence of release	SB-G6-8129-01 through SB-G6-8129-08	SB-G6-8129-01 SB-G6-8129-05 SB-G6-8129-06	Sampling locations SB-G6-8129-05/06 was determined using professional judgement. Sampling location SB-G6-8129-01 was determined using XRF screening; Results indicated a lead concentration of 569 ppm and a zinc concentration of 2,450 ppm at SB-G6-8129-01	Metals, SVOCs
G6-8242	Store House	Building demolished, minimal evidence of remains; location determined from historical maps; No evidence of release	SB-G6-8242-01 through SB-G6-8242-04	SB-G6-8242-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
G6-8243	Chemical Store House #3	Wooden and corrugated sheet metal construction with dilapidated wood/stone foundation; Possible iron staining on S side; No evidence of release	SB-G6-8243-01 through SB-G6-8243-04	SB-G6-8243-03	Sampling location SB-G6-8243-03 was determined using XRF screening; Results indicated a lead concentration of 726 ppm at SB-G6-8243-01	Metals, SVOCs
G6-8244	Chemical Store House #1	Wooden construction over concrete masonry unit foundation. Metal shelving inside. No evidence of release	SB-G6-8244-01 through SB-G6-8244-04	SB-G6-8244-01 SB-G6-8244-03	Sampling location SB-G6-8244-01 was determined using XRF screening; Results indicated a mercury concentration of 275 ppm. A confirmation sample was collected at SB-G6-8244-03	Metals, SVOCs
G7-2347	Chemical Storage	Building demolished, area currently paved over; Location determined from historical maps; No evidence of release	TP-G7-2347-01 through TP-G7-2347-03	TP-G7-2347-02 TP-G7-2347-03	Test Pits dug through asphalt in sampling locations using professional judgement.	SVOCs, Metals
G7-8139	Medical Building	Brick building built on concrete block foundation; 3 Transformers and utility boxes on S side; No evidence of release	SB-G7-8139-01 through SB-G7-8139-10	SB-G7-8139-02 SB-G7-8139-05 SB-G7-8139-08	Sampling location SB-G7-8139-05 was determined using XRF screening; Results indicated a lead concentration of 493 ppm and a copper concentration of 722 ppm at SB-G6-8139-05. Group B E &E materials were detected at SB-G7-8139-02	Metals

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
G7-8249	Store House	Wooden construction with corrugated sheet metal covering on concrete foundation. Appears to be mostly storage. No evidence of release	SB-G7-8249-01 through SB-G7-8249-04	SB-G7-8249-02	Sampling location SB-G7-8249-02 was determined using XRF screening; Results indicated a lead concentration of 771 ppm at SB-G7-8249-02	Metals, SVOCs
G8-2293	Scrap Shed	Building demolished, only minor amounts of wood present; Metal stake for former ground also present No evidence of release (area=100 sq ft)	SB-G8-2293-01 through SB-G8-2293-03	SB-G8-2293-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
H5-4	Stressed Soil Area	Area of stressed soil with aggregate present (area=500 sq ft)	SB-H5-4-01 through SB-H5-4-03	SB-H5-4-03	Sampling location SB-H5-4-03 was determined using XRF screening; Results indicated a copper concentration of 2,650 ppm at SB-H5-4-03	Metals, SVOCs
H5-8126	Ballistics Building	Large brick building with multiple entrances. Two long indoor shooting ranges, laboratory areas on W end. Possible release near shooting trap areas.	SB-H5-8126-01 through SB-H5-8126-12	SB-H5-8126-06 SB-H5-8126-07 SB-H5-8126-11	Sampling locations SB-H5-8126-06/07 were determined using XRF screening; Results indicated a lead concentration of 6,420 ppm at SB-H5-8126-06, and a copper concentration of 653 ppm and a mercury concentration of 1,164 ppm at SB-H5-8126-07. Group B E&E materials were determined at SB-H5-8126-11. Analytical results did not detect elevated E&E concentrations.	Metals, SVOCs
H5-8181	Unknown	Remnant Building, location determined from historical maps	SB-H5-8181-01 through SB-H5-8181-03	SB-H5-8181-01 SB-H5-8181-03	Test Pits dug through asphalt in sampling locations using professional judgement.	SVOCs
H5-938	Trap House	Corrugated metal top on concrete trap house; Filled with scrap wood, glass and ceramic debris; No evidence of release	SB-H5-938-01 through SB-H5-938-04	SB-H5-938-01	Sampling location SB-H5-938-01 was determined using XRF screening; Results indicated a copper concentration of 2,650 ppm at SB-H5-938-01	Metals, SVOCs
H6-8116	Gate House	Aluminum siding over wooden construction on a concrete foundation. No evidence of hazardous materials handled or released.	SB-H6-8116-01 through SB-H6-8116-04	SB-H6-8116-01 SB-H6-8116-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-H6-8116-01. A confirmation sample was collected at SB-H6-8116-02.	SVOCs
H6-8120	General Laboratory	Brick laboratory built on concrete foundation. Multiple vent hoods and discharge pipes, concrete catch pipe with gray material on NW corner	SB-H6-8120-01 through SB-H6-8120-08	SB-H6-8120-04 SB-H6-8120-05 SB-H6-8120-06	Sampling location SB-H6-8120-05 was determined using professional judgement. Sampling locations SB-H6-8120-04/06 were determined using XRF screening; Results indicated a mercury concentration of 363 ppm at SB-H6-8120-04 and a copper concentration of 673 ppm at SB-H6-8120-06	Metals, SVOCs

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H6-8122	Break Room	Concrete and brick building used for breaks and meals only. No suspected as handling hazardous substances. No evidence of release.	SB-H6-8122-01 through SB-H6-8122-04	SB-H6-8122-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
H6-8123B	Environmental Office	Old building identified using old maps. Door to the W, a covered concrete pad to the E, and a drain pipe that ends in the SE. No evidence of release.	SB-H6-8123B-01 through SB-H6-8123B-06	SB-H6-8123B-04 SB-H6-8123B-06	Sampling location SB-H6-8123B-06 was determined using professional judgement. Sampling location SB-H6-8120-04 was determined using XRF screening; Results indicated a lead concentration of 432 ppm at SB-H6-8123B-06	Metals
H6-8127	Sensitivity Test Laboratory	Very old concrete and brick building with an extension on E side; No evidence of release	SB-H6-8127-01 through SB-H6-8127-04	SB-H6-8127-02	Sampling location SB-H6-8127-02 was determined using XRF screening; Results indicated a copper concentration of 1,072 ppm at SB-H6-8127-02	Metals, SVOCs
H6-8130	PETN/Stability Laboratory	Brick construction with attached wooden/corrugated metal storage area. Outside NG/smokeless powder waste storage areas. No evidence of release	SB-H6-8130-01 through SB-H6-8130-07	SB-H6-8130-03 SB-H6-8130-06	Sampling location SB-H6-8130-03 was determined using XRF screening; Results indicated a lead concentration of 563 ppm at SB-H6-8130-03 Group B E&E materials were determined at SB-H6-8130-06	Metals, SVOCs, E&E
H6-8152	Main Office	Brick construction on concrete foundation. Four pipe outlets on N and S sides, culvert (possibly sanitary) on center of S side. Basement entrance on W side is listed as asbestos hazard area. No evidence of release.	SB-H6-8152-01 through SB-H6-8152-08	SB-H6-8152-04 SB-H6-8152-05 SB-H6-8152-07	Sampling locations SB-H6-8152-05/07 was determined using professional judgement. Sampling location SB-H6-8152-04 was determined using XRF screening; Results indicated a lead concentration of 418 ppm at SB-H6-8152-04	Metals
H6-8245	Store House	Wood and steel structure; No evidence of release	SB-H6-8245-01 through SB-H6-8245-04	SB-H6-8245-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
H6-8246	Store House	Wood and steel structure; No evidence of release	SB-H6-8246-01 through SB-H6-8246-04	SB-H6-8246-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
H6-8250	Store House	Wood and steel structure; There are two AC units on the N side; No evidence of release	SB-H6-8250-01 through SB-H6-8250-04	SB-H6-8250-01 SB-H6-8250-04	Sampling location SB-H6-8250-01 was determined using XRF screening; Results indicated a lead concentration of 933 ppm at SB-H6-8250-01	Metals, SVOCs

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H6-8285	Development Area Change House	Old brick building on a concrete foundation; Two drain pipes on the N and S, a steam drain for N side of building, and a pipe that enters the ground at NE corner; In the SE there is a footer with a tank and drain with SV nearby. Scrap shed with three old water heaters in NE	SB-H6-8285-01 through SB-H6-8285-12	SB-H6-8285-05 SB-H6-8285-07 SB-H6-8285-08 TP-H6-8285-12	Sampling locations SB-H6-8285-05/07 were determined using XRF screening; Results indicated a mercury concentration of 538 ppm at SB-H6-8285-05, and a lead concentration of 493 ppm at SB-H6-8285-07. Group B E&E materials were determined at SB-H6-8285-08. Test Pit location placed downgradient from septic. Analytical results did not detect elevated E&E concentrations.	Metals, SVOCs, E&E
H6-8520	Main Gate Substation	Fenced electric substation covered with gravel that contains five telephone poles with many insulators; No evidence of release	SB-H6-8520-01 through SB-H6-8520-05	SB-H6-8520-01 SB-H6-8520-02 SB-H6-8520-03 SB-H6-8520-04 SB-H6-8520-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	PCBs
H7-13	Unknown	Building demolished, only concrete footer remains; Stressed vegetation adjacent to SW corner footer-slag present	SB-H7-13-01 through SB-H7-13-05	SB-H7-13-05	Sampling location SB-H7-13-05 was determined using XRF screening; Results indicated a lead concentration of 4,950 ppm at SB-H7-13-05	Metals, E&E, SVOCs
H7-15	Store House	Small empty aluminum sided shed; No evidence of release	SB-H7-15-01 through SB-H7-15-04	SB-H7-15-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
H7-2172	Canister House	Canister house with multiple loading areas	SB-H7-2172-01 through SB-H7-2172-08	SB-H7-2172-03 SB-H7-2172-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	E&E
H7-606L	Unknown	Building demolished, location determined from historical maps. No evidence of release	SB-H7-606L-01 through SB-H7-606L-03	SB-H7-606L-01	Sampling location SB-H7-606L-01 was determined using XRF screening; Results indicated an arsenic concentration of 331 ppm at SB-H7-606L-01. Analytical results did not detect elevated metal concentrations.	Metals, SVOCs
H7-8123A	Propellant Development	Wood and steel structure on concrete foundation with a small concrete pad to the S that held an air handler. Two doors on each the E and W sides, and a pipe outlet on the N side with a steam drain. SV associated with the air handler pad	SB-H7-8123A-01 through SB-H7-8123A-08	SB-H7-8123A-03 SB-H7-8123A-06	Sampling locations SB-H7-8123A-03/06 were determined using XRF screening; Results indicated a lead concentration of 808 ppm at SB-H7-8123A-03 and 15,980 ppm at SB-H7-8123A-05 and a mercury concentration of 343 ppm at SB-H7-8123A-05	Metals, SVOCs, E&E

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H7-8131	Smokeless Military Building	Wooden and concrete structure with a series of doors; 2 catch tanks and an air handler with a drain pipe to the S; The drain pipe has SV associated with discharge there	SB-H7-8131-01 through SB-H7-8131-09	SB-H7-8131-04 SB-H7-8131-06	Group B E&E materials were detected using an Expray Test Kit at sampling location SB-H7-8131-04. Sampling location SB-H7-8131-06 was determined using professional judgement. Analytical results did not detect elevated E&E concentrations.	Metals, SVOCs
H7-8142	Experimental Smokeless Office	Concrete and wood construction, steam pipes enter in rear (west). Concrete pad on N side probably for AC or electrical unit; No evidence of release	SB-H7-8142-01 through SB-H7-8142-05	SB-H7-8142-05	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-H7-8142-05	Metals, E&E
H7-8143	Dry House	Wooden building over concrete foundation; Small air handler present at S corner; No evidence of release	SB-H7-8143-01 through SB-H7-8143-04	SB-H7-8143-04 SB-H7-8143-03	Sampling location SB-H7-8143-04 was determined using XRF screening; Results indicated a lead concentration of 595 ppm and a copper concentration of 1,095 ppm at SB-H7-8143-04. A confirmation sample was collected at SB-H7-8143-03. Analytical results did not detect elevated metal concentrations.	SVOCs, E&E
H7-8144	Rest House	Rest house surrounded by magazine; Tar-like material on SE corner, black-red color and very viscous; Stressed soil area adjacent to this	SB-H7-8144-01 through SB-H7-8144-06	SB-H7-8144-05 SB-H7-8144-01	Sampling location SB-H7-8144-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-8144-01.	E&E
H7-8145	Dry House	Wooden building on concrete slab. Three loading doors cover the entire N and S side of the building. No evidence of release	SB-H7-8145-01 through SB-H7-8145-04	SB-H7-8145-01 SB-H7-8145-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	E&E
H7-8252	Solvent Storage	Wooden and corrugated sheet metal construction; Area of tar-like seep in rear	SB-H7-8252-01 through SB-H7-8252-04	SB-H7-8252-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
H7-8255	Unknown Laboratory Room	Concrete and plaster construction with laboratory tables inside. No evidence of release	SB-H7-8255-01 through SB-H7-8255-04	SB-H7-8255-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs, Metals
H7-9	Unknown	Old dilapidated concrete foundation; No evidence of release	SB-H7-9-01 through SB-H7-9-04	SB-H7-9-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
H7-916	Fuel Oil Storage	Building or tanks demolished; Location determined from historical maps; No evidence of release	SB-H7-916-01 through SB-H7-916-03	SB-H7-916-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs, VOCs

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H8-2	Unknown	Building demolished, only concrete footers remain; No evidence of release	SB-H8-2-01 through SB-H8-2-05	SB-H8-2-03	Sampling location SB-H8-2-03 was determined using XRF screening; Results indicated an arsenic concentration of 159 ppm at SB-H8-2-03	Metals, SVOCs
H8-8102	PETN Lactose Laboratory	All that remains is the foundation, the laboratory structure has been removed; No evidence of release	SB-H8-8102-01 through SB-H8-8102-05	SB-H8-8102-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
H8-9221	Development Screen House	Brick and wooden construction with small concrete pad to rear for air handler Screen trays and shelving present inside. Green anti-static material evident; loading area on E side. No evidence of release	SB-H8-9221-01 through SB-H8-9221-05	SB-H8-9221-03 SB-H8-9221-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
I5-2	Bunker	Small bunker with two shelves along each side covered by soil. One electrical connection and an insulated steam pipe at front. No evidence of release	SB-I5-2-01 through SB-I5-2-02	SB-I5-2-01 SB-I5-2-02	Sampling location SB-I5-2-01 was determined using XRF screening; Results indicated a lead concentration of 1,902 ppm and a copper concentration of 701 ppm at SB-I5-2-01. Sampling location SB-I5-2-02 was determined using professional judgement	Metals
I5-3	Bullet Kiln	Concrete pad surrounded by an area of residual release, minor amounts of lead, bullet shells and a few bullets with propellant not detonated (area=2,000 sq ft)	SB-I5-3-01 through SB-I5-3-07	SB-I5-3-03 SB-I5-3-06	Sampling locations SB-I5-3-03/06 were determined using XRF screening; Results indicated a lead concentration of 2,155 ppm at SB-I5-3-03 and 38,680 ppm at SB-I5-3-06 and an antimony concentration of 457 ppm at SB-I5-3-06. Group B E&E materials were detected at SB-I5-3-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	Metals
I5-4	Unknown	Concrete pad with macadam and aggregate area on N side Additional wood and concrete debris off edge of E corner of pad. No evidence of release	SB-I5-4-01 through SB-I5-4-03	SB-I5-4-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
I5-5	Front Face of Backstop	Soil berm with protruding rebar Metal L-shaped rebar and metal scrap at base on berm on SE end. No evidence of release	SB-I5-5-01 through SB-I5-5-04	SB-I5-5-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
I5-8	Explosive Test Tunnel	Steel tunnel extended into the hill and now mostly filled with sand. Part of the roof has been blown off, but is still covered with dirt. No evidence of release	SB-I5-8-01 through SB-I5-8-03	SB-I5-8-01 SB-I5-8-02	Sampling location SB-I5-8-01 was determined using XRF screening; Results indicated a lead concentration of 944 ppm at SB-I5-8-01. A confirmation sample was collected at SB-I5-8-02.	Metals

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I5-8141	A Range Test House	Concrete rubble, reinforcing bar, sheet metal, and 1" pipe remain where this building previously stood. No evidence of release	SB-I5-8141-01 through SB-I5-8141-05	SB-I5-8141-01 SB-I5-8141-03	Sampling location SB-I5 8141-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I5-8141-03.	Metals
I5-8170	Nitrogen Laboratory	Concrete and corrugated metal building with wooden roof; Recorder and meter room to the W; Larger room to the E with laboratory table and rectangular object with electric box mounted on back; Asbestos insulation/lining of walls; No evidence of release	SB-I5-8170-01 through SB-I5-8170-04	SB-I5-8170-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
I6-1	Heater House	Wood and steel building with a duct from the heater house to I6-8132. No evidence of release	SB-I6-1-01 through SB-I6-1-04	SB-I6-1-04	Sampling location SB-I6-1-04 was determined using XRF screening; Results indicated an arsenic concentration of 270 ppm at SB-I6-1-04	Metals, SVOCs
I6-11	Stressed Soil Area	Stressed soil area containing laboratory glassware, slag, metal debris and ceramic mesh or cloth wiring wrapping (area=400 sq ft)	SB-I6-11-01 through SB-I6-11-03	SB-I6-11-01	Sampling location SB-I6-11-01 was determined using XRF screening; Results indicated a lead concentration of 3,216 ppm and a zinc concentration of 11,080 at SB-I6-11-01	Metals
I6-5	Ingredient Storage	Wooden structure with three bays on the E and drain pipe on NW corner (probably a steam drain). No evidence of release	SB-I6-5-01 through SB-I6-5-08	SB-I6-5-02 SB-I6-5-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs
I6-8125	Research Laboratory	Wooden structure with lead floor and concrete foundation; There is a heater house and catch tank on the west side; Catch tank has a lead pipe. No evidence of release	SB-I6-8125-01 through SB-I6-8125-07	SB-I6-8125-03 SB-I6-8125-05 SB-I6-8125-07	Sampling location SB-I6-8125-03 was determined using XRF screening; Results indicated a mercury concentration of 669 ppm at SB-I6-8125-03. Sampling locations SB-I6-8125-05/07 were determined using professional judgement	Metals
I6-8132	Consolidated Charge Building	Old wooden structure encased within a berm with a rail loading area on the E side. Total of six doors, some doors are now covered by the berm, indicating it was added after building had been completed. No evidence of release	SB-I6-8132-01 through SB-I6-8132-10	SB-I6-8132-02 SB-I6-8132-03 SB-I6-8132-05	Sampling locations SB-I6-8132-02/03 were determined using XRF screening; Results indicated an arsenic concentration of 198 ppm at SB-I6-8132-02 and a lead concentration of 640 ppm at SB-I6-8132-03. Sampling location SB-I6-8132-05 were determined using professional judgement	Metals, E&E

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I6-8171	High Energy Laboratory	Concrete and wooden structure with five bays on E side. Concrete tunnel with a vent and catch tank house on NW corner. Air conditioner on a concrete pad on S side. There is a pile of scrap insulation and duct work	SB-I6-8171-01 through SB-I6-8171-09	SB-I6-8171-01 SB-I6-8171-04 SB-I6-8171-06 SB-I6-8171-07	Sampling location SB-I6-8171-07 was determined using XRF screening; Results indicated an arsenic concentration of 148 ppm at SB-I6-8171-07. Sampling locations SB-I6-8181-01/04/06 were determined using professional judgement	SVOCs, Metals
I6-8171A	Chem Storage	Chemical storage associated with the High Energy Lab; Location determined from historic maps	SB-I6-8171A-01 through SB-I6-8171A-03	SB-I6-8171A-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs, Metals
I6-8172	DNT Store	Concrete and wood structure with a pile of old lead flooring along the W side, building surrounded by four grounding stakes two doors on the E side and one on the west.	SB-I6-8172-01 through SB-I6-8172-07	SB-I6-8172-06	Sampling location SB-I6-8172-06 was determined using XRF screening; Results indicated an arsenic concentration of 128 ppm at SB-I6-8172-06	Metals
I6-8173	Store House	Concrete structure used to store explosives; No evidence of release	SB-I6-8173-01 through SB-I6-8173-05	SB-I6-8173-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
I6-8183	AC/Heater House	Wooden structure on concrete pad. Duct and steam line to the E, entrance in the SW corner. Steam enters on W, brown stained soil from steam in NE corner.	SB-I6-8183-01 through SB-I6-8183-05	SB-I6-8183-01 SB-I6-8183-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals
I6-8184	Catch Tank	Small wooden structure on a concrete basin that is lead-lined. The catch tank is a lead barrel-like tank with baffles. There is a plastic pipe that exits the building to the W and ends in a field. Potential release at the drain, but no evidence of release exists.	SB-I6-8184-01 through SB-I6-8184-02	SB-I6-8184-02	Sampling location SB-I6-8184-02 was determined using XRF screening; Results indicated a lead concentration of 1,841 ppm at SB-I6-8184-02	Metals, E&E
I6-8192	Storage Shed	Wood and steel structure used to store equipment; There is a floor drain on the S corner inside the building; No evidence of release	SB-I6-8192-01 through SB-I6-8192-04	SB-I6-8192-01 SB-I6-8192-03	Sampling location SB-I6-8192-03 was determined using XRF screening; Results indicated a lead concentration of 874 ppm and a zinc concentration of 4,450 ppm at SB-I6-8192-03. Sampling location SB-I6-8192-01 was determined using professional judgement	SVOCs, Metals
I6-9	Catch Tank House	Wooden structure on concrete foundation with doors on E and W. Catch tank line from I6-8171 enters on E corner. No evidence of release	SB-I6-9-01 through SB-I6-9-06	SB-I6-9-04 SB-I6-9-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, Metals

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I6-9210	Ballistics Magazine #4	Wooden building with corrugated sheet metal on concrete slab Wood-encased earthen berm on S side of building No evidence of release.	SB-I6-9210-01 through SB-I6-9210-04	SB-I6-9210-03 SB-I6-9210-02	Sampling location SB-I6-9210-03 was determined using XRF screening; Results indicated a lead concentration of 776 ppm and a zinc concentration of 5,500 ppm at SB-I6-9210-03. A confirmation sample was collected at SB-I6-9210-02. Analytical results did not detect elevated metal concentrations.	E&E
I6-9215	Charge Building Shed	Small wood and aluminum storage shed; No evidence of release	SB-I6-9215-01 through SB-I6-9215-04	SB-I6-9215-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
I6-E3	Explosive Waste/ Storage Shed	Wooden structure with steam pipe entering to the E; Explosive waste was stored to the N, general storage within the building. No evidence of release.	SB-I6-E3-01 through SB-I6-E3-05	SB-I6-E3-05 SB-I6-E3-04	Sampling location SB-I6-E3-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-E3-04.	E&E
I7-8	Unknown	Building has been removed, two large concrete foundations remain. No evidence of release.	SB-I7-8-01 through SB-I7-8-05	SB-I7-8-03	Sampling location SB-I7-8-03 was determined using XRF screening; Results indicated a zinc concentration of 2,410 ppm at SB-I7-8-03	Metals
J5-5	Old Decontamination Oven	Old decontamination oven sitting on a concrete pad; Charred area around oven from decontamination efforts	SB-J5-5-01 through SB-J5-5-04	SB-J5-5-04	Sampling location SB-J5-5-04 was determined using XRF screening; Results indicated a lead concentration of 4,400 ppm at SB-J5-5-04	SVOCs, Metals, E&E
J6-2	Blower Shed	The shed has partially been dismantled on the concrete pad. Housed what is left of a blower. No evidence of release	SB-J6-2-01 through SB-J6-2-04	SB-J6-2-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J6-2-03. Analytical results did not detected elevated E&E concentrations	Metals
J6-2245	Composite Cast House	Currently all that remains is a pile of broken foundation that has been pushed S of the building. Some vegetation is sparse and may or may not be stressed.	SB-J6-2245-01 through SB-J6-2245-05	SB-J6-2245-05 SB-J6-2245-03	Sampling location SB-J6-2245-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J6-2245-03.	SVOCs
J6-3	Unknown	Two story standing building that has been thermally decontaminated SV within the footprint of the building, and there is some lead associated with the SV. Building probably associated with J6-8134	SB-J6-3-01 through SB-J6-3-04	SB-J6-3-02	Sampling location SB-J6-3-02 was determined using XRF screening; Results indicated a lead concentration of 1,939 ppm at SB-J6-3-02. Analytical results did not detect elevated metal concentrations.	SVOCs

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J6-8133	Experimental Dynamite Mix House	Old wooden building with a narrow gauge railroad on S side for loading, and four loading doors. There is a berm on the N, E, and W sides, there is a pipe through the berm to where the catch tank is estimated. No evidence of release.	SB-J6-8133-01 through SB-J6-8133-08	SB-J6-8133-01 SB-J6-8133-04 SB-J6-8133-05	Sampling location SB-J6-8132-01 was determined using XRF screening; Results indicated a lead concentration of 435 ppm at SB-J6-8132-01. Sampling location SB-J6-8133-04 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-J6-8133-05. Analytical results did not detect elevated E&E concentrations.	Metals, E&E, SVOCs
J6-8134	Experimental Dynamite Packhouse	Thermally decontaminated structure, no sign of catch tank. There is lead on the ground probably from decontamination. Asbestos has been released from an asbestos covered water pipe; Blower house adjacent to the demolished structure.	SB-J6-8134-01 through SB-J6-8134-05	SB-J6-8134-01 SB-J6-8134-04 SB-J6-8134-05	Sampling locations SB-J6-8134-04/05 were determined using XRF screening; Results indicated a lead concentration of 502 ppm at SB-J6-8134-04 and a zinc concentration of 3,270 ppm at SB-J6-8134-05. Sampling location SB-J6-8134-01 was determined using professional judgement. Analytical results did not detect elevated metal concentrations.	SVOCs
J6-8136	Bonded Store House	Small wooden building with three doors on N side and pipe (possible drain) exiting on the W side. No evidence of a release	SB-J6-8136-01 through SB-J6-8136-08	SB-J6-8136-04 SB-J6-8136-07	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
J6-8167	Heater House	Small wooden structure on concrete foundation that contains a heater and duct work to J6-8133. Several pipes exit the building to the N. No evidence of release.	SB-J6-8167-01 through SB-J6-8167-04	SB-J6-8167-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
J6-9	Electric Transformer	Small intact transformer on pole. No evidence of release	SB-J6-9-01	SB-J6-9-01	Sampling location SB-J6-9-01 was determined using XRF screening; Results indicated a lead concentration of 814 ppm at SB-J6-9-01	Metals
J6-915	Experimental Dynamite Mix House Shed	Old wooden shed used for the mix house, shed has been removed and the site is now clean. There is no evidence of a release (area=100 sq ft)	SB-J6-915-01 through SB-J6-915-03	SB-J6-915-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
J6-941A	Command Post Dynamite Test Ground	Small steel shed that was used to monitor testing of experimental dynamite. No evidence of release	SB-J6-941A-01 through SB-J6-941A-04	SB-J6-941A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
J6-942(A)	Chemical Storage Shed	Small steel shed with wooden racks inside. There is a box of some material on the floor inside. No evidence of release.	SB-J6-942A-01 through SB-J6-942A-04	SB-J6-942A-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J7-3	Former Discarded Drums	All that remains is minor amounts of metal debris in this area. Drums have been removed. No evidence of release.	SB-J7-3-01 through SB-J7-3-03	SB-J7-3-03	Sampling location SB-J7-3-03 was determined using XRF screening; Results indicated a lead concentration of 641 ppm at SB-J7-3-03	Metals, SVOCs
K6-1	Unknown		SB-K6-1-01 through SB-K6-1-03	SB-K6-1-01 SB-K6-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-K06-1-02.	SVOCs
K6-9214	Store House #4	Old wooden store house on concrete foundation. Wood and earthen berm to the N, two loading doors to the W. No evidence of release.	SB-K6-9214-01 through SB-K6-9214-06	SB-K6-9214-03 SB-K6-9214-05	Sampling location SB-K6-9214-03 was determined using XRF screening; Results indicated a lead concentration of 577 ppm at SB-K6-9214-03; Sampling location SB-K6-9214-05 was determined using professional judgement	Metals
K6-9217	Experimental Dynamite Magazine	Old wooden structure on concrete footers with a lead floor covered with wood; Canopy and wooden berm on the W side, loading dock adjacent to the S corner. No evidence of release.	SB-K6-9217-01 through SB-K6-9217-05	SB-K6-9217-01 SB-K6-9217-05	Sampling location SB-K6-9217-01 was determined using XRF screening; Results indicated a lead concentration of 443 ppm at SB-K6-9217-01; Sampling location SB-K6-9217-05 was determined using professional judgement. Analytical results did not detect elevated metal concentrations.	E&E
K7-8651	Hose House	Building has been completely removed, all that remains is a concrete footer and three small earthen piles No evidence of release (area=100 sq ft)	SB-K7-8651-01 through SB-K7-8651-03	SB-K7-8651-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
L4-4	Lead Smelter	Building has been destroyed. Lead in front of, and around, the former building, as well as scattered metal debris (area=900 sq ft)	SB-L4-4-01 through SB-L4-4-04	SB-L4-4-02	Sampling location SB-L4-4-02 was determined using XRF screening; Results indicated a lead concentration of 1,518 ppm at SB-L4-4-02	Metals
L5-1	Former Dry Well	3' concrete pipe extending into the ground used to test shoot dynamite. Pipe filled in, so depth unknown	SB-L5-1-01 through SB-L5-1-02	SB-L5-1-01	Sampling location SB-L5-4-02 was determined using XRF screening; Results indicated a lead concentration of 1,144 ppm and copper concentration of 628 ppm at SB-L5-4-02	Metals, VOCs, E&E, SVOCs
L5-10	Stressed Vegetation	SV area devoid of vegetation, reason unknown. Area runs down the slope into the marsh (area=2,300 sq ft)	SB-L5-10-01 through SB-L5-10-08	SB-L5-10-04 SB-L5-10-05 SB-L5-10-06	Sampling locations SB-L5-10-04/05 were determined using XRF screening; Results indicated a lead concentration of 515 ppm at SB-L5-10-04 and 1,796 ppm at SB-L5-10-05; Sampling location SB-L5-10-06 was determined using professional judgement	Metals, SVOCs

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
L5-2275	Decon Oven	Former site of decontamination oven, currently barren with pieces of scrap metal and ash (area=1,100 sq ft). Ash has moved down the back slope toward the adjacent marsh	SB-L5-2275-01 through SB-L5-2275-04	SB-L5-2275-01	Sampling location SB-L5-2275-01 was determined using XRF screening; Results indicated a lead concentration of 6,170 ppm and a mercury concentration of 276 ppm at SB-L5-2275-01	Metals
L5-2313	Can Wash Area	Building has been removed with no evidence of existence. Several can lids and stressed vegetation remain. There is a slope leading to the marsh in the W (area = 900 sq ft)	SB-L5-2313-01 through SB-L5-2313-17	SB-L5-2313-12 SB-L5-2313-17	Sampling location SB-L5-2313-17 was determined using XRF screening; Results indicated a lead concentration of 408 ppm and a zinc concentration of 1,872 ppm at SB-L5-2313-17; Sampling location SB-L5-2313-12 was determined using professional judgement. Analytical results did not detect elevated metal concentrations.	SVOCs
L5-4	Dynamite Test Shed	Building has been nearly completely removed. Remains include a low bermed area, some old test plates, wood beams and a pulley. No evidence of release.	SB-L5-4-01 through SB-L5-4-05	SB-L5-4-02	Sampling location SB-L5-4-02 was determined using XRF screening; Results indicated a lead concentration of 1,144 ppm and a copper concentration of 628 ppm at SB-L5-4-02	Metals, E&E, SVOCs
L5-5	Kerosene Tank	Wooden construction over concrete base that housed kerosene tank used at the old burning ground. Tank has been removed. No evidence of release.	SB-L5-5-01 through SB-L5-5-04	SB-L5-5-01 SB-L5-5-03	Sampling location SB-L5-5-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L5-5-03.	VOCs, SVOCs
L5-539	Dry House	Former building has been removed, all that remains is a berm and old scrap pipes. No evidence of release.	SB-L5-539-01 through SB-L5-539-05	SB-L5-539-03	Sampling location SB-L5-539-03 was determined using XRF screening; Results indicated a lead concentration of 962 ppm at SB-L5-539-03	Metals
L5-6	Stressed Vegetation	Large area of SV associated with dynamite test area (area=7,600 sq ft)	SB-L5-6-01 through SB-L5-6-16	SB-L5-6-02 SB-L5-6-03 SB-L5-6-05 SB-L5-6-10	Sampling locations SB-L5-6-02/05/10 were determined using XRF screening; Results indicated a lead concentration of 756 ppm at SB-L5-6-02, a lead concentration of 1,235 ppm and a copper concentration of 773 ppm at SB-L5-6-05, and a lead concentration of 1,021 ppm at SB-L5-6-10; Group B E&E materials were detected at sampling location SB-L5-6-03	SVOCs, Metals, E&E
L5-7	Electric Transformer	Small electric transformer on top of telephone pole; Transformer looks corroded but intact; No evidence of release	SB-L5-7-01	SB-L5-7-01	Sampling location SB-L5-7-01 was determined using XRF screening; Results indicated a lead concentration of 462 ppm at SB-L5-7-01	Metals

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
L5-8	Earthen Pit	8'-10' foot deep earthen pit that may have been used as a heater house or for berm material, small metal can in pit. No evidence of release (area=1,600 sq ft)	SB-L5-8-01 through SB-L5-8-06	SB-L5-8-05	Sampling location SB-L5-8-05 was determined using XRF screening; Results indicated a lead concentration of 1,711 ppm and a copper concentration of 676 ppm at SB-L5-8-05	Metals
L5-8318	Dynamite Test House	No evidence of the former building; There is stressed vegetation over the whole area	SB-L5-8318-01 through SB-L5-8318-03	SB-L5-8318-02	Sampling location SB-L5-8318-02 was determined using XRF screening; Results indicated a lead concentration of 643 ppm at SB-L5-8318-02	Metals, E&E, SVOCs
L5-9546	Command Post for Old Burning Ground	Small steel building used to monitor burning activities; No evidence of release	SB-L5-9546-01 through SB-L5-9546-04	SB-L5-9546-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs, Metals
L6-1	Debris Area and Stressed Vegetation	Dumping area along the W bank of the duck pond. Consists of general debris and wood, two drums, and many lids. S section contains large area of S.V. Soil is black and no vegetation is growing (area=7,400 sq ft)	SB-L6-1-01 through SB-L6-1-15	SB-L6-1-01 SB-L6-1-02 SB-L6-1-07	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
L6-370	Dry House	Building has been removed except for a fallen down wooden berm and the concrete foundation footers	SB-L6-370-01 through SB-L6-370-05	SB-L6-370-05 SB-L6-370-03	Sampling location SB-L6-370-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L6-370-03.	SVOCs, Metals
L6-371	Dry House	Dismantled dry house, the concrete footers have been pushed over and the berm has been mostly destroyed. No evidence of release	SB-L6-371-01 through SB-L6-371-05	SB-L6-371-01 SB-L6-371-02	Sampling location SB-L6-371-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L6-371-02.	SVOCs
L6-9	Heater House	Small earthen pit used to house the heater house for dry house K6-529. Pit is larger than previous heater house pits. No evidence of release (area=700 sq ft).	SB-L6-9-01 through SB-L6-9-04	SB-L6-9-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
M4-1	Pistol Range	50 yard pistol range, back stop is intact and overgrown; No evidence of release (area=3,700 sq ft)	SB-M4-1-01 through SB-M4-1-13	SB-M4-1-02 SB-M4-1-05 SB-M4-1-09 SB-M4-1-11 SB-M4-1-13	Sampling location SB-M4-1-13 was determined using XRF screening; Results indicated a lead concentration of 497 ppm, a copper concentration of 1,032 ppm and a zinc concentration of 1,872 ppm at SB-M4-1-13; Sampling locations SB-M4-1-02/05/09/11 were determined using professional judgement	Metals

Table 5-44

Development Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
M5-3	Old Burning Ground	Area used to thermally decontaminate old equipment. Debris consists of shell casings, lead pipes, wood, old process equipment and other metal fragments. Several areas of S.V. within the boundary (area=127,000 sq ft)	SB-M5-3-01 through SB-M5-3-20	SB-M5-3-01 SB-M5-3-02 SB-M5-3-04 SB-M5-3-07 SB-M5-3-11 SB-M5-3-16 SB-M5-3-17 SB-M5-3-19	Sampling locations SB-M5-3-02/04/07/11/17/19 were determined using XRF screening; Results indicated a lead concentration of 1,232 ppm, a copper concentration of 1,410 ppm and a zinc concentration of 1,240 ppm at SB-M5-3-02; a zinc concentration of 3,670 ppm at SB-M5-3-04; a lead concentration of 1,493 ppm, a copper concentration of 1,000 ppm and a zinc concentration of 13,290 ppm at SB-M5-3-07; a lead concentration of 3,820 ppm, a copper concentration of 2,090 ppm and a zinc concentration of 6,100 ppm at SB-M5-3-11; a lead concentration of 2,358 ppm, a copper concentration of 1,073 ppm and a zinc concentration of 2,470 ppm at SB-M5-3-17; a lead concentration of 1,884 ppm, a copper concentration of 694 ppm and a zinc concentration of 7,610 ppm at SB-M5-3-19; Group B E&E materials were detected at sampling locations SB-M5-3-01/02/04/16/17/19	E&E, SVOCs, Metals
M5-8166E	Toilet and Water Heater House	Small cinderblock structure housing shooting block toilet and water heater. Toilet discharges to a septic tank to the S. No evidence of release	SB-M5-8166E-01 through SB-M5-8166E-04	SB-M5-8166E-01 SB-M5-8166E-02	Sampling location SB-M5-8166E-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M5-8166E-02.	SVOCs
N4-2	Blast Chamber	Circular dugout section of the hill covered with earth and made of thick reinforced steel Appeared to have tested explosives by shooting at them Sand piled and what looks like a blast area inside Inside metal has impact marks There may be residual explosive material	SB-N4-2-01 through SB-N4-2-03	SB-N4-2-02 SB-N4-2-01	Sampling location SB-N4-2-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N4-2-01.	Metals, SVOCs, E&E
N4-3	Debris Pile	Small debris pile that contains blasting cap wires, three old drums and scrap metal	SB-N4-3-01 through SB-N4-3-03	SB-N4-3-02 SB-N4-3-03	Sampling location SB-N4-3-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N4-3-03.	Metals, SVOCs

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
N5-6	Debris Area	Debris area containing several old drums, wood and spent blasting caps and wires (area=8,600 sq ft)	SB-N5-6-01 through SB-N5-6-17	SB-N5-6-14	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls

TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector

XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot

" = Inch
 = Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-45

Diazo Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H8-1	Diazo Ponds	S pond's location evident due to stressed vegetation areas; N pond located from map; S pond shows dark brown to black soil staining with a red tint to staining (area=10,000 sq ft)			This AOC has been referred to the Remedial Investigation	E&E
H8-584	Can Stop Paint Shop	Bldg demolished-minimal evidence of former bldg; No evidence of release			This AOC has been referred to the Remedial Investigation	E&E
H8-9328	Diazo Store	Wooden and corrugated sheet metal bldg on concrete footers railroad loading on W side; storage only; No evidence of release	SB-H8-9328-01 through SB-H8-9328-07	SB-H8-9328-05 SB-H8-9328-06	Sampling locations SB-H8-9328-05/06 were determined using XRF screening; Results indicated a lead concentration of 809 ppm at SB-H8-9328-05 and 1,043 ppm at SB-H8-9328-06	Metals

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
F10-1	Unknown Foundation	Large concrete foundation footers present within larger pad area catch tank box on NE side; multiple 6" to 8" pipes extending into ground; lead floor present formerly.	SB-F10-1-01 through SB-F10-1-07	SB-F10-1-01 SB-F10-1-04 SB-F10-1-06 SB-F10-1-07	Group B E&E materials were detected using an Expray Test Kit at SB-F10-1-01 and was analyzed for E&E only. Sample SB-F10-1-04 was determined using XRF screening. Results indicated a copper concentration of 647 ppm at SB-F10-1-04. Samples SB-F10-1-06/07 were determined using professional judgement.	Metals, E&E
F10-20	Unknown Shed	Small wooden storage shed with large diameter steam piping running through it. No evidence of release	SB-F10-20-01 through SB-F10-20-04	SB-F10-20-02 SB-F10-20-03	Group B E&E materials were detected using an Expray Test Kit at SB-F10-20-03 and was analyzed for E&E only. Sample SB-F10-20-02 was determined using XRF screening. Results indicated an arsenic concentration of 835 ppm at SB-F10-20-02. Analytical results did not detect elevated E&E concentrations.	Metals
F10-44	Paper Store	Bldg demolished-minimal evidence of paper store; No evidence of release	SB-F10-44-01 through SB-F10-44-05	SB-F10-44-05 SB-F10-44-04	Sampling location SB-F10-44-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F10-44-04	SVOCs
F10-8576	Propane Storage	Currently dilapidated area, only two concrete footers remain, other footers, tanks, and cradles removed. Old, small pump present and a "snap switch" and pressure gauges at SW side. No evidence of release	SB-F10-8576-01 through SB-F10-8576-05	SB-F10-8576-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
F11-2	Garage	Building demolished, minimal evidence of remains. Location determined from historical maps. No evidence of release.	SB-F11-2-01 through SB-F11-2-03	SB-F11-2-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
F11-43	Ingredient Storage	Bldg demolished-minimal evidence remains; No evidence of release	SB-F11-43-01 through SB-F11-43-05	SB-F11-43-03 SB-F11-43-02	Sampling location SB-F11-43-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F11-43-02	SVOCs
F11-458	Fire Chief House	Building demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-F11-458-01 through SB-F11-458-03	SB-F11-458-02 SB-F11-458-01	Sampling location SB-F11-458-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F11-458-01	SVOCs
F11-6813	Glycerin Storage	Large concrete pad with rail mounted to wooden members; Rail runs perpendicular to major pad axis drum labeled "rosin" on concrete pad; No evidence of a release	SB-F11-6813-01 through SB-F11-6813-04	SB-F11-6813-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
F11-8113	Laboratory	Building demolished-minimal evidence of former laboratory. Location determined from historical maps. No evidence of release.	SB-F11-8113-01 through SB-F11-8113-03	SB-F11-8113-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 19,200 ppm at SB-F11-8113-02	Metals
F11-8227	Change House	Building demolished-minor amount of concrete rubble present at W corner. Area currently covered with gravel and macadam. Septic associated with the building. No evidence of release	SB-F11-8227-01 through SB-F11-8227-06 TP-F11-8227-07	SB-F11-8227-01 SB-F11-8227-06 TP-F11-8227-07	A septic tank was discovered during sampling. One additional screening sample SB-F11-8227-06 and analytical sample were collected. Sampling location SB-F11-8227-01 was determined using professional judgement. Test Pit location was taken downgradient from the septic.	Metals, VOCs, SVOCs
F11-A2	Old Premix Scrap Shed	Shed demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-F11-A2-01 through SB-F11-A2-03	SB-F11-A2-01	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 300 ppm at SB-F11-A2-01	Metals
G10-1	Transportation Office	Small wooden and corrugated sheet metal construction over concrete block foundation; steam pipe enters W corner.No evidence of release.	SB-G10-1-01 through SB-G10-1-04	SB-G10-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
G10-16	Air Receiver Tank	Air receiver tank with piping to Bldg. 9106. 1' x 1' area of black staining at vent pipe below N side of tank.	SB-G10-16-01 through SB-G10-16-03	SB-G10-16-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 401 ppm at G10-16-02	Metals
G10-172A	Ammonia Liquor Storage	Building demolished, only concrete foundation remains; No evidence of release	SB-G10-172A-01 through SB-G10-172A-04	SB-G10-172A-01 SB-G10-172A-03	Sampling location SB-G10-172A-01 was determined using XRF screening; Results indicated a lead concentration of 2,126 ppm at SB-G10-172A-01; Group B E&E materials were detected at SB-G10-172A-03 using an Expray Test Kit; An additional analytical sample was collected at SB-G10-172A-03 and analyzed for E&E only. Analytical results did not detect elevated E&E concentrations.	Metals, SVOCs
G10-18	Acid Pump Control Shed	Wooden shed on concrete foundation with controls for Bldg. 9106. No evidence of release	SB-G10-18-01 through SB-G10-18-04	SB-G10-18-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
G10-2	Former Water Tanks	Tanks removed, only foundation of larger tank remains. Most areas paved over. No evidence of release	SB-G10-2-01 through SB-G10-2-04	SB-G10-2-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 401 ppm at SB-G10-2-03	Metals
G10-2008	Unknown	Building demolished, only two 1' x 10' footers remain. Area covered by vegetation and gravel. No evidence of release	SB-G10-2008-01 through SB-G10-2008-03	SB-G10-2008-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	PCBs
G10-2009	Unknown	Building demolished, only two 1' x 10' footers remain; Foundation currently obscured by Bldg. G10-9106 No evidence of release	SB-G10-2009-01 through SB-G10-2009-03	SB-G10-2009-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
G10-269	Unknown	Building demolished, only two 1' x 10' footers remain; Foundation currently obscured by Bldg. G10-9106 No evidence of release	SB-G10-269-01 through SB-G10-269-03	SB-G10-269-03 SB-G10-269-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
G10-271	Unknown	Building demolished, only two 1' x 10' footers remain; Foundation currently obscured by Bldg. G10-9106 No evidence of release	SB-G10-271-01 through SB-G10-271-03	SB-G10-271-01 SB-G10-271-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 458 ppm at SB-G10-271-01 A confirmation sample was collected at SB-G10-271-02	Metals
G10-3	Boiler	Sheet metal enclosing dual boilers that are mounted on steel beams and supported on a concrete foundation. Large stack with duct work to two boilers. Minor amount of white powder present along S end of the western boiler.	SB-G10-3-01 through SB-G10-3-04	SB-G10-3-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 628 ppm at SB-G10-3-01	Metals
G10-4	Unknown Tank	Possible air receiver tank-water present in basin. Vent to concrete catch area at SE end, vent present along piping which leads away from tank to the E. 1' diameter piping leads from tank into powerhouse. No evidence of release.	SB-G10-4-01 through SB-G10-4-06	SB-G10-4-02 SB-G10-4-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 495 ppm at SB-G10-4-02 and 1,563 ppm at SB-G10-4-05	Metals, SVOCs
G10-5	A-Line Canteen	Wooden and aluminum siding construction over concrete foundation; lounge area only. No evidence of release	SB-G10-5-01 through SB-G10-5-04	SB-G10-5-02 SB-G10-5-03	Sampling location SB-G10-5-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G10-5-03	SVOCs

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
G10-8106	Millwright Shop	Brick construction over concrete foundation with rail access into building-loading doors on E/W side. Coal pit present on S side. No evidence of release	SB-G10-8106-01 through SB-G10-8106-06	SB-G10-8106-01 SB-G10-8106-02	Sampling location SB-G10-8106-01 was determined using professional judgement Group B E&E materials were detected at SB-G10-8106-02 using an Expray Test Kit Analytical results did not detect elevated SVOC concentrations	SVOCs
G10-8106A	Millwright Storage Shed	Brick storage shed with wooden racks inside; No evidence of release	SB-G10-8106A-01 through SB-G10-8106A-04	SB-G10-8106A-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 716 ppm at SB-G10-8106A-04	Metals, SVOCs
G10-8106B	Millwright Storage Shed	Wooden storage shed with metal racks inside-temporary storage only. No evidence of release.	SB-G10-8106B-01 through SB-G10-8106B-04	SB-G10-8106B-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,006 ppm and a copper concentration of 754 ppm at SB-G10-8106B-04	Metals, SVOCs
G10-8106C	Cylinder Store House	Small concrete block building used to store oxygen and compressed gas. Empty canister storage on E side. No evidence of release	SB-G10-8106C-01 through SB-G10-8106C-04	SB-G10-8106C-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 3,493 ppm at SB-G10-8106C-04	Metals, SVOCs
G10-8108	Carpenter Shop (Tin Shop on NW end)	Brick bldg built over concrete foundation; cyclone on NE side adjacent to small sheet metal and wood contaminated waste shed; sump at W corner; small heater shed at S corner. No evidence of release	SB-G10-8108-01 through SB-G10-8108-10	SB-G10-8108-06 SB-G10-8108-07 SB-G10-8108-08	Sampling locations were determined using XRF screening Results indicated a lead concentration of 431 ppm at SB-G10-8108-06, 3,090 ppm at SB-G10-8108-07, and 684 ppm at SB-G10-8108-08	Metals, SVOCs, PCBs
G10-8114	Paint Shop	Corrugated sheet metal over concrete foundation; steam pipe enters E corner; painted signs on inside. No evidence of release.	SB-G10-8114-01 through SB-G10-8114-04	SB-G10-8114-03	Sampling location was determined using XRF screening Results indicated a copper concentration of 777 ppm at SB-G10-8114-03	Metals, SVOCs
G10-8159	Solvent Storage	Wooden bldg built on concrete foundation; catch tank on NW side; loading area on W corner. No evidence of release	SB-G10-8159-01 through SB-G10-8159-06	SB-G10-8159-03 SB-G10-8159-05 SB-G10-8159-06	Sampling locations SB-G10-8159-05/06 were determined using professional judgement; XRF screening results indicated a lead concentration of 722 ppm at SB-G10-8159-03	Metals
G10-8204	Change House	Old brick change house with addition built of wood; septic tank location potentially indicated by PVC pipes along SW wall. No evidence of release	SB-G10-8204-01 through SB-G10-8204-05 TP-G10-8204-06	SB-G10-8204-02 SB-G10-8204-05 TP-G10-8204-06	Sampling locations were determined using professional judgement screening results did not warrant biased sampling Test Pit located downgradient from septic tank	Metals, SVOCs
G10-8213	Supply Storage	Concrete block, wooden and corrugated sheet metal construction. Storage only with shelving present inside. No evidence of release.	SB-G10-8213-01 through SB-G10-8213-07	SB-G10-8213-07	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,955 ppm at SB-G10-8213-07	Metals
G10-8224	Laundry	Wooden construction over concrete block foundation; Sump present at SE corner, slag at S corner; No evidence of release	SB-G10-8224-01 through SB-G10-8224-04	SB-G10-8224-02 SB-G10-8224-03 SB-G10-8224-04 TP-G10-8224-05	Sampling locations were determined using professional judgement screening results did not warrant biased sampling. Test Pit placed downgradient from sump.	Metals, SVOCs
G10-8501	Powerhouse	Concrete foundation with brick walls; Ammonia receiver and condenser tanks just inside building; Attached air handler tank; No evidence of release	SB-G10-8501-01 through SB-G10-8501-07	SB-G10-8501-06	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
G10-8502	Boiler House	Large corrugated sheet metal/steel/wood construction on concrete foundation, with additional pad on N corner. Sump present on SE side, heat recovery system on E corner. Piping enters on N corner (Sump sampled as part of Single Phase Remediation effort). No evidence of release.	SB-G10-8502-01 through SB-G10-8502-07	SB-G10-8502-03 SB-G10-8502-07 TP-G10-8502-08 TP-G10-8502-09	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,066 ppm at SB-G10-8502-03 and an arsenic concentration of 963 ppm at SB-G10-8502-07. Test Pits placed downgradient from sump.	Metals
G10-8503	Ammonia Cooler Tank	4' x 12' tank posted as tested hydrostatically and covered by shed on a concrete footer, adjacent to Bldg. 8501. Outgoing brine line leads to west A-line area. No evidence of release.	SB-G10-8503-01 through SB-G10-8503-04	SB-G10-8503-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 555 ppm and a mercury concentration of 322 ppm at SB-G10-8503-03	Metals, SVOCs
G10-8522	Dual Substations	Two fenced areas holding transformers; No evidence of release	SB-G10-8522-01 through SB-G10-8522-02	SB-G10-8522-01 SB-G10-8522-02	Sampling locations were determined using professional judgement XRF results indicated a lead concentration of 954 ppm at SB-G10-8522-02	Metals
G10-8682	Oil Pump House	Corrugated sheet metal construction over concrete foundation. Minor oil staining on concrete foundation, sump on S side	SB-G10-8682-01 through SB-G10-8682-05	SB-G10-8682-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	PCBs
G10-9100	Service Shop	Building demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-G10-9100-01 through SB-G10-9100-03	SB-G10-9100-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 440 ppm at SB-G10-9100-01	Metals
G10-9106A	Unknown	Building demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-G10-9106A-01 through SB-G10-9106A-03	SB-G10-9106A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	PCBs
G10-9515	Car Barn	Brick walls, concrete foundation with corrugated sheet metal roof. Recently constructed wooden shed at SE corner. Internal floor drains evident, dark stained area (possibly oil) evident at NW corner	SB-G10-9515-01 through SB-G10-9515-13	SB-G10-9515-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 663 ppm at SB-G10-9515-02	Metals, SVOCs
G11-1	Former Plant Lab	Building demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-G11-1-01 through SB-G11-1-03	SB-G11-1-01 SB-G11-1-02	Group B E&E materials were detected at SB-G11-1-01 using an Expray Test Kit A confirmation sample was collected at SB-G11-1-02 Analytical results did not detect elevated concentrations	VOCs
G11-2017A	Shell House	Building demolished, foundation removed, minor evidence of building debris present. Minor area of dark discolored slag macadam. No confirmed area of release.	SB-G11-2017A-01 through SB-G11-2017A-06	SB-G11-2017A-02 SB-G11-2017A-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
G11-2017B	Pilot Plant	Brick construction over concrete foundation with adjacent heater house, and multiple loading areas. Waste oil/acetone labeled drums present at W corner. Stressed vegetation from heater house pipe outlet	SB-G11-2017B-01 through SB-G11-2017B-07	SB-G11-2017B-01 SB-G11-2017B-07 SB-G11-2017B-08	Sampling location SB-G11-2017B-08 was collected at an area of stressed vegetation, no screening sample was collected there. Sampling location SB-G11-2017B-01 was determined using professional judgement. Sampling location SB-G11-2017B-07 was determined using XRF screening; Results indicated an arsenic concentration of 982 ppm at SB-G11-2017B-07	Metals, SVOCs
G11-2259	Dope House	Indicated as dope house storage, wooden and corrugated sheet metal construction over concrete foundation. No evidence of release.	SB-G11-2259-01 through SB-G11-2259-07	SB-G11-2259-01 SB-G11-2259-06	Sampling location SB-G11-2259-01 was determined using professional judgement; Sampling location SB-G11-2259-06 was determined using XRF screening; Results indicated an arsenic concentration of 222 ppm at SB-G11-2259-06	Metals, SVOCs

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
G11-3	Drum Storage Building	Building demolished, concrete pad evident on NW, W and E sides. No evidence of release.	SB-G11-3-01 through SB-G11-3-05	SB-G11-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
G11-5	Unknown Storage Tank	Steel AST insulation wrapped and covered in sheet metal. 6" pipe leads to S corner, currently cut off, no indication of feeds. No evidence of release.	SB-G11-5-01 through SB-G11-5-03	SB-G11-5-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,485 ppm at SB-G11-5-02	Metals
G11-66	Drum Storage Building	Large concrete pad with imprints of rust from former drum storage. Adjacent dark stained soil area. Currently scrapped equipment storage area.	SB-G11-66-01 through SB-G11-66-06	SB-G11-66-03 SB-G11-66-05	Sampling location SB-G11-66-03 was determined using professional judgement; Sampling location SB-G11-66-05 was determined using XRF screening; Results indicated a copper concentration of 2,110 ppm at SB-G11-66-05	Metals, SVOCs
G11-8208	Shell House Warehouse	Building demolished, foundation and structure removed. Location determined from maps. No evidence of release.	SB-G11-8208-01 through SB-G11-8208-05	SB-G11-8208-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
G11-8212	HEOD Storage	Building demolished, foundation evidence also removed. Minor amounts of building debris present. Ends of building estimated. No evidence of release.	SB-G11-8212-01 through SB-G11-8212-05	SB-G11-8212-04	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 235 ppm at SB-G11-8212-04	Metals, SVOCs
G11-8257	Oil Storage Tanks	Tanks have been removed; Area currently filled with orange sand; No reduced vegetation as observed during the recon event; No evidence of release	SB-G11-8257-01 through SB-G11-8257-06	SB-G11-8257-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, PCBs, SVOCs
G11-9300/251	Records Keeping	Brick building used for storage only; Adjacent area of stressed soil; Septic associated with the building. No evidence of release	SB-G11-9300-01 through SB-G11-9300-05 TP-G11-9300A-01	SB-G11-9300-03 SB-G11-9300-05 TP-G11-9300A-01	Sampling locations were determined using XRF screening Results indicated a lead concentration of 482 ppm at SB-G11-9300-03 and 2,770 ppm at SB-G11-9300-05. Test Pit location down gradient from the septic tank.	Metals, SVOCs
G11-9304	Store House	Wooden and corrugated sheet metal construction over concrete foundation with loading dock on W side. Currently misc. storage with wood flour (triacetin) stored at W end. Septic associated with the building. No evidence of release.	SB-G11-9304-01 through SB-G11-9304-05 TP-G11-9304A-01	SB-G11-9304-02 SB-G11-9304-05 TP-G11-9304A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling Test Pit location downgradient from septic tank	Metals, SVOCs
G11-9305	Store House	Wooden and corrugated sheet metal construction with clay tiled walls on E and W sides and loading doors to adjacent buildings. No evidence of release.	SB-G11-9305-01 through SB-G11-9305-06	SB-G11-9305-02 SB-G11-9305-01	Sampling location SB-G11-9305-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G11-9305-01	Metals, SVOCs
G11-9309	Store House	Building demolished, only concrete pad remains. Loading area at N corner. No evidence of release.	SB-G11-9309-01 through SB-G11-9309-05	SB-G11-9309-01 SB-G11-9309-05	Sampling location SB-G11-9309-05 was determined using professional judgement; Sampling location SB-G11-9309-01 was determined using XRF screening; Results indicated an arsenic concentration of 341 ppm at SB-G11-9309-01	Metals, SVOCs
G11-B86	Chemical Ware Store	Building demolished, only old dilapidated concrete footers remain. No evidence of release (area=400 sq ft).	SB-G11-B86-01 through SB-G11-B86-04	SB-G11-B86-01 SB-G11-B86-03	Sampling location SB-G11-B86-01 was determined using professional judgement; Sampling location SB-G11-B86-03 was determined using XRF screening; Results indicated an arsenic concentration of 487 ppm at SB-G11-B86-03	Metals, SVOCs
G12-252	Sample Smokeless Powder Mag. #1	Remnant Building, location determined from historical maps	SB-G12-252-01 through SB-G12-252-03	SB-G12-252-03 SB-G12-252-02	Sampling location SB-G12-252-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G12-252-02	E&E

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
G12-775	TNT Laundry	Remnant Building, location determined from historical maps	SB-G12-775-01 through SB-G12-775-03	SB-G12-775-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
G12-8109	Transportation Office	Building demolished, area currently largely vegetated. Location determined from maps. No evidence of release.	SB-G12-8109-01 through SB-G12-8109-03	SB-G12-8109-02 SB-G12-8109-01	Sampling location SB-G12-8109-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G12-8109-01	Metals, SVOCs
G9-15	Locomotive House	Bldg demolished- all evidence of locomotive house largely removed; machine oil between G10-4 and G10-37B; some dark colored soil present due to staining or organic activity-source unknown; No evidence of release	SB-G9-15-01 through SB-G9-15-03	SB-G9-15-01 SB-G9-15-02	Sampling location SB-G9-15-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G9-15-02	Metals
G9-2	Scrap Shed	Two story wooden shed built on concrete foundation, recently constructed; steel I-beam connects to rear of machine shop. white powdery material present at N corner.	SB-G9-2-01 through SB-G9-2-05	SB-G9-2-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 408 ppm and a copper concentration of 3,600 ppm at SB-G09-2-03	Metals, PCBs, SVOCs
G9-8107	Pipe/Scale Shop	Concrete block bldg with asphalt roof; two loading areas on NW side rail line along NW side; shop only. No evidence of release.	SB-G9-8107-01 through SB-G9-8107-06	SB-G9-8107-02 SB-G9-8107-05	Sampling locations were determined using XRF screening Results indicated a lead concentration of 548 ppm at SB-G09-8107-02 and 541 ppm at SB-G09-8107-05 and an arsenic concentration of 317 ppm at SB-G09-8107-02 and 279 ppm at SB-G09-8107 -05	Metals
G9-8182	Carpenter Shop	Small wooden carpenter shop with attached storage area; loading doors on SE/NW sides. No evidence of release	SB-G9-8182-01 through SB-G9-8182-06	SB-G9-8182-01 SB-G9-8182-05	Sampling location SB-G09-8182-05 was determined using professional judgement XRF screening results indicated a copper concentration of 2,180 ppm and a lead concentration of 675 ppm at SB-G09-8182-01	Metals, SVOCs
G9-8187	Unknown	Bldg demolished-evidence largely removed; area of reduced vegetation. No evidence of release	SB-G9-8187-01 through SB-G9-8187-05	SB-G9-8187-01 SB-G9-8187-02	Sampling location SB-G9-8187-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G9-8187-02	SVOCs
G9-8207	Oil Storage Bldg	Concrete block with wooden front doors, corrugated sheet metal roof and concrete foundation; steam pipe enters front vent at rear with minor area of stressed vegetation from steam vent.	SB-G9-8207-01 through SB-G9-8207-05	SB-G9-8207-04 SB-G9-8207-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	VOCs, SVOCs
G9-8267	Lumber/Lead Storage	Wooden storage shed with multiple bays for storage and shed on NW side; lead not evident. No evidence of release.	SB-G9-8267-01 through SB-G9-8267-06	SB-G9-8267-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 884 ppm at SB-G09-8267-04	Metals, SVOCs
G9-9321	Spare Parts Store	Wooden and corrugated sheet metal construction over 1 'x 1' concrete footers; storage only. No evidence of release.	SB-G9-9321-01 through SB-G9-9321-08	SB-G9-9321-02 SB-G9-9321-08	Sampling location SB-G09-9321-08 was determined using professional judgement; XRF screening results indicated a lead concentration of 444 ppm at SB-G09-9321-02. Analytical results did not detect elevated metal concentrations.	SVOCs
H10-10	Unknown Foundation	Large concrete pad with screen burner H10-2260 and H10-1 constructed on top. Currently fiber insulation pile at S corner. Piles of molten lead present on foundation.	SB-H10-10-01 through SB-H10-10-08	SB-H10-10-02 SB-H10-10-06 SB-H10-10-07	Sampling locations SB-H10-10-06/07 were determined using professional judgement; Sampling location SB-H10-10-02 was determined using XRF screening; Results indicated a lead concentration of 496 ppm at SB-H10-10-02	Metals, SVOCs, E&E, PCBs

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H10-11	Acid Mix Equipment	Building demolished, concrete foundation evident but significantly dilapidated. No evidence of release	SB-H10-11-01 through SB-H10-11-05	SB-H10-11-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 552 ppm at SB-H10-11-05	Metals, SVOCs
H10-12	S.A. Store Tank	Building demolished, only concrete in NE edge remains; No evidence of release	SB-H10-12-01 through SB-H10-12-03	SB-H10-12-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,588 ppm at SB-H10-12-01	Metals, SVOCs
H10-13	Bag Store	Building demolished, minor amounts of concrete and brick remain. Location determined from historical maps. No evidence of release, however adjacent area of SV present.	SB-H10-13-01 through SB-H10-13-03	TP-H10-13-01 TP-H10-13-03	This AOC was located under asphalt. Test Pits were dug to collect samples. Screening results did not warrant biased sampling.	Metals, SVOCs
H10-14	Unknown	Building demolished, remains of a concrete footer outline site. Adjacent area of stressed vegetation (slag present).	SB-H10-14-01 through SB-H10-14-05	SB-H10-14-01 SB-H10-14-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 6,300 ppm at SB-H10-14-01 and a concentration of 4,460 at SB-H10-14-02	Metals, SVOCs, E&E
H10-154B	Dry Bag Store	Building demolished, minimal evidence remains; Location determined from historical maps; No evidence of release	SB-H10-154B-01 through SB-H10-154B-03	SB-H10-154B-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs, PCBs
H10-16	Unknown Concrete Footer	Small rectangular concrete footer; 2' x 2' piece of lead present	SB-H10-16-01 through SB-H10-16-04	SB-H10-16-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 5,920 ppm at SB-H10-16-02	Metals, E&E, SVOCs
H10-17	Unknown	Small rectangular concrete footer; 2' x 2' piece of lead present	SB-H10-17-01 through SB-H10-17-03	SB-H10-17-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	PCBs
H10-2003	Spent Acid Tower	Building demolished, concrete foundation evident but significantly dilapidated. Location determined from foundation and maps. No evidence of release.	SB-H10-2003-01 through SB-H10-2003-05	SB-H10-2003-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 7,760 ppm at SB-H10-2003-01	Metals
H10-2092/ 2002	Spent Acid Recovery Tanks	Building demolished, evidence of foundations removed. Location determined from maps. No evidence of release.	SB-H10-2092-01 through SB-H10-2092-05	SB-H10-2092-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,087 ppm at SB-H10-2092-03	Metals
H10-262	Nitric Acid House	Remnant Building, location determined from historical maps	SB-H10-262-01 through SB-H10-262-03	SB-H10-262-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 549 ppm at SB-H10-262-02	Metals, PCBs, SVOCs
H10-267	Absorption Tower	Remnant Building, location determined from historical maps	SB-H10-267-01 through SB-H10-267-03	SB-H10-267-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 3,577 ppm at SB-H10-267-01	Metals
H10-269	Unknown	Building demolished, largely vegetated area. Location determined from maps. No evidence of release.	SB-H10-269-01 through SB-H10-269-03	SB-H10-269-03	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 241 ppm at SB-H10-269-03	Metals
H10-502	Nitric Acid Recovery Area	Remnant Building, location determined from historical maps	SB-H10-502-01 through SB-H10-502-03	SB-H10-502-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 603 ppm at SB-H10-502-01	Metals, SVOCs
H10-503	Sulfuric Acid Recovery	Remnant Building, location determined from historical maps	SB-H10-503-01 through SB-H10-503-03	SB-H10-503-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,762 ppm at SB-H10-503-02	Metals, SVOCs

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H10-68	Spent Acid Recovery	Building demolished, evidence of building largely removed. Location determined from maps. Area covered by boiler slag, area to the E of ceramic debris and slag.	SB-H10-68-01 through SB-H10-68-03	SB-H10-68-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 871 ppm at SB-H10-68-03	Metals, E&E, SVOCs
H10-8225	Unknown	Concrete pad evident at NW corner only, the rest is covered in gravel. Location confirmed from historical maps. No evidence of release.	SB-H10-8225-01 through SB-H10-8225-03	SB-H10-8225-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 459 ppm at SB-H10-8225-03	Metals
H10-8264	Old Soda House	Building demolished, minimal concrete and building debris present. Location determined from maps. No evidence of release.	SB-H10-8264-01 through SB-H10-8264-04	SB-H10-8264-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 420 ppm at SB-H10-8264-01	Metals
H10-9000	Unknown	Building demolished, only two 1' x 6' footers remain; No evidence of release	SB-H10-9000-01 through SB-H10-9000-03	SB-H10-9000-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 547 ppm at SB-H10-9000-01	Metals, SVOCs, E&E
H10-9001	Unknown	Building demolished, evidence of former concrete footer present. Location determined from maps. No evidence of release.	SB-H10-9001-01 through SB-H10-9001-03	SB-H10-9001-03	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 532 ppm at SB-H10-9001-03	Metals, SVOCs, E&E
H10-9002	Oil Storage	Storage area demolished, former storage tanks and support removed. Adjacent area contains tan-brown sandy soil fill evidence where cleanup occurred. No current evidence of release.	SB-H10-9002-01 through SB-H10-9002-05	SB-H10-9002-01 SB-H10-9002-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 888 ppm at SB-H10-9002-01 and a copper concentration of 1,305 ppm at SB-H10-9002-02	Metals, SVOCs, PCBs
H10-9103	Sulfuric Acid Store Tank	Concrete containment around steel tank (one tank removed). Floor drain in N corner, concrete gutter at SW side, brick basin at SW side. No evidence of release.	SB-H10-9103-01 through SB-H10-9103-06	SB-H10-9103-01 SB-H10-9103-03 SB-H10-9103-04	Sampling location SB-H10-9103-01 was determined using professional judgement; Sampling locations SB-H10-9103-03/04 were determined using XRF screening; Results indicated a lead concentration of 1,308 ppm at SB-H10-9103-03 and 605 ppm at SB-H10-9103-04	Metals, SVOCs, VOCs
H10-9104	Nitric Acid Store Tank	Concrete containment basin for fuel storage, tank has been removed, No. 2 fuel oil tank is currently stored in basin. No evidence of release.	SB-H10-9104-01 through SB-H10-9104-04	SB-H10-9104-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 3,086 ppm at SB-H10-9104-02	Metals, SVOCs
H10-9308	Sodium Nitrate Store	Concrete block walls to 6' elevation, then steel and wood construction. Currently white material stored inside, possibly rock salt. No evidence of release.	SB-H10-9308-01 through SB-H10-9308-06	SB-H10-9308-02 SB-H10-9308-03	Sampling location SB-H10-9308-02 was determined using XRF screening; Results indicated a lead concentration of 555 ppm. A confirmation sample was colllected at SB-H10-9308-03	Metals, SVOCs, PCBs
H10-9320	Can Paint House	Large concrete pad with sheet metal building on SW third of pad. Currently used for equipment storage. No evidence of a release.	SB-H10-9320-01 through SB-H10-9320-04	SB-H10-9320-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 715 ppm at SB-H10-9320-03	Metals, SVOCs
H11-1	Former Burning Ground	Currently largely vegetated area with dark soil present towards E corner. No evidence of release (area=16,000 sq ft).			This AOC has been referred to the Remedial Investigation	E&E
H11-2319	Drum Storage Pad	Concrete pad with 8" high walls for containment. Posted as former storage of petroleum contaminated soil and waste oil. No evidence of release.	SB-H11-2319-01 through SB-H11-2319-05	SB-H11-2319-04 SB-H11-2319-02	Sampling location SB-H11-2319-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-2319-02	Metals

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H11-3	Mixed Acid Storage Tank	All tanks and equipment removed, footers show where tanks were. Location determined from maps. No evidence of release.	SB-H11-3-01 through SB-H11-3-06	SB-H11-3-02 SB-H11-3-03	Sampling location SB-H11-3-02 was determined using XRF screening Results indicated a lead concentration of 581 ppm. A confirmation sample was collected at SB-H11-3-03	Metals, SVOCs
H11-4	Acid Unloading Area Release	Area currently vegetated and gravel covered, adjacent to eyewash station. Connections and piping to 9106 present. No evidence of release.	SB-H11-4-01 through SB-H11-4-03	SB-H11-4-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,435 ppm at SB-H11-4-03	Metals, SVOCs, PCBs
H11-6	Unknown	Concrete pad partially covered by macadam-paved road to Bldg. 9336. No evidence of release.	SB-H11-6-01 through SB-H11-6-04	SB-H11-6-01	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 256 ppm at SB-H11-6-01	Metals, SVOCs
H11-757	Unknown	Area largely vegetated, building destroyed, foundation not evident. Location determined from maps. No evidence of release.	SB-H11-9312-01 through SB-H11-9312-06	SB-H11-9312-02 SB-H11-9312-04	This AOC was sampled as part of H11-9312. NFA/FA justification and exceedances based on samples collected from H11-9312.	Metals, SVOCs
H11-761	Unknown	Building demolished, concrete debris present; Location determined from maps; No evidence of release	SB-H11-761-01 through SB-H11-761-04	SB-H11-761-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 814 ppm at SB-H11-761-03	Metals, SVOCs
H11-763	Unknown	Building demolished, minimal evidence of former building. Location determined from maps. No evidence of release.	SB-H11-763-01 through SB-H11-763-03	SB-H11-763-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 552 ppm at SB-H11-763-03 Analytical results did not detect elevated metal concentrations	SVOCs
H11-8	Unknown Tank	Dilapidated steel tank with significant rust present. Extends 3' above ground surface and to an unknown depth. Two reinforcing steel I-beams present inside. Slag present surrounding and on W side.	SB-H11-8-01 through SB-H11-8-02	SB-H11-8-01 SB-H11-8-02	Sampling location was determined using professional judgement XRF results indicated a lead concentration of 419 ppm at SB-H11-8-01 Professional judgement used in determining SB-H11-8-02.	Metals, SVOCs
H11-9	Cooling Reservoir	Concrete foundation remains; Largely vegetated, however concrete walls evident; No evidence of release	SB-H11-9-01 through SB-H11-9-04	SB-H11-9-02 SB-H11-9-04	Sampling location SB-H11-9-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-9-04	Metals
H11-9310	Shook Storage	Building demolished, area paved somewhat and gravel covered, also significant vegetation present. Location determined from maps. No evidence of release	SB-H11-9310-01 through SB-H11-9310-03	SB-H11-9310-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
H11-9312	Box Storage	Corrugated sheet metal/wooden storage building. Loading areas at NE and SE corners. No evidence of release.	SB-H11-9312-01 through SB-H11-9312-06	SB-H11-9312-02 SB-H11-9312-04	Sampling location SB-H11-9312-04 was determined using professional judgement; Sampling locations SB-H11-9312-02 was determined using XRF screening; Results indicated a lead concentration of 598 ppm at SB-H11-9312-02	Metals, SVOCs
H11-9313	Shook Storage	Corrugated sheet metal/wooden storage building on concrete pad. Loading areas at NW and SW corners. Adjacent debris area expected to be second building (rail line runs through debris area). No evidence of release.	SB-H11-9313-01 through SB-H11-9313-06	SB-H11-9313-02 SB-H11-9313-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals
H11-9335	Warehouse	Corrugated sheet metal and wood structure built on concrete foundation. Heater pad on SW side. Stressed vegetation with iron staining present.	SB-H11-9335-01 through SB-H11-9335-07	SB-H11-9335-05 SB-H11-9335-06	Sampling locations were determined using XRF screening Results indicated a copper concentration of 1,012 ppm at SB-H11-9335-05 and an arsenic concentration of 287 ppm at SB-H11-9335-06	Metals, SVOCs

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H11-9336	General Warehouse	Sheet metal construction with wooden walls on concrete footers. Heater unit on E side with steam pipe vent and a small area of stressed vegetation below. No evidence of release.	SB-H11-9336-01 through SB-H11-9336-07	SB-H11-9336-01 SB-H11-9336-02	Sampling locations were determined using XRF screening Results indicated an arsenic concentration of 278 ppm at SB-H11-9336-01 and 1,310 ppm at SB-H11-9336-02	Metals, SVOCs, PCBs
H12-2	Soda Dry House #6	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H12-2-01 through SB-H12-2-03	SB-H12-2-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
H12-8563	Chlorinator House #2	Building demolished, area currently covered with gravel; Location determined from maps; No evidence of release	SB-H12-8563-01 through SB-H12-8563-03	SB-H12-8563-03 SB-H12-8563-01	Sampling location SB-H12-8563-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H12-8563-01	SVOCs
H13-408	Unknown	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H13-408-01 through SB-H13-408-03	SB-H13-408-02 SB-H13-408-03	Sampling location SB-H13-408-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H13-408-03	Metals, SVOCs
H13-9329	Pulp Dry House	Building demolished, no evidence of former building, foundation removed. Building debris present, end of rail evident. Location determined from maps. No evidence of release.	SB-H13-9329-01 through SB-H13-9329-03	SB-H13-9329-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
H8-585	Chemical Storage	Bldg demolished-concrete rubble present; No evidence of release	SB-H8-585-01 through SB-H8-585-03	SB-H8-585-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 436 ppm at SB-H08-585-01	Metals
H8-69E	Ingredient Storage	Bldg demolished-evidence of former store house largely removed. No evidence of release.	SB-H8-69E-01 through SB-H8-69E-03	SB-H8-69E-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
H8-8262	Corporation Yard	Area cleared;discolored soil present in NE; No evidence of release	SB-H8-8262-01 through SB-H8-8262-03	SB-H8-8262-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
H8-9226	Break Room	Bldg demolished; area largely vegetated and grass covered; No evidence of release	SB-H8-9226-01 through SB-H8-9226-03	SB-H8-9226-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
H9-10	Former Pond	Saturated area with tall grass, currently no stressed vegetation. Location determined from maps. No evidence of release (area=1,400 sq ft).	SB-H9-10-01 through SB-H9-10-05	SB-H9-10-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
H9-2261	Unknown	Wooden construction over concrete foundation; AC unit on W corner; probably an office bldg.; No evidence of release	SB-H9-2261-01 through SB-H9-2261-04	SB-H9-2261-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 433 ppm at SB-H09-2261-04	Metals, E&E
H9-8155	Engineering Office	Building demolished, area currently covered with vegetation. Location determined from maps. No evidence of release.	SB-H9-8155-01 through SB-H9-8155-03	SB-H9-8155-02 SB-H9-8155-01	Sampling location SB-H9-8155-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H9-8155-01	SVOCs
H9-8238	Maintenance Office	Building demolished, area of reduced vegetation indicates location. Location determined from maps. Septic tank vent pipe apparent (one sludge sample taken during Single Phase Remediation effort). No evidence of release.	SB-H9-8238-01 through SB-H9-8238-03 TP-H9-8238-04	SB-H9-8238-01 SB-H9-8238-02 SB-H9-8238-03 TP-H9-8238-04	Sampling location was determined using professional judgement screening results did not warrant biased sampling	Metals

Table 5-46

Maintenance Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I11-9117	Ammonia Storage Tanks	Tanks and cradles removed, area now covered with vegetation. Location determined from maps. No evidence of release.	SB-I11-9117-01 through SB-I11-9117-06	SB-I11-9117-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-47

B-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J11-B25	Unknown	Only aggregate remains at former location; Location determined from historical maps; No evidence of release	SB-J11-B25-01 through SB-J11-B25-03	SB-J11-B25-02 SB-J11-B25-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-B25-02. A confirmation sample was collected at SB-J11-B25-01. Analytical results did not detect elevated E&E concentrations.	SVOCs
I11-1	B-Line Canteen	Wood/vinyl construction; No indication of chemicals or potential release	SB-I11-1-01 through SB-I11-1-04	SB-I11-1-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-I11-1-03	E&E, SVOCs
I11-7	Unknown Foundation	Dilapidated concrete footer; No evidence of a release	SB-I11-7-01 through SB-I11-7-03	SB-I11-7-03 SB-I11-7-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-I11-7-03. A confirmation sample was collected at SB-I11-7-01. Analytical results did not detect elevated E&E concentrations.	SVOCs
I11-8260	Change House	Corrugated sheet metal construction ; No evidence of a release	SB-I11-8260-01 through SB-I11-8260-04	SB-I11-8260-02 SB-I11-8260-03	Sampling location SB-I11-8260-02 was determined using XRF screening; Results indicated a lead concentration of 406 ppm at SB-I11-8260-02; Group B E&E materials were also detected at SB-I11-8260-02. A confirmation sample was collected at SB-I11-8260-03.	Metals, SVOCs, E&E
I11-8504	B-Line Pump House	Wooden and corrugated sheet metal construction; Storage tank at SW corner, oil-water separator on W side; (Sampled during Single Phase Remediation); No evidence of a release	SB-I11-8504-01 through SB-I11-8504-06 TP-I11-8504-07	SB-I11-8504-03 SB-I11-8504-04 SB-I11-8504-06 TP-I11-8504-07	Sampling location SB-I11-8504-03 was determined using professional judgement; Sampling locations SB-I11-8504-04/06 were determined using an Expray Test Kit. Group B E&E materials were detected at SB-I11-8504-04/06. Test Pit location was placed downgradient from sump. Analytical results did not detect elevated E&E concentrations.	Metals, SVOCs
I12-4	Foundation	Building demolished, large concrete foundations with protruding rebar, continuous footers below larger support foundations. Portions of former brick walls present. No evidence of a release	SB-I12-4-01 through SB-I12-4-05	SB-I12-4-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-I12-4-01 Analytical results did not detect elevated E&E concentrations	Metals, SVOCs
I12-8101	Ammonia Oxidation	Building demolished, remains include concrete and rebar; foundation, parts of brick walls, and wood building; No evidence of a release	SB-I12-8101-01 through SB-I12-8101-05	SB-I12-8101-01 SB-I12-8101-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-I12-8101-01. A confirmation sample was collected at SB-I12-8101-02. Analytical results did not detect elevated E&E concentrations.	SVOCs

Table 5-47

B-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J10-2187	Filament Winding Building	Only demolition rubble in soil indicates presence of former building. No evidence of a release.	SB-J10-2187-01 through SB-J10-2187-05	SB-J10-2187-05 SB-J10-2187-01	Sampling location SB-J10-2187-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J10-2187-01.	Metals
J10-5	B-Line Office	Brick building over concrete foundation. No evidence of a release. Occupies half of the foundation, equipment storage the other half.	SB-J10-5-01 through SB-J10-5-06	SB-J10-5-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 653 ppm at SB-J10-5-01	Metals, SVOCs
J10-8280	Unknown	Minor amounts of building rubble are only remaining evidence of a building. Location determined from historical maps. No evidence of a release.	SB-J10-8280-01 through SB-J10-8280-03	SB-J10-8280-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
J11-1	Spray Field B	Currently heavily vegetated, little trace of former sprayfield. Ditch dug from K11-2301 to water detention basin to prevent flow into building area 2300. No evidence of a release (area=26,000 sq ft).	SB-J11-1-01 through SB-J11-1-20	SB-J11-1-01 through SB-J11-1-20	Sampling locations were determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-1-01/02/07/14/17. Confirmation samples were taken at the remaining locations.	SVOCs, E&E
J11-10	Unknown	Concrete containment structure, trailer-mounted tank on pad. Drainage to PVC pipe outlet on E end. No evidence of a release.	SB-J11-10-01 through SB-J11-10-05	SB-J11-10-05	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-10-05	SVOCs, E&E
J11-2188	B-Line Mix House	Wooden construction over concrete foundation with multiple loading areas. Brick walls separate each mix house. Sumps and floor drains surround building. Potential former discharge to ground/sumps.	SB-J11-2188-01 through SB-J11-2188-08 TP-J11-2188-09 through TP-J11-2188-11	SB-J11-2188-03 SB-J11-2188-06 SB-J11-2188-08 TP-J11-2188-09 TP-J11-2188-10 TP-J11-2188-11	Sampling locations were determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-2188-03/06/08 Test Pit locations were placed downgradient from sumps	Metals, E&E, SVOCs
J11-2296	Control Room	Building demolished, only concrete masonry unit foundation and ceramic steampipe vent catch remain. No evidence of release.	SB-J11-2296-01 through SB-J11-2296-05	SB-J11-2296-04 SB-J11-2296-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-2296-04. A confirmation sample was collected at SB-J11-2296-02.	E&E, SVOCs
J11-2298	Extruder/Cutter	Wooden construction over concrete foundation. Concrete walls divide building into thirds.	SB-J11-2298-01 through SB-J11-2298-05	SB-J11-2298-04	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-2298-04	SVOCs, E&E

Table 5-47

B-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J11-3	Former Tank	Two tank cradles where tanks formerly stood; No evidence of a release	SB-J11-3-01 through SB-J11-3-06	SB-J11-3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	VOCs
J11-317	Powder Testing Grounds	Stressed soil area, pieces of lead present; Small amounts of vegetation returning (area=2,200 sq ft)	SB-J11-317-01 through SB-J11-317-08	SB-J11-317-01 SB-J11-317-03 SB-J11-317-05 SB-J11-317-06	Sampling location SB-J11-317-01 was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-317-01 Sampling locations SB-J11-317-03/05/06 were determined using XRF screening; Results indicated a lead concentration of 811 ppm and a copper concentration of 1,400 ppm at SB-J11-317-03, a lead concentration of 780 ppm at SB-J11-317-05, and 427 ppm at SB-J11-317-06.Analytical results did not detect elevated E&E concentrations.	Metals, SVOCs, E&E
J11-6	Storage Tank	Surrounded by concrete containment. Pipe feeds to B-Line Mix House. Posted as holding water, acetone, ethanol, NG, NC, and process water. No evidence of a release.	SB-J11-6-01 through SB-J11-6-04	SB-J11-6-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-6-03 Analytical results did not detect elevated E&E concentrations.	VOCs
J11-8265	Store House	Building demolished, footers and debris still present; Location determined from footers and maps; No evidence of a release	SB-J11-8265-01 through SB-J11-8265-05	SB-J11-8265-04	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-8265-04	Metals, E&E
J11-8570	Wastewater Holding #1	2 sump pumps on concrete pad, sump piping leads away to WWTP. No evidence of a release.	SB-J11-8570-01 through SB-J11-8570-04 TP-J11-8570-05	SB-J11-8570-01 TP-J11-8570-05	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-8570-02 Test Pit location was placed downgradient from sump	VOCs
J12-3	Unknown	Old stone wall with depression in front; Possible surface runoff from powder grinder; No evidence of a release (area=100 sq ft)	SB-J12-3-01 through SB-J12-3-03	SB-J12-3-02	Sampling location was determined using XRF screening; Results indicated a lead concentration of 1,605 ppm at SB-J12-3-02	Metals, E&E, SVOCs
K10-1	Concrete Pad	Concrete pad, possible heater or electrical pad for Pedry House. No evidence of a release.	SB-K10-1-01 through SB-K10-1-04	SB-K10-1-01 SB-K10-1-02	Sampling location SB-K10-1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K10-1-02.	SVOCs
K10-2	Unknown Containment Area	Large concrete containment basin with high concrete walls; Large pipe outlet in SE corner; No evidence of a release	SB-K10-2-01 through SB-K10-2-05	SB-K10-2-02 SB-K10-2-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs

Table 5-47

Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
K10-2090	Pedry House	Wooden construction over concrete foundation; Concrete culvert to adjacent control house; Two berms and multiple loading area present; Stressed vegetation at N corner	SB-K10-2090-01 through SB-K10-2090-08	SB-K10-2090-01 SB-K10-2090-04 SB-K10-2090-07 SB-K10-2090-08	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
K10-2197	Curing House	Corrugated steel vault with wooden front doors; Blower unit at rear enters vault at back; No evidence of a release	SB-K10-2197-01 through SB-K10-2197-06	SB-K10-2197-05 SB-K10-2197-04	Sampling location SB-K10-2197-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K10-2197-04.	Metals, SVOCs, E&E
K10-2197A	Curing House	Corrugated steel vault with concrete footer, wooden front facade soil overlain; Loading area in front; No evidence of a release	SB-K10-2197A-01 through SB-K10-2197A-05	SB-K10-2197A-01 SB-K10-2197A-05	Sampling location SB-K10-2197A-05 was determined using an Expray Test Kit. Group B E&E materials were detected at SB-K10-2197A-05; Sampling location SB-K10-2197A-01 was dertermined using professional judgement.	E&E, SVOCs
K10-2266	Control Room	Plaster over concrete masonry unit construction; Concrete culverts leads to Pedry House on SE side; No evidence of a release	SB-K10-2266-01 through SB-K10-2266-07	SB-K10-2266-04 SB-K10-2266-05	Sampling location SB-K10-2296-04 was determined using an Expray Test Kit. Group B E&E materials were detected at SB-K10-2266-04; Sampling location SB-K10-2266-05 was dertermined using professional judgement.	Metals, SVOCs, E&E
K10-3	Smokeless Powder Storage	Building demolished, only stone foundation remains; No evidence of a release (area=900 sq ft)	SB-K10-3-01 through SB-K10-3-04	SB-K10-3-02	Sampling location was determined using XRF screening; Results indicated a lead concentration of 1,203 ppm at SB-K10-3-02	Metals
K10-5	Stressed Vegetation	Aggregate and reddish stained soil (possibly iron staining); Shape follows surface drainage pattern, leading away from Pedry House (area=1,200 sq ft)	SB-K10-5-01 through SB-K10-5-04	SB-K10-5-02 SB-K10-5-04	Sampling location was determined using XRF screening; Results indicated a copper concentration of 1,310 ppm at SB-K10-5-02	Metals
K11-1 K11-2	Unknown Foundation	Concrete foundation and former building rubble present. Pipes present at W and S corner protruding from foundation corner. No evidence of a release.	SB-K11-1-01 through SB-K11-1-05	SB-K11-1-04 SB-K11-1-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
K11-2225B	Coating House Paraplex Tank	Paraplex tank mounted on concrete saddles wrapped in corrugated metal. Pump on S side and piping leading to Bldg. 2225, concrete pad on S side. No evidence of a release.	SB-K11-2225B-01 through SB-K11-2225B-04	SB-K11-2225B-02 SB-K11-2225B-04	Sampling location SB-K11-2225B-04 was determined using an Expray Test Kit. Group B E&E materials were detected at SB-K11-2225B-04; Sampling location SB-K10-2225B-02 was dertermined using professional judgement.	SVOCs, E&E

Table 5-47

B-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
K11-2264	Heater House	Metal siding over metal frame construction, concrete footer; Condenser on concrete pad to SE corner; No evidence of a release	SB-K11-2264-01 through SB-K11-2264-04	SB-K11-2264-04 SB-K11-2264-03	Sampling location SB-K11-2264-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-2264-03.	SVOCs
K11-2300	B-Line Press and Cut	Concrete Masonry Unit/corrugated sheet metal construction. Concrete walls in separate areas. Floor drains previously discharged to ground. Sump associated with the building	SB-K11-2300-01 through SB-K11-2300-06 TP-K11-2300-07	SB-K11-2300-01 SB-K11-2300-05 TP-K11-2300-07	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling Test Pit location placed downgradient from sump	SVOCs, E&E
K11-2301	Heater House	Corrugated metal and wood construction. Duct feed to Bldg. 2300, feed from adjacent stream line into Bldg. 2301. No evidence of a release.	SB-K11-2301-01 through SB-K11-2301-04	SB-K11-2301-04 SB-K11-2301-02	Sampling location SB-K11-2301-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-2301-02.	SVOCs
K11-2302	Cut and Rest House	Wooden construction over concrete foundation. Indicated by Roux as previous wastewater release. Concrete wall on W side. No direct evidence of a release.	SB-K11-2302-01 through SB-K11-2302-05	SB-K11-2302-03 SB-K11-2302-05	Sampling locations were determined using an Expray Test Kit. Group B E&E materials were detected at SB-K11-2302-03/05	SVOCs, Metals, E&E
K11-3	Debris Area	No evidence of former debris, all has been removed; No evidence of a release	SB-K11-3-01 through SB-K11-3-03	SB-K11-3-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-K11-3-02	SVOCs, E&E
K11-598	Final Press and Grain #3	Remnant Building, location determined from historical ı	SB-K11-598-01 through SB-K11-598-03	SB-K11-598-03 SB-K11-598-02	Sampling location SB-K11-598-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-598-02.	SVOCs
K11-601	Cutting House #3	Remnant Building, location determined from historical ı	SB-K11-601-01 through SB-K11-601-03	SB-K11-601-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
K11-604	Press & Grain #4	Remnant Building, location determined from historical ı	SB-K11-604-01 through SB-K11-604-03	SB-K11-604-02 SB-K11-604-03	Sampling location SB-K11-604-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-604-03.	SVOCs, E&E
L10-2	Unknown Foundation	Building demolished, only concrete foundation remaining; Currently an overgrown area; No evidence of a release	SB-L10-2-01 through SB-L10-2-05	SB-L10-2-02 SB-L10-2-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L10-2-02. A confirmation sample was collected at SB-L10-2-01.	E&E, SVOCs

B-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
L10-2088/2255/ 2256/2258	Former 4 Buildings	Area covered with piles of soil, building debris and pipes; Location determined from historical maps; Unable to determine if release present	SB-L10-2088-01 through SB-L10-2088-03	SB-L10-2088-02 SB-L10-2088-01	Sampling location SB-L10-2088-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L10-2088-01.	E&E, SVOCs
L10-2191	Cabinet Dryers 37,38,39	Only concrete footers and loading dock remain; 1" steel pipe at dock (NW side); Stressed vegetation present	SB-L10-2191-01 through SB-L10-2191-07	SB-L10-2191-02 SB-L10-2191-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
L10-2242	Dry House	Only concrete rubble and pad remaining as evidence of a building. No evidence of a release.	SB-L10-2242-01 through SB-L10-2242-04	SB-L10-2242-03 SB-L10-2242-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L10-2242-03. A confirmation sample was collected at SB-L10-2242-02. Analytical result did not detect elevated E&E concentrations.	SVOCs
L10-2316	Pump House	Building demolished. Location determined from historical maps and site features. No evidence of a release.	SB-L10-2316-01 through SB-L10-2316-03	SB-L10-2316-02	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 269 ppm at SB-L10-2316-02	Metals, SVOCs
L10-6	Waste Powder Storage	Building demolished, brick and concrete foundation remain. SE edge of foundation paved over. No evidence of a release.	SB-L10-6-01 through SB-L10-6-05	SB-L10-6-05 SB-L10-6-01	Sampling location SB-L10-6-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L10-6-01.	E&E
L10-725	Solvent Recovery and W. Dry House	Building demolished, macadam and vegetation currently cover area. Location determined from historical maps. No evidence of a release.	SB-L10-725-01 through SB-L10-725-03	SB-L10-725-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L10-725-01 Analytical result did not detect elevated E&E concentrations	SVOCs, E&E
L10-8210	Store House	Minor amounts of brick and concrete rubble only remaining evidence of a building. Location determined from historical maps. No evidence of a release.	SB-L10-8210-01 through SB-L10-8210-03	SB-L10-8210-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L10-8210-03	E&E, SVOCs
L10-8215	Outside Toilets	Building demolished, minimal evidence of buildings present; Location determined from historical maps; No evidence of a release	SB-L10-8215-01 through SB-L10-8215-03	SB-L10-8215-02 SB-L10-8215-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L10-8215-02. A confirmation sample was collected at SB-L10-8215-01. Analytical result did not detect elevated E&E concentrations	E&E, SVOCs
L10-B462	Steeping House #2	Only concrete rubble remaining as evidence of a building; Location determined from historical maps; No evidence of a release	SB-L10-B462-01 through SB-L10-B462-03	SB-L10-B462-03 SB-L10-B462-01	Sampling location SB-L10-B462-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L10-B462-01.	SVOCs

Table 5-47

B-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
L11-1	Unknown Containment Basin	Two large circular concrete pads held within a larger basin; Adjacent to L11-2089; No evidence of a release	SB-L11-1-01 through SB-L11-1-04	SB-L11-1-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
L11-2	Tank Cradles	Concrete tank cradles large enough to hold 6' diameter tank; Covered in tar paper; No evidence of a release	SB-L11-2-01 through SB-L11-2-03	SB-L11-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
L11-2089	Glazing/Coating House	New wooden construction over concrete foundation; Catch tank on W corner; Sump associated with the building. No evidence of release.	SB-L11-2089-01 through SB-L11-2089-05 TP-L11-2089-06	SB-L11-2089-01 SB-L11-2089-05 TP-L11-2089-06	Sampling location SB-L11-2089-05 was determined using professional judgement; Sampling location SB-L11-2089-01 was determined using an Expray Test Kit. Group B E&E materials were detected. Test Pit location was placed downgradient from the sump.	SVOCs, E&E
L11-2091	Heater House	Concrete pad with steam pipes leading to L11-2089; Drain pipe on W corner; No evidence of release	SB-L11-2091-01 through SB-L11-2091-05	SB-L11-2091-02 SB-L11-2091-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs
L11-2225	Coating House	Wooden, sheet metal, and fiberglass construction over a concrete foundation. Connections to control house and paraplex tank. No evidence of a release.	SB-L11-2225-01 through SB-L11-2225-07	SB-L11-2225-02 SB-L11-2225-05	Sampling locations were determined using an Expray Test Kit. Group B E&E materials were detected at SB-L11-2225-02/05	Metals, E&E
L11-2226	Control House	Concrete and wooden construction. Controls for coating barrel, screen, chem mix, rotoclone, paraplex pump, and fines collection. No evidence of a release.	SB-L11-2226-01 through SB-L11-2226-04	SB-L11-2226-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
L11-2303	Coating/Glazing Electrical Room	Wooden construction over concrete foundation and asphalt roof; Construction may not have been completed; No evidence of a release	SB-L11-2303-01 through SB-L11-2303-04	SB-L11-2303-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L11-2303-03 Analytical result did not detect elevated E&E concentrations	SVOCs, E&E
L8-1	Store House	Structure removed, only loading area, stacked rail ties and mounded soil/aggregate cover remains. No evidence of a release.	SB-L8-1-01 through SB-L8-1-05	SB-L8-1-01 SB-L8-1-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals
L9-1	Unknown	Possible AC or heater house for M09-2192; Only concrete pad remains; No evidence of a release (area=100 sq ft)	SB-L9-1-01 through SB-L9-1-03	SB-L9-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs

Table 5-47

B-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
L9-8210	Store House	Only brick and concrete rubble remain, building demolished; No evidence of a release	SB-L9-8210-01 through SB-L9-8210-05	SB-L9-8210-05	Sampling location was determined using XRF screening; Results indicated a lead concentration of 3,665 ppm at SB-L9-8210-05	SVOCs, Metals
M10-1	Unknown	Old building with cement footers, an old stack, a drum, and steel siding as debris.	SB-M10-1-01 through SB-M10-1-05	SB-M10-1-02 SB-M10-1-04	Sampling location SB-M10-1-02 was determined using professional judgement;Screening results did not warrant biased sampling. A confirmation sample was collected at SB-10-1-04.	Metals, E&E
M10-2262/ B41-6/ B41-7	Curing House/ B11-6/B41-7	Building demolished, area has been covered with aggregate; No evidence of a release	SB-M10-2262-01 through SB-M10-2262-05	SB-M10-2262-05 SB-M10-2262-04	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-M10-2262-05. A confirmation sample was collected at SB-M10-2262-04. Analytical results did not detect elevated E&E concentrations.	SVOCs
M10-2315	Vacuum House	Building has been removed, broken concrete foundations remain. No evidence of release (area=100 sq ft).	SB-M10-2315-01 through SB-M10-2315-04	SB-M10-2315-02	Sampling location was determined using XRF screening; Results indicated a copper concentration of 1,600 ppm at SB-M10-2315-02	Metals
M10-6	Unknown	Building demolished, only concrete footer and surrounding; berm indicate building location; Empty drum and bucket present; No evidence of a release	SB-M10-6-01 through SB-M10-6-05	SB-M10-6-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
M10-7	B-Line Halfway Dock	Wooden construction with no walls (only roof and floor); No evidence of a release	SB-M10-7-01 through SB-M10-7-04	SB-M10-7-02 SB-M10-7-03	Sampling location SB-M10-7-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M10-7-03.	E&E
M10-724	Solvent Recovery and W. Dry House	Indication of former building removed; Location determined from historic maps; No evidence of release, however stained soil M10-4 is adjacent	SB-M10-724-01 through SB-M10-724-03	SB-M10-724-01 SB-M10-724-03	Sampling location SB-M10-724-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M10-724-03.	SVOCs, E&E
M11-3	Unknown	Building demolished, four wooden posts at corners debris on E side. No evidence of a release (area=500 sq ft).	SB-M11-3-01 through SB-M11-3-04	SB-M11-3-02 SB-M11-3-03	Sampling location SB-M11-3-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M11-3-03.	Metals, SVOCs

Table 5-47

B-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
M8-2	Unknown	Cement foundation with four concrete footers and leftover bricks; Building probably associated with adjacent cabinet dryer. No evidence of a release.	SB-M8-2-01 through SB-M8-2-05	SB-M8-2-05	Sampling location was determined using XRF screening; Results indicated a lead concentration of 431 ppm at SB-M8-2-05	Metals, SVOCs
M8-2196	Cabinet Dryers	Complex building that housed three cabinet dryers. Three loading areas to the S. Two stressed vegetation areas to the N. Foundations and loading area are intact and all that remain.	SB-M8-2196-01 through SB-M8-2196-08	SB-M8-2196-03 SB-M8-2196-07 SB-M8-2196-08	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	E&E
M9-2191	Former Rocket House	Building has been completely removed. Only a cut out portion of slope and a steam pipe junction remain. Minor debris remains. No evidence of a release.	SB-M9-2191-01 through SB-M9-2191-05	SB-M9-2191-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
M9-2192	Cabinet Dryers 40,41,42	Loading dock and concrete footers remain. Line of steel supports lead to dock from near concrete footers. Stressed vegetation on N corner leading away from footers.	SB-M9-2192-01 through SB-M9-2192-06	SB-M9-2192-03 SB-M9-2192-05 SB-M9-2192-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	E&E
M9-2193	Cabinet Dryers 43,44,45	Loading dock and concrete footers remain; Loading areas on SW loading dock; Stressed vegetation on N corner	SB-M9-2193-01 through SB-M9-2193-06	SB-M9-2193-01 SB-M9-2193-05 SB-M9-2193-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	E&E
M9-2251	Solvent Prep House	Only one footer remains with no other evidence of a building; No evidence of a release (area=500 sq ft)	SB-M9-2251-01 through SB-M9-2251-04	SB-M9-2251-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
M9-2254	A.C. House	Only concrete pad remains on the NE side of M09-2193; No evidence of a release (area=100 sq ft)	SB-M9-2254-01 through SB-M9-2254-03	SB-M9-2254-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
M9-2261	Catch Tank House	Building has been removed, only flat area with some reinforcing rod and electrical conduit remain. No evidence of a release.	SB-M9-2261-01 through SB-M9-2261-04	SB-M9-2261-01 SB-M9-2261-02	Sampling location SB-M9-2261-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M9-2261-02.	SVOCs
M9-3	Unknown	Building demolished, concrete footer with rebar protruding; No evidence of a release (area=100 sq ft)	SB-M9-3-01 through SB-M9-3-03	SB-M9-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs

Table 5-47

B-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
N8-2304	Utility House	Old steel sided building with stained soil at the W corner. Multiple electrical conduit lines, a steam line, steam sump, and instrument control panel.	SB-N8-2304-01 through SB-N8-2304-05	SB-N8-2304-01 SB-N8-2304-05	Sampling locations were determined using an Expray Test Kit. Group B E&E materials were detected at SB-N8-2305-01/05 Analytical results did not detect elevated E&E concentrations.	SVOCs
N9-2195	Former Rocket House	Only cut-out of the berm, an air compressor, and old pipe remain. Possibility of some stained soil near pipe. Insulation and sand also present on ground.	SB-N9-2195-01 through SB-N9-2195-06	SB-N9-2195-02 SB-N9-2195-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
N9-2260	Unknown		SB-N9-2260-01 through SB-N9-2260-03	SB-N9-2260-01	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs
N9-2267	Glaze/Screen House	Two story steel sided building with a great deal of electrical conduit. Three loading docks and an wood supported earthen berm in W corner. No evidence of a release.	SB-N9-2267-01 through SB-N9-2267-05	SB-N9-2267-03 SB-N9-2267-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
N9-2269	Control House	Small concrete foundation with steel siding; No evidence of a release	SB-N9-2269-01 through SB-N9-2269-04	SB-N9-2269-04	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-N9-2269-04	SVOCs
O8-2274/ 2270/2273	X-Ray House	Earthen covered structure houses three buildings. Asbestos covered steam pipe on S side, small pad on N corner. No evidence of a release.	SB-O8-2274-01 through SB-O8-2274-04	SB-O8-2274-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-48

A-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
E10-2101/ 2102/2103	Premix House # 2	Wooden and concrete block foundation; alcohol feed (2101); Floor drains to Catch Tank House (2289)	SB-E10-2101-01 through SB-E10-2101-12	SB-E10-2101-05 SB-E10-2101-12	Group B E&E materials were detected at SB-E10-2101-05 and SB-E10-2101-12 using an Expray Test Kit	SVOCs, E&E
E10-615	Unknown	Bldg demolished-only portions of former foundation remains; No evidence of release (area=400 sq ft)	SB-E10-615-01 through SB-E10-615-04	SB-E10-615-04	Group B E&E materials were detected at SB-E10-615-04 using an Expray Test Kit	SVOCs, E&E
E9-1	Store House	Wooden construction over concrete block; seven loading; doors on SE and NW sides; stressed vegetation leads to culvert on SE side of bldg.			This AOC has been referred to the Remedial Investigation due to the presence of energetics	E&E
E9-2	Unknown Containment Pad	Concrete pad with 4' high containment around perimeter; Stainless steel piping to SE; No evidence of release	SB-E9-2-01 through SB-E9-2-04	SB-E9-2-03 SB-E9-2-01	Group B E&E materials were detected at SB-E9-2-03 using an Expray Test Kit. A confirmation sample was collected at SB-E9-2-01	E&E
E9-2119	Dry House	Wooden construction over concrete foundation; rail line; loading area on NW side; two steam pipe outlets on SE side; No evidence of release			This AOC has been referred to the Remedial Investigation due to the presence of powder on the ground	E&E
E9-2153	Unknown Name	Corrugated metal over wooden structure built on concrete; foundation; conduit leads to 2119; electrical controls present; inside; possible second control house adjacent to F8-6; No evidence of release	SB-E9-2153-01 through SB-E9-2153-04	SB-E9-2153-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
E9-2161	Poach House	Bldg demolished-concrete footers remain; No evidence of release	SB-E9-2161-01 through SB-E9-2161-05	SB-E9-2161-04	Group B E&E materials were detected at SB-E9-2161-04 using an Expray Test Kit	SVOCs, E&E
E9-2296	Slurry Coat House	Wooden and fiberglass construction over concrete foundation Octagonal tank support at N corner; sump at W corner; multiple loading areas; Sump associated with the building. No evidence of release	SB-E9-2296-01 through SB-E9-2296-08 TP-E9-2296-09	SB-E9-2296-04 SB-E9-2296-05 SB-E9-2296-06 SB-E9-2296-07 TP-E9-2296-09	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling Test Pit location placed downgradient from the sump	E&E
E9-2297	Unknown		SB-E9-2297-01 through SB-E9-2297-04	SB-E9-2297-02	Group B E&E materials were detected at SB-E9-2297-02 using an Expray Test Kit	Metals, E&E
E9-2337	100-ft Dryer	Wood construction over concrete block; steam process water line leads to SE. No evidence of a release.			This AOC has been referred to the Remedial Investigation due to the presence of powder on the ground	E&E
E9-558B	Dehydrator Press	Bldg demolished-minor amounts of concrete and rubble present outline of foundation evident. No evidence of a release (area=100 sq ft).	SB-E9-558B-01 through SB-E9-558B-03	SB-E9-558B-03	Group B E&E materials were detected at SB-E9-558B-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	Metals

Table 5-48

A-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
E9-562	AL Mixing House	Bldg demolished-minimal evidence of former bldg; No evidence of release (area=100 sq ft)	SB-E9-562-01 through SB-E9-562-03	SB-E9-562-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
E9-610	Unknown	Bldg demolished-only concrete foundation and footers remain; No evidence of release	SB-E9-610-01 through SB-E9-610-05	SB-E9-610-04	Group B E&E materials were detected at SB-E9-610-04 using an Expray Test Kit	SVOCs, E&E
F10-11	Molten Lead in Soil	Small piles of molten lead in soil (area=100 sq ft)	SB-F10-11-01 through SB-F10-11-02	SB-F10-11-01	Group B E&E materials were detected at SB-F10-11-01 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	Metals
F10-2094	NC Weigh House	Wooden construction over concrete foundation-loading area on SE side; new floor drain on NW side routed to adjacent culvert to WWTP. No evidence of release.			This AOC has been referred to the Remedial Investigation due to the presence of powder on the ground	E&E
F10-2096	Cotton Dehy Press	Foundation; floor drains drain to NE corner; pit A10-PVC pipe drain enters ground at NE corner; brick separation wall in center; tank cradles on NW side (storage tank removed). No evidence of release.	SB-F10-2096-01 through SB-F10-2096-08	SB-F10-2096-06 SB-F10-2096-07 SB-F10-2096-08	Group B E&E materials were detected at SB-F10-2096-06/07/08 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	Metals, SVOCs, E&E
F10-2145	Heater House	Wooden construction over concrete foundation; 1' x 2' duct to 2094. No evidence of release.	SB-F10-2145-01 through SB-F10-2145-04	SB-F10-2145-01 SB-F10-2145-04	Sampling location SB-F10-2145-04 was determined using XRF screening; Results indicated a lead concentration of 416 ppm at SB-F10-2145-04 Group B E&E materials were detected at SB-F10-2145-01 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	SVOCs, E&E
F10-2222	Alcohol Still House	Five story still house-wood and corrugated sheet metal over concrete foundation; weak and strong alcohol feed lines enter rear of bldg catch tank at S corner; No evidence of release	SB-F10-2222-01 through SB-F10-2222-04	SB-F10-2222-01 SB-F10-2222-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	VOCs
F10-2323	Heater House	Wooden construction; steam pipe vents on S side to 7" diameter area of stressed vegetation; concrete foundation.	SB-F10-2323-01 through SB-F10-2323-05	SB-F10-2323-02 SB-F10-2323-05	Sampling location SB-F10-2323-05 determined using professional judgement; Group B E&E materials were detected at SB-F10-2323-02 using and Expray Test Kit	Metals, E&E
F10-3	Tank Cradles	Concrete tank cradles-60% on S side mounted on concrete pad; 40% on N end not mounted on concrete pad; 6" pipe with valve at end extends out of ground; concrete catch pit also present; No evidence of release	SB-F10-3-01 through SB-F10-3-07	SB-F10-3-01 SB-F10-3-07	Sampling location SB-F10-3-01 was determined using professional judgement; Sampling location SB-F10-3-07 was determined using E&E screening; Group B E&E materials were detected at SB-F10-3-07	SVOCs, E&E
F10-460	Unknown	Bldg demolished-minimal evidence of former bldg; No evidence of release (area=100 sq ft)	SB-F10-460-01 through SB-F10-460-03	SB-F10-460-01	Sampling location SB-F10-460-01 was determined using XRF screening; Results indicated an lead concentration of1,690 ppm at SB-F10-460-01	Metals
F10-7	Stressed Vegetation	Gray-brown discolored soil between cotton weigh house and 9116 tank storage area; very soft consistency; adjacent wet area (area=100 sq ft)	SB-F10-7-01 through SB-F10-7-03	SB-F10-7-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals

Table 5-48

A-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
F10-8237	Process Control Center	Wooden and corrugated sheet metal construction-office bldg, computers present; storage shed off N corner with tank cradles present-tank removed. Septic tank associated with the building. No evidence of release.	SB-F10-8237-01 through SB-F10-8237-07 TP-F10-8237A-01	SB-F10-8237-04 SB-F10-8237-05 TP-F10-8237A-01	Group B E&E materials were detected at SB-F10-8237-04/05 using an Expray Test Kit Test Pit location downgradient from septic	E&E
F10-PA8	Waste Water Pit	Collection sump with associated float switches, pumps, and piping steel tank cast in concrete; wastewater odor; piping enters from tank storage area and powerhouse area; No evidence of release	SB-F10-PA8-01	SB-F10-PA8-01	Test Pit location placed between F10-PA8 and F10-PA9. Labeled F10-PA8	E&E SVOCs
F11-2016	Can Pack House	Sections of different construction- brick, wood, wood covered with corrugated sheet metal; loading area on SW side; heater unit and AC unit on NW side; no piping evident; No evidence of release	SB-F11-2016-01 through SB-F11-2016-08	SB-F11-2016-01 SB-F11-2016-06 SB-F11-2016-07	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	E&E, SVOCs
F8-2107	Finishing Press (5-House Area)	Wooden and corrugated sheet metal construction with concrete foundation and interior concrete wall partitions; floor drain runs along NW side; uncovered heater equipment on NW side; loading area on SE side; No evidence of release	SB-F8-2107-01 through SB-F8-2107-05	SB-F8-2107-01 SB-F8-2107-02 SB-F8-2107-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
F8-2116	Dry House	Wooden construction with sheet metal lined doors and walls; Rail loading area on W side; concrete foundation; No evidence of release	SB-F8-2116-01 through SB-F8-2116-10	SB-F8-2116-03 SB-F8-2116-07 SB-F8-2116-09 SB-F8-2116-10	Sampling locations SB-F8-2116-09/10 were determined using XRF screening; Results indicated a copper concentration of 842 ppm at SB-F8-2116-09 and a lead concentration of 543 ppm at SB-F8-2116-10. Group B E&E materials were detected at SB-F8-2116-03/07 using an Expray Test Kit	Metals, E&E, SVOCs
F8-2117	Dry House	Bldg demolished-concrete rubble, charred timbers, beams, and metal debris remains; layer of green anti-static material evident beneath former floor; appears explosion occurred here; No evidence of release, but debris very scattered	SB-F8-2117-01 through SB-F8-2117-10	SB-F8-2117-07 SB-F8-2117-08	Sampling location SB-F8-2117-07 was determined using XRF screening; Results indicated an arsenic concentration of 153 ppm at SB-F8-2117-07 Group B E&E materials were detected at SB-F8-2117-08 using an Expray Test Kit	Metals, E&E
F8-2118	Dry House	Wood and corrugated metal over concrete foundation; concrete with wooden rail loading area on NW side; additional loading area to SE side; floor drains lead to catch tank through concrete gutter; catch tank at W corner (Catch tank sampled and removed during Single Phase Remediation effort). No evidence of release.	SB-F8-2118-01 through SB-F8-2118-10	SB-F8-2118-02 SB-F8-2118-10	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E, SVOCs
F8-2144	Heater Pad	Concrete pad with heater equipment and appurtenances; no housing for equipment; drainage leads to adjacent culvert; stressed vegetation along drainage path to culvert	SB-F8-2144-01 through SB-F8-2144-06	SB-F8-2144-03 SB-F8-2144-04 SB-F8-2144-06	Sampling locations SB-F8-2144-03/06 were determined using XRF screening; Results indicated a lead concentration of 421 ppm at SB-F8-2144-03 and 1,732 at SB-F8-2144-06. Group B E&E materials were detected at SB-F8-2144-04 using an Expray Test Kit	Metals, E&E
F8-2150	Heater House	Wooden construction with corrugated sheet metal over concrete foundation; stressed vegetation leads from steam pipes which protrude from S corner-area extends past RR line on SE side of G8-2116	SB-F8-2150-01 through SB-F8-2150-05	SB-F8-2150-02 SB-F8-2150-05	Sampling location SB-F8-2150-02 was determined using professional judgement; Sampling location SB-F8-2150-05 was determined using XRF screening; Results indicated a lead concentration of 719 ppm at SB-F8-2150-05	Metals

Table 5-48

A-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
F8-2152	Control/Heater House	Small control house next to heater mounted on steel I-beam; No evidence of release	SB-F8-2152-01 through SB-F8-2152-04	SB-F8-2152-02	Sampling location was determined using XRF screening; Results indicated a zinc concentration of 4,600 ppm at SB-F8-2152-02. Analytical results did not detect elevated metal concentrations.	SVOCs
F8-2207	Press/Cut House	Corrugated metal house overlain by soil; acetone/alcohol feedlines from G8-3; floor drains lead to 8562A; large berm to W. No evidence of a release.	SB-F8-2207-01 through SB-F8-2207-04	SB-F8-2207-01 SB-F8-2207-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals
F8-563D	Change House	Dilapidated old concrete foundation; rest of former bldg demolished. No evidence of release.	SB-F8-563D-01 through SB-F8-563D-05	SB-F8-563D-02	Sampling location SB-F8-563D-02 was determined using XRF screening; Results indicated a copper concentration of 1,370 ppm at SB-F8-563D-02. Analytical results did not detect elevated metal concentrations.	SVOCs
F8-573	Chemical Store House	Bldg demolished-minimal evidence of former store house; No evidence of release (area=100 sq ft)	SB-F8-573-01 through SB-F8-573-03	SB-F8-573-02	Group B E&E materials were detected at SB-F8-573-02 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	SVOCs
F8-575	Grinder House	Bldg demolished-concrete pad and bldg debris remain; No evidence of a release	SB-F8-575-01 through SB-F8-575-04	SB-F8-575-02 SB-F8-575-04	Sampling location SB-F8-575-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F8-575-04	SVOCs, E&E
F8-9	Diphenylamine Mix House	Bldg demolished-only concrete rubble remains; No evidence of release (area=100 sq ft)	SB-F8-9-01 through SB-F8-9-03	SB-F8-9-02	Sampling location SB-F8-9-02 was determined using XRF screening; Results indicated an arsenic concentration of 148 ppm at SB-F8-9-02	Metals, E&E
F9-1	Former Solvent Recovery House	Bldg demolished, area largely vegetated, minimal evidence of extent of recovery house; minor amounts of bldg debris present; No evidence of release	SB-F9-1-01 through SB-F9-1-05	SB-F9-1-04 SB-F9-1-01	Group B E&E materials were detected at SB-F9-1-04 using an Expray Test Kit. A confirmation sample was collected at SB-F9-1-01	SVOCs, E&E
F9-16	Unknown Foundation	Large concrete pad foundation-former bldg demolished 12 ' pipe enters the ground along SE side; currently G9-6 built on former bldg pad, a control house for F9-2109; No evidence of release	SB-F9-16-01 through SB-F9-16-05	SB-F9-16-04 SB-F9-16-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
F9-2105	Final Mix House	Wooden construction with concrete separation walls; floor drains to NW side; alcohol and acetone feed lines along the NW side-feed from the S corner extend to SW; electrical control room on W side. Sump associated with the building. No evidence of release.	SB-F9-2105-01 through SB-F9-2105-06 TP-F9-2105-07	SB-F9-2105-01 SB-F9-2105-05 TP-F9-2105-07	Group B E&E materials were detected at SB-F9-2105-01 using an Expray Test Kit. XRF screening results indicated a copper concentration of 621 ppm at SB-F9-2105-05. Test Pit location downgradient from sump.	SVOCs, E&E, Metals
F9-2105A	Control Room	Steel encased concrete circular control room; electrical controls inside; cutter, wiring, camera, lights, control switches evident No evidence of release.	SB-F9-2105A-01 through SB-F9-2105A-04	SB-F9-2105A-01 SB-F9-2105A-04	Sampling location SB-F9-2105A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F9-2105A-04	E&E, SVOCs
F9-2105B	Unknown Foundation	Large concrete pad foundation-former bldg demolished. Similar footprint to adjacent 2105; green anti-static material present. No evidence of release.	SB-F9-2105B-01 through SB-F9-2105B-05	SB-F9-2105B-01	Sampling location SB-F8-2105B-01 was determined using XRF screening; Results indicated an copper concentration of1,590 ppm at SB-F8-2105B-01	Metals, E&E

Table 5-48

A-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
F9-2106	Block Press House	Concrete block and corrugated sheet metal and fiberglass construction; heater equipment and "pit" on N corner-posted as "Confined space"; steps lead into dark basement area; Thick-walled control structure on S corner directed to central press area; walkways adjacent	SB-F9-2106-01 through SB-F9-2106-04	SB-F9-2106-04	Group B E&E materials were detected at SB-F9-2106-04 using an Expray Test Kit	SVOCs, E&E
F9-2109	Press House (7 House)	Wooden and corrugated sheet metal construction with concrete separation walls and concrete foundation; floor drains on SE side leads to sump; press bays on NW side; boarding and cutting bays on SE side; floor drains dilapidated-potential release	SB-F9-2109-01 through SB-F9-2109-08 TP-F9-2109-09	SB-F9-2109-01 SB-F9-2109-05 SB-F9-2109-08 TP-F9-2109-09	Group B E&E materials were detected at SB-F9-2109-01/05/08 using an Expray Test Kit Test Pit location placed downgradient from sump	SVOCs, E&E
F9-2109C	DIGL-RIP Block Conditioning Bldg	Sheet metal construction over concrete pad foundation-recent construction; large oven inside-listed as DIGL-RIP flammable; Listed for following: diethylene glycol, dinitrate NC, ethyl alcohol, acetone; stressed vegetation near W corner	SB-F9-2109C-01 through SB-F9-2109C-05	SB-F9-2109C-01 SB-F9-2109C-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
F9-2109A	Control House	Wooden construction over former concrete foundation; conduit leads to F9-2109; conveyor belt controls indicated on interior wall. No evidence of release.	SB-F9-16-01 through SB-F9-16-05	SB-F9-16-04 SB-F9-16-05	This AOC is located on the foundation of F9-16, and was sampled as part of F9-16	SVOCs, E&E
F9-2109D	Heater House	Wooden framed and sided heater house on concrete foundation; Steam pipe vents at W corner; Bottle storage area along SE side. No evidence of release.	SB-F9-2109D-01 through SB-F9-2109D-05	SB-F9-2109D-02 SB-F9-2109D-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
F9-2251/ 2254	Control House	Corrugated steel bldg-conduit leads to SW end of 2107; Concrete foundation. No evidence of release.	SB-F9-2251-01 through SB-F9-2251-04	SB-F9-2251-03 SB-F9-2251-01	Sampling location SB-F9-2251-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F9-2251-01	SVOCs
F9-5	Unknown	Bldg demolished; area clear of vegetation; ground stake present; wood, brick bldg debris present No evidence of release (area=100 sq ft)	SB-F9-5-01 through SB-F9-5-03	SB-F9-5-03	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-F09-5-03 using an Expray Test Kit	E&E, SVOCs
F9-563	Pre-Mix Store House	Bldg demolished-minimal evidence of former bldg; No evidence of release (area=100 sq ft)	SB-F9-563-01 through SB-F9-563-03	SB-F9-563-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
F9-611	Pump House	Bldg demolished-minimal evidence of former pump house; No evidence of release (area=100 sq ft)	SB-F9-611-01 through SB-F9-611-03	SB-F9-611-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
F9-8	Unknown Trailer Loading Pad	Trailer loading/unloading area; recently poured concrete foundation with PVC draining pipe on NW side; No evidence of release	SB-F9-8-01 through SB-F9-8-05	SB-F9-8-02 SB-F9-8-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
F9-8188	Unknown Shed	Bldg demolished; area of gravel and no vegetation indicates location of former shed; vegetation returning No evidence of release (area=100 sq ft)	SB-F9-8188-01 through SB-F9-8188-03	SB-F9-8188-01	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-F09-8188-01 using an Expray Test Kit	E&E

Table 5-48

A-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
F9-9	Unknown Containment Basin	Concrete containment basin-recently constructed; probably tank storage area; drainage pipe on N corner. No evidence of release.	SB-F9-9-01 through SB-F9-9-05	SB-F9-9-01 SB-F9-9-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs, E&E
F9-A4	Dehydration Scrap Shed	Bldg demolished-minimal evidence of former shed; No evidence of release (area=100 sq ft)	SB-F9-A4-01 through SB-F9-A4-03	SB-F0-A4-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
F9-A5	Unknown Shed	Corrugated sheet metal over wooden frame construction, storage only; two 4' x 6' sheds; No evidence of release	SB-F9-A5-01 through SB-F9-A5-04	SB-F9-A5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
F9-A6	Block Press House Scrap Shed	Bldg demolished; area of brown colored grass; No evidence of release (area=100 sq ft)	SB-F9-A6-01 through SB-F9-A6-03	SB-F9-A6-01	Group B E&E materials were detected at SB-F9-A6-01 using an Expray Test Kit	E&E, SVOCs
F9-C1	Press House Scrap Shed	Wooden construction over wooden foundation-temporary storage only- storage of "6 blocks/ 6 tubs". No evidence of release.	SB-F9-C1-01 through SB-F9-C1-04	SB-F9-C1-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
F9-PA4	Waste Water Pit	Two pipes enter from NW side, one from SW side; No evidence of release	TP-F9-PA4-01	TP-F9-PA4-01	Test Pit location was placed downgradient from the Pit.	E&E
F9-PA6	Collection Pit	Concrete-encased steel-lined WW sump; multiple pipes enter N side; one drainage pipe exists on S side; screen present; No evidence of release	TP-F9-PA6-01	TP-F9-PA6-01	Test Pit location was placed downgradient from the Pit.	E&E
G7-1	Unknown Concrete Pads		SB-G7-1-01 through SB-G7-1-05	SB-G7-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
G7-2115	Dry House	Wooden construction with sheet metal-lined walls and doors; Rail loading area on W side; stressed vegetation on W side-slag and green anti-static bldg material present; concrete foundation	SB-G7-2115-01 through SB-G7-2115-08	SB-G7-2115-04 SB-G7-2115-06 SB-G7-2115-07	Sampling location SB-G07-2115-06 was determined using professional judgement; Sampling locations SB-G07-2115-04/07 were determined using XRF screening; Results indicated a lead concentration of 803 ppm at SB-G07-2115-04; and a copper concentration of 619 ppm and an arsenic concentration of 321 ppm at SB-G07-2115-07	Metals, E&E, SVOCs
G7-2149	Heater House	Wooden bldg on concrete foundation; area of slag possibly stressed vegetation on E side; electrical control box present; concrete footers inside bldg	SB-G7-2149-01 through SB-G7-2149-04	SB-G7-2149-01 SB-G7-2149-04	Sampling location SB-G07-2149-01 was determined using professional judgement; Sampling location SB-G07-2149-04 was determined using XRF screening; Results indicated an arsenic concentration of 329 ppm at SB-G07-2149-04	Metals, SVOCs
G7-2164	Old Barrel Coating	Wooden structure over concrete block foundation; Rail and truck loading areas; No evidence of release	SB-G7-2164-01 through SB-G7-2164-07	SB-G7-2164-01 SB-G7-2164-05 SB-G7-2164-07	Sampling locations were determined using XRF screening Results indicated an arsenic concentration of 278 ppm at SB-G07-2164-01 and 282 ppm at SB-G07-2164-05. Other location sampled using professional judgement.	Metals, SVOCs, E&E
G7-58	Smokeless Supply Store	Bldg demolished; old concrete and stone wall present on NW side scrap metal, brick, and rebar remains. No evidence of release.	SB-G7-58-01 through SB-G7-58-05	SB-G7-58-04 SB-G7-58-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-G07-58-01	E&E

Table 5-48

A-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
G8-2110	Cut Powder Store	Wooden bldg constructed on concrete footers; rail loading area; on NE side; 1' x 1' duct work vent on NW side; No evidence of release.			This AOC has been referred to the Remedial Investigation due to the presence of E&E materials found to be present using an Expray Test Kit	E&E
G8-2114	Dry house	Bldg demolished-gravel and vegetation covered area remains; concrete loading area present; stressed vegetation present off S corner with green anti-static material present	SB-G8-2114-01 through SB-G8-2114-06	SB-G8-2114-03 SB-G8-2114-06	Sampling locations were determined using XRF screening Results indicated an arsenic concentration of 164 ppm at SB-G08-2114-03 and a copper concentration of 9,950 ppm at SB-G08-2114-06	Metals, E&E, SVOCs
G8-2209	Control House	Concrete block control house-controls for mixer/hot water transformer/mixer tilt drive. Concrete gutter on NE side leads to 8562 (Catch Tank House). No evidence of a release.	SB-G8-2209-01 through SB-G8-2209-05	SB-G8-2209-01 SB-G8-2209-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals
G8-2210	Halfway House	Corrugated metal cylinder overlain with soil; adjacent to 2249 loading area to E; alcohol and acetone feedlines enter front entrance from G8-3. No evidence of release	SB-G8-2210-01 through SB-G8-2210-03	SB-G8-2210-02 SB-G8-2210-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	E&E, SVOCs
G8-2249	Unknown	Corrugated metal cylindrical bldg overlain by soil; concrete gutter leads to Catch Tank house (8562); lead floor. No evidence of release.	SB-G8-2249-01 through SB-G8-2249-03	SB-G8-2249-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E
G8-3	Chemical Storage Shed	Alcohol and acid storage shed feedlines to 2210 and 2207; concrete foundation, wood, and corrugated fiberglass walls, wood roof. No evidence of release.	SB-G8-3-01 through SB-G8-3-04	SB-G8-3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	VOCs
G9-2108	Repair Shop	Sheet metal construction over 1' x 1' concrete footer; steam pipe on NW/SE sides. No evidence of release.	SB-G9-2108-01 through SB-G9-2108-06	SB-G9-2108-02 SB-G9-2108-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
G9-2123	Chemical Weigh House	Wooden and corrugated sheet metal construction over concrete block foundation; loading door in front; 3" diameter duct vent on SW side; walkway adjacent to 9322; minor amount of stressed soil under duct vent. No evidence of release.	SB-G9-2123-01 through SB-G9-2123-06	SB-G9-2123-01 SB-G9-2123-05	Sampling location SB-G09-2123-05 was determined using professional judgement; Sampling location SB-G09-2123-01 was determined using XRF screening; Results indicated an arsenic concentration of 173 ppm at SB-G09-2123-01	Metals, SVOCs
G9-3	Former Tanks	Tank/cradles removed-largely vegetated area; minimal evidence of former tank present; No evidence of release	SB-G9-3-01 through SB-G9-3-03	SB-G9-3-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
G9-7	Unknown Pond	Pond filled in: largely vegetated with significant ponded water present. No evidence of release (area=18,000 sq ft).	SB-G9-7-01 through SB-G9-7-20	SB-G9-7-05 SB-G9-7-11	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E, SVOCs
G9-9322	Chemical Storage	Corrugated sheet metal and wooden construction on concrete footers; loading areas on NW/SE side; No evidence of release	SB-G9-9322-01 through SB-G9-9322-06	SB-G9-9322-02 SB-G9-9322-04	Sampling location SB-G09-9322-02 was determined using professional judgement; Sampling location SB-G09-9322-04 was determined using E&E screening; Group B E&E materials were detected at SB-G09-9322-04 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	Metals, E&E, SVOCs

Table 5-48

A-Line Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
G9-A11	Machine Scrap Shop Shed	Bldg removed, paved area indicates former location; No evidence of release (area=100 sq ft)	SB-G9-A11-01 through SB-G9-A11-03	SB-G9-A11-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
" = Inch
 = Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-49

Finishing Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I10-2	Unknown	Only two concrete footers remain. No evidence of a release (area=100 sq ft)	SB-I10-2-01 through SB-I10-2-03	SB-I10-2-02	Sampling location was determined using XRF screening; Results indicated a lead concentration of 666 ppm at SB-I10-2-02.	Metals
I10-2079	Titan Cast House	Largely vegetated area-evidence of bldg removed; No evidence of a release	SB-I10-2079-01 through SB-I10-2079-05	SB-I10-2079-02 SB-I10-2079-05	Sampling location SB-I10-2079-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I10-2079-05.	E&E
I10-2080	Lunch Shed	Vegetation present at former location of lunch shed. Minimal evidence of former foundation. No evidence of a release (area=200 sq ft)	SB-I10-2080-01 through SB-I10-2080-03	SB-I10-2080-01 SB-I10-2080-02	Sampling location SB-I10-2080-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I10-2080-02.	SVOCs
I10-3	Stressed Vegetation	Stressed vegetation-green bldg material which covered concrete foundation (area=100 sq ft)	SB-I10-3-01 through SB-I10-3-02	SB-I10-3-02	Sampling location was determined using XRF screening; Results indicated a copper concentration of 11,310 ppm at SB-I10-3-02.	Metals
I10-550	Unknown	Square concrete foundation with protruding rebar; overgrown with vegetation. No evidence of a release.	SB-I10-550-01 through SB-I10-550-04	SB-I10-550-02	Sampling location was determined using XRF screening; Results indicated a zinc concentration of 2,310 ppm at SB-I10-550-02.	Metals
I10-552	Unknown	Largely grass-covered with minor amounts of rubble present. No evidence of a release (area=800 sq ft).	SB-I10-552-01 through SB-I10-552-04	SB-I10-552-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
I10-E50	Unknown	Only vegetation remains-evidence of bldg largely removed; No evidence of a release	SB-I10-E50-01 through SB-I10-E50-05	SB-I10-E50-05 SB-I10-E50-01	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I10-E50-05. A confirmation sample was collected at SB-I10-E50-01. Analytical results did not detect elevated E&E concentrations.	Metals
I7-15	Blender House # 1	Bldg. Demolished-area bulldozed flat. Some broken foundation fragments. No evidence of a release.	SB-I7-15-01 through SB-I7-15-05	SB-I7-15-05 SB-I7-15-04	Sampling location SB-I7-15-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I7-15-04	SVOCs, E&E
I7-2124	Blender House	Wooden structure with catch tank on E side and a loading dock on the NE side; loading dock associated with narrow gage rail. Steam drain on SE side with brown staining; cartway on W side that connects blender to Shaker House.	SB-I7-2124-01 through SB-I7-2124-06	SB-I7-2124-04 SB-I7-2124-05 SB-I7-2124-06	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling	Metals, E&E

Table 5-49

Finishing Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I7-2133A	Unknown	Bldg. Removed, five cement footers remain. Unknown use. No evidence of a release (area=300 sq ft).	SB-I7-2133A-01 through SB-I7-2133A-05	SB-I7-2133A-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I7-2133A-03	Metals, SVOCs, E&E
I7-2305/ 2280/8652	Unknown	Bldgs. Demolished-almost no evidence of existence; One depression that is probably a former bldg.	SB-I7-2305-01 through SB-I7-2305-03	SB-I7-2305-02	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I7-2305-02	SVOCs, E&E
I7-3	Hand Sieve	Bldg. Demolished-slight depression; No evidence of a release (area=100 sq ft)	SB-I7-3-01 through SB-I7-3-03	SB-I7-3-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
I7-5	Gas Shed	Wooden shed used to store flammable liquids-two doors on W side. No evidence of a release.	SB-I7-5-01 through SB-I7-5-04	SB-I7-5-03	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 1,100 ppm at SB-I7-5-03.	Metals
I7-566	Rest House	Bldg. Demolished; No evidence of a release (area=100 sq ft)	SB-I7-566-01 through SB-I7-566-03	SB-I7-566-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	E&E
I7-566A	Unknown	Bldg. Demolished; No evidence of a release (area=100 sq ft)	SB-I7-566A-01 through SB-I7-566A-03	SB-I7-566A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
I7-8181	Finishing Area Repair Shop	Wooden structure on thick concrete foundation. Shed-like structure on the W side and cement walkway on S side Bldg. May have had a different use in the past.	SB-I7-8181-01 through SB-I7-8181-05	SB-I7-8181-01 SB-I7-8181-04	Sampling location SB-I7-8181-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I7-8181-04.	SVOCs
I7-B59	Sieve House	Bldg. Demolished; No evidence of a release (area=100 sq ft)	SB-I7-B59-01 through SB-I7-B59-03	SB-I7-B59-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E, SVOCs
I8-2138/ 2139	Blender and Motor House	Bldgs. Demolished-only found one fragment of a foundation. No evidence of a release.	SB-I8-2138-01 through SB-I8-2138-03	SB-I8-2138-03	Sampling location SB-I8-2138-03 was determined using XRF screening; Results indicated an arsenic concentration of 785 ppm at SB-I8-2138-03	Metals, E&E, SVOCs
I8-2170	Unknown	Mostly vegetated-evidence of former bldg removed; No evidence of release	SB-I8-2170-01 through SB-I8-2170-05	SB-I8-2170-05 SB-I8-2170-04	Sampling location SB-I8-2170-05 was determined using professional judgement; Screening results did not warrant biased sampling SB-I8-2170-04.	E&E

Table 5-49

Finishing Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I8-2328	Shaker House	Wood and concrete structure fully encased within a berm; loading docks to NW and SE; narrow gauge rail loading area in SW. No evidence of a release.	SB-I8-2328-01 through SB-I8-2328-08	SB-I8-2328-02 SB-I8-2328-07	Sampling location SB-I8-2328-07 was determined using professional judgement; Group B E&E material were detected at sampling location SB-I8-2328-02 using an Expray Test Kit	E&E
I8-2328A	Shaker House Rotoclone	Small wood structure on cinder block foundation; steam and water ducts from I8-2328. No evidence of a release.	SB-I8-2328A-01 through SB-I8-2328A-04	SB-I8-2328A-02 SB-I8-2328A-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I8-2328A-02. A confirmation sample was collected at SB-I8-2328A-03.	E&E, SVOCs
I8-2333	Control House	Cylindrical corrugated steel with concrete foundation overlain by soil bunker. No evidence of release.	SB-I8-2333-01 through SB-I8-2333-03	SB-I8-2333-02 SB-I8-2333-03	Sampling location SB-I8-2333-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-2333-03.	Metals
I8-2405	Ribbon Blender	Concrete walls and foundation; wooden walls and ceilings recent construction, somewhat unfinished; multiple loading areas slide on W side; shed and holding tank on E side; built over the following former bldgs: 594-B, 595-B, 596-B, 2329, and 2327. No evidence of release.	SB-I8-2405-01 through SB-I8-2405-07	SB-I8-2405-01 SB-I8-2405-05 SB-I8-2405-06	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E
I8-588(E)	Rest House	Mostly vegetated-concrete footers present; possible former heater house on S end; stressed vegetation-mostly slag on SE corner of bldg	SB-I8-588E-01 through SB-I08-588E-06	SB-I8-588E-03 SB-I8-588E-06	Sampling location SB-I8-588E-03 was determined using XRF screening; Results indicated a lead concentration of 1,397 ppm at SB-I8-588E-03	Metals
I8-8236	Finishing Area Canteen	Brick bldg. concrete foundation. Septic tank ~ 15' N of bldg. Possible stressed vegetation, brown stained soils, at NW corner adjacent to a steam drain (one sludge sample taken from septic during Single Phase Remediation effort).	SB-I8-8236-01 through SB-I8-8236-05 TP-I8-8236-06	SB-I8-8236-01 SB-I8-8236-05 TP-I8-8236-06	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling. Test Pit location placed downgradient from septic.	SVOCs
I8-9334	Unknown	Small bldg. based on map, probably used with I8-2328 Bldg. Demolished. No evidence of a release.	SB-I8-9334-01 through SB-I8-9334-03	SB-I8-9334-01 SB-I8-9334-02	Sampling location SB-I8-9334-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-9334-02.	E&E, SVOCs
I9-2	Heater House	Concrete pad where former heater house stood; Steam pipes from 2112 lead to pad; No evidence of a release	SB-I9-2-01 through SB-I9-2-03	SB-I9-2-01 SB-I9-2-02	Sampling location SB-I9-2-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-2-02.	SVOCs

Table 5-49

Finishing Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I9-2311	Dry House	Large concrete foundation with rebar and rail ties; ceramic debris with possible lead paint on NE end of foundation; currently ethyl alcohol tank supported by rail ties on foundation surrounded by large soil berm. Potential release-lead flooring present.	SB-I9-2311-01 through SB-I9-2311-08	SB-I9-2311-01 SB-I9-2311-06	Sampling locations were determined using an Expray Test Kit; Group B E&E materials were detected at SB-I9-2311-01/06	E&E
I9-519	Unknown	Bldg demolished; minimal evidence of former bldg; No evidence of release	SB-I9-519-01 through SB-I9-519-05	SB-I9-519-03 SB-I9-519-04	Sampling locations SB-I9-519-03/04 were determined using XRF screening; Results indicated a lead concentration of 1,136 ppm at SB-I9-519-03 and 2,327 ppm at SB-I9-519-04	Metals
I9-523	Unknown	Vegetation and macadam over former location of bldg.; No evidence of a release	SB-I9-523-01 through SB-I9-523-05	SB-I9-523-03 SB-I9-523-05	Sampling location SB-I9-523-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-523-05.	E&E, SVOCs
I9-524	Unknown	Mostly vegetation, minor amounts of rubble present; No evidence of a release	SB-I9-524-01 through SB-I9-524-05	SB-I9-524-01	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 688 ppm at SB-I9-524-01.	Metals, E&E, SVOCs
J10-587 (B)	Unknown	Concrete and brick present; No evidence of a release	SB-J10-587B-01 through SB-J10-587B-03	SB-J10-587B-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
J6-2340	Can Pack House Rotoclone	Wooden structure used to house Rotoclone Particulate Filter. Duct on S side from J7-2133; Steam and possibly compressed air to the E. No evidence of a release.	SB-J6-2340-01 through SB-J6-2340-05	SB-J6-2340-02 SB-J6-2340-04	Sampling location SB-J6-2340-02 was determined using an Expray Test Kit; Group B E&E materials were detected at SB-J6-2340-02; Sample location SB-J6-2340-04 was determined using XRF screening. Results indicated a lead concentration of 416 ppm at SB-J6-2340-04. Analytical results did not detect elevated E&E or metal concentrations.	SVOCs
J7-1	Graphite Pond	Former pond that received waste from Blender/Packer House J7-2281 J7-2282; pine trees in former pond; no water in former pond. No evidence of negative impact to the pond (area=18,000 sq ft).			This AOC has been reserved for the Remedial Investigation due to the presence of E&E materials	E&E
J7-2	Unknown	Complex of unknown foundations. Some pyramidal footers. Bldg. extends to rail line-heavily overgrown. No evidence of a release.	SB-J7-2-01 through SB-J7-2-05	SB-J7-2-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-J7-2-03	SVOCs, E&E

Table 5-49

Finishing Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J7-2133	Old Can Pack House	Wooden structure built on a possible rock foundation; narrow gauge rail line in S of bldg. three loading doors adjacent to rails; Bldg. is bermed. No evidence of a release.	SB-J7-2133-01 through SB-J7-2133-06	SB-J7-2133-01 SB-J7-2133-06	Sampling locations were determined by using XRF screening and an Expray Test Kit; Group B E&E materials were detected at sampling locations SB-J7-2133-01/06; Results indicated a lead concentration of 791 ppm at SB-J7-2133-01 and 460 ppm at SB-J7-2133-06	Metals, SVOCs, E&E
J7-2246	Bulk Pack Scrap Shed	Wood and steel structure that currently contains electric relays. No evidence of a release from this bldg.	SB-J7-2246-01 through SB-J7-2246-04	SB-J7-2246-01 SB-J7-2246-02	Sampling location SB-J7-2246-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J7-2246-02.	SVOCs
J7-2281	Blender/Packer	Wooden structure covered with mound of earth; loading dock on SE corner; discharge pipe on SW corner reportedly goes to graphite pond. No evidence of a release except the discharge pipe.	SB-J7-2281-01 through SB-J7-2281-06	SB-J7-2281-02 SB-J7-2281-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E, SVOCs
J7-2324	Heater House	Wood and steel structure housing a heater for bldg. J7-8133. Duct to J7-8133 on W side and a vent on the E side. No evidence of a release.	SB-J7-2324-01 through SB-J7-2324-06	SB-J7-2324-06	Sampling location was determined using XRF screening; Results indicated a lead concentration of 482 ppm at SB-J7-2324-06	Metals, SVOCs
J7-241	Rest House 241	Bldg. demolished area covered with grass - two foundations in SW corner of area remain. No evidence of a release.	SB-J7-241-01 through SB-J7-241-05	SB-J7-241-05 SB-J7-241-04	Sampling location SB-J7-241-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J7-241-04.	E&E
J7-8281	Store House	Bldg. demolished with no evidence of former bldg; center of bldg. Estimated. No evidence of a release.	SB-J7-8281-01 through SB-J7-8281-03	SB-J7-8281-02 SB-J7-8281-01	Sampling location SB-J7-8281-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J7-8281-01.	SVOCs
J8-2354	Can Pack House (Sign on front reads"Canister House")	Wood and concrete construction; fairly new; many loading areas. No evidence of a release.	SB-J8-2354-01 through SB-J8-2354-09	SB-J8-2354-02 SB-J8-2354-05 SB-J8-2354-01	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E
J9-1	Debris Area	Vegetation in place of former debris area; minor amounts of brick. Scrap metal present (area=100 sq ft).	SB-J9-1-01 through SB-J9-1-02	SB-J9-1-02	Sampling location was determined using XRF screening; Results indicated a copper concentration of 1,300 ppm at SB-J9-1-02	Metals, SVOCs

Table 5-49

Finishing Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J9-2111	NC Dry House	Substation built at location of former dry house; brick scattered around. No evidence of a release.	SB-J9-2111-01 through SB-J9-2111-05	SB-J9-2111-05 SB-J9-2111-04	Sampling location SB-J9-2111-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J9-2111-04.	E&E
J9-2142	Heater House	Only foundation remains,concrete and rebar with rail ties cast-in-place, metal plates cast-in, metal pipe debris; lead paint coating on concrete footer; brick and burnt wood present. Stressed vegetation on N side.	SB-J9-2142-01 through SB-J9-2142-05	SB-J9-2142-04 SB-J9-2142-05	Sampling location SB-J9-2142-04 was determined using professional judgement; Screening results did not warrant biased sampling. Sampling location SB-J9-2142-05 was determined using XRF screening; Results indicated a copper concentration of 603 ppm at SB-J9-2142-05.	Metals, SVOCs
J9-3	Debris Area	General bldg demolition materials and slag; brick, corrugated sheet metal and stone (area=100 sq ft)	SB-J9-3-01 through SB-J9-3-03	SB-J9-3-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
J9-4	Unknown Name	Only concrete footers present, all other evidence removed (area=600 sq ft)	SB-J9-4-01 through SB-J9-4-04	SB-J9-4-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-J9-4-03	Metals, E&E, SVOCs

Abbreviations:
AOC = Area of Concern

SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-50

Ammonia-Nitrate Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
G13-1	Office	Former office	SB-G13-1-01 through SB-G13-1-05	SB-G13-1-03 SB-G13-1-04	Sampling location was determined using XRF screening; Results indicated a lead concentration of 1,069 ppm at SB-G13-1-03. A confirmation sample was taken at SB-G13-1-04.	Metals
H12-1	Settling Pond	Currently covered with grass; No evidence of release (area=1,900 sq ft)	SB-H12-1-01 through SB-H12-1-07	SB-H12-1-02 SB-H12-1-06 SB-H12-1-07	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	SVOCs, Metals
H12-237	Former Burning Ground	Large areas of SV; minor amounts of gray/green discoloration. Slag aggregate present (area=25,000 sq ft).			This AOC has been referred to the Remedial Investigation due to the presence of E&E materials	E&E
H13-1	Unknown Name	Bldg. demolished-wood construction; three posts evident in W corner; Stressed vegetation in W corner and N of rail line off of N corner of bldg.			This AOC has been referred to the Remedial Investigation due to the presence of E&E materials	E&E
H13-2014	Ammonia Rope House	Bldg. demolished-vegetation covers area; No evidence of release (area=100 sq ft)	SB-H13-2014-01 through SB-H13-2014-03	SB-H13-2014-01	Sampling location was determined using XRF screening and an Expray Test Kit; Results indicated a lead concentration of 2,014 ppm and a copper concentration of 886 ppm at SB-H13-2014-01. Group B E&E materials were detected at SB-H13-2014-01	SVOCs, Metals, E&E
H13-2031A	Unknown Shed	Unknown storage shed (area=100 sq ft)	SB-H13-2031A-01 through SB-H13-2031A-03	SB-H13-2031A-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
H13-7	Stressed Vegetation	Large area with minimal vegetation; White powdery material present in small amounts to S corner of area (area=6,200 sq ft)			This AOC has been referred to the Remedial Investigation due to the presence of E&E materials	E&E
H13-8158	South Gate House	Wooden construction with aluminum siding, asphalt roof; Gate house only, no evidence of release	SB-H13-8158-01 through SB-H13-8158-04	SB-H13-8158-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
H13-8164	Training Building	Wooden/brick/aluminum siding building; No. 2 fuel oil storage at E corner, septic tank at W corner	SB-H13-8164-01 through SB-H13-8164-05	SB-H13-8164-02 SB-H13-8164-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	SVOCs, Metals
H13-8214	Oxidation House Parts Storage	Bldg. demolished-vegetation covers area; No evidence of release (area=100 sq ft)	SB-H13-8214-01 through SB-H13-8214-03	SB-H13-8214-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs

Table 5-50

Ammonia-Nitrate Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H13-8226	Change House	Bldg. demolished-vegetation covers area; Associated septic (sludge sample taken during Single Phase Remediation); No evidence of release	SB-H13-8226-01 through SB-H13-8226-05 TP-H13-8226-06	SB-H13-8226-02 SB-H13-8226-01 TP-H13-8226-06	Sampling location SB-H13-8226-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-H13-8226-01. Test Pit location downgradient from septic.	Metals, SVOCs
I11-9303	Ingredient Storage	Bldg. demolished-minimal evidence remains; No evidence of release	SB-I11-9303-01 through SB-I11-9303-05	SB-I11-9303-02	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I11-9303-02	SVOCs, Metals, E&E
I11-B5	Storage Shed	Corrugated metal shed on wooden foundation. Two waste laboratory glassware metal refuse containers on S side of shed. No evidence of release.	SB-I11-B5-01 through SB-I11-B5-04	SB-I11-B5-04	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 185 ppm at SB-I11-B5-04	Metals
I12-10	Unknown Foundation	Concrete foundation-possibly formerly lead painted. Possible tank storage. No evidence of release.	SB-I12-10-01 through SB-I12-10-04	SB-I12-10-03 SB-I12-10-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 722 ppm and a zinc concentration of 4,760 ppm at SB-I12-10-03. A confirmation sample was taken at SB-I12-10-01. Analytical results did not detect elevated metal concentrations.	SVOCs
I12-11	Debris Area	Bldg. debris and decontaminated equipment from adjacent decontamination area (area=5,900 sq ft).	SB-I12-11-01 through SB-I12-11-14	SB-I12-11-06 SB-I12-11-08 SB-I12-11-13 SB-I12-11-11 SB-I12-11-09 SB-I12-11-02 SB-I12-11-04	Sampling locations SB-I12-11-06/08/13/11 were determined using professional judgement; Screening results did not warrant biased sampling. Confirmation samples were taken at SB-I12-11-02/04/09.	SVOCs
I12-14	Stressed Vegetation	Area of reduced vegetation growth; minimal staining evident. Possibly due to acid storage (area=400 sq ft).	SB-I12-14-01 through SB-I12-14-03	SB-I12-14-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 948 ppm and a copper concentration of 642 ppm at SB-I12-14-01	Metals
I12-15	Unknown Concrete Vault	6' deep concrete vault currently filled in with soil/debris; NW side 6' square cutout-possible inlet for catch tank; No evidence of release	SB-I12-15-01 through SB-I12-15-04	SB-I12-15-01 SB-I12-15-04	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	Metals
I12-2010	Evaporation Shed	Bldg. demolished-concrete footers remain; No evidence of release	SB-I12-2010-01 through SB-I12-2010-05	SB-I12-2010-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
I12-2013	Crystalizer Repair Shop	Bldg. demolished-concrete pad remains. Currently decontamination oven mounted on concrete pad.	SB-I12-2013-01 through SB-I12-2013-04	SB-I12-2013-01	Sampling location was determined using XRF screening; Results indicated a copper concentration of 1,610 ppm at SB-I12-2013-01	Metals

Table 5-50

Ammonia-Nitrate Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I12-2184	Compressor House	Bldg. demolished; Minimal evidence of former location; No evidence of release	SB-I12-2184-01 through SB-I12-2184-03	SB-I12-2184-01	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 296 ppm at SB-I12-2184-01	Metals
I12-2186	Oxidation House	Steel and concrete masonry unit with plaster covering. Laboratory room storage, loading area, and electrical control room. No. 2 fuel oil ASTs with concrete containment.	SB-I12-2186-01 through SB-I12-2186-15	SB-I12-2186-03 SB-I12-2186-06 SB-I12-2186-13	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	Metals, SVOCs
I12-2287	Falling Film Evaporator	Bldg. demolished-center of building between two foundations-one with brick wall. No evidence of release (area=300 sq ft).	SB-I12-2287-01 through SB-I12-2287-04	SB-I12-2287-01 SB-I12-2287-04	Sampling location SB-I12-2287-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-2287-04.	Metals
I12-2341	Unknown Name	Bldg. demolished-concrete rubble present; No evidence of release	SB-I12-2341-01 through SB-I12-2341-03	SB-I12-2341-03	Sampling location was determined using XRF screening; Results indicated a lead concentration of 25,130 ppm at SB-I12-2341-03	Metals, SVOCs
I12-6	Unknown Concrete Pad	Possible former Boiler House pad. Recently constructed pad. No evidence of release.	SB-I12-6-01 through SB-I12-6-04	SB-I12-6-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, SVOCs
I12-7	Equalization Tank	Steel tank, catch basin on NW side with two flanking valve boxes. Pumps on SW side. No evidence of release.	SB-I12-7-01 through SB-I12-7-04 TP-I12-7-05	SB-I12-7-02 SB-I12-7-04 SB-I12-7-05	Sampling location SB-I12-7-02 was determined using professional judgement; Sampling location SB-I12-7-04 was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I12-7-04. Test Pit location was placed downgradient of the sump.	Metals
I12-9110	Nitric Acid Storage Tanks	Bldg. Demolished-minimal evidence of former tanks, tanks removed. No evidence of release.	SB-I12-9110-01 through SB-I12-9110-06	SB-I12-9110-03 SB-I12-9110-04	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	Metals

Table 5-51

Storage Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I11-8278	Charge House	Concrete footers only evidence of former building; Area covered with vegetation; No evidence of release (area=100 sq ft)	SB-I11-8278-01 through SB-I11-8278-03	SB-I11-8278-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
I11-9301	Box Store House	Minimal evidence of former building, now a vegetated area; Some rebar protruding from the ground N end of former building	SB-I11-9301-01 through SB-I11-9301-05	SB-I11-9301-05 SB-I11-9301-02	Sampling location SB-I11-9301-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I11-9301-02.	Metals, SVOCs
J10-2	Debris Area	Most metal debris removed along this former railroad line. Minor amounts of aluminum and sheet metal, rail ties and track. No evidence of release (area=3,700 sq ft).	SB-J10-2-01 through SB-J10-2-11	SB-J10-2-03 SB-J10-2-04 SB-J10-2-08 SB-J10-2-11	Sampling locations SB-J10-2-03/08/11 were determined using an Expray Test Kit; Group B E&E materials were detected at SB-J10-2-03/08/11; Sampling locations SB-J10-2-04/11 were determined using XRF screening. Results indicated an arsenic concentration of 328 ppm at SB-J10-2-04 and 400 ppm at SB-J10-2-11. Analytical results did not detect elevated E&E concentrations.	Metals, SVOCs
J10-2033	Box Paint House	All that remains of former building is vegetated area and one footer; Adjacent to rail line. No evidence of release.	SB-J10-2033-01 through SB-J10-2033-05	SB-J10-2033-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 770 ppm at SB-J10-2033-01	Metals, SVOCs
J10-2166	D-2 Wax House	CMU foundation with wooden siding. Catch tank on S side.			This AOC has been referred to the Remedial Investigation due to the presence of E&E materials	E&E
J10-9122	D-2 Wax Tank	Utility hoist motor on SW side; Pump and temp gauge on NE side; Wax coating on surrounding machinery	SB-J10-9122-01 through SB-J10-9122-03	SB-J10-9122-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	VOCs
J10-9334	D-2 Store House	Wooden construction built on concrete footers; No evidence of a release	SB-J10-9334-01 through SB-J10-9334-06	SB-J10-9334-01	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-J10-9334-01	SVOCs, E&E
J8-9220	Shipping House #1	Concrete foundation with wooden construction and corrugated sheet metal, 3 loading areas. Soil berm on N. side of building. No evidence of a release	SB-J8-9220-01 through SB-J8-9220-07	SB-J8-9220-02 SB-J8-9220-05	Sampling location SB-J8-9220-05 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-J8-9220-02	E&E
K7-2125	Rest House #2	Steel and wood structure; Three loading doors on E side, loading dock on S side, possible; narrow gauge railroad on E side; No evidence of a release	SB-K7-2125-01 through SB-K7-2125-05	SB-K7-2125-01 SB-K7-2125-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E
K7-2126	Rest House #3	Steel and wood structure; Two loading doors on E side, loading dock on SE corner; A canopy covers the loading dock; No evidence of a release	SB-K7-2126-01 through SB-K7-2126-05	SB-K7-2126-03 SB-K7-2126-05	Sampling location SB-K7-2126-05 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-K7-2126-03	E&E

Table 5-51

Storage Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
K7-2132	Rest House #4	Wood and steel structure. Three loading doors on the W side and a loading dock on the S corner. A canopy covers the loading dock, a potential narrow gauge rail loading area. No evidence of a release.	SB-K7-2132-01 through SB-K7-2132-05	SB-K7-2132-03 SB-K7-2132-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E
K8-1	Unknown Foundation	Old foundation consisting of cement footers; Probably used for storage; No evidence of release	SB-K8-1-01 through SB-K8-1-05	SB-K0-1-01 SB-K8-1-05	Sampling location SB-K8-1-05 was determined using professional judgement; Sampling location SB-K8-1-01 was determined using XRF screening. Results indicated a lead concentration of 532 ppm and an arsenic concentration of 247 ppm at SB-K8-1-01	Metals, E&E, SVOCs
K8-393	Blender 393 Packhouse 565	Building has been completely removed; No evidence of a release	SB-K8-393-01 through SB-K8-393-05	SB-K8-393-05 SB-K8-393-01	Sampling location SB-K8-393-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K8-393-01.	E&E, SVOCs
K8-9207	Shipping House #2	All that remains is concrete pad and railroad ties leading up to and away from building. A chunk of TNT found in center of concrete pad. No evidence of a release.	SB-K8-9207-01 through SB-K8-9207-04	SB-K8-9207-02 SB-K8-9207-04	Sampling location SB-K8-9207-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K8-9207-04.	E&E, SVOCs
K8-9212	New Premix Storehouse	Wooden building with corrugated sheet metal construction; Stressed soil on E and W side of building, dark stained soil with black pellets, possibly coal	SB-K8-9212-01 through SB-K8-9212-07	SB-K8-9212-02 SB-K8-9212-07	Sampling location SB-K8-9212-07 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-K8-9212-02. Analytical results did not detect elevated E&E concentrations.	Metals
K9-9203	Dynamite Magazine #4	Brick foundation, corrugated sheet metal, wooden construction Loading dock to SW side of building. No evidence of release.	SB-K9-9203-01 through SB-K9-9203-07	SB-K9-9203-01 SB-K9-9203-07	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E
L6-2128	Rest House #7	Steel and wood structure. Two loading doors on E side, loading dock on E corner, possibly for narrow gauge railroad. No evidence of a release.	SB-L6-2128-01 through SB-L6-2128-05	SB-L6-2128-03 SB-L6-2128-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E
L6-2129	Rest House #9	Steel sided structure with loading areas on the W and possibly E sides. No evidence of released.	SB-L6-2129-01 through SB-L6-2129-07	SB-L6-2129-03 SB-L6-2129-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E
L7-2130	Rest House #8	Steel sided building. Two narrow gauge rail loading areas, one truck loading area, one hand loading area. No evidence of a release.	SB-L7-2130-01 through SB-L7-2130-08	SB-L7-2130-01 SB-L7-2130-06	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E

Table 5-51

Storage Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
L7-2131	Rest House #5	Wood and steel structure. Three loading doors and a loading dock on the E side. A canopy covers the loading dock, a potential narrow gauge rail loading area. No evidence of a release.	SB-L7-2131-01 through SB-L7-2131-05	SB-L7-2131-04 SB-L7-2131-05	Sampling location SB-L7-2131-05 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-L7-2131-04	E&E
M6-1	Debris Area	Debris area and flyash consisting of bottles, pipes, a drum and general rubbish along a duck pond (area=14,000 sq ft)	SB-M6-1-01 through SB-M6-1-20	SB-M6-1-01 SB-M6-1-06 SB-M6-1-07 SB-M6-1-11 SB-M6-1-13 SB-M6-1-14 SB-M6-1-15 SB-M6-1-18	Sampling locations SB-M6-1-11/13/14/15/18 were determined using professional judgement; Sampling location SB-M6-1-06 was determined using XRF screening. Results indicated an arsenic concentration of 229 ppm at SB-M6-1-06; Group B E&E materials were detected at SB-M6-1-01/07 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	Metals
M7-1	Possible Dynamite Magazine	Building has been removed, only remains are an elevated area of soil and the remains of a loading dock. No evidence of a release.	SB-M7-1-01 through SB-M7-1-05	SB-M7-1-01 SB-M7-1-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E
M7-2	Debris Area	Debris area consisting of metal cans, pipes, fittings and sidings, Some concrete covered in the green fibrous material from N7-5 (area=30,000 sq ft)	SB-M7-2-01 through SB-M7-2-20	SB-M7-2-02 SB-M7-2-04 SB-M7-2-05 SB-M7-2-11 SB-M7-2-13 SB-M7-2-15 SB-M7-2-18 SB-M7-2-20	Sampling locations SB-M7-2-02/04/11/13/18 were determined using professional judgement; Sampling locations SB-M7-2-05/15/20 were determined using XRF screening. Results indicated a copper concentration of 9,200 ppm and a lead concentration of 1,117 ppm at SB-M7-2-05; an arsenic concentration of 371 ppm at SB-M7-2-15; and a lead concentration of 863 ppm at SB-M7-2-20	Metals, SVOCs
N5-582	Former Store House	Old wooden structure that has been completely removed, only poorly weathered berm remains. No evidence of release.	SB-N5-582-01 through SB-N5-582-05	SB-N5-582-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
N6-640	Blending House	Formerly large structure, all that remains is the central foundation, it is covered with debris with trees growing in it, it is reported the structure was scrapped. No evidence of release.	SB-N6-640-01 through SB-N6-640-05	SB-N6-640-03	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 254 ppm at SB-N6-640-03	Metals, SVOCs

Table 5-51

Storage Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
N7-2	Debris Area	Debris area consisting of drums, wood, cement and scrap metal. Pooled water that may be seasonal, buried drums (area=11,000 sq ft).	SB-N7-2-01 through SB-N7-2-19	SB-N7-2-06 SB-N7-2-07 SB-N7-2-10 SB-N7-2-13 SB-N7-2-14 SB-N7-2-17	Sampling locations SB-N7-2-06/07/10/13/14 were determined using professional judgement; Sampling location SB-N7-2-17 was determined using XRF screening. Results indicated a lead concentration of 1236 ppm at SB-N7-2-17	Metals, SVOCs
N7-572	Unknown	Building has been totally destroyed, the only remnants being a few bricks and a piece of copper. No evidence of a release (area=100 sq ft).	SB-N7-572-01 through SB-N7-572-03	SB-N7-572-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	E&E
N7-573	Unknown	Building totally removed, approximate location based on historic maps. No evidence of release.	SB-N7-573-01 through SB-N7-573-03	SB-N7-573-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals, E&E, SVOCs
N7-9222	Shipping House #8	Cement foundation wood with steel siding, there is a berm to the S. There is a potential loading in the E and two loading docks, the N loading dock is for rail, the W loading dock for trucks. No evidence of release.	SB-N7-9222-01 through SB-N7-9222-07	SB-N7-9222-06 SB-N7-9222-01	Sampling location SB-N7-9222-06 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N7-9222-01.	E&E
O5-579	Rest House #13	Building completely removed, only foundation remains. No evidence of release.	SB-O5-579-01 through SB-O5-579-05	SB-O5-579-04 SB-O5-579-01	Sampling location SB-O5-579-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O5-579-01.	E&E
O6-9223	Shipping House #10	Concrete foundation with a wooden structure sided in steel. Two loading docks on the N and S side. No evidence of a release. Loading dock is covered with a roof structure	SB-O6-9223-01 through SB-O6-9223-07	SB-O6-9223-06 SB-O6-9223-07	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	E&E
O6-9224	Shipping House #12	Concrete foundation with a wooden structure sided in steel. Two loading docks on the E and W side. No evidence of a release.	SB-O6-9224-01 through SB-O6-9224-07	SB-O6-9224-03 SB-O6-9224-06	Sampling location SB-O6-9224-06 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-O6-9224-03	E&E
O7-1	Water Dry House	Building has been removed except for 14 cement column footers, some toppled. No evidence of a release.	SB-O7-1-01 through SB-O7-1-05	SB-O7-1-03 SB-O7-1-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 4200 ppm at SB-O7-1-03. A confirmation sample was collected at SB-O7-1-01	Metals
O7-396	Blender 396	No evidence of building remain, location based on historic maps. No evidence of release.	SB-O7-396-01 through SB-O7-396-03	SB-O7-396-02 SB-O7-396-03	Sampling location SB-O7-396-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-396-03.	Metals

Table 5-51

Storage Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
O7-9319	Former Store House	Building was dismantled and all that remains are brick and cement footers with scattered debris including metal reinforcers and pipes. No evidence of a release.	SB-O7-9319-01 through SB-O7-9319-04	SB-O7-9319-01	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-O7-9319-01	Metals, E&E
O8-3	Debris Area	Debris pushed down the slope from B-Line. Consists of foundations, process equipment and scrap metal. Slightly stressed or steep slope prevents vegetation (area=15,000 sq ft).	SB-O8-3-01 through SB-O8-3-20	SB-O8-3-04 SB-O8-3-06 SB-O8-3-09 SB-O8-3-12 SB-O8-3-13 SB-O8-3-15 SB-O8-3-18 SB-O8-3-20	Sampling locations SB-O8-3-04/06/09/12/13/15/18/20 were determined using professional judgement; Screening results did not warrant biased sampling	Metals, SVOCs
O8-392	Water Dry House	Building has been removed, location estimated from historical maps. No evidence of a release.	SB-O8-392-01 through SB-O8-392-03	SB-O8-392-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	E&E
O8-732	Blending Tower 732	Inner cement circle surrounded by nine support footers. Pit is filled with water, structure completely removed. No evidence of a release.	SB-O8-732-01 through SB-O8-732-05	SB-O8-732-01 SB-O8-732-04	Sampling location was determined using XRF screening; Results indicated a lead concentration of 664 ppm at SB-O8-732-01. A confirmation sample was collected at SB-08-732-04.	Metals
P5-535	Dry House #54	Very similar to 05-537 and 05-536. No evidence of release.	SB-P5-535-01 through SB-P5-535-05	SB-P5-535-04	Sampling location was determined using XRF screening; Results indicated a lead concentration of 666 ppm at SB-P5-535-04	Metals, E&E
P6-541	Dry House #60	Building has been completely removed, all that remains is 21 concrete footers, small amount of steel siding S of former structure. No evidence of release.	SB-P6-541-01 through SB-P6-541-05	SB-P6-541-05 SB-P6-541-01	Sampling location SB-P6-541-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-P6-541-01.	Metals
P6-651	Blender 651	Only concrete footer remains. No evidence of release.	SB-P6-651-01 through SB-P6-651-05	SB-P6-651-02 SB-P6-651-04	Sampling location SB-P6-651-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-P6-651-04.	Metals
P6-9225	Shipping House	Cement pad with wooden structure, covered with steel siding. Loading dock on SW side-partially collapsed, no utilities. No evidence of release.	SB-P6-9225-01 through SB-P6-9225-05	SB-P6-9225-03 SB-P6-9225-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	SVOCs

Table 5-51

Storage Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
P7-4	Unknown	Foundation debris piled up, most likely a former store house, there is an area of S.V. where this building once stood. The S.V. area looks to be covered with flyash.	SB-P7-4-01 through SB-P7-4-03	SB-P7-4-01	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 183 ppm at SB-P7-4-01	Metals, SVOCs
P7-9209	Shipping House #11	Wooden structure sided and roofed with steel, two narrow gauge rail loading docks on the S side and a truck loading dock on the E side. There is no evidence of a release.	SB-P7-9209-01 through SB-P7-9209-07	SB-P7-9209-03 SB-P7-9209-06	Sampling location SB-P7-9209-06 was determined using professional judgement; Sampling location SB-P7-9209-03 was determined using XRF screening. Results indicated a mercury concentration of 333 ppm at SB-P7-9209-03	Metals, E&E
Q6-8	House Storage	Old cement pad with loading dock, old use unknown, currently small steel shed that holds fire hose for burn area. No evidence of release	SB-Q6-8-01 through SB-Q6-8-05	SB-Q6-8-03 SB-Q6-8-05	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-Q6-8-03. A confirmation sample was collected at SB-Q6-8-05.	E&E
R5-1	Former Container Debris	Holding area for containers, all removed except one 5 gal steel container. No evidence of release.	SB-R5-1-01 through SB-R5-1-03	SB-R5-1-01 SB-R5-1-03	Sampling location SB-R5-1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-R5-1-03.	SVOCs
R5-2	Spill Area	There are three separate areas of SV, Area A contains some white material, Area B has no identifiable material, Area C has small metal wires and old rope; possible dumping area.	SB-R5-2-01 through SB-R5-2-06	SB-R5-2-01 SB-R5-2-03 SB-R5-2-05	Sampling locations SB-R5-2-01/05 were determined using professional judgement; Sampling location SB-R5-2-03 was determined using XRF screening. Results indicated a zinc concentration of 2,430 ppm at SB-R5-2-03	Metals
S7-1	Railroad Canteen	Currently only concrete piers present on S side; fired clay tiles present-used in construction. No evidence of release (area=300 sq ft).	SB-S7-1-01 through SB-S7-1-04	SB-S7-1-01 SB-S7-1-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	SVOCs

Abbreviations:
AOC = Area of Concern

Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-52

Miscellaneous/Offsite Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Description	Unrestricted Use Exceedances
D16-2	Club House	Bldg demolished-largely vegetated area; concrete debris present NW/SE corners of bldg possibly evident. No evidence of release.	SB-D16-2-01 through SB-D16-2-05	SB-D16-2-01 SB-D16-2-04	Sampling location SB-D16-2-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D16-2-04	SVOCs
E16-8561	Former Sewage Treatment Plant	Wooden (pump) house adjacent to large concrete septic tank; wooden box-gutter leads across stream to a small shed. No evidence of release.	SB-E16-8561-01 through SB-E16-8561-04 TP-E16-8561-05	SB-E16-8561-02 SB-E16-8561-03 SB-E16-8561-04 TP-E16-8561-05	Sampling locations were determined using professional judgement Location SB-E16-8561-02 was analyzed for VOCs, SB-E16-8561-03 for SVOCs and metals. Test Pit location was placed downgradient from the septic tank.	Metals, SVOCs
G14-1	Guard House Office	Concrete pad with small concrete catch box at S corner (possibly only surface water drainage); old ceramic tile floor covers foundation. No evidence of release.	SB-G14-1-01 through SB-G14-1-04	SB-G14-1-02 SB-G14-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
G14-2	Barracks	Bldg demolished-vegetated area remains; no foundation of bldg debris evident. No evidence of release.	SB-G14-2-01 through SB-G14-2-05	SB-G14-2-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	SVOCs
H14-3	Rock Quarry	Inactive rock quarry; unknown items may have been buried here. No evidence of release (area=65,000 sq ft).	SB-H14-3-01 through SB-H14-3-20	SB-H14-3-03 SB-H14-3-19	Sampling location SB-H14-3-19 was determined using professional judgement Sampling location SB-H14-3-03 was determined using XRF screening Results indicated a lead concentration of 1,455 ppm at SB-H14-3-03	Metals
M11-8606	Water Storage	Concrete foundation with steel water tank; No evidence of a release	SB-M11-8606-01 through SB-M11-8606-04	SB-M11-8606-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 525 ppm and a zinc concentration of 14,220 ppm at SB-M11-8606-03	Metals, SVOCs
N13-1	Unknown	Building demolished, large concrete pad with footers remain. Large concrete debris area to the S extending into a thick forest. No evidence of release.	SB-N13-1-01 through SB-N13-1-04	SB-N13-1-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals

Table 5-52

Miscellaneous/Offsite Area FA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Description	Unrestricted Use Exceedances
N13-4	Unknown	Large concrete foundation with brick wall on NE side. Two large footers in the center. Building function unknown. No evidence of release.	SB-N13-4-01 through SB-N13-4-04	SB-N13-4-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
O13-1	Trap/Pistol Range	Trap/pistol range with an area of stressed vegetation within an area of shotgun impact. Concrete pad with trap house and three metal storage trailers (area=10,000 sq ft).	SB-O13-1-01 through SB-O13-1-18	SB-O13-1-01 SB-O13-1-17	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	Metals
O13-2	Trap/Pistol Range Perimeter	Perimeter of ranges to incorporate areas of suspected contamination. Potential release, lead evident along rear (area=110,000 sq ft)	SB-O13-2-01 through SB-O13-2-20	SB-O13-2-17 SB-O13-2-18	Sampling locations were determined using XRF screening Results indicated a lead concentration of 525 ppm at SB-O13-2-18 and 6,790 ppm at SB-O13-2-17	Metals

Analyte List by AOC Type
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

Transformers**
PCBs
TOC, one per AOC
Grain Size, one per AOC

PPL VOC +15, if PID/FID indicates positive detection or suspected to be present
PPL SVOC+25, if suspected to be present
PPL metals, if XRF indicates elevated levels or suspected to be present

Above Ground Storage Tanks and Pipes, Septic Tanks, and Spray Fields**
PPL VOC+15
PPL SVOC+25
TOC, one per AOC
Grain Size, one per AOC

PPL metals + mercury, if XRF indicates elevated levels or suspected to be present
E&E, if field screening indicates positive detection or suspected to be present
pH, if acid stored in above ground storage tank

Discharge Points and Remnant Activity Areas**
PPL SVOC+25
PPL Metals + Mercury
TOC, one per AOC
Grain Size, one per AOC
pH

PPL VOC +15, if PID/FID indicates positive detection or suspected to be present
E&E, if field screening indicates positive detection or suspected to be present

Spill Containment Structures, Wastewater Pits, and Culverts**
PPL SVOC+25
E&E
TOC, one per AOC
Grain Size, one per AOC

PPL VOC +15, if PID/FID indicates positive detection or suspected to be present
PPL metals, if XRF indicates elevated levels or suspected to be present

Existing/Former Process Buildings Including Ancillary Features**
PPL SVOC+25
PPL Metals + Mercury
E&E
TOC, one per AOC
Grain Size, on per AOC

PPL VOC +15, if PID/FID indicates positive detection or suspected to be present

Existing/Former Support Buildings Including Ancillary Features**

PPL VOC +15, if PID/FID indicates positive detection or suspected to be present
E&E, if field screening indicates positive detection or suspected to be present

NG Gutters and Existing/Former E&E Storage Building Including Ancillary Features**
E&E
TOC, one per AOC
Grain Size, one per AOC

PPL VOC +15, if PID/FID indicates positive detection or suspected to be present
PPL metals, if XRF indicates elevated levels or suspected to be present

* Bold items indicate standard analyte list for each AOC. Non bold items may be added to the analyte list if detected through field screening or they are suspected to be present.
** Field screening for the presence of E&E compounds was conducted during the collection of all samples regardless of AOC Type

Abbreviations:

AOC	-	Area of Concern	PID	-	Photo Ionization Detector
E&E	-	Explosive & Energetic	SVOC	-	Semivolatile Organic Compound
FID	-	Flame Ionization Detector	VOC	-	Volatile Organic Compound
NG	-	Nitroglycerin	XRF	-	X-Ray Fluorescence
PCB	-	Polychlorinated Biphenyls			
PPL	-	Priority Pollutant List

Notes:
VOC = Volatile Organic Constituents
SVOC = Semi-Volatile Organic Constituents
E&E = Explosives and Energetics
IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

Notes:
SVOC = Semi-Volatile Organic Constituents
E&E = Explosives and Energetics
PCBS = Polychlorinated Biphenyls
IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NA = Not Applicable
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

[1] = AOCs with associated rejected data (R) or concentrations that exceeded the instrument calibration range (E) and no further NJDEP SCC exceedances were identified and will be sampled during the RI to confirm the R and E data do not warrant further action.

[2] = AOCs with associated rejected data or concentrations that exceeded the instrument calibration range identified at concentrations exceeding the NJDEP SCC and will be sampled during the RI to determine if further action is warranted.

[3] = Based on SI analytical data, this AOC requires additional investigation. The rejected analytes will be incorporated into RI sampling efforts

Table 6-1

AOCs Reserved For Remedial Investigation
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

Operational Area	AOC Designation	Name	Description	Sample Selection Justification	Unrestriced Use Exceedances
TNT	A11-2	Mixed Acid Storage #3	Mixed Acid Storage # 3 50-60 ft. E of A11-7 contains tank cradles and a lower level for tank storage; pipe in S foundation no stressed vegetation (area 900 sq. ft.)	Reserved for Remedial Investigation due to the presence of lead, based on Roux's TNT Area Site Investigation	Metals
TNT	A11-4	Acid Fortifier #2	Rectangular, overgrown foundation with catch tank on N side; NW corner has transite piping and vessels; no environmental impacts	Reserved for Remedial Investigation due to the presence of lead, based on Roux's TNT Area Site Investigation	Metals
TNT	A11-5	Bi/Trinitrator #2	Old, overgrown foundation with pipes going into the ground at each corner no stressed vegetation	Reserved for Remedial Investigation due to the presence of lead and E&E materials, based on Roux's TNT Area Site Investigation	Metals, E&E
TNT	A11-504	Weak Acid Storage Tanks	Weak Acid Storage Tank; several old pits along E side of former bldg. Possibly catch tanks	Reserved for Remedial Investigation due to the presence of lead, based on Roux's TNT Area Site Investigation	Metals
TNT	A11-7	Nitric Acid Storage #2	Concrete footers overgrown; two small areas less than 10 ft. in diameter of stressed vegetation approximately 15 ft. from footers SE stressed vegetation contained lead both have slag present	Reserved for Remedial Investigation due to the presence of lead, based on Roux's TNT Area Site Investigation	Metals
TNT	A12-1	TNT in Soil	Small area S of A11-6; numerous chunks of TNT measuring several inches across;discarded terra cotta pipe and overturned soils (area 300 sq. ft.)	Reserved for Remedial Investigation due to the presence of TNT chunks on the ground, based on Phase I - Site Investigation Field Observation	E&E
TNT	A12-426	Block Breaker	Bldg. Demolished; adjacent to rail spur some brick present, but mostly a concrete foundation; rail spur overgrown	A subsurface layer of NC was found along the SW corner of the foundation during screening activities. This AOC has been reserved for the Remedial Investigation, based on Phase I - Site Investigation Field Observation	E&E
TNT	A13-625	Filter House #2	Thermally decontaminated building with half of former berm destroyed; metal debris remaining; no stressed vegetation	Reserved for Remedial Investigation due to the presence of E&E materials, based on Roux's TNT Area Site Investigation	E&E
TNT	B10-2	TNT in Soil	Piles of dirt that contain waste TNT not much vegetation in area; appears to radiate out from unknown structure possibly a catch tank to the north	Reserved for Remedial Investigation due to the presence of arsenic and E&E materials, based on Roux's TNT Area Site Investigation	Metals, E&E
TNT	B10-5	Possible Catch Tank for B10-508/B10-509	Three small concrete foundations covered with burnt wood; pipes from bldgs. 508 and 509 aimed toward this building; potential for stressed vegetation	Group A E&E materials were found at this location using an Expray Test Kit. This AOC has been deferred to the Remedial Investigation, based on Phase I - Site Investigation Field Observation	E&E
TNT	B10-501	Nitric Acid Storage #1	Nitric Acid Storage Tanks; bldg. was burnt Bldg very degraded probably from acid; no vegetation in interior of bldg; process pipes and foundation not intact	Reserved for Remedial Investigation due to the presence of lead, based on Roux's TNT Area Site Investigation	Metals
TNT	B10-502	Mixed Acid Storage Tanks #1	Mi1ed Acid Storage Tanks; metal debris and drums present; thermally decontaminated pipes not intact; overgrown	Reserved for Remedial Investigation due to the presence of lead, based on Roux's TNT Area Site Investigation	Metals
TNT	B10-505	Acid Fortifier	Overgrown foundation of Acid Fortifying House thermally decontaminated;pipes inside bldg.	Reserved for Remedial Investigation due to the presence of lead, based on Roux's TNT Area Site Investigation	Metals
TNT	B10-508	Bi/Trinitrator #1	Binitrator bldg burnt; large amount of debris and piping in center of bldg.; E of SE corner is left over brine coils	Reserved for Remedial Investigation due to the presence of lead and E&E materials, based on Roux's TNT Area Site Investigation	Metals, E&E

Table 6-1

AOCs Reserved For Remedial Investigation
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

Operational Area	AOC Designation	Name	Description	Sample Selection Justification	Unrestriced Use Exceedances
TNT	B10-509	Neutralizer/Pelletizer #1	Neutralizer/Pelletizer Bldg has very high berms; piping and machinery in bldg. vegetated	Reserved for Remedial Investigation due to the presence of lead, based on Roux's TNT Area Site Investigation	Metals
TNT	B10-6	TNT in Soil	Small area 25 ft. S-SE of bldg. 508 with stressed vegetation; one piece of TNT found here; more possible	Reserved for Remedial Investigation due to the presence of arsenic and E&E materials, based on Roux's TNT Area Site Investigation	Metals, E&E
TNT	B12-1	Perchlorate Grinder	Undocumented structure very similar to Perchlorate Grinder; two large concrete foundations and a few pieces of old metal no evidence of environmental impact (area 400 sq. ft.)	Group A E&E materials were found at this location using an Expray Test Kit. This AOC has been deferred to the Remedial Investigation, based on Phase I - Site Investigation Field Observation	E&E
TNT	B12-234	Filter House #1 Sump	Rectangular shaped sump house for Filter House # 1; pit filled with water; no stressed vegetation	Reserved for Remedial Investigation due to the presence of E&E materials, based on Roux's TNT Area Site Investigation	E&E
TNT	B13-1	Settling Pond	Depressed area with a ditch entering from NW ditch originated at A13-625 Filter House # 2; 8-12 inch terra cotta pipe enters from the W possibly from A13-7543 Filter House # 3 area of brown stressed vegetation	Reserved for Remedial Investigation due to the presence of beryllium, lead and thallium, based on Roux's TNT Area Site Investigation	Metals
TNT	B13-2	Gravel Pit	Center of stressed vegetation, gravel pit (perimeter=800 ft)	This AOC has been referred to the Remedial Investigation due to the presence of E&E materials, based on Phase I - Site Investigation Field Observation	E&E
TNT	C10-439	Weak Acid Storage Tanks	Old foundation; recently cleared here slight stressed vegetation on W side of ground; internal catch basin associated with tank cradles; several small pipes	Reserved for Remedial Investigation due to the presence of lead, based on Roux's TNT Area Site Investigation	Metals
Dynamite	C13-666	Refined Graining House	Completely dismantled; TNT chunks scattered around ground	Reserved for Remedial Investigation due to the presence of TNT on the ground, based on Phase I - Site Investigation Field Observation	E&E
NG	C11-8572C	Storage Shed	Currently existing structure; aluminum sided with large loading/unloading door on E side; associated with nearby catch tank;contains old hoses for pumps. No evidence of release	Reverved for Remedial Investigation due to the presence of Group B explosives detected using an Expray Test Kit, based on Phase I - Site Investigation Field Observation	E&E
NG	C11-8572D	Instrument Room	Small shed with a meter that monitored the catch tank; aluminum siding. No evidence of release	Reverved for Remedial Investigation due to the presence of Group B explosives detected using an Expray Test Kit, based on Phase I - Site Investigation Field Observation	E&E
NG	D11-2031	DNT Heater House	Intact brick structure with elevated walkway; immediate area is vegetated; doesn't appear to be any vegetative impacts.	Reserved for Remedial Investigation due to the presence of DNT, based on Phase I - Site Investigation Field Observation	E&E
Development	K5-1	Former Drum Disposal Area	An area adjacent to narrow gauge rail. Several hundred drums with metal debris, broken glass, and an old piece of process equipment on the surface. Dums and metal debris removed as part of IRM (perimeter=500 foot). Minimal evidence of release from seve	This AOC has been referred to the Remedial Investigation, based on Phase I - Site Investigation Field Observation	NA - No Samples Collected
Development	K5-2	Pond	Shallow pond that contained approximately 50 drums and metal debris on the surface. Pond may be seasonal and trees are growing within the pond. Drums and metal debris removed as part of IRM (perimeter=500 foot).	This AOC has been referred to the Remedial Investigation, based on Phase I - Site Investigation Field Observation	NA - No Samples Collected

Table 6-1

AOCs Reserved For Remedial Investigation
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

Operational Area	AOC Designation	Name	Description	Sample Selection Justification	Unrestriced Use Exceedances
B-Line	M8-1	Disposal Area	Large area of stressed vegetation. Filled with building debris, scrap metal, wood, and drums. Some drums are buried and/or corroded (perimeter=2100 feet).	This AOC has been referred to the Remedial Investigation, based on Phase I - Site Investigation Field Observation	NA - No Samples Collected
Diazo	H8-1	Diazo Ponds	S pond's location evident due to stressed vegetation areas; N pond located from map; S pond shows dark brown to black soil staining with a red tint to staining (area=10,000 sq ft)	This AOC has been referred to the Remedial Investigation, based on Phase I - Site Investigation Field Observation	E&E
Diazo	H8-584	Can Stop Paint Shop	Bldg demolished-minimal evidence of former bldg; No evidence of release	This AOC has been referred to the Remedial Investigation, based on Phase I - Site Investigation Field Observation	E&E
Maintenance	G9-4	Buried Drum Area	Approximately 50 drums buried shallow beneath ground surface. Drums removed as part of IRM (perimeter=500 feet).	This AOC has been referred to the Remedial Investigation, based on Phase I - Site Investigation Field Observation	NA - No Samples Collected
Maintenance	H11-1	Former Burning Ground	Currently largely vegetated area with dark soil present towards E corner. No evidence of release (area=16,000 sq ft).	This AOC has been referred to the Remedial Investigation, based on Phase I - Site Investigation Field Observation	E&E
A-Line	E9-1	Store House	Wooden construction over concrete block; seven loading; doors on SE and NW sides; stressed vegetation leads to culvert on SE side of bldg.	This AOC has been referred to the Remedial Investigation due to the presence of E&E materials, based on Phase I - Site Investigation Field Observation	E&E
A-Line	E9-2119	Dry House	Wooden construction over concrete foundation; rail line; loading area on NW side; two steam pipe outlets on SE side; No evidence of release	This AOC has been referred to the Remedial Investigation due to the presence of powder on the ground, based on Phase I - Site Investigation Field Observation	E&E
A-Line	E9-2337	100-ft Dryer	Wood construction over concrete block; steam process water line leads to SE. No evidence of a release.	This AOC has been referred to the Remedial Investigation due to the presence of powder on the ground, based on Phase I - Site Investigation Field Observation	E&E
A-Line	F10-2094	NC Weigh House	Wooden construction over concrete foundation-loading area on SE side; new floor drain on NW side routed to adjacent culvert to WWTP. No evidence of release.	This AOC has been referred to the Remedial Investigation due to the presence of powder on the ground, based on Phase I - Site Investigation Field Observation	E&E
A-Line	G8-2110	Cut Powder Store	Wooden bldg constructed on concrete footers; rail loading area; on NE side; 1' x 1' duct work vent on NW side; No evidence of release.	This AOC has been referred to the Remedial Investigation due to the presence of E&E materials found to be present using an Expray Test Kit, based on Phase I - Site Investigation Field Observation	E&E
Finishing	J7-1	Graphite Pond	Former pond that received waste from Blender/Packer House J7-2281 J7-2282; pine trees in former pond; no water in former pond. No evidence of negative impact to the pond (area=18,000 sq ft).	This AOC has been reserved for the Remedial Investigation due to the presence of E&E materials, based on Phase I - Site Investigation Field Observation	E&E
AN	H12-237	Former Burning Ground	Large areas of SV; minor amounts of gray/green discoloration. Slag aggregate present (area=25,000 sq ft).	This AOC has been referred to the Remedial Investigation due to the presence of E&E materials, based on Phase I - Site Investigation Field Observation	E&E
AN	H13-1	Unknown Name	Bldg. demolished-wood construction; three posts evident in W corner; Stressed vegetation in W corner and N of rail line off of N corner of bldg.	This AOC has been referred to the Remedial Investigation due to the presence of E&E materials, based on Phase I - Site Investigation Field Observation	E&E
AN	H13-7	Stressed Vegetation	Large area with minimal vegetation; White powdery material present in small amounts to S corner of area (area=6,200 sq ft)	This AOC has been referred to the Remedial Investigation due to the presence of E&E materials, based on Phase I - Site Investigation Field Observation	E&E

Table 6-1

AOCs Reserved For Remedial Investigation
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

Operational Area	AOC Designation	Name	Description	Sample Selection Justification	Unrestriced Use Exceedances
Storage	J10-2166	D-2 Wax House	CMU foundation with wooden siding. Catch tank on S side.	This AOC has been referred to the Remedial Investigation due to the presence of E&E materials, based on Phase I - Site Investigation Field Observation	E&E
Storage	N6-1	Disposal Area	Area used for disposal of solid materials: machinery, concrete, drums, wood, etc. Disposal area currently covered with grass (perimeter=2000 feet).	This AOC has been referred to the Remedial Investigation, based on Phase I - Site Investigation Field Observation	NA - No Samples Collected

Abbreviations:
AOC = Area of Concern
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
XRF = X-ray Fluorescence

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
IRM = Interim Remedial Measure
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector

Sq Ft = Square Foot
No. = Number
NA = Not Applicable

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 7-1

Uncompleted Sampling Activities
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

Operational Area	AOC Designation	OP #	Name	Description	Screening Sample IDs	Analytical Sample Ids	Required Action
TNT	A12-3	1	Heater House	Heater house collapsing foundation (area 600 sq. ft.)	SB-A12-3-01 through SB-A12-3-04	SB-A12-3-03	Collect a confirmation analytical sample at SB-A12-3-02
TNT	A13-753	1	Filter House #3	Bldg. and associated berm almost totally removed; substantial vegetation; pieces of metal machinery in center of former bldg. Small pile of metal reinforcing bars E of A13-753 (area 500 sq. ft.)	SB-A13-753-01 through SB-A13-753-04	SB-A13-753-01	Collect a confirmation analytical sample at SB-A13-753-03
NG	D10-3	3	Electric Transformer	Transformer has been removed. No evidence of release	SB-D10-3-01	SB-D10-3-01	Collect an analytical sample at SB-D10-3-01, and analyze for Metals
MAINTENANCE	G9-8105	7	Machine Shop	Brick shop built on concrete foundation; concrete gutter along SE side. No evidence of release.	SB-G9-8105-01 through SB-G9-8105-07	SB-G9-8105-05	Collect a confirmation analytical sample at SB-G9-8105-04
MAINTENANCE	H12-4	7	Baled Bag Store #10	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H12-4-01 through SB-H12-4-03	SB-H12-4-01	Collect a confirmation analytical sample at SB-H12-4-02
MAINTENANCE	H12-5	7	Pulp and Sawdust Store #4	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H12-5-01 through SB-H12-5-03	SB-H12-5-03	Collect a confirmation analytical sample at SB-H12-5-02
A-LINE	E9-556	9	Cotton Blend	Bldg demolished-only concrete foundation remains; No evidence of release (area=300 sq ft)	SB-E9-556-01 through SB-E9-556-04	SB-E9-556-04	Collect a confirmation analytical sample at SB-E9-556-02
A-LINE	F10-2289	9	Catch Tank House	Corrugated sheet metal and wood construction over concrete foundation; gutter from 2101; No evidence of release	SB-F10-2289-01 through SB-F10-2289-04	SB-F10-2289-01	Collect a confirmation analytical sample at SB-F10-2289-03
A-LINE	F8-1	9	Unknown	Bldg demolished; corners of foundation evident the rest covered by soil; 4" pipe into ground at S corner. No evidence of release.	SB-F8-1-01 through SB-F8-1-06	SB-F8-1-02	Collect a confirmation analytical sample at SB-F8-1-04
A-LINE	F8-2	9	Unknown	Bldg. demolished; old concrete foundations evident in S and E; remainder covered by soil; sheet metal debris present possibly due to adjacent F8-2117	SB-F8-2-01 through SB-F8-2-05	SB-F8-2-01	Collect a confirmation analytical sample at SB-F8-2-05
A-LINE	F8-4	9	Unknown Foundations	Concrete pads; W pad has cast-in-place rebar. Bldgs demolished. No evidence of release (area=200 sq ft).	SB-F8-4-01 through SB-F8-4-03	SB-F8-4-02	Collect a confirmation analytical sample at SB-F8-4-03
A-LINE	F8-567	9	Final Mix House	Bldg demolished; concrete rubble at N end; No evidence of release	SB-F8-567-01 through SB-F8-567-05	SB-F8-567-05	Collect a confirmation analytical sample at SB-F8-567-02
A-LINE	F9-2104	9	Premix Rest House	Wooden and corrugated sheet metal construction; steam pipe enters E corner; drum of potassium sulfate inside; No evidence of release	SB-F9-2104-01 through SB-F9-2104-06	SB-F9-2104-03	Collect a confirmation analytical sample at SB-F9-2104-02
A-LINE	F9-2279	9	Air Compressor/Dryer House	Sheet metal and fiberglass over wood; air compressor/dryer evident in fiberglass enclosed SW half of structure; No evidence of release	SB-F9-2279-01 through SB-F9-2279-04	SB-F9-2279-02	Collect a confirmation analytical sample at SB-F9-2279-04
A-LINE	F9-558A	9	Dehydrator	Bldg demolished-minimal evidence of former bldg; No evidence of release (area=500 sq ft)	SB-F9-558A-01 through SB-F9-558A-04	SB-F9-558A-01	Collect a confirmation analytical sample at SB-F9-558A-03

Table 7-1

Uncompleted Sampling Activities
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

Operational Area	AOC Designation	OP #	Name	Description	Screening Sample IDs	Analytical Sample Ids	Required Action
TNT	A12-3	1	Heater House	Heater house collapsing foundation (area 600 sq. ft.)	SB-A12-3-01 through SB-A12-3-04	SB-A12-3-03	Collect a confirmation analytical sample at SB-A12-3-02
A-LINE	F9-PA3	9	Collection Pit	Culvert leads in from A1/A2 and out to A4; feed in from 2106; No evidence of release			Excavate a Test Pit at this location, collect a screening sample and an analytical sample
FINISHING	I9-515	10	Spent Acid Recovery	Bldg demolished; pine grove planted in former location; No evidence of a release	SB-I9-515-01 through SB-I9-515-05	SB-I9-515-01	Collect a confirmation analytical sample at SB-I9-515-05
STORAGE	L7-4	12	Discarded Drums	Drums and metal debris has been removed; No evidence of a release	SB-L7-4-01 through SB-L7-4-03	SB-L7-4-02	Collect a confirmation analytical sample at SB-L7-4-01
STORAGE	P5-536	12	Dry House #55	Same as 05-537 except berm is more intact, there is a 0.5 inch pipe going into ground at NE corner.	SB-P5-536-01 through SB-P5-536-06	SB-P5-536-01	Collect a confirmation analytical sample at SB-P5-536-05
MISCELLANEOUS/OFFSITE	D16-1	13	Administration Building	Wooden/siding construction over concrete block foundation Ceramic catch pipe on SE corner. No evidence of release.	SB-D16-1-01 through SB-D16-1-05	SB-D16-1-01 SB-D16-1-02	Collect a confirmation analytical sample at SB-D16-1-04

Note: All area measurements have been rounded to the nearest 100 feet.

Abbreviations:

TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
IRM = Interim Remedial Measure
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
Sq Ft = Square Foot
No. = Number
AOC = Area of Concern
XRF = X-ray Fluorescence
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 8-1

Geophysical Investigation
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

Operational Area	AOC Designation	Name	Description
TNT	B13-2	Gravel Pit	Center of stressed vegetation, gravel pit (perimeter=800 ft)
MAINTENANCE	G9-4	Buried Drum Area	Approximately 50 drums buried shallow beneath surface. Drums removed as part of Single Phase Remediation. (perimeter=200 ft)
DEVELOPMENT	K05-1	Former Drum Disposal Area	Area adjacent to narrow gauge rail. Several hundred drums with metal debris, broken glass, and an old piece of process equipment on surface. Drums and metal debris removed as part of Single Phase Remediation. (perimeter=500 ft)
DEVELOPMENT	K5-2	Pond	Shallow pond that contained approximately 50 drums and metal debris on surface. Pond may be seasonal and trees are growing within the pond. Drums and metal debris removed as part of Single Phase Remediation. (perimeter=500 ft)
DEVELOPMENT	K6-1	Debris Area	Small area of drum and metal debris. Drums and metal debris removed as part of Single Phase Remediation. (perimeter=40 ft)
B-LINE	M8-1	Former Landfill	Large area of stressed vegetation. Filled with building material, scrap metal, wood and drums. Some drums are buried and/or corroded. (perimeter=2100 ft)
STORAGE	N6-1	Former Landfill	Area used for disposal of solid materials: machinery, concrete, drums, wood, etc. Landfill currently covered with grass (perimeter=2000 ft)

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

Table 5-2B

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

Table 5-3B

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

Table 5-3E

Analytical Results
NG Area - Metals
Phase I - Site Investigation
Kenvil Works Facility, New Jersey
