EXECUTIVE SUMMARY ES-1

1.0 INTRODUCTION 1-1
- 1.1 PROJECT OBJECTIVE 1-2
- 1.2 REPORT ORGANIZATION 1-3
- 1.3 FACILITY HISTORY 1-4
- 1.4 FACILITY DESCRIPTION 1-5
- 1.5 FACILITY AOC DESCRIPTION 1-6
  - 1.5.1 Existing Buildings 1-7
  - 1.5.2 Remnant Buildings 1-7
  - 1.5.3 Building Ancillary Features 1-8
  - 1.5.4 Aboveground Storage Tanks (ASTs) 1-8
  - 1.5.5 Underground Storage Tanks (USTs) 1-8
  - 1.5.6 Septic Tanks 1-8
  - 1.5.7 Spill Containment Structures/Culverts/Wastewater Pits 1-9
  - 1.5.8 Above Grade Process Pipelines/NG Gutters 1-9
  - 1.5.9 Discharge Points or Areas/Remnant Activity Areas 1-9
  - 1.5.10 Transformers/Electric Substations 1-10
- 1.6 COMPLEX AOCS 1-10
- 1.7 REGIONAL GEOLOGY 1-10
  - 1.7.1 Bedrock Geologic Units 1-11
  - 1.7.2 Glacial Deposits 1-11
- 1.8 REGIONAL HYDROGEOLOGY 1-12
- 1.9 PREVIOUS INVESTIGATIONS SUMMARY 1-13
  - 1.9.1 Preliminary Assessment Report 1-13
  - 1.9.2 Preliminary SI of the TNT Area 1-14
- 1.10 FACILITY-WIDE INVESTIGATION DEVELOPMENT ACTIVITIES 1-14
  - 1.10.1 Historical Map Review/Digitization 1-14
  - 1.10.2 Site Reconnaissance/Survey 1-15
  - 1.10.3 Basemap Development 1-15
  - 1.10.4 Facility Grid System and Feature Identification 1-15
  - 1.10.5 Undeveloped Area Preliminary Assessment/ Site Investigation (PA/SI) 1-16

2.0 SCOPE OF WORK 2-1
- 2.1 SOIL SAMPLING 2-1
  - 2.1.1 Field Screening Methods 2-1
    - 2.1.1.1 Explosive and Energetic Compounds 2-1
    - 2.1.1.2 Volatile Organic Compounds 2-3

EXECUTIVE SUMMARY

This document presents the results of the Site Investigation (SI) conducted on the soils (Soils – SI) of the Hercules Incorporated Kenvil Works Facility (facility) as part of an obligation to execute a Remedial Agreement (RA) with the New Jersey Department of Environmental Protection (NJDEP). The RA was signed on March 10, 1995 and establishes the basis for conducting activities at the facility under New Jersey's Industrial Site Recovery Act (ISRA). This report has been prepared adhering to the requirements of New Jersey Administrative Code (N.J.A.C) 7:26E-3.13 for the submittal of SI reports.

The primary objective of the Soil – SI, as described in N.J.A.C. 7:26E-3.3(a), is to determine on a facility-wide basis, and in a manageable and cost effective manner, if there are any contaminants present within the facility soils at concentrations exceeding any applicable clean-up standards.

The facility is comprised of approximately 1,200 Areas of Concern (AOCs), as defined by N.J.A.C. 7:26E-1.8. Due to the high degree of complexity and numerous years of operational history, many of these AOCs share or have supported similar facility functions. The AOCs are grouped into the following 10 categories to simplify development of sampling and analysis protocols for each AOC in compliance with N.J.A.C. 7:26E-3.3 through 3.12 requirements. The following is a listing of each AOC category present at the facility:

- Existing Buildings
- Remnant Buildings
- Building Ancillary Features
- Aboveground Storage Tanks
- Underground Storage Tanks
- Septic Tanks
- Spill Containment Structures/Culverts/Wastewater Pits
- Above-grade Process Pipelines/Nitroglycerin (NG) Gutters
- Discharge Points or Areas/Remnant Activity Areas
- Transformers/Electric Substations

The Soil - SI is designed to comply with the intent of the NJDEP's Technical Requirements for Site Remediation (Technical Requirements) documented in N.J.A.C. 7:26E. Specifically, the Soil – SI field investigation complies with the SI requirements established in N.J.A.C. 7:26E-3.3 through 3.12. The required number of analytical samples described in the Technical Requirements was reduced and approved by the NJDEP as a variance to the regulations by utilizing the following sample collection methodology:

- Field soil screening methods were used throughout the SI investigation to bias the collection of analytical samples sent to an independent laboratory for analysis. Screening data was used to evaluate, at a minimum, energetic and explosive (E&E) compounds by colorimetric methods, volatile organic compounds (VOCs) utilizing a photoionization/flame ionization detector, and metals utilizing X-Ray fluorescence spectrophotometry. Collection of screening samples was compliant to the sampling requirements of N.J.A.C 7:26E-3.5 through 3.9 and biased towards the location of suspected greatest contamination based on field conditions or knowledge of operations history as defined in N.J.A.C. 7:26E-3.4. The following criteria were used to bias screening samples: area history, discolored soil, stressed vegetation, drainage patterns, field screening, odor, and professional judgement.

- Analytical sample collection was based on screening results, field conditions, or knowledge of history where site screening results were inconclusive. At most, AOCs analytical samples were collected at a frequency of two samples per each AOC with an area greater than 100 square feet unless the NJDEP Technical Requirements stipulate a single sample is necessary for that AOC category. AOCs less than 100 square feet in area were addressed with one analytical sample. In the case of complex AOCs (multiple AOCs functioning as a single operational unit), one analytical sample was collected for each AOC category present. Complex AOCs with only two AOC categories were addressed with two analytical samples. This sample frequency was collected to justify a request of no further action in the event favorable analytical results were received.

To accomplish the objective of the Soils - SI, Hercules categorized the approximately 1,200 areas of concern (AOCs) into common groups to aid in processing each AOC through the SI process. To categorize the AOCs into common groups, the results of the approximately 1,900 laboratory analyzed samples collected during the Soil – SI field investigation were compared to the NJDEP Residential Direct Contact Soil Clean-up Criteria (RDCSCC), Non-Residential Direct Contact Soil Clean-up Criteria (NRDSCC), and Impact to Groundwater

Soil Clean-up Criteria (IGWSCC). Based on these comparisons, the AOCs were placed into the categories below, which are:

- AOCs requiring no further action (NFA). NFA is requested for AOCs identified not to have constituents within the soil exceeding any of the NJDEP Soil Clean-up Criteria (NJSCC).

- AOCs requiring further action (FA) and additional investigation. AOCs that have identified constituents within the soil exceeding at least one of the NJSCC will continue through the facility-wide restoration strategy as depicted in Figure 1-1 of Volume I. This category is subdivided into the following subcategories:

  - AOCs suitable for Single Phase Remediation. These are AOCs where the remedial action can be conducted concurrently with sampling efforts to delineate the contamination and to confirm contaminant removal. AOCs suitable for Single Phase Remediation will be identified and discussed with NJDEP prior to initiating remedial activities.

  - AOCs reserved for the Remedial Investigation (RI). AOCs were placed in this subcategory based on field observations determining that various facility related constituents would exceed the NJDEP RDCSCC.

The results of the AOC categorization yielded 517 AOCs recommended for NFA and 694 AOCs requiring FA. Included in the 694 AOCs requiring FA, 34 AOCs are suitable for Single Phase Remediation, 43 AOCs are Reserved for RI, 19 AOCs require confirmation sampling, and one AOC was inadvertently missed during the field investigation. The total number of AOCs investigated, site-wide, during the Soils – SI is 1211 AOCs.

1.0 INTRODUCTION

Hercules Incorporated (Hercules) retained MWH Americas, Inc. (MWH) to conduct a Site Investigation (SI) on the soils (Soils – SI) of the Kenvil Works Facility (facility) as part of their obligation to execute a Remedial Agreement (RA) with the New Jersey Department of Environmental Protection (NJDEP). The RA was signed on March 10, 1995 and establishes the basis for conducting activities at the site under New Jersey's Industrial Site Recovery Act (ISRA).

The Soil - SI was designed to comply with the intent of the NJDEP's Technical Requirements for Site Remediation (Technical Requirements) documented in the New Jersey Administrative Code (N.J.A.C.) 7:26E. Specifically, the Soil – SI field investigation complies with the SI requirements established in N.J.A.C. 7:26E-3.3 through 3.12. This report has been prepared following the requirements of N.J.A.C 7:26E-3.13 for the submittal of SI reports.

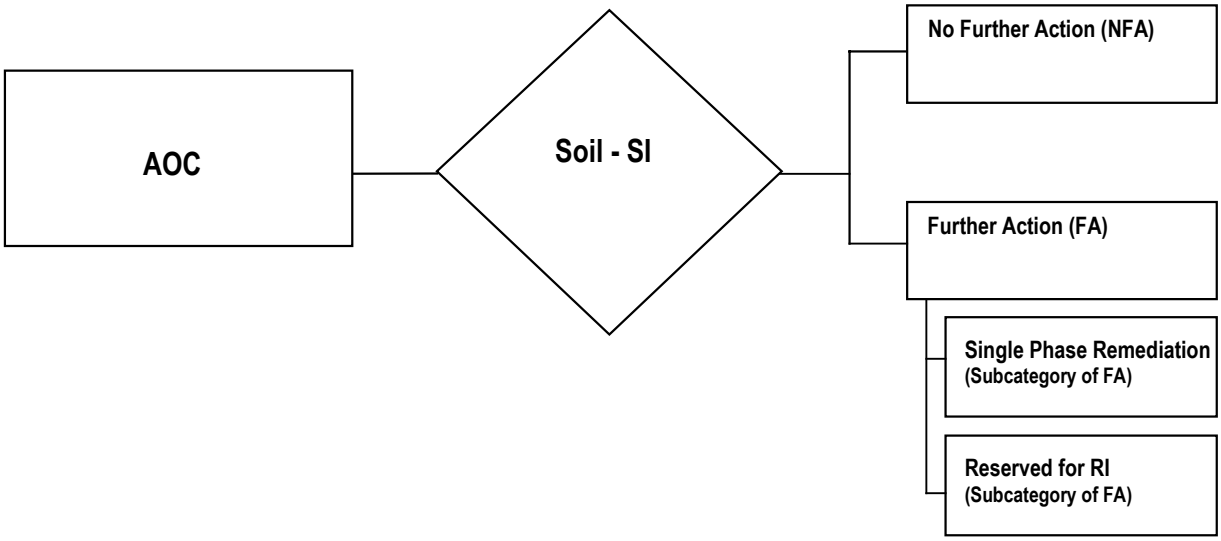
This Soil – SI is one of a series of phases that comprise a facility-wide restoration strategy. The facility-wide restoration strategy, graphically presented on Figure 1-1 of Volume I, incorporates flexibility to address each major environmental media (i.e. groundwater, sediment, surface water, or soils) either on a facility-wide or a former operational area basis.

The following documents, each previously submitted to NJDEP, were integral to the performance of the Soil - SI:

- The *Field Site-Specific Health and Safety Plan* (SSHSP – Montgomery Watson, April 1999) provides the health and safety procedures to be adhered to during the facility-wide investigation. The NJDEP received the SSHSP in compliance with N.J.A.C. 7:26E-1.9.

- The *Revised Analytical Quality Assurance Project Plan* (AQAPP - Montgomery Watson, December 2000) describes the quality assurance/quality control (QA/QC) procedures for all analytical activities conducted during the facility-wide investigation, including the Soil - SI. The Revised AQAPP was modified to include Lancaster Laboratories as a contract laboratory. The NJDEP has approved the previous AQAPP.

- The *Final Field Quality Assurance Project Plan* (FQAPP - Montgomery Watson, June 1999) was developed to describe, in detail, the field sampling and screening methodologies to be followed during the facility-wide investigation, including the Soil - SI. NJDEP has approved the FQAPP.



1.1 PROJECT OBJECTIVE

The primary objective of the Soil – SI as described in N.J.A.C. 7:26E-3.3(a) is to determine on a facility-wide basis, and in a manageable and cost effective manner, if there are any contaminants present within the facility soils at concentrations exceeding any of the applicable clean-up standards.

To accomplish this objective, following the receipt of analytical results, Hercules categorized the approximately 1,200 areas of concern (AOCs) into common groups to aid in processing each AOC through the SI process. To categorize the AOCs into common groups, the results of the laboratory analysis collected during the Soil – SI field investigation were compared to the NJDEP Residential Direct Contact Soil Clean-up Criteria (RDCSCC), Non-Residential Direct Contact Soil Clean-up Criteria (NRDSCC), and Impact to Groundwater Soil Clean-up Criteria (IGWSCC). Based on these comparisons, the AOCs were placed into the following categories:

- AOCs requiring no further action (NFA). NFA is requested for AOCs identified not to have constituents within the soil exceeding any of the NJDEP Soil Clean-up Criteria (NJSCC).
- AOCs requiring further action (FA) and additional investigation. AOCs that have identified constituents within the soil exceeding at least one of the NJSCC will continue through the facility-wide restoration strategy as depicted in Figure 1-1 of Volume I. This category is subdivided into the following subcategories:
  - AOCs suitable for Sinlge Phase Remediation. These are AOCs where the remedial action may be suitable to be conducted concurrently with sampling efforts to delineate the contamination and to confirm contaminant removal. AOCs selected for Single Phase Remediation will be identified and discussed with the NJDEP prior to any remedial action.
  - AOCs reserved for the Remedial Investigation (RI). AOCs were placed in this subcategory based on field observations determining that various facility related constituents would exceed the NJDEP RDCSCC.

AOC Processing Concept

This grouping will be used to focus the next phase of site characterization and to identify areas that are good candidates for potential single-phase remediation, if appropriate. This laboratory analytical results-based grouping should not be confused with the AOC categories developed to aid in the logistics of field sampling the approximately 1200 AOCs, which is described in Section 1.5 of this report.

Note: Site-specific clean-up criteria are likely to be established for the facility. Following NJDEP acceptance of any site-specific clean-up criteria, AOCs may be moved from the remedial categories to the NFA category.

1.2 REPORT ORGANIZATION

This report is organized as follows:

- Section 1.0 presents the report organization and objectives, and summarizes facility background information.
- Section 2.0 presents the scope of work for the Soil – SI, which describes the specific sampling procedures and requirements followed during site screening activities.

- Section 3.0 presents the data quality control results for samples collected during the Soil – SI.

- Section 4.0 describes the background concentrations of the constituents detected during the Soil – SI. The background samples were collected from unutilized portions of the facility and represent native conditions.

- Section 5.0 summarizes the results of the analytical samples collected during the Soil - SI.

- Section 6.0 presents the AOCs that were reserved for the forthcoming remedial investigation. AOCs were reserved for the remedial investigation based on field observations determining that various facility related constituents would exceed the NJCSCC.

- Section 7.0 summarizes the remaining field-sampling activities that were not completed during the Soil –SI.

- Section 8.0 presents the results of the geophysical investigation conducted as part of the Soil – SI.

- Section 9.0 presents the conclusions of this Soil – SI report, as well as recommendations for future work based on the results of the Soil – SI report.

1.3 FACILITY HISTORY

The facility dates back to the 1870's when it was opened for the manufacture of dynamite to support the iron ore mining operations in the surrounding area. The facility was operated by various companies until 1912 when Hercules became the sole owner.

The facility has produced a variety of explosive and energetic (propellant) (E&E) related products for both military and commercial applications. In the early 1900's, the plant produced trinitrotoluene (TNT) in support of World War I activities along with other ordnance-related materials. The production of materials for military applications was expanded during World War II to include smokeless powder for both the United States and Great Britain. During the 1980's, the explosives industry began using Ammonium Nitrate/Fuel Oil (ANFO) in many explosive applications. Ammonium Nitrate manufacturing operations were installed and slurry explosive trucks operated out of the facility. The facility has also maintained a research and development area and produced special products such as initiating materials, ingredients for medical applications, and materials for actuating devices.

The principal product over the last 20 years, smokeless powder, was most recently produced by Alliant Techsystems (Alliant) under a facility lease agreement. The principal processing areas for this activity include the Nitroglycerin (NG) Area, the A-Line production area, the B-Line production area, and the Finishing Area. Material handling areas at the facility include both loading and unloading areas which were used to unload incoming raw materials and load finished product for shipment by truck. Former support areas at the facility included office space, plant laboratories, maintenance areas, power houses, mixed acid areas, drum storage areas, the water supply system, a wastewater treatment plant (WWTP), warehouses and other miscellaneous production and support buildings.

In early 1995, Hercules sold the smokeless powder business to Alliant, who operated the facility until December 31, 1996. Hercules re-acquired control of the facility on January 1, 1997 and as the property owner is responsible for the remediation and closure of the facility for sale or reuse.

During the time Alliant operated the facility, Hercules entered into a voluntary agreement with the State of New Jersey to investigate the contamination level at the TNT area. ISRA requirements were triggered when Alliant terminated the lease for the facility.

1.4 FACILITY DESCRIPTION

The facility is located on Howard Boulevard, approximately 0.5 miles northwest of the center of Kenvil, in Morris County, New Jersey. Figure 1-2 of Volume I illustrates the location of the site with respect to Roxbury Township. Figure 1-3 of Volume I provides a general layout of the plant divided into 13 former operational areas, including:

1. Trinitrotoluene (TNT) Area
2. Dynamite Area
3. Nitroglycerin (NG) Area
4. Pentaerythritol Tetranitrate (PETN) Area
5. Development Area
6. Diazodinitrophenol (DIAZO) Area
7. Maintenance Area
8. B-Line Area

9. A-Line Area
10. Finishing Area
11. Ammonia Nitrate (AN) Area
12. Storage Area
13. Miscellaneous/Offsite Area

The plant is located approximately 40 miles west of New York City and 30 miles east of the Delaware Water Gap. The site is approximately 13,000 feet long by 5,000 feet wide and occupies approximately 1,200 acres, of which approximately 800 acres were developed for plant use. The remaining 400 acres are undeveloped areas between process units and around the perimeter of the site, which buffer the former active portions of the plant from the surrounding community.

The plant's production areas are centrally located in a relatively flat area with a slight slope extending to Howard Boulevard on the northwest side and a topographic ridge on the southeast side that separates the production area from the Berkshire Valley area. The property contains several wet areas and has one major pond, known as "Duck Pond", which is approximately 10 acres in size.

The principal process areas at the facility included the TNT Area, Nitroglycerine (NG) Area, Diazo area, A-Line Area, B-Line Area, Dynamite Area, Development Area, and Finishing Area. The material handling areas at the facility included loading and unloading areas, where raw materials were unloaded and finished product was loaded for shipment by truck, and tank farms where raw and recovered materials were stored.

1.5 FACILITY AOC DESCRIPTION

The facility is comprised of approximately 1,200 AOCs, as defined by N.J.A.C. 7:26E-1.8. Due to its high degree of complexity and numerous years of operational history, many of these AOCs share or have supported similar facility functions. The AOCs were grouped into the following 10 categories to simplify development of sampling and analysis protocols for each AOC in compliance with N.J.A.C. 7:26E-3.3 through 3.12 requirements. The following

is a listing and description of each AOC category present at the facility and the NJDEP approved sampling protocols, which represent a variance to the Technical Requirements:

- Existing Buildings
- Remnant Buildings
- Building Ancillary Features
- Aboveground Storage Tanks
- Underground Storage Tanks
- Septic Tanks
- Spill Containment Structures/Culverts/Wastewater Pits
- Above-grade Process Pipelines/NG Gutters
- Discharge Points or Areas/Remnant Activity Areas
- Transformers/Electric Substations

1.5.1 Existing Buildings

Many existing structures were present at the time the Soil – SI field efforts were performed. These structures generally ranged from 2-foot by 5-foot storage sheds to 200-foot by 100-foot manufacturing buildings. The structures were constructed of very high-grade materials meeting Department of Defense (DOD) explosive manufacturing specifications and were in good condition. Decontamination and dismantlement (D&D) efforts have been conducted in conjunction with the implementation of the SI and as a result the majority of the buildings present at the time of the Soil – SI field efforts have since been demolished. Figures 1-4 and 1-5 of Volume I present the soil screening strategy for existing and soil covered buildings.

1.5.2 Remnant Buildings

During the long historic operation of the facility, many buildings were demolished to support new and modified manufacturing processes. Formerly demolished buildings were observed in the form of building foundations, building rubble, or building foundations partially or largely covered with soil and/or vegetation. Every attempt was made to identify the function of each remnant building and identify any ancillary features associated with its use. Figures 1-6, 1-7, and 1-8 of Volume I present the soil screening strategy for remnant buildings.

1.5.3 Building Ancillary Features

Building ancillary features are locations intimately integrated into the former use of a building that meet the NJDEP description of an AOC. The primary ancillary features encountered at the site were loading areas, storage areas, and drain pipes associated with the process function of the buildings. Figure 1-4 of Volume I presents the soil screening strategy for building ancillary features.

1.5.4 Aboveground Storage Tanks (ASTs)

Present and former aboveground storage tanks (ASTs) encountered during the site reconnaissance were generally used for liquid storage or as compressed air tanks during facility operation. ASTs were identified mounted/formerly mounted above soil and containment pads. Figure 1-9 of Volume I presents the soil screening strategy for ASTs.

1.5.5 Underground Storage Tanks (USTs)

In July of 1998, two 2,000-gallon underground storage tanks (USTs) were removed from the facility's maintenance area. The removal of the two USTs were cited in *Site Investigation Report – UST Closure* (November 1998), and are believed to be the last regulated USTs within the facility boundary.

1.5.6 Septic Tanks/Leach Fields

Septic tanks are present at the facility and are associated with "change houses," which are essentially personnel locker room type structures. Records indicate that the septic tanks held sanitary waste. Originally, the septic tanks were believed to have associated drain fields but upon inspection it was determined that the septic tanks were operated similar to cesspools and there were no associated drain fields. All known septic tanks within the facility boundary have been included in this report. Figure 1-10 of Volume I presents the soil screening strategy for septic tanks.

1.5.7 Spill Containment Structures/Culverts/Wastewater Pits

Spill containment structures present at the facility were encountered in the form of "catch tanks" or "catch basins" located to collect facility process liquids and fine-grained material. These structures were generally closely associated with a specific process building and were used in conjunction with underground pipelines, culverts (the intersection of two or more wastewater pipelines), or "wastewater pits" to transfer process liquids to the facility WWTP plant. The intersection of the wastewater pipelines was contained within cement structures and culverts were cleaned at regular intervals to reduce the potential for an explosive hazard to exist within the wastewater treatment system. Figure 1-11 of Volume I presents the soil screening strategy for spill containment structures/culverts/wastewater pits.

1.5.8 Above Grade Process Pipelines/NG Gutters

Above grade process pipelines and nitroglycerin (NG) gutters were utilized to transfer process fluids within the facility. Due to the nature of explosive manufacturing, very little above grade process piping was present at the facility. The majority of the chemical inventory required for manufacturing was stored in small quantities at the particular manufacturing site. Historically, explosions and fires made bulk transfer of raw chemical material through pipelines impractical. The primary above grade process piping was used for cooling water and compressed air in support of the manufacturing operations. The only significant above grade chemical process piping were the NG gutters, specified by the DOD, to transport NG from the manufacturing buildings to the storage areas. Figure 1-12 of Volume I presents the soil screening strategy for above grade process pipelines/NG gutters.

1.5.9 Discharge Points or Areas/Remnant Activity Areas

Discharge points or areas were encountered as areas of "stressed vegetation". Remnant activity areas were defined as areas in which general facility support previously occurred and there is no history of hazardous substance usage or storage. Examples of remnant activity areas include a former scrap metal storage area that stored only non-contaminated metal prior to shipment off-site for reuse, wood storage, and equipment staging. Figure 1-13 of Volume I presents the soil screening strategy for discharge points or areas/remnant activity areas.

1.5.10 Transformers/Electric Substations

Transformers and electric substations were either attached to utility poles or installed within a gravel-covered electric substation area. The small utility pole mounted transformers were the most prevalent. Figure 1-14 of Volume I presents the soil screening strategy for transformers/electric substations.

1.6 COMPLEX AOCS

Complex AOCs are defined as a single operational unit, such as a shipping house or process building, that possessed more than one AOC category as defined by the NJDEP (i.e. loading areas, catch tank, and floor drain) that was integral to the operation of the unit. Complex AOCs were viewed as individual discrete units and were investigated as such; one analytical sample was collected for each AOC category present, with a two-sample minimum.

1.7 REGIONAL GEOLOGY

The facility is located in the New Jersey Highlands physiographic province of north central New Jersey. This area is characterized by broad, elevated ridges separated by long, narrow valleys. Areas of higher elevation are underlain by Proterozoic crystalline metamorphic bedrock that has been intricately deformed by folding and faulting. Prominent faults in the vicinity of the site include the Longwood Valley Fault, the Berkshire Valley Fault, and the Picatinny Fault. These faults resulted from several periods of Paleozoic and Mesozoic deformation. Faults and fold axes are generally oriented in a southwest to northeast direction. This results in topographic features such as ridges and valleys to also be oriented in a southwest to northeast direction. A layer of colluvium and weathered bedrock, generally less than 10 feet thick, is present on some hillsides in the area. The colluvium is composed of unstratified and unsorted boulders, cobbles, and pebbles of bedrock in an orange-brown, silty-sand matrix. The weathered bedrock ranges from sandy saprolite to a rubble of angular cobbles and boulders.

Bedrock and surficial geologic maps for the vicinity of the site are provided in Figures 1-15 and 1-16 of Volume I, respectively. Figure 1-17 of Volume I presents a geologic cross section of the region.

1.7.1 Bedrock Geologic Units

The Byram Intrusive Suite of the Proterozoic age forms the ridges of Mine Hill southeast of the site and Mount Arlington and Mooney Mountain northwest of the site. The bedrock of the Byram Intrusive Suite predominantly consists of light-colored granite gneisses and gneissoid granites.

The Hardyston Formation and the Leithsville Dolomite of the Cambrian age are present in the subsurface within the valleys between Mine Hill and Mooney Mountain. The Hardyston Formation consists of quartzite and conglomerate. The Leithsville Formation contains dolomite, dolomitic shale, and interbedded sandstone. The Hardyston Formation occurs throughout most of Long Valley and is overlain by bedrock of the Leithsville Formation. These formations are overlain by glacial deposits in the vicinity of the site.

Beds of Silurian age quartzite and conglomerate of the Green Pond Formation form a minor ridge, Green Pond Ridge, which divides Long Valley into two parts in the vicinity of the site. The ridge is present along the southeastern boundary of the plant. The Green Pond Conglomerate is oriented in a southwest to northeast direction and continues in the subsurface beneath the overlying glacial deposits away from the facility.

Undifferentiated sedimentary rocks of Silurian and Devonian age consisting of shale and sandstone are present north of the site within the Berkshire Valley.

1.7.2 Glacial Deposits

Three Pleistocene age glacial geologic units, known in the literature as "valley-fill", are present in the area: a basal fluvial and deltaic sand and gravel unit; a middle lacustrine unit consisting of fine sand, silt, and clay; and an upper outwash deposit consisting of sand and gravel. The top of the basal sand and gravel unit occurs at the facility at a depth of approximately 200 feet below ground surface (bgs) and is up to 50 feet thick. The middle lacustrine unit occurs at a depth of approximately 50 to 200 feet bgs and is approximately 150 feet thick. The upper outwash unit occurs at the ground surface in the vicinity of the site and is approximately 50 feet thick.

The valley-fill deposits are overlain by terminal moraine deposits in the northeastern portions of the facility. Terminal moraine deposits, which were formed at the furthest advance of the glacial front, are a distinctive topographic feature extending across northern New Jersey and through the northern portion of the facility. The terminal moraine deposits are composed of poorly sorted clay and boulders interstratified with well-sorted sand and gravel. Boulders as large as 10 feet in diameter are reportedly present in the terminal moraine deposits in the vicinity of the facility (Roux, 1993).

1.8 REGIONAL HYDROGEOLOGY

The occurrence and movement of groundwater in the region varies according to the geologic materials present. In the bedrock geologic units, groundwater occurs principally within fractures, bedding planes, and zones of shearing and faulting. The primary porosity of these rocks is minimal. The availability of water from wells drilled in these bedrock formations is dependent upon the size and frequency of fractures encountered in any particular well. The yield of large-diameter supply wells located within the bedrock formations in Morris County reportedly range from 4 to 400 gallons per minute (gpm) with a median range of 25 to 50 gpm (Roux, 1993). Recharge occurs to these formations by direct infiltration from precipitation. Local ground water flows from the topographic high areas and discharges into the adjacent valleys.

The sand and gravel deposits form the most significant aquifers in the region due to their high porosity. Groundwater occurs in these deposits under unconfined conditions throughout large areas, and under confined and semi-confined conditions where bounded by impermeable clays. The sand and gravel valley-fill aquifers are the largest producers of water in the region. Yields of large-diameter wells reportedly range from 20 to 2,000 gpm with a median range between 200 to 500 gpm (Roux, 1993).

The sand and gravel aquifers occur throughout the valleys in the vicinity of the facility. The aquifers receive recharge from direct infiltration of precipitation, infiltration from surface water bodies, and from subsurface discharge from adjacent bedrock formations. Discharge occurs to streams in low-lying parts of the valley.

Groundwater flow in the sand and gravel aquifers is controlled by the topography and by the locations of the major stream drainage systems. The permeability of the sand and gravel aquifers is greater than that of the surrounding bedrock. The bedrock formations act as semipermeable boundaries. Groundwater generally flows in the direction of the valley and trends either to the northeast or southwest. The ridge composed of quartzite and conglomerate of the Green Pond Formation divides the valley into two parts, and locally acts as a northeast to southwest boundary to groundwater flow.

1.9 PREVIOUS INVESTIGATIONS SUMMARY

This section summarizes the previous investigations conducted at the facility, including the Preliminary Assessment (PA) and the Preliminary SI of the TNT Area conducted by Roux Associates (Roux). These investigations were conducted prior to the development of the facility-wide investigation strategy.

1.9.1 Preliminary Assessment Report

A PA of the facility was conducted by Roux in December of 1993. The objective of the PA was to provide background information for the facility and identify areas of potential concern. The activities conducted as part of the PA included:

- File search
- Review of historic plant maps
- Employee interviews
- Interpretation of historic aerial photographs
- Site inspections
- Magnetic Surveys
- Ground Penetrating Radar (GPR) Surveys
- Established the facility map grid system

The data compiled in the PA Report were reviewed and utilized to guide the development of the Soil – SI. However, many AOCs have been identified since the PA report was issued and thus were not included in the report, and further developmental efforts were required to fully

identify all of the AOCs at the facility. Section 1.10 describes the additional activities conducted to augment the Soil - SI.

1.9.2 Preliminary SI of the TNT Area

A preliminary SI was conducted by Roux in the TNT Area of the facility in the fall of 1997. The objective of the Preliminary TNT SI was to maintain the RA schedule compliance and to obtain an initial indication of TNT Area constituents of concern. The activities included sampling a number of AOCs within the TNT Area. The data generated during the Preliminary TNT - SI was used to modify the Phase I – SSI for the TNT Area. As previously agreed with NJDEP, analytical data for the TNT area was used as part of the Soil – SI to determine AOCs that were suitable to be reserved for the RI.

1.10 FACILITY-WIDE INVESTIGATION DEVELOPMENT ACTIVITIES

This section describes the developmental activities conducted to plan the facility-wide Soil – SI effort in support of the ISRA requirements. As a function of the information development process described in the following sections, the number of AOCs increased by approximately 46% over those originally identified and presented in the PA. As agreed with the NJDEP, these additional AOCs, largely comprised of remnant facility structures obscured by structural degradation and/or soil and vegetation overgrowth, were added to the overall facility-wide Soil – SI effort.

1.10.1 Historical Map Review/Digitization

A historic map and document search was conducted in October 1997 wherein 120 maps were identified and selected as representing the most significant sources of land use history information for the facility. The purpose of the search was to develop a graphic database which detailed site infrastructure at different phases over the course of the facility's history. Previously undocumented AOCs of structural and/or environmental significance were identified and categorized. The historic maps were then computer digitized so that the information represented on the maps could easily be electronically manipulated to help create the facility-wide basemap, described in Section 1.10.3 of this report. Table 1-7 of Volume I presents the primary maps utilized during the historical site map review of the facility.

1.10.2 Site Reconnaissance/Survey

Based on the results of the historic map review, a site reconnaissance was conducted in 3rd quarter of 1998. The purpose of the site reconnaissance was to field-verify facility AOCs and to survey their locations using global positioning system (GPS) and conventional surveying techniques. Surveyed AOCs were documented via digital photography and log book descriptions, and compiled into a facility information database compatible with NJDEP Geographic Information System (GIS) requirements.

1.10.3 Basemap Development

Following the site reconnaissance, a facility-wide basemap was developed. The basemap was constructed utilizing the various data sets generated during the previous facility information development phases. The facility basemap was developed in N.J.A.C. 7:26E required format and is presented in Figure A-1 of Appendix A.

1.10.4 Facility Grid System and Feature Identification

An alpha-numeric grid system was previously developed for the facility and was utilized to develop a subsequent system to aid in the simplification of AOC designation. The original grid is a uniform size of 500 ft by 500 ft with alphabetic designations established along the east-west axis and numeric designations established along the north-south axis. The grid node designations, when combined with newly developed AOC designation numbers, uniquely identifies and locates each AOC. For example building 8126 which is the ballistics laboratory in the Development Area, is located in grid H5 and is therefore, uniquely designated as H5-8126.

AOCs identified during the site reconnaissance that did not already have assigned an identification number were sequentially identified according to the order of their discovery, and associated with their appropriate grid number, e.g. the first AOC located in grid area H5 without an assigned identification number was identified as H5-1, and so forth.

1.10.5 Undeveloped Area Preliminary Assessment/ Site Investigation (PA/SI)

A PA/SI was conducted in the outlying portions of the facility that had never been utilized for manufacturing or support activities conducted at the facility. The objective of the Undeveloped Area PA/SI was to accelerate through the ISRA closure process the portions of the site that are likely not to have been impacted by historic operations. This investigation utilized both random and biased sampling to identify areas requiring further investigation and potentially remediation as described by Technical Requirements. The results of this investigation identified five isolated areas requiring further investigation. Four of the areas are less than 100-square feet (sq. ft.) and one area is approximately 900-sq. ft. The NJDEP has reviewed and commented on the Undeveloped Area PA/SI, which is currently in the comment and response phase.

2.0 SCOPE OF WORK

This section describes the field investigation and related office tasks conducted by MWH for the Soil SI.

2.1 SOIL SAMPLING

This section describes the methods and procedures utilized for the collection of soil samples during the Soil – SI. A minimum of 2 analytical samples, biased to the locations of highest potential contamination through the use of field screening methods as specified within N.J.A.C. 7:26E-2.1(b)1ii, were collected from each AOC greater than 100 square feet in order to request NFA from the NJDEP. AOCs less than 100 square feet required one analytical sample, biased to the locations of highest potential contamination through the use of field screening methods as specified within N.J.A.C. 7:26E-2.1(b)1ii, to request NFA. This sampling strategy was verbally approved during a meeting held on September 9, 1999, and a subsequent phone conversation held on September 22, 1999. This agreement was documented in a letter from Hercules dated September 30, 1999.

2.1.1 Field Screening Methods

Field soil screening methods were used extensively during the Soil – SI field investigation to bias the collection of analytical samples sent to the laboratory for analysis. Field screening methods were under no circumstance used to eliminate laboratory analysis. It was used to add analysis if compounds were detected during screening efforts. Field screening was not intended to replace laboratory analysis, only refine the location of the sample. A total of 5,206 screening samples were collected. Screening sample locations were compliant with the sampling frequency requirements of N.J.A.C 7:26E-3.5 through 3.9 and were biased to the location of greatest suspected contamination based on field conditions or knowledge of historic facility operations as defined in N.J.A.C. 7:26E-3.4. Appendix A presents the soil screening sample locations per former operational area. Tables 2-1 through 2-13 of Volume II, provide a summary of screening samples collected at each AOC per former operational area.

2.1.1.1 Explosive and Energetic Compounds. To ensure the safety of field and laboratory personnel, field screening for the presence of explosive and energetic (E&E) compounds was conducted during the collection of all soil samples. Field screening for E&E compounds was an essential aspect of the Soil – SI because the facility has manufactured or otherwise managed E&E compounds at various locations throughout the facility for more than 125 years.

The field screening method for E&E compounds presented in Section 5.1 of the FQAPP was modified slightly to achieve the objectives of the Soil – SI. Since delineation of E&E impacted soils is not in the scope of Soil – SI, the procedure was terminated with the use of the EX-PRAY ® E&E compound detection kit. The Dtech™ E&E compound detection kit was not utilized because the kit provides positive detection and relative concentration information for a narrow range of selected E&E compounds. The Dtech™ test kit is most applicable to delineation efforts and will be utilized during subsequent activities. The modified procedure for field screening E&E compounds is as follows:

- Upon arriving at the selected sample location, the field team visually inspected the ground surface for the presence of E&E compounds. If E&E compounds were visually identified the project manager was notified and personally inspected the area. The project manager determined if the concentration of E&E compounds were significant, and if the area warranted isolation for future remedial efforts, and therefore no samples were to be collected. If no E&E compounds were visually identified, then the proposed sampling was initiated.

- If no E&E compounds were visually identified during the sampling event, the sample material was evaluated for the presence of E&E compounds at levels below visual observation using the EX-PRAY® E&E compound detection test kit. If E&E compounds were detected using an EX-PRAY® E&E compound detection test kit, the sample was analyzed at the laboratory for E&E compounds. If no E&E compounds were detected, it was considered safe to fill the appropriate sample containers and ship the samples to the laboratory.

- The EX-PRAY® E&E compound detection test kit is an aerosol based technique that utilizes a patented paper and colorimetric reaction to identify E&E compounds at residual levels (20 nanograms). This kit can differentiate between polynitro-aromatics (TNT, picric acid, etc.), nitrate esters (nitroglycerin (NG), nitrocellulose (NC), etc.), and Nitramines {cyclotrimethylenetrinitramine (RDX), cyclotetramethylenetetranitramine (HMX), etc.}. The EX-PRAY® kit, however, does not provide contaminant concentration data, it is designed only to determine if E&E compounds are present in ranges from residual levels to near percentage

concentrations. The manufacturers' information and instructions for performing the EX-PRAY® tests is included in Appendix A of the FQAPP.

All personnel involved in site activities received initial or refresher E&E compound safety education prior to the commencement of the Soil - SI. This education was designed to provide employees with a thorough knowledge of and the ability to identify E&E compounds that could potentially be encountered on-site.

2.1.1.2 Volatile Organic Compounds. Field screening for the presence of volatile organic compounds (VOCs) was conducted continuously during the collection of soil samples for the Soil – SI to bias the location of the analytical sample. The field screening was accomplished with a Foxboro TVA 1000 which incorporates both a photo-ionization detector (PID), using a standard 10.6 electron volt lamp, and flame-ionization detector (FID) into one unit. Section 5.2 of the FQAPP presents the VOC screening procedure.

2.1.1.3 Metal Constituents. Field screening for the presence of metal constituents was conducted on each screening sample collected during the Soil - SI to bias the location of the analytical sample. The Spectrace 9000 X-Ray Fluorescence (XRF) spectrophotometer was the instrument utilized for metal screening. The Spectrace 9000 uses energy dispersive XRF spectrophotometry to determine the concentration of metal constituents present within soils. It uses three radioactive isotopes, Fe 55, Cd 109, and Am 241 to produce X-rays. The target metals of concern in the facility-wide investigation, specified because they were most frequently used in historical operations or likely to be encountered, included antimony (Sb), arsenic (As), chromium (Cr), copper (Cu), lead (Pb), mercury (Hg), and zinc (Zn). These target metals were only applied to field screening with the XRF spectrophotometer, analytical samples sent to the laboratory were analyzed for the full priority pollutant list (PPL) suite of metal constituents. Section 5.4 of the FQAPP presents the metal screening procedure.

2.1.2 Soil Sample Collection

The primary soil sampling method (used at approximately 99% of the sampling locations) was the manual sample collection method utilizing a stainless steel soil coring device and bucket auger. The secondary soil sampling method was the test pit sample collection method

utilizing a track mounted excavator. Section 7.0 of the FQAPP presents the specific procedures utilized for each soil sampling method.

The vast majority of the soil samples (greater than 95%) were collected from 0 to 2-feet below grade as stipulated in the Technical Requirements, N.J.A.C. 7:26E-3.6. Some AOC specific sampling requirements (less than 5%) stipulated in the Technical Requirements, N.J.A.C. 7:26E-3.9, required samples to be collected at specific depth ranges other than the 0 to 2-foot range (i.e. catch tanks). The exact sample collection depth for each analytical sample collected during the Soil – SI is presented in the data summary tables, discussed in Section 5.0 of this report, and in the Analytical Result Tables 5-1A through 5-13E of Volume III.

Analytical sample collection was based on screening results, field conditions, or professional judgement based on knowledge of historic facility operations where site screening results were inconclusive. At most AOCs, analytical samples were collected at a frequency of two samples per AOC greater than 100 square feet, to support a request for no further action. Only one sample was collected at AOCs in cases where the NJDEP Technical Requirements stipulated only one sample. AOCs less than 100 square feet were addressed with one analytical sample, as approved by the NJDEP. In the case of complex AOCs, one analytical sample was collected for each AOC type present, with a two-sample minimum. Appendix A presents figures showing the analytical sample locations per former operational area. Table 2-14 of Volume II provides a list of potential chemical waste classes that could be present at each AOC type. Tables 2-1 through 2-13 of Volume II provide a summary of the number of analytical samples collected and the analytical parameters selected at each AOC.

All samples collected for VOC analysis were collected from an undisturbed 6-inch interval obtained from a depth at least 6 inches below grade pursuant to the Technical Requirements, N.J.A.C. 7:26E-3.6(a)3. All remaining samples were derived from a composite of the 2-foot sample interval. A full 2-foot sample interval was required for the non-VOC analysis due to the large volume of sample material necessary.

In areas where E&E compounds were likely to be encountered, primarily former manufacturing structures (sumps, catch tanks, and wastewater pits), sampling devices were

constructed of non-sparking and non-conductive materials (polyvinyl chloride (PVC)) due to safety concerns.

***Note**: Every attempt was made to achieve the desired sample depth range. However, because of the operational history of the facility and geologic conditions, not all sample intervals could be advanced over the full desired depth range. In these cases, the soil boring was terminated at refusal because it is not safe to force sampling equipment when there is the possibility of encountering E&E compounds in the bore-hole. The exact sample collection depth for each analytical sample collected during the Soil – SI is presented in the data summary tables, discussed in Section 5.0 of this report, and in the Analytical Results Tables 5-1A through 5-13E of Volume III.*

2.1.3 Laboratory Analysis

1,998 samples were collected for analytical analyses. The samples were submitted to General Physics Laboratories (GPL) of Gaithersburg, Maryland. GPL is certified to provide laboratory services in the State of New Jersey (Certification No. 60671). Each soil sample submitted for analytical analyses was analyzed for portions of the priority pollutant (PP) +40 list. Since various AOCs handled specific chemicals and E&E compounds, respective analytical suites of laboratory analysis for these areas were modified to include the specific constituents of concern. Table 2-15 of Volume II presents a list of constituents analyzed per analyte group. Tables 2-1 through 2-13 of Volume II summarize the program for analytical analyses conducted at each AOC per former operational area. Section 6.0 of the AQAAP provides specific analytical information for each analyte or parameter selected during the Soil – SI.

2.1.4 Sample Handling and Shipment

Analytical samples submitted for analysis were immediately packaged in the appropriate sample containers and placed in an iced cooler for shipment to GPL. The coolers were shipped to GPL via courier and were received by the laboratory within 24-hours of sample collection.

2.1.5 Sample Identification

All samples collected were designated with an alpha-numeric code that identifies each sample by the matrix sampled, site location number, sequential sample number and depth interval, as appropriate. Sampled matrices were identified by a two-letter code, (e.g., SB for soil boring sample). The site location number corresponds to the facility grid location and feature number (i.e. A13-2205). Sequential sample numbers at each new sampling location for each sample type began with 01 and increased accordingly. Sample designations for soil and sediment samples collected included the depth to the top of sample interval.

The following is a guide for sample identification:

Matrix	Site Location Number		Sequential Sample	Sample Depth Range Or Top of VOC Sample Interval Depth (in feet)
AA	ANN-NNNN	–	NN	(NN)

where:

A = alphabetic
N = numeric

Matrix codes for this project will be as follows:

SB = Soil boring samples
SD = Sediment samples
MW = Monitoring well groundwater
GW = Groundwater samples from non-permanent sampling point
SW = Surface Water
EQ = Equipment blank
TB = Trip blank

Example sample designations are shown below:

- Soil samples collected from site I6-8125 (Development Area Research Lab) were labeled as SB-I6-8125-01(0-2), SB-I6-8125-02(0-2), SB-I6-8125-03(0-2), etc.

The information contained within the sample identification is included in the Hazsite electronic data submission.

2.1.6 Equipment Decontamination Procedures

The following subsections describe the equipment decontamination procedures used during the Soil – SI.

2.1.6.1 Manual Sampling Equipment. All non-disposable manual sampling equipment (i.e. soil coring devices, spoons, bowls, etc.) was decontaminated prior to mobilization to each sampling location and after each use. The following procedures were used to decontaminate the manual sampling equipment:

- Equipment was washed with potable water and laboratory-grade detergent.
- Equipment was thoroughly rinsed with potable tap water.
- Equipment was rinsed with distilled water from an approved potable water source.
- If the equipment was used to collect samples for metals analysis, equipment was rinsed with a 10 percent solution of laboratory grade nitric acid followed by another rinse with distilled water.
- If the equipment was used to collect samples for organic analysis the equipment was rinsed with pesticide-grade acetone rinse, air dried, and followed by another rinse with distilled water.
- Equipment was wrapped for storage in aluminum foil, shiny side out.

2.1.6.2 Heavy Equipment. The excavator used to conduct test-pitting activities was decontaminated upon arrival at the site, between each subsurface sampling location, and upon leaving the site. The bucket and arm of the excavator was decontaminated with a high-pressure steam cleaner.

2.1.7 Investigation-Derived Waste Management

The following subsections describe the disposal practices used for soil cuttings and equipment decontamination fluids.

2.1.7.1 Soil Cuttings. Soil cuttings generated during sampling activities were returned to the borehole in compliance with the NJDEP *Field Sampling Procedures Manual* (NJDEP, 1992).

2.1.7.2 Decontamination Water. All decontamination fluids were contained and disposed of at the on-site WWTP.

2.1.8 Field Documentation

All aspects of the Soil – SI field activities were permanently recorded so that information obtained and decisions made during field activities could be reproduced and future events could benefit from the information gained. The primary source of field documentation was the field book. All field activities performed and observations made during sample collection activities were documented in the field books. Documentation recorded in the field book was performed according to the procedure detailed in Section 17.0 of the FQAPP. The secondary source of field documentation is the sample screening sheets. The sample screening sheets contain (on one sheet of paper) all pertinent soil classification and analytical sample justification information. The sample screening sheets have been bound by former operational area according to AOC. The total number of field books generated was 41 and the number of sample screening sheets exceeds 5,000. The field documentation is not submitted as part of the Soil – SI due to the volume of information, however it can be made available upon request.

2.2 GEOPHYSICAL INVESTIGATION

Electromagnetic (EM) and ground penetrating radar (GPR) geophysical methods were used during the Soil – SI to help define subsurface conditions at site features that potentially had buried environmental concerns or explosive hazards pursuant to N.J.A.C. 7:26E-3.6. The geophysical work was subcontracted to Earth Resources Technology (ERT), Inc. Appendix C contains ERT's report that details the investigation and specific instrumentation used. The following is a list of AOCs investigated with geophysical methods:

AOC Designation	AOC Name	Operational Area
B13-2	Gravel Pit	TNT

AOC Designation	AOC Name	Operational Area
G9-4	Buried Drum Area	Maintenance
K5-1	Former Drum Disposal Area	Development
K5-2*	Pond	Development
K6-1*	Debris Area	Development
M8-1	Disposal Area	B-Line
N6-1	Disposal Area	Storage

* AOCs K5-2 and K6-1 were combined and investigated together in ERT's report.

Section 8.0 of this report presents the details and finding of ERTs report.

2.3 SURVEY METHODS

All screening and analytical sampling locations were surveyed as part of the Soil – SI as required by the Technical Requirements, N.J.A.C. 7:26E. Surveying was accomplished using a combination of global positioning system (GPS) and traditional electronic distance measurement (EDM) equipment. Combined survey methods were necessary because communication with GPS satellites was blocked at various locations by existing structures and physiographic features, thus requiring conventional survey methods to obtain survey data. The horizontal survey control references the New Jersey State Plane coordinate system and the vertical survey control references the North American Vertical Datum (NAVD 1988).

2.4 HEALTH AND SAFETY

The field activities conducted were performed according to the health and safety requirements of the *Final Site-Specific Health and Safety Plan* (Montgomery Watson, 1999c).

Personnel involved in site activities conducted at the facility received initial or refresher E&E compound safety education prior to commencement of work. The site E&E compound safety education was directed by the MWH project safety officer (PSO) and the Hercules PSO. This education was designed to provide employees with a thorough knowledge of and the

ability to identify E&E compounds that could potentially be encountered on-site. All personnel new to the site were required to receive this training before they were permitted to undertake field activities.

2.5 SOIL – SI REPORT

This report is prepared in accordance with the N.J.A.C. 7:26E3.13 (NJDEP, 1997a). In addition to the hardcopy information presented in this report, an Electronic Database Deliverable (EDD) will be submitted with this report which meets the requirements of the NJDEP Electronic Data Interchange (EDI) submittal format.

The analytical laboratory data was reduced and validated in accordance with Section 4.0 of the *Revised Analytical Quality Assurance Project Plan (AQAPP)* (Montgomery Watson, 1999b). In accordance with Section 4.2 of the AQAPP, data validation indicates any limitations or qualifications concerning the use of laboratory data documented by the data validator. Deliverables include hard copies and electronic files of the data as specified in Section 9.0 of the AQAPP.

3.0 DATA QUALITY CONTROL

This section is a summary of the quality control review results for samples collected from September 1999 to August 2000, in support of the facility-wide site soils investigation at the Kenvil Works Facility, Kenvil, New Jersey. GPL performed the chemical analyses of all samples. The samples were validated in accordance with the National Functional Guidelines for Inorganic Data Review (USEPA 1994), the National Functional Guidelines for Organic Data Review (USEPA 1999), and Explosives Residue Standard Operating Procedure (USEPA Region II 1994) as applicable to SW-846 analyses. Appendix B presents the data validation notes for each sample delivery group (SDG) pertaining to the Soil – SI. The field samples and associated quality control samples were analyzed for the following parameters:

- Volatile organic compounds (VOCs) by SW-846 8260B
- Semivolatile organic compounds (SVOCs) by SW-846 8270C
- Pesticides/Polychlorinated biphenyls (PCBs) by SW-846 8081 and 8082, respectively
- Metals by SW-846 6010/7471
- Pentaerythritol Tetranitrate (PETN) by SW-846 8330
- Nitrate by USEPA method 353.2
- Diazodinitrophenol (DDNP) by SW-846 8330
- Nitrocellulose by GPES-SOP 11.73
- Percent solids by method D2216
- Nitrate/nitrite - N by method E353.2
- pH by method SW-9045C
- Total petroleum hydrocarbon (TPH) by method 8015
- Ammonia as N by method E350.3
- Total organic carbon (TOC) by method SW-9060
- Nitroglycerin by SW-846 8332
- Total recoverable phenolics by method SW-9065
- Explosives by SW-846 8330

The quality of the data was assessed according to the USEPA's PARCC (precision, accuracy, representativeness, comparability and completeness) parameters. These criteria were used to

identify unacceptable or biased data that could result in corrective actions being implemented, or otherwise require qualification of the data. The following is a brief summary of the data quality evaluation and resulting qualification of the results, as applicable.

3.1 PRECISION AND ACCURACY

Precision and accuracy were evaluated based on the quality control results generated from laboratory matrix spike and matrix spike duplicate (MS/MSD) samples, laboratory duplicates, laboratory control samples (LCS), internal compounds and surrogate spike compounds. In addition, initial and continuing calibration results were used to assess accuracy.

Analyses that failed to meet precision or accuracy limits established in the AQAPP, or defined by the laboratory if not specified in the AQAPP, were assigned a data qualifier in accordance with the USEPA functional guidelines or Region II SOP as appropriate. As specified in the Region II Standard Operating Procedures (SOP) for Explosives Residues (US USEPA Region II 1994), there were several samples that were qualified as rejected ('R') for explosives, due to the column percent difference between the primary and secondary column exceeding limits specified in the Region II SOP. As defined in the Region II SOP, the 'R' qualification deems the data unusable. Table 5-54 of Volume II presents analytical samples with rejected concentrations or with concentrations exceeding the calibration range of the instrumentation as well as corrective action to be taken at each AOC.

3.1.1 Matrix Spikes/Matrix Spike Duplicate

Matrix spike samples were collected in the field and sent to the laboratory along with the field samples. If a field sample was not designated as a matrix spike and matrix spike duplicate for a particular analysis, the laboratory provided matrix spike results from the analytical batch, which were then used to assess accuracy. Data were then qualified in accordance with the functional guidelines, or the Region II SOP in cases where the accuracy limits were not met.

3.1.2 Laboratory Duplicates

Laboratory duplicates were analyzed as appropriate throughout the analytical program, with the exception of the explosives residues. While the Region II SOP specifies a review of laboratory duplicate data for the explosives' analyses, the laboratory did not include a laboratory duplicate as part of their internal quality control program. However, field duplicates were collected for E&E analysis at the frequency specified in the AQAPP and were sent to the laboratory to be analyzed. In general, it is more difficult to collect a duplicate field sample and retrieve acceptable results than it is for the laboratory to analyze a sub-sample of a sample and retrieve acceptable results. Thus, the amalgamation of laboratory duplicates and field duplicates ensured that the quality of data was not impacted by the lack of laboratory duplicates, and also enabled laboratory and field precision to be reviewed during data validation. Field data associated with a laboratory duplicate that failed to meet precision criteria were qualified as estimated in the data packages.

3.1.3 Laboratory Control Samples

Laboratory control samples were analyzed by the laboratory at the appropriate frequency throughout the project. Low or unacceptable LCS results led to qualification of laboratory data as specified in the Region II SOP and USEPA functional guidelines.

3.1.4 Surrogate Recoveries

Surrogate spikes were introduced into samples as required in the analytical methods. Surrogate recoveries that were outside control limits were qualified as estimated in accordance with the Region II SOP and USEPA functional guidelines.

3.1.5 Calibration

Initial and continuing calibration results were reviewed against specific analytical method criteria. Calibration results that were outside acceptable limits were then qualified for the particular failing compounds, in accordance with the USEPA functional guidelines and/or the Region II SOP. Table 5-54 of Volume II presents analytical samples with rejected

concentrations or with concentrations exceeding the calibration range of the instrumentation as well as corrective action to be taken at each AOC.

The laboratory's SOP for E&E analysis differed slightly from the EPA Region II SOP to accommodate specific laboratory requirements. The initial calibration for explosives residues required in the Region II criteria specifies triplicate injection of each of the five calibration levels. The initial calibration provided in the data packages consisted of a single, six-point calibration. Data were not qualified due to the laboratory employing different calibration criteria than that specified in the Region II SOP. However, analytical instrumentation was calibrated and met method criteria, and the laboratory performed routine quality control checks during analysis of the samples; thus no impact of the data was identified.

3.2 REPRESENTATIVENESS

Representativeness was evaluated through the analysis of laboratory method blank samples, field blank samples, and trip blank samples. Analysis of these types of samples was important to distinguish between ambient sampling and analytical levels, and actual site contamination. There were no major problems identified in any of the blanks. Blank data were used to further qualify associated field data if applicable. Data results that were less than five times the associated method blank result were qualified as undetected, 'U' for several samples, most notably during review of the metals data.

3.3 COMPLETENESS

Data completeness was evaluated based on the samples requested on the chain-of-custody documentation and the samples reported by the laboratory.

The following anomalies were noted during the completeness review:

- SDG 9909187 - The laboratory did not analyze field blank (FB-UD-03) for SVOCs due to grossly exceeded holding times.
- SDG 9909211 - A trip blank was analyzed for VOCs but was not on the COC.

- SDG 9911037 - Nitroso-di-methylamine was not analyzed or reported for sample FB-18 as noted in the laboratory narrative.

The completeness requirement set forth in the AQAPP was 100%, the completeness was greater than 99%, thus considered met for the project.

3.4 COMPARABILITY

Comparability was achieved by analyzing the samples according to the specified standard methods, reporting limits and holding times for both extraction and analysis. The laboratory analyzed the field samples in accordance with the methods specified in the AQAPP. Reporting limits were met with the following exceptions in several samples:

- Soil matrix: antimony, 2,4-dinitrophenol, 4-nitrophenol
- Water matrix: antimony, selenium, zinc, 3,3'-dichlorobenzidine, 2,4-dinitrophenol, 4-nitrophenol, 3-nitrotoluene and nitroglycerin

The reporting limits provided by the laboratory were elevated if the sample was analyzed at a dilution. Data were not qualified based on elevated reporting limits.

There were several samples that were analyzed outside holding times, which were qualified as estimated if the sample was extracted or analyzed within two times the required holding time. If the sample holding time was over two times the method specification, the data were qualified as rejected, 'R'.

3.5 SUMMARY OF DATA QUALITY AND RELIABILITY

The evaluation of the data against PARCC criteria provided information on the data quality and reliability. As a result of this evaluation, all data are of known and acceptable quality, excluding rejected data as qualified based on the laboratory-established acceptance control limits or USEPA guidance. These data are considered valid and useable for decision-making purposes.

3.6 DATA QUALITY OBJECTIVES

The data quality objectives (DQOs) set forth in the AQAPP on Table 4-1 and the comparison of these DQOs with actual laboratory data results are summarized in the following table. Only DQOs specific to definitive data and resulting data validation are summarized.

DQO summary for data validation parameters

Parameter	Sample Media	DQO goal	Actual	DQO Met?	Comments
Sample documentation	Soil	100%	100%	Yes	
Chain-of-custody documentation	Soil	100%	100%	Yes	
Instrument calibration meets laboratory's specification	Soil	100%	100%	Yes	
Analyte identification and quantification	Soil	100%	100%	Yes	
Trip blanks for VOCs	Soil	1 per cooler	100%	Yes	
Instrument blanks	Soil	GC -every 10 samples GC/MS – every 12 hours Metals – every 10 samples	100% 100% 100%	Yes Yes Yes	
Laboratory method blank	Soil	1 per SDG	100%	Yes	
Rinseate samples	Soil	1 per day	100%	Yes	Sampled as appropriate.
Laboratory precision and accuracy	Soil	100% within established limits for MS, LCS, duplicates, surrogates	100% precision and accuracy performed by laboratory	Yes	Data exceeding precision and accuracy limits were qualified.
Laboratory MDLs<PQLs	Soil	100%	100%	Yes	
LCS samples	Soil	100% within established limits per SDG	100% LCS samples analyzed as specified in QAPP	Yes	Data exceeding limits were qualified.

Parameter	Sample Media	DQO goal	Actual	DQO Met?	Comments
MS/MSD samples	Soil	5%	100% each SDG or sample batch contained an MS/MSD	Yes	Data exceeding limits were qualified as specified in USEPA guidelines.
Field duplicates	Soil	10%	10%	Yes	

All analytical DQOs as set forth in the AQAPP were met. Data that exceeded limits for LCS and MS/MSD samples were qualified in accordance with USEPA functional guidelines or the Region II SOP.

4.0 BACKGROUND

This section describes the background concentrations of all constituents detected in the samples collected as part of the Undeveloped Area Preliminary Assessment/Site Investigation (PA/SI) which was further utilized during the Soils – SI to identify background conditions at the facility that exceed the New Jersey Soil Clean-Up Criteria (NJSCC). The PA/SI was submitted to NJDEP in December 2000. The background concentrations discussed in this section are based on 21 samples collected from portions of the facility that have never been utilized for manufacturing operations and represent native conditions. The samples were analyzed for the Priority Pollutant +40 List and E&E compounds. Tables 4-1A through 4-1E of Volume II present the comparison of the laboratory analyses of the background sample results to the NJSCC. Figure A-2 of Appendix A presents the Background Sampling Point Map.

The following embedded tables present the background concentration range of detected constituents detected that exceeded the NJDEP Residential Direct Contact Soil Clean-Up Criteria (RDCSCC) or Impact to Groundwater Soil Clean-Up Criteria (IGWSCC). The NJDEP RDCSCC and the IGWSCC were chosen as the basis for comparison because they represent the lowest concentration exposure scenario. Currently, there are no IGWSCC for metals.

Volatile Organic Compounds (VOCs)

Constituent	Minimum Concentration (ug/kg)	Maximum Concentration (ug/kg)	RDCSCC (ug/kg)	IGWSCC (ug/kg)
Benzene	ND	ND	3,000	1,000
Chlorobenzene	ND	566	37,000	1,000
Chloroform	ND	ND	19,000	1,000
Methylene Chloride	ND	ND	49,000	1,000
Trichloroethene	ND	ND	23,000	1,000

Semi-Volatile Organic Compounds (SVOCs)

Constituent	Minimum Concentration (ug/kg)	Maximum Concentration (ug/kg)	RDCSCC (ug/kg)	IGWSCC (ug/kg)
1,4-Dichlorobenzene	ND	ND	570,000	100,000
2,4-Dinitrophenol	ND	ND	110,000	10,000
2,4/2,6-Dintrotoluene	ND	ND	940	0.3
Acrylonitrile	ND	ND	1,000	1,000
Benzo(a)anthracene	28	45	900	500,000
Benzo(a)pyrene	28	300	660	100,000
Benzo(b)fluoranthene	210	360	900	50,000
Benzo(k)fluoranthene	180	230	900	500,000
Bis(2-ethylhexyl)phthalate	23	85	49,000	100,000
Butylbenzylphthalate	ND	ND	1,100,000	100,000
Chrysene	59	300	9,000	500,000
Dibenz(a,h)anthracene	ND	ND	660	100,000
Diethylphthalate	ND	ND	10,000,000	50,000
Di-n-butylphthalate	47	170	5,700,000	100,000
Indeno(1,2,3-c,d)pyrene	98	120	900	500,000
n-Nitroso-di-n-propylamine	ND	ND	660	10,000
n-Nitrosodiphenylamine	ND	ND	140,000	100,000

Metals

Constituent	Minimum Detection (mg/kg)	Maximum Detection (mg/kg)	RDCSCC (mg/kg)	IGWSCC (mg/kg)
Antimony	0.68	1.6	14	NA
Arsenic	1.9	18.6	20	NA
Beryllium	0.64	2.80	2	NA
Cadmium	ND	ND	39	NA
Copper	7	42	600	NA

Constituent	Minimum Detection (mg/kg)	Maximum Detection (mg/kg)	RDCSCC (mg/kg)	IGWSCC (mg/kg)
Lead	18.5	272	400	NA
Mercury	0.04	0.49	14	NA
Nickel	4.30	49.20	250	NA
Selenium	1.2	6.2	63	NA
Silver	ND	ND	110	NA
Thallium	ND	ND	2	NA
Zinc	18.3	199.0	1500	NA

Energetic and Explosives (E&E)

Constituent	Minimum Concentration (ug/kg)	Maximum Concentration (ug/kg)	RDCSCC (ug/kg)	IGWSCC (ug/kg)
2,4,6-Trinitrotoluene	ND	ND	21,000	40
HMX	ND	ND	3,900,000	NA
Nitroglycerin	ND	ND	46,000	NA
RDX	ND	ND	5,800	NA

Polychlorinated Biphenyls (PCBs)

Constituent	Minimum Concentration (ug/kg)	Maximum Concentration (ug/kg)	RDCSCC (ug/kg)	IGWSCC (ug/kg)
Total PCBs	ND	ND	490	50,000

The results of the background analysis determined that beryllium is present at the facility at concentrations (0.64 to 2.8 mg/kg) that exceed the NJDEP RDCSCC of 2 mg/kg. Therefore beryllium concentrations below 2.8 mg/kg in the operational areas of the facility are a result of natural conditions and do not warrant additional investigation as permitted by N.J.A.C. 7:26E-3.10(b).

The remainder of the constituents identified during the Soil – SI were present in the background samples at concentration ranges below the NJDEP soil clean-up criteria. This

indicates these constituents, when detected in the manufacturing areas at concentrations above the NDJEP soil clean-up criteria, are likely the result of historic facility operations.

5.0 ANALYTICAL RESULTS

The following sections describe the results and interpretation of the analytical samples collected as part of the Soil – SI. These sections are designed to comply with the intent of the Technical Requirements for reporting site investigation activities (N.J.A.C 7:26E-3.13). In addition, due to the volume of AOCs investigated and number of samples collected, the data have been tabulated in various formats to facilitate presentation and interpretation. The data tables are supported by figures to aid in data evaluation. The data tables and figures are discussed in detail below.

5.0.1 Organization of Analytical Results Presentation

The analytical results are presented by former operational area for discussion. The following information will be presented for each former operational area in this section:

- General Analytical Results Discussion
- Frequent Exceedance Constituent (FEC) Identification
- Frequent Exceedance Constituent Postings Map Discussion
- Summary

General Analytical Results Discussion

The general analytical result section presents the discussion of the analyses performed on the samples collected for laboratory analysis. Tables 2-1 through 2-13 of Volume II present the complete list of laboratory analyses performed on each sample submitted to the laboratory. Table 2-14 and 2-15 of Volume II presents the analyte list by AOC type (specified in section 1 of this report), and a list of constituents analyzed per analytical group. Tables 5-1A through 5-13E of Volume II present the complete comparison of laboratory analytical results to the New Jersey Soil Cleanup Criteria (NJSCC).

The analytical results for soil samples collected during the Soil – SI were compared to the following NJSCC:

- Residential Direct Contact Soil Cleanup Criteria (RDCSCC)

- Non-Residential Direct Contact Soil Cleanup Criteria (NRDCSCC)
- Impact to Groundwater Soil Cleanup Criteria (IGWSCC) (organic constituents only)

Currently, New Jersey does not provide RDCSCC, NRDCSCC, or IGWSCC for pentaerythritol tetranitrate (PETN), diazodinitrophenol (Diazo), and nitrocellulose (NC). PETN and Diazo represent minor site constituents and may only be present at a few AOCs. Site-specific clean-up standards will be calculated for these constituents and submitted to the NJDEP prior to initiating remedial efforts.

Frequent Exceedance Constituent Identification

Frequent Exceedance Constituent are defined for the purpose of this report as constituents with detected concentrations exceeding the RDCSCC at a high relative frequency per former operational area. However, the frequency of IGWSCC exceedances were also used in the determination of FECs to a lesser extent. The establishment of FECs was to facilitate a side-wide understanding of the most common constituents that exceed the NJSCC and will be utilized to drive future remedial measures at the facility. The list of FECs was not intended or used as a screening mechanism to eliminate any AOCs from further action/remediation (FA). All AOCs with SCC exceedances will be addressed in accordance with N.J.A.C. 7:26E. Only AOCs identified as no further action (NFA) will be eliminated from subsuequent phases of the facility wide restoration strategy presented in Figure 1-1 of Volume I.

FECs are identified for each former operational area and are presented in this section of the text. The FECs vary among former operational areas because each area utilized product specific ingredients and manufacturing techniques. The identification of FECs exceeds the typical requirements of a site investigation and begins to fulfill the requirements of a remedial investigation. This is being done as part of the Soil – SI to facilitate future efforts of the facility-wide restoration strategy.

The FECs identified at the various former operational areas include the following:

- Polyaromatic Hydrocarbons (PAHs) (benzo(a)anthracene; benzo(a)pyrene; benzo(b)fluoranthene; benzo(k)fluoranthene; indeno(1,2,3-cd)pyrene)
- Polychlorinated Biphenyls (PCBs)
- 2,4/2,6-Dinitrotoluene (DNT)
- 2,4,6-Trinitrotoluene (TNT)
- Arsenic
- Lead
- Copper
- Mercury
- Nitroglycerin (NG)

The potential sources of the FECs are generally consistent across the facility and are described below. While not all FECs were reported in all former operational areas, the sources of individual FECs generally did not vary among former operational areas. Therefore, the discussion of potential sources is not repeated in the individual discussions for each former operational area.

- Benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, and indeno(1,2,3-cd)pyrene: These PAHs are believed to be related to the extensive use of fly ash that may have been imported from off-site or from areas where burning of materials took place. The fly ash was historically used to modify the grade of the facility to support the expansion of manufacturing activities.
- Total PCBs (limited to the Maintenance Area): The PCBs are believed to be the result of transformer repair operations that were likely conducted within this area.
- 2,4/2,6-Dinitrotoluene (DNT): DNT has two primary usages associated with the facility. First, DNT is a common component of smokeless gunpowder used in various amounts to control the rate of burn or strength of the gunpowder. Second, DNT was an intermediate constituent in the manufacture of TNT.
- 2,4,6-Trinitrotoluene (TNT) (limited to the TNT Area): TNT was the commercial/military product manufactured within this area.

- Nitroglycerin (NG): NG is a key ingredient historically used in the manufacture of dynamites and smokeless gunpowder.

- Arsenic: Arsenic is a key ingredient historically used in industrial grade herbicides. Herbicides were used extensively at E&E manufacturing facilities to control and/or eliminate ground level vegetation. Ground level vegetation was controlled and/or eliminated to prevent the spread of small fires, limiting the potential for catastrophic destruction of property and loss of life.

- Lead: Lead was utilized widely throughout the facility in E&E manufacturing structures. Lead is a non-conductive and non-sparking metal that was used to coat structure surfaces and process equipment to reduce the potential of accidental ignition of E&E compounds.

- Copper and mercury (limited to the Development Area and Former Burning Grounds): Mercury was mainly identified adjacent to the laboratories within the Development Area and is a common component of laboratory equipment. Copper was mainly identified within the Former Burning Grounds and is likely to have resulted from the thermal decontamination of process equipment conducted at this AOC.

Frequent Exceedance Constituent Postings Map Discussion

Postings maps were created for each FEC identified and are presented per former operational area in Appendix A. The FEC postings maps are discussed in this section in general terms, limiting the discussion to major areas of RDCSCC exceedances.

The FEC postings maps represent the preliminary attempt to define the areal extent of commonly detected constituents exceeding the IGWSCC, RDCSCC, or NRDCSCC. Each FEC postings map presents the sample ID and associated analytical result in the following categorized groups to aid in presentation:

- Sample ID and associated analytical result exceeding the IGWSCC, highlighted in Green.

- Sample ID and associated analytical result not exceeding the IGWSCC, but exceeding the RDCSCC and less than the NRDCSCC, highlighted in Blue.

- Sample ID and associated analytical result not exceeding the IGWSCC, but exceeding the NRDCSCC, highlighted in Red.

- Sample ID and associated nondetected analytical result (method detection limit) exceeding the IGWSCC, RDCSCC, or NRDCSCC (Table 5-53 of Volume II), highlighted in Brown.

- Sample ID and associated rejected or "E" qualified (concentration exceeded the calibration range of the instrumentation) analytical result (Table 5-54 of Volume II), highlighted in Purple.

- Sample ID and associated detected/nondetected analytical result less than the IGWSCC, RDCSCC, or NRDCSCC, highlighted in Grey.

The associated sample interval and/or matrix code per analytical sample can be found in the following documents:

- Tables 5-1 (A-D) through 5-13 (A-E) of Volume II, presents the complete comparison of laboratory analytical results to the NJSCC (e.g., Tables 5-1A through 5-1D present the VOC, SVOC, E&E, and metals analytical results, respectively, for the TNT Area).

- Tables 5-14 through 5-26 of Volume II, presents compounds reported at detected concentrations exceeding the NJSCC for each AOC, organized by operational area (e.g., Tables 5-14A through 5-14C present SVOC, E&E, and metal exceedances, respectively, for the TNT Area).

***Note**: The constituent DNT was incorporated in two analytical groups and analyzed utilizing two separate methodologies in samples analyzed for SVOCs and/or E&E compounds: as a SVOC (method SW-846-8270C using Gas Chromatograph/Mass Scpectrograph (GC/MS) techniques, referenced in text, tables, and figures as DNT - SVOC) and as an E&E (method SW-846-8330 using High Performance Liquid Chromatograph (HPLC) techniques, referenced in text, tables, and figures as DNT – E&E). While both methods, HPLC and GC/MS, are accurate and acceptable, GC/MS is more accurate than HPLC and will be the selected analytical method when delineating areas containing 2,4/2,6-DNT in the RI.*

Summary

This section presents the objectives of the Soil – SI. The summary section of each former operational area presents the results of the AOC categorization process described in Section 1.1. Each AOC is placed into one of the following categories:

- AOCs requiring no further action (NFA). NFA is requested for AOCs identified not to have constituents within the soil exceeding any of the NJDEP Soil Clean-up Criteria (NJSCC).

- AOCs requiring further action (FA) and additional investigation. AOCs that have identified constituents within the soil exceeding at least one of the NJSCC will continue through the facility-wide restoration strategy as depicted in Figure 1-1 of Volume I. This category is subdivided into the following subcategories:

  - AOCs suitable for Single Phase Remediation. These are AOCs where the remedial action is suitable to be conducted concurrently with sampling efforts to delineate the contamination and to confirm contaminant removal. AOCs suitable for Single Phase Remediation will be identified and discussed with the NJDEP prior to initiating any remedial activity.

  - AOCs reserved for the Remedial Investigation (RI). AOCs were placed in this subcategory based on field observations determining that various facility related constituents would exceed the NJDEP RDCSCC.

Tables 5-27 through 5-39 of Volume II present the area specific AOC justification for no further action (NFA). Tables 5-40 through 5-52 of Volume II present the area specific AOC justification for further action (FA), Single Phase Remediation, and reserved for the RI.

Appendix A Area of Investigation figures present the AOCs located within each operational area which require NFA or FA. Each NFA/FA figure presents the AOCs per operational area with detected analytical results in the following categorized groups to aid in presentation:

- FA AOCs with associated detected analytical results exceeding the IGWSCC, highlighted in Green.

- FA AOCs with associated detected analytical results not exceeding the IGWSCC, but exceeding the RDCSCC and less than the NRDCSCC, highlighted in Blue.

- FA AOCs with associated detected analytical results not exceeding the IGWSCC, but exceeding the NRDCSCC, highlighted in Red.

- FA AOCs reserved for the remediation investigation (RI) are highlighted in Pink.

- NFA AOCs with associated detected analytical results less than the IGWSCC, RDCSCC, or NRDCSCC, highlighted in Grey.

FA AOCs suitable for Single Phase Remediation are not indicated by group with a specific color on the Appendix A figures. They are included in Appendix A figures and are denoted by color depending on detected analytical sample results exceeding the specific SCC.

Site-specific clean-up criteria are likely to be established for the facility. Following NJDEP acceptance of any site-specific clean-up criteria, AOCs may be moved from the further action category and associated further action subcategories to the NFA category.

5.0.2 Organization of Data Tables

The SI analytical results are presented in two types of tables, including:

- Support tables, presented in the "Tables" section of this Soil - SI Report, in Volume II and Volume III
- Embedded tables included within the text of Section 5.0

These two types of tables serve different purposes in presenting the results of the Soil – SI. The support tables included in the "Tables" section of the Soil - SI Report in Volume II and Volume III are complete data presentations, as described below:

- Tables 2-1 through 2-13 of Volume II present Sampling Plans for AOCs in each former operational area, (e.g., Table 2-1 presents the sampling plan for AOCs located within the TNT Area). Six AOCs which were selected for the geophysical investigation (discussed in Section 8.0 of this report) which did not have samples collected, are not included in the sampling plans, these include:
  - B13-2 in the TNT Area, G9-4 in the Maintenance Area, K5-1 and K5-2 in the Development Area, M8-1 in the B-Line Area, and N6-1 in the Storage Area.
- Table 2-14 of Volume II presents the analyte list by AOC type (specified in section 1.5 of this report).
- Table 2-15 of Volume II presents a list of constituents analyzed per analytical group.
- Tables 5-1A through 5-13E) of Volume III present complete comparisons of all analytical sample results to the NJSCC. These tables are organized by former operational area (discussed in section 1.4), and by analyte type within operational area, (e.g., Tables 5-1A through 5-1D present the VOC, SVOC, E&E, and metals analytical results, respectively, for the TNT Area). The associated sample interval and/or matrix code per analytical sample is included in these tables.

- Tables 5-14A through 5-26B of Volume II present compounds reported at detected concentrations exceeding the NJSCC for each AOC, organized by former operational area, (e.g., Tables 5-14A through 5-14C present SVOC, E&E, and metal exceedances, respectively, for the TNT Area). The associated sample interval and/or matrix code per analytical sample is included in these tables.

- Tables 5-27 through 5-39 of Volume II present the justification for NFA for each AOC where NFA was selected as appropriate, organized by former operational area (e.g., Table 5-27 presents NFA justifications for the TNT Area AOCs).

- Tables 5-40 through 5-52 of Volume II present the justification for FA for AOCs where FA was determined to be appropriate, organized by operational area (e.g., Table 5-40 presents FA justifications for the TNT Area AOCs). FA AOCs suitable for Singe Phase Remediation and FA AOCs reserved for the RI are included in these tables.

- Table 6-1 of Volume II presents AOC justification for FA for all AOCs reserved for the RI.

The tables embedded within the text of the various subsections in Section 5 are meant to serve as brief data summaries that provide a "snapshot" view of conditions within each former operational area. Three types of embedded tables are presented, including:

- Embedded tables that summarize the number of samples analyzed, and the number of samples with detected concentrations exceeding the NJSCC, for each analyte group per each former operational area

- Embedded tables that summarize the AOCs identified with FECs per analyte group and former operational area (The associated figures in Appendix A present the FECs identified per former operational area and associated sample Ids and analytical results per FEC.)

- Embedded tables that summarize the AOCs selected for NFA, FA, and FA subcategories for each operational area. AOCs selected for the geophysical investigation (discussed in Section 8.0 of this report), which were not sampled, are not included in the embedded tables of Section 5.0 and its subsections. These include:

  - B13-2 in the TNT Area, G9-4 in the Maintenance Area, K5-1 and K5-2 in the Development Area, M8-1 in the B-Line Area, and N6-1 in the Storage Area

5.1 TRINITROTOLUENE (TNT) AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the TNT Area. Figures A-3 and A-4 of Appendix A present the TNT Area Map and TNT Area Sampling Point Map, respectively.

5.1.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the TNT Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-1 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Tables 5-1A through 5-1D of Volume III present the comparison of laboratory analyses to the NJSCC. Tables 5-14A through 5-14C of Volume II present a summary of the NJSCC exceedances within the TNT Area. VOCs were not detected above any of the NJSCC in samples collected from the TNT Area.

Semi-Volatile Organic Compounds (SVOCs)

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	63	7	2	21
2,4-Dinitrophenol	63	0	0	1
Benzo(a)anthracene	63	2	1	0
Benzo(a)pyrene	63	3	3	0
Benzo(b)fluoranthene	63	2	0	0
Benzo(k)fluoranthene	57	1	0	0
Indeno(1,2,3-cd)pyrene	63	1	0	0

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Antimony	56	1	0	NA
Arsenic	56	3	3	NA

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Copper	56	2	2	NA
Lead	56	13	11	NA
Zinc	56	3	3	NA

Energetic and Explosives (E&E)

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
1,3-Dintrobenzene	43	1	0	8
2-Amino-4,6-Dinitrotoluene	43	2	0	13
4-Amino-2,6-Dinitrotoluene	43	3	0	0
2,4/2,6-Dinitrotoluene	43	10	5	14
2,4,6-Trinitrotoluene	43	4	4	22
Nitroglycerin	46	1	1	NA

5.1.2 FEC Identification

Three FECs were identified within the TNT Area, these include;

- 2,4,6-Trinitrotoluene (TNT), an E&E compound
- 2,4/2,6-Dinitrotoluene (DNT), an E&E and SVOC compound
- Lead, a metal compound

5.1.3 FEC Posting Map Discussion

The following paragraphs describe the FEC postings maps created for the TNT Area.

TNT & DNT

Figures A-6, A-7, and A-8 of Appendix A present the TNT, DNT - E&E, and DNT - SVOC postings maps respectively. TNT and DNT exhibit similar RDCSCC exceedance patterns within the TNT Area. TNT was found exceeding the RDCSCC in 4 discrete areas. DNT - E&E was found exceeding the RDCSCC in 8 discrete areas. DNT - SVOC was found exceeding the RDCSCC in 6 discrete areas. The exceedances are primarily associated with

former manufacturing structures. Soil samples collected from the following AOCs contained TNT and DNT at concentrations exceeding the RDCSCC:

TNT

A12-8	B10-503	B11-663	B13-724

DNT – E&E

A12-8	B10-503	B10-506	B11-663	B12-237	B13-682
B13-724	B13-757				

DNT – SVOC

B10-503	B10-506	B11-602C	B12-237	B13-682	B13-724

Lead

Figure A-9 of Appendix A presents the Lead postings map. Lead was found exceeding the RDCSCC in 11 discrete areas. Similar to TNT and DNT, Lead is primarily associated with former manufacturing structures. Soil samples collected from the following AOCs contained Lead at concentrations exceeding the RDCSCC:

Lead

A11-1	A11-9	A12-8	A13-1	B10-20	B11-602C
B12-237	B9-2	C10-440	C10-466	C8-1	

5.1.4 Summary

The following tables present the categorization of the TNT Area AOCs. Table 5-27 of Volume II contains the justification for requesting no further action (NFA). Table 5-40 of Volume II provides the justification for requiring further action (FA) and FA subcategories. Figure A-5 of Appendix A presents the AOCs located within the TNT Area which require NFA or FA.

AOCs Requesting No Further Action (NFA)

A10-2	A10-3	A10-516	A11-3	A12-3	A12-4
A12-5	A12-6	A13-753	B10-3	B10-4	B11-2
C10-438					

AOCs Requiring Further Action (FA)

A11-1	A11-570	A11-8	A11-9	A12-7	A12-8
A13-1	B10-20	B10-503	B10-506	B10-656	B11-513
B11-523	B11-602C	B11-663	B12-237	B12-3	B12-450
B13-682	B13-724	B13-757	B13-8	B9-2	C10-432
C10-440	C10-466	C8-1			

FA AOCs Reserved for the RI

A11-2	A11-4	A11-5	A11-504	A11-7	A12-1
A12-426	A13-625	B10-2	B10-5	B10-501	B10-502
B10-505	B10-508	B10-509	B10-6	B12-1	B12-234
B13-1	C10-439				

5.2 DYNAMITE AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the Dynamite Area. Figures A-10 and A-11 of Appendix A present the Dynamite Area Map and Dynamite Area Sampling Points Map, respectively.

5.2.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the Dynamite Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-2 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Tables 5-2A through 5-2E of Volume III present the comparison of laboratory analyses to the NJSCC. Tables 5-

15A through 5-15D of Volume II present a summary of the NJSCC exceedances within the Dynamite Area. PCBs were not detected above any of the NJSCC in samples collected from the Dynamite Area.

Volatile Organic Compounds (VOCs)

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Methylene Chloride	6	0	0	1

SVOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	194	2	2	18
Benzo(a)anthracene	194	5	2	0
Benzo(a)pyrene	194	6	6	0
Benzo(b)fluoranthene	194	9	2	0
Benzo(k)fluoranthene	194	2	1	0
Chrysene	194	1	0	0
Dibenz(a,h)anthracene	194	1	1	0
Indeno(1,2,3-cd)pyrene	194	3	1	0

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Arsenic	187	30	30	NA
Copper	187	3	3	NA
Lead	187	16	12	NA
Thallium	187	3	3	NA
Zinc	187	4	4	NA

E&E

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2-Amino-4,6-Dinitrotoluene	100	0	0	6
2,4/2,6-Dinitrotoluene	100	2	1	12
2,4,6-Trinitrotoluene	100	2	1	8

5.2.2 FEC Identification

Two FECs were identified within the Dynamite Area, these include;

- Arsenic, a metal compound
- Lead, a metal compound

5.2.3 FEC Posting Map Discussion

The following paragraphs describe FEC postings maps created for the Dynamite Area.

Arsenic

Figure A-13 of Appendix A presents the Arsenic postings map for the Dynamite Area. Arsenic was found exceeding the RDCSCC in 24 discrete areas. The occurrence of Arsenic is primarily associated with the former manufacturing structures. Soil samples collected from the following AOCs contained Arsenic at concentrations exceeding the RDCSCC:

Arsenic

C13-262B	D11-B232	D12-209B	D12-289	D13-268	D13-303F
D14-204B	E11-12	E11-2064	E11-52	E11-7	E11-R2
E12-286B	E12-286D	E12-325B	E13-2074	E13-2076	E13-325

5.3 NITROGLYCERIN (NG) AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the NG Area.

Note: The PETN Area was combined with the NG Area for map presentations. These areas were combined because the PETN Area is very small and occupies the same physiographic region of the facility as the NG Area. Figures A-15 and A-16 of Appendix A present the NG and PETN Area Map and NG and PETN Sampling Point Map, respectively.

5.3.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the NG Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included.

Table 2-3 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Tables 5-3A through 5-3E of Volume III present the comparison of laboratory analyses to the NJSCC. Tables 5-16A through 5-16C of Volume II present a summary of the NJSCC exceedances within the NG Area. VOCs and PCBs were not detected above any of the NJSCC in samples collected from the NG Area.

SVOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	149	1	1	25
Benzo(a)anthracene	149	10	3	0
Benzo(a)pyrene	149	13	13	0
Benzo(b)fluoranthene	149	12	4	0
Benzo(k)fluoranthene	149	6	0	0
Bis(2-ethylhexyl)phthalate	149	1	0	0

5.3.2 FEC Identification

Two FECs were identified within the NG Area and one FEC was identified within the PETN Area. These include;

- Arsenic and Lead, metal compounds, in the NG Area
- Lead, a metal compound, in the PETN Area

5.3.3 FEC Posting Map Discussion

The following paragraphs describe the FEC postings maps created for the NG and PETN Areas.

Arsenic

Figure A-18 of Appendix A presents the Arsenic postings map for the NG Area. Arsenic was found exceeding the RDCSCC in 22 discrete areas within the NG Area. The occurrence of Arsenic is primarily associated with the former manufacturing structures within the NG Area. Soil samples collected from the following AOCs have detected Arsenic at concentrations exceeding the RDCSCC:

Arsenic

B11-1	C10-13	C11-1	C11-10	C11-12	C11-19
C11-30	C11-8	C11-9	D10-165B	D10-2007	D10-2227
D10-2230A	D10-2349	D10-4	D10-5	D10-6	D10-8234
D10-8284	E10-2169	E10-4	E10-8277		

Lead

Figure A-19 of Appendix A presents the Lead postings map for the NG and PETN Areas. Lead was found exceeding the RDCSCC in 32 discrete areas within the NG Area, frequently coinciding with locations where Arsenic exceeded the RDCSCC. The occurrence of Lead is primarily associated with the former manufacturing structures, a large area of stressed vegetation (C11-4), and one former pond (E10-5). Soil samples collected from the following AOCs have detected Lead at concentrations exceeding the RDCSCC:

Lead

5.4 PENTAETHRITOL TETRANITRATE (PETN) AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the PETN Area.

Note: The PETN Area was combined with the NG Area for map presentations. These areas were combined because the PETN Area is very small and occupies the same physiographic region of the facility as the NG Area. Figures A-15 and A-16 of Appendix A *present the NG and PETN Area Map and NG and PETN Sampling Point Map, respectively.*

5.4.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the PETN Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-4 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Table 5-4A through 5-4D of Volume III presents the comparison of laboratory analyses to the NJSCC. Tables 5-17A through 5-17C of Volume II present a summary of the NJSCC exceedances within the PETN Area. VOCs were not detected above any of the NJSCC in samples collected from the PETN Area.

SVOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	9	1	1	3
Benzo(a)anthracene	9	1	0	0
Benzo(a)pyrene	9	1	1	0
Benzo(b)fluoranthene	9	2	0	0
Benzo(k)fluoranthene	9	1	0	0

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances

Zinc	8	1	1	NA

E&E

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
1,3-Dinitrobenzene	10	0	0	2

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	10	3	1	5
2,4,6-Trinitrotoluene	10	0	0	3

5.4.2 FEC Identification

One FEC was identified within the PETN Area;

- Lead, a metal compound.

5.4.3 FEC Posting Map Discussion

Lead

Figure A-19 of Appendix A present the Lead postings map for the NG and PETN Areas. Lead was found exceeding the RDCSCC in 4 discrete areas within the PETN Area. The occurrence of Lead is primarily associated with the former manufacturing structures. Soil samples collected from the following AOCs have detected Lead at concentrations exceeding the RDCSCC:

Lead

B10-2178	C10-2	C10-2179	C10-3

5.4.4 Summary

The following tables present the categorization of the PETN Area AOCs. Table 5-30 of Volume II contains the justification for requesting NFA. Table 5-43 of Volume II provides the justification for requiring FA. Figure A-17 of Appendix A presents the AOCs located within the PETN Area which require NFA or FA.

AOCs Requesting NFA

5.5 DEVELOPMENT AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the Development Area. Figures A-20 and A-21 of Appendix A present the Development Area Map and Development Area Sampling Point Map, respectively.

5.5.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the Development Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-5 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Table 5-5A through 5-5E of Volume III presents the comparison of laboratory analyses to the NJSCC. Tables 5-18A through 5-18E of Volume II present a summary of the NJSCC exceedances within the Development Area.

VOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Methylene Chloride	44	0	0	3

SVOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances

RDX	152	3	1	NA

Polychlorinated Biphenyls (PCBs)

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Total PCBs	23	2	1	0

5.5.2 FEC Identification

Eight FECs were identified within the Development Area, these include:

- Three SVOC polycyclic aromatic hydrocarbons (PAHs) including Benzo(a)anthracene, Benzo(a)pyrene, and Benzo(b)fluoranthene
- 2,4/2,6-Dinitrotoluene (DNT), an E&E and SVOC compound
- Arsenic, Copper, Lead, and Mercury, metal compounds.

5.5.3 FEC Posting Map Discussion

The following paragraphs describe the FEC postings maps created for the Development Area.

2,4/2,6-Dinitrotoluene (DNT)

Figures A-23 and A-24 of Appendix A present the DNT - E&E and DNT - SVOC postings maps for the Development Area. DNT – E&E was found exceeding the RDCSCC in 5 discrete areas within the Development Area. DNT – SVOC was found exceeding the RDCSCC in 14 discrete locations within the Development Area. The locations of exceedances are primarily associated with the former laboratories and the Old Burning Grounds (M5-3). Soil samples collected from the following AOCs have detected DNT at concentrations exceeding the RDCSCC:

DNT – E&E

H6-8130	I6-9210	L5-4	L5-6	M5-3

DNT – SVOC

G6-8244	H6-8130	H6-8246	H6-8250	H8-9221	I6-1

I6-5	I6-8192	J7-3	L5-4	L5-6	M5-3
M5-8166E	N4-2				

PAHs

Figures A-25, A-26, and A-27 of Appendix A present the PAH postings maps for the Development Area. The PAH FECs exhibited similar RDCSCC exceedance patterns within the Development Area. Benzo(a)anthracene was found exceeding the RDCSCC in 23 discrete areas, Benzo(a)pyrene in 27 discrete areas; and Benzo(b)fluoranthene in 29 discrete areas. The locations of the exceedances are primarily associated with the use of fly ash as fill material to improve the grade at the facility. Soil samples collected from the following AOCs have detected PAH FECs at concentrations exceeding the RDCSCC:

Benzo(a)anthracene

G6-2	G7-2347	G7-8249	H5-8181	H5-938	H6-8120
H6-8122	H7-8123A	H7-8143	H7-8255	I6-8171	I6-8171A

K6-1	L5-9546	L6-370	L6-371	N5-6	

Arsenic

Figure A-28 of Appendix A presents the Arsenic postings map for the Development Area. Arsenic was found exceeding the RDCSCC in 38 discrete areas within the Development Area. These locations are associated with the former laboratories and the Old Burning Grounds (M5-3). Soil samples collected from the following AOCs have detected Arsenic at concentrations exceeding the RDCSCC:

Arsenic

G6-8128	G6-8243	G6-8244	G7-2347	G7-8139	G7-8249
H5-4	H5-8126	H5-938	H6-8285	H7-13	H7-15
H7-606L	H8-2	H8-8102	I5-2	I5-3	I5-4
I5-8141	I6-1	I6-8125	I6-8132	I6-8171	I6-8171A
I6-8172	I6-8192	I6-9	I7-8	J6-2	J6-8133
J6-8167	J6-915	K6-9214	L5-10	L5-2275	L6-1
M5-3	N5-6				

Copper

Figure A-29 of Appendix A presents the Copper postings map for the Development Area. Copper was found exceeding the RDCSCC in 16 discrete areas within the Development Area. The locations are associated with the former laboratories and in particular the Old Burning Grounds (M5-3). Soil samples collected from the following AOCs have detected Copper at concentrations exceeding the RDCSCC:

Copper

G7-8139	H5-938	H6-8120	H7-8131	I5-2	I5-3
I5-8	I6-11	J6-9	L4-4	L5-4	L5-6
L6-9	M5-3	N4-2	N4-3		

Lead

Figure A-30 of Appendix A presents the Lead postings map for the Development Area. Lead was found exceeding the RDCSCC in 48 discrete areas within the Development Area. The locations are associated with the former laboratories, particularly the area of the former Ballistics Laboratory (H5-8126) and the Old Burning Grounds (M5-3). Soil samples collected from the following AOCs have detected Lead at concentrations exceeding the RDCSCC:

Lead

G6-8128	G6-8129	G6-8243	G6-8244	G7-8139	G7-8249
H5-8126	H6-8120	H6-8130	H6-8152	H6-8245	H6-8250

L5-8318	L5-9546	L6-370	L6-9	M4-1	M5-3

Mercury

Figure A-31 of Appendix A presents the Mercury postings map for the Development Area. Mercury was found exceeding the RDCSCC in 19 discrete areas within the Development Area. The locations are primarily associated with the former laboratories. Soil Samples collected from the following AOCs have detected Mercury at concentrations exceeding the RDCSCC:

Mercury

G6-8129	G6-8242	H5-8126	H5-938	H6-8120	H6-8123B

5.6 DIAZODINTROPHENOL (DIAZO) AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the Diazo Area. Figures A-32 and A-33 of Appendix A present the Diazo Area Map and Diazo Area Sampling Point Map, respectively.

5.6.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the Diazo Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-6 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Tables 5-6A through 5-6C of Volume III present the comparison of laboratory analyses to the NJSCC. Table 5-19A of Volume II presents a summary of the NJSCC metal exceedances within the Diazo Area. SVOCs and

E&E compounds were not detected above any of the NJSCC in samples collected from the Diazo Area.

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Arsenic	8	1	1	NA
Lead	8	2	1	NA
Thallium	8	1	1	NA

5.6.2 FEC Identification

Due to the very small size of the Diazo area and limited number of samples collected, no FECs were identified.

5.6.3 FEC Posting Map Discussion

No FECs were identified within the Diazo Area, therefore, no FEC postings maps were created.

5.6.4 Summary

The following tables present the categorization of the Diazo Area AOCs. Table 5-32 of Volume II contains the justification for requesting NFA. Table 5-45 of Volume II provides the justification for requiring FA and FA subcategories. Figure A-34 of Appendix A presents the AOCs located within the Diazo Area which require NFA or FA.

AOCs Requesting NFA

H8-2181	H8-69F	H8-9121

AOCs Requiring FA

5.7 MAINTENANCE AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the Maintenance Area. Figures A-35 and A-36 of Appendix A present the Maintenance Area Map and Maintenance Area Sampling Point Map, respectively.

5.7.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the Maintenance Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-7 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Tables 5-7A through 5-7E of Volume III present the comparison of laboratory analyses to the NJSCC. Tables 5-20A through 5-20E of Volume II present a summary of the NJSCC exceedances within the Maintenance Area.

VOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Chlorobenzene	68	0	0	1
Methylene Chloride	76	0	0	2
Trichloroethylene	68	0	0	1

SVOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	241	12	6	59
1,4-Dichlorobenzene	246	0	0	1
Benzo(a)anthracene	241	21	2	0
Benzo(a)pyrene	241	26	26	0
Benzo(b)fluoranthene	241	43	3	0
Benzo(k)fluoranthene	241	12	2	0

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Butylbenzylphthalate	241	0	0	1
Chrysene	241	2	0	0
Dibenz(a,h)anthracene	241	2	2	0
Indeno(1,2,3-cd)pyrene	241	5	1	0

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Antimony	226	4	1	NA
Arsenic	226	77	77	NA
Beryllium	226	1	1	NA
Copper	226	9	9	NA
Lead	226	62	45	NA
Mercury	227	5	0	NA
Nickel	226	4	0	NA
Thallium	226	4	4	NA
Zinc	226	1	1	NA

E&E

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
1,3-Dinitrobenzene	52	0	0	3
2-Amino-4,6-Dinitrotoluene	51	1	1	1
2,4/2,6-Dinitrotoluene	52	3	2	8
2,4,6-Trinitrotoluene	52	1	1	3
RDX	52	1	1	NA

PCBs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Total PCBs	53	15	7	1

5.7.2 FEC Identification

Six FECs were identified within the Maintenance Area, these include:

- Three SVOC polycyclic aromatic hydrocarbon (PAH) compounds including are Benzo(a)anthracene, Benzo(a)pyrene, and Benzo(b)fluoranthene
- Total polychlorinated biphenyls (PCBs)
- Arsenic and Lead, metal compounds

5.7.3 FEC Posting Map Discussion

The following paragraphs describe the FEC postings maps created for the Maintenance Area.

PAHs

Figures A-38, A-39, and A-40 of Appendix A present the PAH postings maps for the Maintenance Area. The PAH FECs exhibited similar RDCSCC exceedance patterns within the Maintenance Area. Benzo(a)anthracene was found exceeding the RDCSCC in 20 discrete areas, Benzo(a)pyrene in 26 discrete areas, and Benzo(b)fluoranthene in 40 discrete areas. Soil samples collected from the following AOCs have detected PAH FECs at concentrations exceeding the RDCSCC:

Benzo(a)anthracene

F10-44	F10-8576	F11-458	G10-18	G10-8106	G10-8224
G10-8503	G10-9515	G11-9305	G11-9309	G12-8109	H10-11

H8-69E	H8-8262	H8-9226	H9-10		

PCBs

Figure A-41 of Appendix A presents the total PCBs postings map for the Maintenance Area. PCBs were found exceeding the RDCSCC in 14 discrete areas within the Maintenance Area. The locations are primarily located within the central portion of the Maintenance Area. Soil samples collected from the following AOCs have detected PCBs at concentrations exceeding the RDCSCC:

PCBs

G10-2008	G10-8108	G10-8682	G10-9106A	G11-8257	G9-2
H10-10	H10-154B	H10-17	H10-262	H10-9002	H10-9308
H11-4	H11-9336				

Arsenic

Figure A-42 of Appendix A presents the Arsenic postings map for the Maintenance Area. Arsenic was found exceeding the RDCSCC in 67 discrete areas within the Maintenance Area. The locations appear to be associated with the former Maintenance Area structures, particularly the former acid recovery area located in facility grids H10 and H11. Soil samples collected from the following AOCs have detected Arsenic at concentrations exceeding the RDCSCC:

Arsenic

5.8 B-LINE AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the B-Line Area. Figures A-44 and A-45 of Appendix A present the B-Line Area Map and B-Line Area Sampling Point Map, respectively.

5.8.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the B-Line Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-8 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Table 5-8A through 5-8E of Volume III presents the comparison of laboratory analyses to the NJSCC. Tables 5-21A through 5-21D of Volume II present a summary of the NJSCC exceedances within the B-Line Area. PCBs were not detected above any of the NJSCC in samples collected from the B-Line Area.

VOC

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Benzene	43	3	0	3

SVOC

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	209	16	3	67
2,4-Dinitrophenol	210	0	0	1
Benzo(a)anthracene	209	25	7	0
Benzo(a)pyrene	209	30	30	0
Benzo(b)fluoranthene	209	33	8	0
Benzo(k)fluoranthene	209	14	1	0
Chrysene	209	1	0	0
Dibenz(a,h)anthracene	209	3	3	0
Diethylphthalate	209	0	0	1
Di-n-butylphthalate	209	0	0	3
Indeno(1,2,3-cd)pyrene	209	18	1	0
n-Nitroso-di-n-propylamine	209	1	1	0
n-Nitrosodiphenylamine	204	1	0	1

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Arsenic	165	16	16	NA
Copper	165	4	4	NA
Lead	165	16	8	NA
Mercury	165	1	0	NA
Thallium	165	7	7	NA
Zinc	165	1	1	NA

E&E

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2-Amino-4,6-Dinitrotoluene	158	0	0	2
2,4/2,6-Dinitrotoluene	158	11	5	24
2,4,6-Trinitrotoluene	158	1	0	15
Nitroglycerin	160	26	15	NA

5.8.2 FEC Identification

Nine FECs were identified within the B-Line Area, these include:

- Five SVOC polycyclic aromatic hydrocarbons (PAHs) including Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, and Indeno(1,2,3-cd)pyrene
- Nitroglycerin, an E&E compound
- 2,4/2,6-Dinitrotoluene (DNT), an E&E and SVOC compound
- Arsenic and Lead, metal compounds

5.8.3 FEC Posting Map Discussion

The following paragraphs describe the FEC postings maps created for the B-Line Area.

2,4/2,6-Dinitrotoluene (DNT) Figures A-47 and A-48 of Appendix A present the DNT - E&E and DNT – SVOC postings maps for the B-Line Area. DNT – E&E was found exceeding the RDCSCC in 9 discrete areas within the B-Line Area. DNT – SVOC was found exceeding the RDCSCC in 16 discrete areas within the B-Line Area. The locations appear to be primarily associated with the former manufacturing structures. Soil samples collected from the following AOCs have detected DNT at concentrations exceeding the RDCSCC:

DNT – E&E

J11-10	J11-2188	J11-2298	K10-2090	K10-2266	L10-2

5.9 A-LINE AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the A-Line Area. Figures A-57 and A-58 of Appendix A present the A-Line Area Map and A-Line Area Sampling Point Map, respectively.

5.9.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the A-Line Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-9 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Table 5-9A through 5-9E of Volume III presents the comparison of laboratory analyses to the NJSCC. Tables 5-22A through 5-22D of Volume II present a summary of the NJSCC exceedances within the A-Line Area. PCBs were not detected above any of the NJSCC in samples collected from the A-Line Area.

VOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Acrylonitrile	22	1	0	1
Benzene	22	1	0	1

SVOC

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dintrotoluene	184	16	7	54
Benzo(a)anthracene	184	9	1	0
Benzo(a)pyrene	184	10	10	0
Benzo(b)fluoranthene	184	11	2	0
Benzo(k)fluoranthene	184	5	1	0
Chrysene	184	1	0	0
Dibenz(a,h)anthracene	184	1	1	0
Indeno(1,2,3-cd)pyrene	184	6	1	0
n-Nitroso-di-n-propylamine	184	1	1	0

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Arsenic	162	25	25	NA
Copper	162	6	6	NA
Lead	162	7	3	NA
Nickel	162	1	0	NA
Thallium	162	9	9	NA

E&E

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
1,3-Dinitrobenzene	138	0	0	2
2,4/2,6-Dintrotoluene	138	15	5	39
2,4,6-Trinitrotoluene	138	1	1	24
Nitroglycerin	140	34	12	0

5.9.2 FEC Identification

Three FECs were identified within the A-Line Area, these include:

- Nitroglycerin, an E&E compound
- 2,4/2,6-Dinitrotoluene (DNT), an E&E and SVOC compound
- Arsenic, a metal compound

5.9.3 FEC Posting Map Discussion

2,4/2,6-Dinitrotoluene (DNT)

Figures A-60 and A-61 of Appendix A present the DNT - E&E and DNT - SVOC postings maps for the A-Line Area. DNT – E&E was found exceeding the RDCSCC in 13 discrete areas within the A-Line Area. DNT – SVOC was found exceeding the RDCSCC in 14 discrete areas within the A-Line Area. The locations appear to be primarily associated with

the former manufacturing structures. Soil samples collected from the following AOCs have detected DNT at concentrations exceeding the RDCSCC:

DNT – E&E

E10-615	E9-2161	E9-610	F10-3	F9-2105	F9-2105A
F9-2109	F9-2109C	F9-A6	F9-PA4	G7-2115	G8-2114
G8-2210					

DNT – SVOC

E10-615	E9-2161	E9-610	F8-2107	F8-575	F9-2105
F9-2106	F9-2109	F9-2109C	F9-8	F9-9	G7-2115
G8-2114	G9-2123				

Nitroglycerin (NG)

Figure A-62 of Appendix A presents the NG postings map for the A-Line Area. NG was found exceeding the RDCSCC in 23 discrete areas within the A-Line Area. The locations appear to be primarily associated with the former manufacturing structures. Soil samples collected from the following AOCs have detected NG at concentrations exceeding the RDCSCC:

NG

E10-2101/2102/2103		E9-2296	E9-2297	E9-610	F10-8237
F11-2016	F8-2107	F8-2116	F8-2117	F8-2144	F8-575
F8-9	F9-16	F9-2105	F9-2106	F9-2109	F9-2109C
F9-5	F9-8188	F9-PA6	G7-2115	G8-2114	G8-2249

Arsenic

Figure A-63 of Appendix A presents the Arsenic postings map for the A-Line Area. Arsenic was found exceeding the RDCSCC in 19 discrete areas within the A-Line Area. The locations appear to be primarily associated with the former manufacturing structures,

particularly the former dry houses located at the northern portion of A-Line. Soil samples collected from the following AOCs have detected Arsenic at concentrations exceeding the RDCSCC:

Arsenic

E9-2297	F10-11	F10-2323	F8-2116	F8-2117	F8-2118
F8-2150	F8-9	F9-2109D	F9-563	G7-1	G7-2115

5.10 FINISHING AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the Finishing Area. Figures A-64 and A-65 of Appendix A present the Finishing Area Map and Finishing Area Sampling Point Map, respectively.

5.10.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the Finishing Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-10 of Volume II provides the summary of the number of analytical

samples collected and the analytical parameters selected at each AOC. Table 5-10A through 5-10E of Volume III presents the comparison of laboratory analyses to the NJSCC. Tables 5-23A through 5-23C of Volume II present a summary of the NJSCC exceedances within the Finishing Area. VOCs and PCBs were not detected above any of the NJSCC in samples collected from the Finishing Area.

SVOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	119	5	4	27
Benzo(a)anthracene	119	3	0	0
Benzo(a)pyrene	119	3	3	0
Benzo(b)fluoranthene	119	4	1	0
Benzo(k)fluoranthene	119	1	0	0
Indeno(1,2,3-cd)pyrene	119	1	0	0

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Antimony	120	2	0	NA
Arsenic	120	13	13	NA
Copper	120	3	3	NA
Lead	120	8	8	NA
Mercury	120	1	0	NA
Selenium	120	2	0	NA
Zinc	120	1	1	NA

E&E

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2-Amino-4,6-Dinitrotoluene	108	0	0	1
2,4/2,6-Dinitrotoluene	108	7	5	15
2,4,6-Trinitrotoluene	108	0	0	10
Nitroglycerin	108	12	5	0

5.10.2 FEC Identification

Four FECs were identified within the Finishing Area, these include:

- Nitroglycerin, an E&E compound
- 2,4/2,6-Dinitrotoluene (DNT), an E&E and SVOC compound
- Arsenic and Lead, metal compounds

5.10.3 FEC Posting Map Discussion

2,4/2,6-Dinitrotoluene (DNT)

Figures A-67 and A-68 of Appendix A present the DNT - E&E and DNT - SVOC postings maps for the Finishing Area. DNT – E&E was found exceeding the RDCSCC in 6 discrete areas within the Finishing Area. DNT – SVOC was found exceeding the RDCSCC in 4 discrete areas within the Finishing Area. The locations appear to be primarily associated with the former manufacturing structures. In particular the locations include 3 structures closely located at the northern portion of the Finishing Area, I7-2133A (Unknown), I7-2305 (Unknown), and J7-2133 (Old Can Pack House). Soil samples collected from the following AOCs have detected DNT at concentrations exceeding the RDCSCC:

DNT – E&E

I7-2133A	I7-2305	I9-524	J7-2	J7-2133	J7-241

DNT – SVOC

I7-2133A	I7-2305	J7-2	J7-2133

Nitroglycerin (NG)

Figure A-69 of Appendix A presents the NG postings map for the Finishing Area. NG was found exceeding the RDCSCC in 11 discrete areas within the Finishing Area. The locations appear to be primarily associated with the former manufacturing structures. Soil samples collected from the following AOCs have detected NG at concentrations exceeding the RDCSCC:

NG

I7-B59	I8-2138/2139	I8-2170	I8-2328	I8-2328A	I8-9334
I9-2311	J7-2	J7-2133	J7-2281	J8-2354	

Arsenic

Figure A-70 of Appendix A presents the Arsenic postings map for the Finishing Area. Arsenic was found exceeding the RDCSCC in 12 discrete areas within the Finishing Area. The locations appear to be primarily associated with the former manufacturing structures. Soil samples collected from the following AOCs have detected Arsenic at concentrations exceeding the RDCSCC:

Arsenic

I10-552	I10-E50	I7-5	I7-566A	I7-B59	I8-2138/2139
I9-524	J7-2133	J7-2324	J9-1	J9-2142	J9-4

Lead

Figure A-71 of Appendix A presents the Lead postings map for the Finishing Area. Lead was found exceeding the RDCSCC in 6 discrete areas within the Finishing Area. The locations are associated with the former manufacturing structures. Soil samples collected from the following AOCs have detected Lead at concentrations exceeding the RDCSCC

Lead

5.11 AMMONIA-NITRATE (AN) AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the Ammonia-Nitrate Area. Figures A-72 and A-73 of Appendix A present the Ammonia-Nitrate Area Map and Ammonia-Nitrate Area Sampling Point Map, respectively.

5.11.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the Ammonia-Nitrate Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-11 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Table 5-11A through 5-11E of Volume III presents the comparison of laboratory analyses to the NJSCC. Tables 5-24A through 5-24C of Volume II present a summary of the NJSCC exceedances within the Ammonia-Nitrate Area. VOCs and PCBs were not detected above any of the NJSCC in samples collected from the Ammonia-Nitrate Area.

SVOC

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	66	1	0	8
Benzo(a)anthracene	66	8	2	0
Benzo(a)pyrene	66	8	8	0
Benzo(b)fluoranthene	66	9	2	0
Benzo(k)fluoranthene	66	5	0	0
Dibenz(a,h)anthracene	66	1	1	0
Indeno(1,2,3-cd)pyrene	66	4	0	0

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Arsenic	63	11	11	NA
Copper	63	3	3	NA
Lead	63	9	8	NA
Thallium	63	4	4	NA
Zinc	63	3	3	NA

E&E

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	12	1	0	1
2,4,6-Trinitrotoluene	12	0	0	1

5.11.2 FEC IDENTIFICATION

Five FECs were identified within the Ammonia-Nitrate Area, these include;

- Three SVOC polycyclic aromatic hydrocarbons (PAHs) including Benzo(a)anthracene, Benzo(a)pyrene, and Benzo(b)fluoranthene
- Arsenic and Lead, metal compounds

5.11.3 FEC Posting Map Discussion

PAHs

Figures A-75, A-76, and A-77 of Appendix A present the PAH postings maps for the Ammonia-Nitrate Area. The PAH FECs exhibited identical RDCSCC exceedance patterns within the Ammonia-Nitrate Area. Benzo(a)anthracene, Benzo(a)pyrene, and Benzo(b)fluoranthene exceeded the RDCSCC in 8 discrete areas. The locations of the exceedances are primarily associated with the use of fly ash as fill material to improve the grade at the facility. Soil samples collected from the following AOCs have detected PAH FECs at concentrations exceeding the RDCSCC:

Benzo(a)anthracene, Benzo(a)pyrene, and Benzo(b)fluoranthene

H12-1	H13-2014	H13-8158	H13-8164	I11-9303	I12-10
I12-2010	I12-9111				

Arsenic

Figure A-78 of Appendix A presents the Arsenic postings map for the Ammonia-Nitrate Area. Arsenic was found exceeding the RDCSCC in 11 discrete areas within the Ammonia-Nitrate Area. The locations appear to be primarily associated with the former manufacturing

structures. Soil samples collected from the following AOCs have detected Arsenic at concentrations exceeding the RDCSCC:

Arsenic

H13-2014	H13-2031A	H13-8226	I11-9303	I11-B5	I12-14
I12-15	I12-2184	I12-2186	I12-2287	I12-6	

Lead

Figure A-79 of Appendix A presents the lead postings map for the Ammonia-Nitrate Area. Lead was found exceeding the RDCSCC in 9 discrete areas within the Ammonia-Nitrate Area. The locations are primarily associated with the former manufacturing structures. Soil samples collected from the following AOCs have detected Lead at concentrations exceeding the RDCSCC

Lead

5.12 STORAGE AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the Storage Area. Figures A-80 and A-81 of Appendix A present the Storage Area Map and Storage Area Sampling Map, respectively.

5.12.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the Storage Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedances and the number of specific NJSCC exceedances are also included. Table 2-12 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Table 5-12A through 5-12E of Volume III presents the comparison of laboratory analyses to the NJSCC. Tables 5-25A through 5-25D of Volume II present a summary of the NJSCC exceedances within the Storage Area. PCBs were not detected above any of the NJSCC in samples collected from the Storage Area.

VOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Benzene	3	1	0	1

SVOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	133	4	1	17
Benzo(a)anthracene	133	13	6	0
Benzo(a)pyrene	133	16	16	0
Benzo(b)fluoranthene	133	16	8	0
Benzo(k)fluoranthene	133	12	4	0
Chrysene	133	3	0	0
Dibenz(a,h)anthracene	133	6	6	0
Indeno(1,2,3-cd)pyrene	133	11	3	0

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Antimony	135	1	0	NA
Arsenic	135	23	23	NA
Copper	135	3	3	NA
Lead	135	11	8	NA
Mercury	134	1	0	NA
Nickel	135	1	0	NA
Selenium	135	1	0	NA
Silver	135	1	0	NA
Thallium	135	1	1	NA
Zinc	135	3	3	NA

E&E

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
1,3-Dinitrobenzene	139	0	0	1
2-Amino-4,6-Dinitrotoluene	139	0	0	1
2,4/2,6-Dinitrotoluene	139	9	5	17
2,4,6-Trinitrotoluene	139	0	0	10
Nitroglycerin	139	10	4	0

5.12.2 FEC Identification

Three FECs were identified within the Storage Area, these include;

- Two SVOC polycyclic aromatic hydrocarbons (PAHs) including Benzo(a)pyrene and Benzo(b)fluoranthene, and,
- Arsenic, a metal compound.

5.12.3 FEC Posting Map Discussion

PAHs

Figures A-83 and A-84 of Appendix A present the PAH postings maps for the Storage Area. The PAH FECs exhibited similar RDCSCC exceedance patterns within the Storage Area. Benzo(a)pyrene and Benzo(b)fluoranthene exceeded the RDCSCC in 9 discrete areas. The locations are primarily associated with the use of fly ash as fill material to improve the grade of the facility. Soil samples collected from the following AOCs have detected PAH FECs at concentrations exceeding the RDCSCC:

Benzo(a)pyrene

J10-2	J10-9334	M7-2	N5-582	N6-640	N7-2
O8-3	P7-4	S7-1			

Benzo(b)fluoranthene

I11-8278	I11-9301	J10-2	J10-9334	N5-582	N6-640
N7-2	P7-4	S7-1			

Arsenic

Figure A-85 of Appendix A presents the Arsenic postings map for the Storage Area. Arsenic was found exceeding the RDCSCC in 13 discrete areas within the Storage Area. The locations appear to be primarily associated with the former manufacturing structures and two debris areas (M7-2 & N7-2). Soil samples collected from the following AOCs have detected Arsenic at concentrations exceeding the RDCSCC:

Arsenic

I11-9301	J10-2	J10-2033	K8-1	K8-9212	M6-1
M7-2	N6-640	N7-2	N7-573	O7-396	P6-651
P7-4					

5.12.4 Summary

The following tables present the categorization of the Storage Area AOCs. Table 5-38 of Volume II contains the justification for requesting NFA. Table 5-51 of Volume II provides the justification for requiring FA and FA subcategories. Figure A-82 of Appendix A presents the AOCs located within the Storage Area which require NFA or FA.

5.13 MISCELLANEOUS/OFFSITE AREA

This section describes the results of the Soil – SI chemical analyses performed on samples collected from the Miscellaneous/Offsite Area. Figures A-86 and A-89 of Appendix A present the Miscellaneous/Offsite Area Map.

5.13.1 General Analytical Results Discussion

The following tables present each constituent by analytical group detected within the Miscellaneous/Offsite Area found to exceed any of the NJSCC. The number of analyses performed per constituent with NJSCC exceedance and the number of specfic NJSCC exceedances are also included. Table 2-13 of Volume II provides the summary of the number of analytical samples collected and the analytical parameters selected at each AOC. Table 5-13A through 5-13E of Volume III presents the comparison of laboratory analyses to the NJSCC. Tables 5-26A and 5-26B of Volume II present a summary of the NJSCC exceedances within the Miscellaneous/Offsite Area. VOCs, E&E compounds, and PCBs were not detected above any of the NJSCC in samples collected from the Miscellaneous/Offsite Area.

SVOCs

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
2,4/2,6-Dinitrotoluene	64	0	0	1
Benzo(a)anthracene	64	3	0	0
Benzo(a)pyrene	64	4	4	0
Benzo(b)fluoranthene	64	3	0	0
Benzo(k)fluoranthene	64	2	0	0
Indeno(1,2,3-cd)pyrene	64	1	0	0

Metals

Constituent	Number of Analyses	RDCSCC Exceedances	NRDCSCC Exceedances	IGWSCC Exceedances
Antimony	37	1	0	NA
Arsenic	37	1	1	NA
Beryllium	37	1	1	NA
Copper	37	1	1	NA
Lead	37	8	5	NA
Thallium	37	2	2	NA
Zinc	37	1	1	NA

5.13.2 FEC Identification

One FEC was identified within the Miscellaneous/Offsite Area;

- Lead, a metal compound.

5.13.3 FEC Posting Map Discussion

The following paragraph describes the FEC postings maps created for the Miscellaneous/Offsite Area.

Lead

Figures A-88 and A-91 of Appendix A present the Lead postings maps for the Miscellaneous/Offsite Area. Lead was found exceeding the RDCSCC in 5 discrete areas within the Miscellaneous/Offsite Area. Soil samples collected from the following AOCs have detected Lead at concentrations exceeding the RDCSCC:

Lead

E16-8561	H14-3	M11-8606	O13-1	O13-2

5.13.4 Summary

The following tables present the categorization of the Miscellaneous/Offsite Area AOCs. Table 5-39 of Volume II contains the justification for requesting NFA. Table 5-52 of Volume II provides the justification for requiring FA and FA subcategories. Figures A-87 and A-90 of Appendix A present the AOCs located within the Miscellaneous/Offsite Area which require NFA or FA.

AOCs Requesting NFA

D16-1	D16-3	E15-8560	H14-2	J14-2	M11-1
N13-5	O13-4	O13-7	O13-8	O13-8577	O13-8604
O14-1	O14-8603				

AOCs requiring FA

E16-8561	G14-1	G14-2	H14-3	M11-8606	N13-1
N13-4	O13-1				

FA AOCs Suitable for Single Phase Remediation

D16-2	O13-2

6.0 AOCs RESERVED FOR REMEDIAL INVESTIGATION

This section describes the AOCs that were not sampled as part of the Soil – SI and were reserved for the forthcoming remedial investigation (RI). AOCs were reserved for the remedial investigation based on existing analytical data or if field observations determined that various constituents would exceed the NJDEP RDCSCC. Roux Associates collected the existing analytical data during the preliminary Phase I TNT Area Site Investigation. This report was submitted to the NJDEP on December 5, 1997. The field observations were collected during the field implementation of the Phase I – SI. The following AOCs were reserved for the remedial investigation:

AOC Designation	Operational Area	AOC Designation	Operational Area	AOC Designation	Operational Area
A11-2	TNT	B10-6	TNT	H11-1	Maintenance
A11-4	TNT	B12-1	TNT	M8-1	B-Line
A11-5	TNT	B12-234	TNT	E9-1	A-Line
A11-504	TNT	B13-1	TNT	E9-2119	A-Line
A11-7	TNT	B13-2	TNT	E9-2337	A-Line
A12-1	TNT	C10-439	TNT	F10-2094	A-Line
A12-426	TNT	C13-666	Dynamite	G8-2110	A-Line
A13-625	TNT	C11-8572C	NG	J7-1	Finishing
B10-2	TNT	C11-8572D	NG	H12-237	AN
B10-5	TNT	D11-2031	NG	H13-1	AN
B10-501	TNT	K5-1	Development	H13-7	AN
B10-502	TNT	K5-2	Development	J10-2116	Storage
B10-505	TNT	H8-1	Diazo	N6-1	Storage
B10-508	TNT	H8-584	Diazo		
B10-509	TNT	G9-4	Maintenance		

Table 6-1 presents the justification for reserving the AOCs for the remedial investigation.

The AOCs reserved for the remedial investigation are also presented by operational area in the following sections of this report:

- Section 5.0 Analytical Results, Volume I, presents all AOCs reserved for the RI in the Summary subsection,

- Section 8.0 Geophysical Investigation, Volume I, presents 6 AOCs reserved for the RI (B13-2 in the TNT Area, G9-4 in the Maintenance Area, K5-1 and K5-2 in the Development Area, M8-1 in the B-Line Area, and N6-1 in the Storage Area),

- Sampling Plan Tables 2-1 through 2-13, Volume II, presents all AOCs reserved for the RI with the exception of 6 AOCs in the geophysical investigation (B13-2 in the TNT Area, G9-4 in the Maintenance Area, K5-1 and K5-2 in the Development Area, M8-1 in the B-Line Area, and N6-1 in the Storage Area),

- Further Action Tables 5-40 through 5-52, Volume II, presents all AOCs reserved for the RI with the exception of 6 AOCs in the geophysical investigation (B13-2 in the TNT Area, G9-4 in the Maintenance Area, K5-1 and K5-2 in the Development Area, M8-1 in the B-Line Area, and N6-1 in the Storage Area),

- Table 8-1 Geophysical Investigation, Volume II, presents 6 AOCs reserved for the RI (B13-2 in the TNT Area, G9-4 in the Maintenance Area, K5-1 and K5-2 in the Development Area, M8-1 in the B-Line Area, and N6-1 in the Storage Area).

7.0 REMAINING SOIL – SI ACTIVITIES

This section describes the field-sampling activities that were not completed during the Soil – SI. The remaining items are limited to performing screening and sampling activities at one AOC and collecting confirmation samples at 19 AOCs. The single AOC that was not sampled during the Soil – SI was F9-PA3. The 19 AOCs requiring confirmation sampling are:

AOC Designation	Operational Area	AOC Designation	Operational Area	AOC Designation	Operational Area
A12-3	TNT	F8-1	A-Line	F10-2289	A-Line
A13-753	TNT	F8-2	A-Line	I9-515	Finishing
D10-3	NG	F8-4	A-Line	L7-4	Storage
G9-8105	Maintenance	F8-567	A-Line	P5-536	Storage
H12-4	Maintenance	F9-2104	A-Line	D16-1	Miscellaneous/ Offsite
H12-5	Maintenance	F9-2279	A-Line		
E9-556	A-Line	F9-558A	A-Line		

F9-PA3, the single AOC that was not sampled during the SI, was inadvertently deleted from the sampling list during preparation for field activities. The 19 confirmation samples were not collected primarily due to initial misinterpretation of the preliminary data supplied by the laboratory. The remaining Soil – SI activities will be completed as part of the next field investigation activity and the results will be submitted to the NJDEP either as a addendum to this report or as part of a subsequent remedial investigation. Table 7-1 of Volume II presents the remaining activities for each AOC.

8.0 GEOPHYSICAL INVESTIGATIONS

This section describes the results of the geophysical investigation conducted as part of the Soil – SI. Each location chosen to be investigated with geophysical methods was selected because historic facility operational history indicated a strong possibility of subsurface environmental or explosive hazards as described in N.J.A.C. 7:26E-3.6(a)1. The primary focus of the geophysical investigation was to provide the information necessary to focus the forthcoming remedial investigation of these areas. Therefore, samples were not collected as part of the Soil – SI with the exception of K6-1. Two samples, K6-1-01 and K6-1-02, were inadvertently collected from AOC K6-1. Analytical results of the two samples confirmed the indication that K6-1 was to be reserved for the RI. Appendix C contains the Earth Resources Technology (ERT) geophysical investigation report. Table 8-1 of Volume II presents a general description of the 7 AOCs where the geophysical investigation was conducted.

8.1 B13-2 GRAVEL PIT

B13-2 (Gravel Pit) is located in the TNT Area, adjacent to the Dynamite Area. B13-2 is approximately 150-foot by 150-foot in areal extent. Figure A-5 of Appendix A presents the location of B13-2. This area appears to have been historically excavated and later partially back-filled with debris. The center of the excavated area has been visually identified to contain explosive residue. Figures 3.5-1 through 3.5-4 of Appendix C illustrate the results of the geophysical investigation of this AOC.

The results of the geophysical investigation determined that several isolated ferrous objects and multiple areas of debris are present within the boundary of this AOC. This is consistent with the surface expression of materials placed within this AOC.

8.2 G9-4 BURIED DRUM AREA

G9-4 (Buried Drum Area) is located in the Maintenance Area. G9-4 is approximately 50-feet by 40-feet in size. Figure A-37 of Appendix A presents the location of G9-4. On December 10, 1998 approximately 50 drum carcasses were removed from this AOC. The drum carcasses were substantially corroded and did not contain any material. It is believed the interment of these drums was related to the large facility explosion that occurred in 1940.

The drums were removed as an interim remedial measure. Figures 3.6-1 through 3.6-4 of Appendix C illustrate the results of the geophysical investigation of this AOC.

The results of the geophysical investigation determined that two small isolated areas of ferrous metal are present and may be associated with light debris. Since this area is in close proximity to the 1940 explosion it is likely these objects are shrapnel associated with the explosion. Light metal debris can be found over a wide area in this region of the facility resulting from the 1940 or later explosions.

8.3 K5-1 FORMER DRUM DISPOSAL AREA

K5-1 (Former Drum Disposal Area) is located within the Development Area. K5-1 is approximately 500-feet in perimeter. Figure A-22 of Appendix A presents the location of K5-1. In December 1998, several hundred drum carcasses were removed from this AOC. The drum carcasses were substantially corroded and the vast majority did not contain any material. Approximately 35 drums were found to contain pine oil and were immediately placed in salvage drums. It is believed the majority of the drums historically contained pine oil, however, several drums were found to contain general trash. The pine oil is believed to have been an experimental intermediate compound for the historic development of new E&E materials. The drums were removed as an interim remedial measure until the investigation of this AOC coincided with the facility-wide investigation. Figures 3.3-1 through 3.3-4 of Appendix C illustrate the results of the geophysical investigation conducted at this AOC.

The results of the geophysical investigation determined that a linear pattern of subsurface ferrous objects is present within this AOC.

8.4 K5-2 POND and K6-1 DEBRIS AREA

K5-2 (Pond) and K6-1 (Debris Area) are located in the Development Area in close proximity to K5-1. K5-2 and K6-1 are located very close to one another and were investigated as one unit. Figure A-22 of Appendix A presents the location of K5-2 and K6-1. K5-2 is a small shallow pond with a perimeter of approximately 500-feet. K6-1 is small depression located adjacent to K5-2 and is approximately 40-feet in diameter. In December 1998, approximately 20 drum carcasses and various steel reinforcing material were removed from

K5-2 and K6-1. The drum carcasses were substantially corroded and did not contain any material. There is no historical information concerning the utilization of K5-2 or K6-1 and it is believed they were used as a general trash disposal area. The drums and steel reinforcing materials were removed as an interim remedial measure. Figures 3.4-1 through 3.4-4 of Appendix C illustrate the results of the geophysical investigation conducted at these AOCs.

The results of the geophysical investigation determined the presence of numerous buried ferrous objects. The investigation also identified the presence of a large subsurface ferrous object that could represent a former process vessel or a large mass of ferrous metal.

8.5 M8-1 DISPOSAL AREA

M8-1 (Disposal Area) is located in B-Line Area. M8-1 is approximately 700-feet by 400-feet in areal extent. Figure A-46 of Appendix A presents the location of M8-1. This AOC contains many materials associated with the production and handling of smokeless gunpowder and solid rocket fuel. Several of the materials contained within M8-1 include: smokeless powder press screens, smokeless powder storage bags, rocket motor housings, and drum carcasses. The historical records indicate this disposal area was created to handle the debris resulting from the large 1940 explosion. Since M8-1 is associated with the clean-up operations of a large explosion during World War II and materials associated with the production and handling of smokeless powder and solid rocket fuels are present at the surface it is unsafe to physically penetrate the disposal area and evaluate buried objects. Figures 3.1-1 through 3.1-4 of Appendix C illustrate the results of the geophysical investigation conducted at this AOC.

The results of the geophysical investigation identified a large number of subsurface objects indicative of drums, reinforced concrete, and various other unidentifiable materials. This is consistent with the surface expression of materials placed within this AOC.

8.6 N6-1 DISPOSAL AREA

N6-1 (Disposal Area) is located within the Storage Area and is approximately 650-feet by 450-feet in areal extent. Figure A-82 of Appendix A presents the location of N6-1. This

AOC contains materials consistent with a large scale facility dismantlement activity. Several of the materials identified at the surface of the AOC include steel process vessels, drum carcasses, and large reinforced concrete blocks. The historical records do not indicate what this disposal area was related to, however it is anticipated that it is similar to M8-1. Since it is likely N6-1 is similar to M8-1, it is considered unsafe to physically penetrate the disposal area and evaluate the buried objects. Figures 3.2-1 through 3.2-4 of Appendix C illustrate the results of the geophysical investigation conducted at this AOC.

The results of the geophysical investigation identified a large number of subsurface objects indicative of drums, process tanks, reinforced concrete, and various other unidentifiable materials. This is similar to the materials contained within M8-1.

9.0 CONCLUSIONS AND RECOMMENDATIONS

9.1 CONCLUSIONS

The Soil – SI completed the stated objective of categorizing the more than 1,200 AOCs at the facility into those requiring no further action (NFA) and those requiring further action (FA) based on the criteria presented in the Technical Requirements (N.J.A.C. 7:26E-3.3). In addition to fulfilling the requirements of a site investigation, sufficient information was available, due to the large number of analytical samples collected (approximately 1900), to begin preliminary remedial investigation tasks. The following paragraphs present specific conclusions and recommendations of the Soil – SI:

- The required sample frequencies and analytical suites presented in the Soil – Site Investigation Sampling and Analysis Plan were met for all AOCs present at the facility, except for 20 AOCs that require further sampling. The remaining sampling and analysis constitutes significantly less than 1% of the field activities conducted as part of the Soil – SI. The remaining activities will be conducted as part of the next field effort and be reported to the NJDEP as an addendum to the Soil – SI or as part of the subsequent remedial investigation.

- The data quality objectives established for laboratory analysis of samples collected in the field were met. The evaluation of the laboratory analysis against the USEPA precision, accuracy, representativeness, comparability, and completeness parameters determined that the laboratory data is of known and acceptable quality as qualified. Therefore, the laboratory data generated for the Soil – SI are considered valid and usable for decision-making purposes.

- The evaluation of background concentrations of constituents detected within the manufacturing areas of the facility identified that beryllium, ranging in concentration from 0.64 mg/kg to 2.8 mg/kg represents natural conditions. Therefore, beryllium detected within the manufacturing areas of the facility within this range exceeding the RDCSCC does not warrant additional investigation. The background concentrations of the remaining constituents detected within the manufacturing areas of the facility did not exceed the RDCSCC. Therefore, detected concentrations exceeding the RDCSCC are likely the result of historic facility operations.

- The results of the laboratory analysis identified 5 VOCs, 16 SVOCs, 12 metal constituents, 8 E&E compounds, and total PCBs as having exceeded the NJSCC at least once at the Facility. The analytical groups, constituents, and number of specific NJSCC exceedances site-wide include:

VOCs	Number of IGWSCC Exceedances	Number of RDCSCC Exceedances	Number of NRDCSCC Exceedances
Acrylonitrile	1	1	0
Benzene	5	5	0
Chlorobenzene	1	0	0
Methylene Chloride	6	0	0

PCBs	**Number of IGWSCC Exceedances**	**Number of RDCSCC Exceedances**	**Number of NRDCSCC Exceedances**
Total PCBs	1	17	8

- Based on the frequency of RDCSCC exceedance, 13 Frequent Exceedance Constituents (FECs) were identified. The FECs are comprised of 6 SVOCs, 4 metal constituents, 2 E&E compounds, and total PCBs. The primary FECs consisted of DNT (DNT-SVOC method SW-846-8270, and DNT-E&E method SW-846-8330), benzo(a)anthracene (SVOC), benzo(a)pyrene (SVOC), and benzo(b)fluoranthene (SVOC), and 2 metal constituents (Arsenic and Lead). The occurrence and spatial distribution of FECs indicates they are primarily associated with the former manufacturing/laboratory structures and the historic use of fly ash. To a lesser extent the FECs are related to discharge points/remnant activity areas. Arsenic is primarily associated with the historic use of herbicides. The PAH FECs are related to the fly ash that was used to improve the grade of the facility, supporting the expansion of manufacturing activities.

- The following embedded table presents the results of the AOC categorization process into AOCs requesting NFA and AOCs requiring FA:

Operational Area	Total Number of AOCs	Total Number of AOCs Requesting NFA	Percentage of AOCs Requesting NFA per Operational Area	Total Number of AOCs Requiring FA	Percentage of AOCs Requiring FA per Operational Area
TNT	61	13	21%	48	79%
DYNAMITE	108	53	49%	55	51%
NG	118	58	49%	60	51%

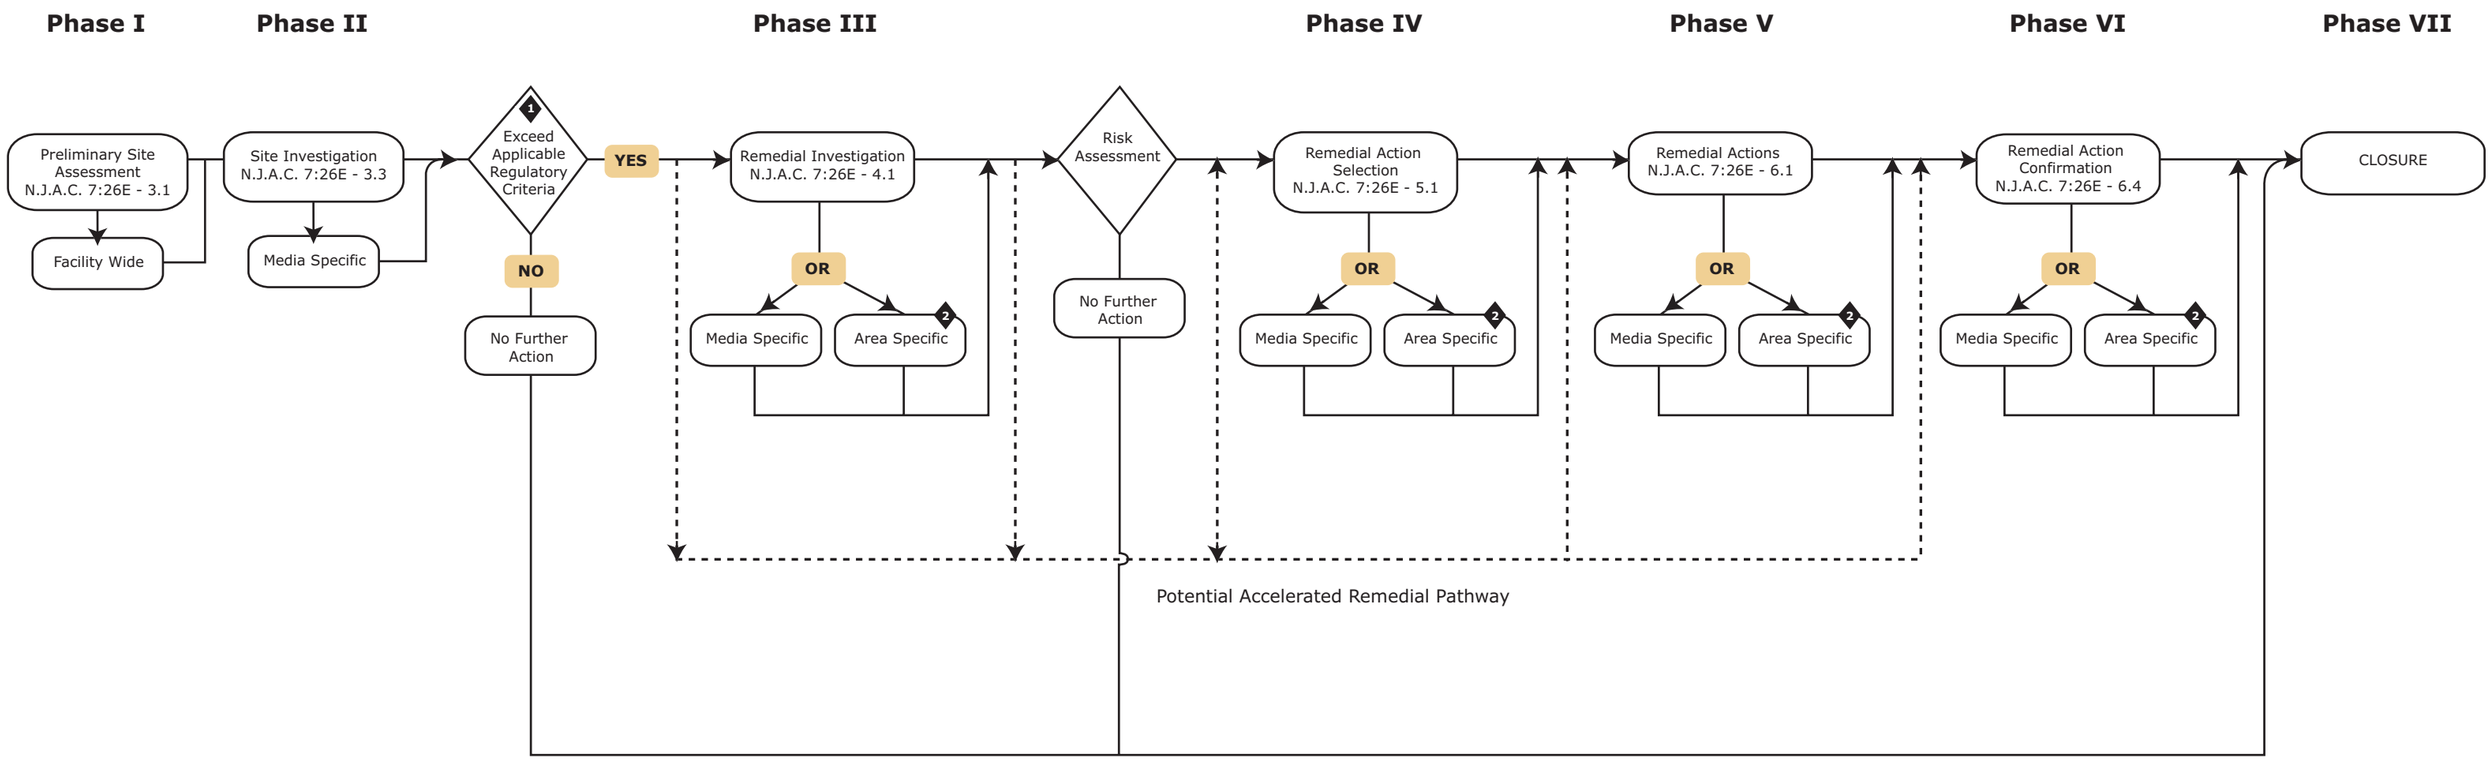
- The geophysical investigation provided the information necessary to safely and successfully conduct future remedial investigation activities at AOCs B13-2, G9-4, K5-1, K5-2, K6-1, M8-1, and N6-1.

9.2 RECOMMENDATIONS

- Conduct the remaining Soil – SI field-sampling activities as part of the next field effort expected to begin in second or third quarter 2005. The results will be reported to the NJDEP as an addendum to the Soil – SI or as part of the subsequent remedial investigation.

- Utilize the information collected as part of the Soil – SI to focus the groundwater, surface water, and sediment site investigations. Following the groundwater, surface water, and sediment site investigations, perform a Baseline Ecological Evaluation as specified in N.J.A.C 7:26E-3.11. Hercules plans to petition the NJDEP as part of the Baseline Ecological Evaluation Work Plan to combine areas where closely located AOCs have been identified to contain similar exceedances of the NJSCC, thus focusing the ecological evaluation on a site-wide or area basis instead of an AOC-specific basis.

- Utilize the FEC posting maps to group AOCs in similarly contaminated areas for remedial investigation efforts. The remedial investigation, when appropriate, should focus on contaminated areas rather than individual AOCs.



- Evaluate the likely potential that the fly ash used to support facility expansion meets the NJDEP definition of historic fill and if it is subject to the applicable historic fill regulations.

- Generate site-specific clean-up standards for the facility utilizing the information collected (i.e. grain-size and total organic carbon) during the Soil – SI. Generic clean-up standards are based on generalized assumptions regarding soil chemistry, physical parameters, and exposure scenarios. Sufficient data have been collected to support the development of site-specific clean-up standards based on the known facility conditions and probable future exposure scenarios. Additionally, there are currently no generic clean-up standards for NC, PETN, and Diazo.

- Identify and evaluate the use of innovative technologies that may prove effective in remediating site constituents. In particular, innovative technologies have proven very effective for the remediation of E&E compounds at other E&E manufacturing facilities.

9.3 ITEMS FOR FURTHER CONSIDERATION

- Potentially using a declaration of environmental restriction on the facility to allow either limited restricted or restricted redevelopment. Limiting future redevelopment of the facility will allow delineation and remediation of constituents to the appropriate restricted use standards as defined by N.J.A.C. 7:26E-4.1(b).

SOURCE:

1. SITE RECONNAISSANCE AND GPS SURVEY CONDUCTED BY MONTGOMERY WATSON FROM MARCH TO JUNE 1998. SURVEY CONTROL PROVIDED BY PAUL J. EMILIUS JR., GEOD CORPORATION, N.J. LICENSE NO. 37186.

2. PLANIMETRIC MAP PREPARED BY ATLANTIS AERIAL SURVEY COMPANY, INC. FROM PHOTOGRAPHY DATED 3/18/95. GROUND CONTROL PROVIDED BY EDWARD F. SECCO P.L.S. N.J. LICENSE NO. 18607.

3. TOPOGRAPHIC FILE PREPARED BY ATLANTIS AERIAL SURVEY COMPANY, INC. FROM PHOTOGRAPHY DATED 3/25/98.

4. KENVIL WORKS FACILITY SITE HISTORICAL MAPS PROVIDED BY HERCULES INC.

NOTES:

1. THESE FILES ARE IN THE NORTH AMERICAN DATUM 1983 NEW JERSEY STATE PLANE COORDINATE SYSTEM. THE TOPOGRAPHIC FILE REFERENCES THE NORTH AMERICAN VERTICAL DATUM 1988.

2. THE BOUNDARY LINE AS DELINEATED IS APPROXIMATE AND HAS BEEN DIGITIZED FROM A MAP ENTITLED "HERCULES INCORPORATED, KENVIL PLANT PROPERTY MAP, PLANT 080, ACCOUNT 9500, CLASSIFICATION 21045, FILE CODE SWE REVISION 1" REVISED TO JUNE 11, 1970 PROVIDED BY REPRESENTATIVES OF HERCULES, INC., AND THE TAX MAP OF THE TOWNSHIP OF ROXBURY AND NOT FROM AN ACTUAL FIELD SURVEY OR WITH THE BENEFIT OF A TITLE SEARCH.

3. MISCELLANEOUS REMNANT ACTIVITY AREAS INCLUDE: DEBRIS AREAS, THERMAL OR TESTING AREAS, LANDFILLS, COAL PILES, SPRAY FIELDS, FIRING RANGES, DRUM AREAS, EARTHEN PITS, DISCHARGE AREAS, ROCK QUARRIES, BACKFILL AREAS, AND SUPPORT AREAS.

4. DASHED TOPOGRAPHIC CONTOURS INDICATE AREAS WHERE THE GROUND IS OBSCURED BY DENSE TREES OR SHADOWS. THESE AREAS MAY NOT CONFORM TO ACCURACY STANDARDS.

SOURCE:

1. SITE RECONNAISSANCE AND GPS SURVEY CONDUCTED BY MONTGOMERY WATSON FROM MARCH TO JUNE 1998. SURVEY CONTROL PROVIDED BY PAUL J. EMILIUS JR., GEOD CORPORATION, N.J. LICENSE NO. 37186.

2. PLANIMETRIC MAP PREPARED BY ATLANTIS AERIAL SURVEY COMPANY, INC. FROM PHOTOGRAPHY DATED 3/19/95. GROUND CONTROL PROVIDED BY EDWARD F. SECCO P.L.S. N.J. LICENSE NO. 18607.

3. TOPOGRAPHIC FILE PREPARED BY ATLANTIS AERIAL SURVEY COMPANY, INC. FROM PHOTOGRAPHY DATED 3/25/98.

4. KENVIL WORKS FACILITY SITE HISTORICAL MAPS PROVIDED BY HERCULES INC.

NOTES:

1. THESE FILES ARE IN THE NORTH AMERICAN DATUM 1983 NEW JERSEY STATE PLANE COORDINATE SYSTEM. THE TOPOGRAPHIC FILE REFERENCES THE NORTH AMERICAN VERTICAL DATUM 1988.

2. THE BOUNDARY LINE AS DELINEATED IS APPROXIMATE AND HAS BEEN DIGITIZED FROM A MAP ENTITLED "HERCULES INCORPORATED, KENVIL PLANT PROPERTY MAP, PLANT 080, ACCOUNT 9500, CLASSIFICATION 21045, FILE CODE 5WE REVISION 1" REVISED TO JUNE 11, 1970 PROVIDED BY REPRESENTATIVES OF HERCULES, INC., AND THE TAX MAP OF THE TOWNSHIP OF ROXBURY AND NOT FROM AN ACTUAL FIELD SURVEY OR WITH THE BENEFIT OF A TITLE SEARCH.

3. MISCELLANEOUS REMNANT ACTIVITY AREAS INCLUDE: DEBRIS AREAS, THERMAL OR TESTING AREAS, LANDFILLS, COAL PILES, SPRAY FIELDS, FIRING RANGES, DRUM AREAS, EARTHEN PITS, DISCHARGE AREAS, ROCK QUARRIES, BACKFILL AREAS, AND SUPPORT AREAS.

4. DASHED TOPOGRAPHIC CONTOURS INDICATE AREAS WHERE THE GROUND IS OBSCURED BY DENSE TREES OR SHADOWS. THESE AREAS MAY NOT CONFORM TO ACCURACY STANDARDS.

5. THE SAMPLES WERE VALIDATED IN ACCORDANCE WITH THE NATIONAL FUNCTIONAL GUIDELINES FOR INORGANIC DATA REVIEW (USEPA 1994), THE NATIONAL FUNCTIONAL GUIDELINES FOR ORGANIC DATA REVIEW (USEPA 1999) AND EXPLOSIVES RESIDUE STANDARD OPERATIONING PROCEDURE (USEPA REGION II 1994) AS APPLICABLE TO SW-846 ANALYSES.

Appendix B
Data Validation Report

This text is a summary of items that required qualification as a result of data validation of the Kenvil data. The following acronyms are used in the text:

CCAL - continuing calibration
LCS - laboratory control sample
%D - percent difference
'U' - undetected qualification
'J' - estimated concentration
'R' - rejected qualification
MS - matrix spike
MSD - matrix spike duplicate
'UJ' - undetected at an estimated concentration
SDG - sample delivery group
PCB - polychlorinated biphenyl
TPH - total petroleum hydrocarbon
%R - percent recovery

SDG 9910038

Volatiles – NA

Semivolatiles – Spiked sample SB-013-8603-02(0-2) was qualified as estimated for 1,2,4-trichlorobenzene, pyrene and acenaphthene due to low spike recovery of these compounds. The LCS associated with this SDG was acceptable.

Pesticides/PCBs – The continuing calibration was low for AR1260, the field blank (FB-03) was qualified as estimated for AR1260.

Explosives/ Nitroglycerine – NA

TPH/TOC/NC – No qualification of the data.

Metals – Antimony was qualified as undetected, 'U' due to blank contamination in the following samples: SB-013-8603-02(0-2), SB-N13-1-03(0.8), SB-N13-4-042(0-1), SB-013-4-02(0-2), SB-013-8604-01(0-1.5), and SB-013-8577-02(0-2).

Other Comments – None.

SDG 9910009

Volatiles – All compounds in samples SB-E15-8560-01(0.5), SB-E15-8560-11(0.5), SB-E15-8560-08(0.5), and SB-E15-8560-13(0.5) were qualified as estimated, due to low surrogate recovery. Sample SB-E15-8560-06(0.5) was qualified as estimated for 1,1-dichloroethene for LCS recovery. Also, the LCS recoveries were outside limits for vinyl chloride, 1,1,1-trichloroethane and carbon tetrachloride, which led to estimated

qualification of associated samples for these compounds. The calibration %D were outside limits for chloromethane, bromomethane and methylene chloride which led to estimated qualification of all compounds for soils analyzed with the unacceptable calibration. Methylene chloride contamination in the method blanks led to 'U' qualification of this compound in all samples in the SDG.

Semivolatiles – Sample FB-01 was extracted outside holding time and was therefore qualified as estimated for all compounds. Also, n-nitroso-di-n-propylamine was qualified as estimated for all soil samples in the SDG due to low LCS recovery.

Pesticides/PCBs – Sample SB-UD-34(0-1.5)dup was qualified as estimated for all pesticides, due to spike recovery and holding times. Samples SB-UD-34(0-1.5) and SB-UD-34(0-1.5)dup were qualified as estimated for endrin aldehyde and methoxychlor, due to continuing calibration criteria.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC – Samples SB-UD-34(0-1.5) and SB-UD-34(0-1.5)dup were qualified as estimated for TPH and NC due to low MS and LCS recoveries.

Metals – Samples SB-UD-34(0-1.5) and SB-UD-34(0-1.5)dup were qualified as estimated for antimony due to low MS recovery.

Other Comments – none

SDG 9910021

Volatiles – All compounds for samples SB-E15-8560-14(0.5), SB-E15-1-15(0.8), and SB-E15-8560-17(0.5) were qualified as estimated due to the internal standard criteria exceedence. All soils in the SDG were qualified as estimated for chloromethane due to calibration criteria exceedence. Methylene chloride was qualified as 'U' in all soil samples due to method blank contamination.

Semivolatiles – No data qualification.

Pesticides/PCBs – Endrin aldehyde and methoxychlor were below the control limits in the continuing calibration, resulting in estimated qualification of all soil samples for these two compounds.

Explosives/ Nitroglycerine – No data qualification.

TPH/TOC/NC - The LCS recovery for TPH and NC were low, resulting in estimated qualification of the soil samples. Also, the MS recovery was low for NC. Data were already qualified due to the LCS, no further qualification was applied.

Metals – Low antimony recovery in the matrix spike resulted in estimated qualification of antimony in all soil samples. Antimony in the method blank resulted in 'U' qualification of antimony in samples SB-013-1-17(0-2), SB-UD-33(0-2) and SB-013-2-18(0-2).

Other Comments – Field blank sample FB-02 contained chromium (1.9 ug/L) and copper (4.9 ug/L). Field duplicate pair SB-UD-33(0-2)/dup results were acceptable with the exception of bis-2-ethylhexyl phthalate. Data was not qualified based on field precision.

SDG 9910059

Volatiles – Vinyl chloride was qualified as estimated for field blank sample FB-05 due to the LCS recovery. Methylene chloride was qualified as estimated due to the initial calibration results, and chloroethane was qualified as estimated for sample FB-05. Due to the method blank, sample FB-05 was qualified 'U' for methylene chloride.

Semivolatiles – Field blank sample FB-05, and all soils in the SDG were qualified as estimated for 2,4-dinitrophenol due to the initial calibration result of this compound. Hexachlorocyclopentadiene was qualified as estimated for field blank FB-05 due to the continuing calibration recovery.

Pesticides/PCBs –NA

Explosives/ Nitroglycerine – NA

TPH/TOC/NC – The field duplicate precision was high for the TOC analysis of field pair SB-H13-3-19(0.8)/dup. Data was not qualified based on field duplicate results.

Metals – Antimony was qualified as estimated for all soil samples in the SDG due to low MS and LCS recovery. All soils were qualified with a 'J' or 'UJ' for lead due to the laboratory duplicate sample precision results. Field blank sample FB-05 was qualified as undetected for zinc for associated blank contamination. The field blank was used to qualify 'U' the following field soils, where the concentrations of the field samples were less than five times the field blank result: silver in sample SB-H14-3-03(0-1) and copper for samples SB-G14-1-02(0-2), SB-H13-3-19(0-0.8), SB-H14-3-03(0-1), SB-G14-2-05(0-1), SB-H13-3-19(0.8)dup, SB-J14-2-03(0-1.8) and SB-H13-2-03(0-0.8).

Other Comments – none.

SDG 9910062

Volatiles – All samples were qualified for methylene chloride with a 'U' due to blank contamination. All compounds were qualified as estimated for sample SB-E15-8560-24(6) due to low surrogate recovery. Methylene chloride in sample FB-04 was qualified as estimated due to the initial calibration results. The laboratory provided a reintegrated

calibration for chloromethane. The compound exceeded the percent difference, which resulted in the estimated qualification of chloromethane for SB-D16-1-01(6).

Semivolatiles – The reporting limits for samples SB-D16-1-02(0-0.8) and SB-D16-1-02(0-0.8)dup were reported ten times higher because the samples could not be fully extracted. Sample SB-E15-8560-18(0-2) was qualified as estimated for acenaphthene due to low MS recovery. Sample SB-D16-2-01(0-0.8) was qualified as estimated for indeno(1,2,3-cd)pyrene and benzo(g,h,i)perylene due to the continuing calibration criteria. Samples SB-E15-8560-21(0-1.5), SB-E15-8560-22(0-2), SB-E15-8560-22(0-2)DUP, SB-E15-8560-23(0-1.5), SB-E15-8560-24(0-1.5), SB-E15-8560-25(0-1.2), SB-E15-8560-27(0-1.4), SB-D16-1-02(0-0.8), SB-D16-2-01(0-0.8) and SB-D16-3-05(0-2) were qualified as estimated for hexachlorobenzene, 4,6-dinitro-2-methylphenol and indeno(1,2,3-cd)pyrene due to the CCAL recovery of these compound.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – NA

TPH/TOC/NC – no data qualification.

Metals – Cadmium in samples SB-D16-2-01(0-0.8) and SB-D16-2-01(0-0.8)dup was qualified as undetected due to blank contamination. Antimony in all soil samples was qualified as estimated due to low MS and LCS recovery. The lead precision criteria was not met for the laboratory duplicate, resulting in estimated qualification of lead for all soil samples.

Other Comments – Field blank sample FB-04 contained chromium at 0.81 ug/L and copper at 2.4 ug/L.

SDG 9910070

Volatiles – The initial calibration criteria for chloromethane and methylene chloride were not met, therefore, both samples in the SDG were qualified as estimated for these compounds. Methylene chloride was qualified as 'U' for both samples in the SDG due to associated blank contamination.

Semivolatiles – Compounds associated with internal standards that were outside the control limits were qualified as estimated if above the reporting limit, this included samples SB-E16-8561-03(0-0.8), SB-E16-8561-03(0-0.8)dup and SB-M11-8606-03(0-1).

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – NA

TPH/TOC/NC - No qualification of data.

Metals – Samples SB-Q06-1-0(0-2) and SB-M11-1-02(0-0.5) were qualified as 'U' for cadmium due to blank contamination. All antimony results were qualified as estimated due to low LCS and MS recoveries. Laboratory duplicate precision was not met for lead, thus, all lead results were qualified as estimated. Serial dilution results were outside control limits for zinc; all zinc results were qualified as estimated.

Other Comments – Field duplicate results for mercury were outside precision limits. Data were not qualified based on duplicate data.

SDG 9910099/9910086

Volatiles – Vinyl chloride was qualified as estimated for sample FB-05 due to the low LCS recovery. Chloromethane, bromomethane and methylene chloride were qualified as estimated in all soil samples due to the initial calibration results of these compounds. Methylene chloride was qualified as 'U' for all samples due to blank contamination.

Semivolatiles – All compounds for sample SB-C10-440-02(0-2) were qualified as estimated due to surrogate recovery. The internal standards for sample SB-B13-8-04(0-2) were outside control limits, resulting in estimated qualification of compounds associated with the internal standards. The 2,4-dinitrophenol was qualified as estimated in sample SB-C10-440-02(0-2) as a result of the initial calibration for this compound.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Several samples were qualified as estimated for 2-amino-4,6-dinitrotoluene due to a high LCS recovery for this compound. Several detected compounds were also qualified as estimated in several samples because of a high %D on the two columns used to quantify and confirm the detection of the explosive compounds.

TPH/TOC/NC – Low MS recovery resulted in estimated qualification of nitrocellulose for sample SB-B13-682-04(0-1.33).

Metals – Copper was qualified 'U' in field blank sample FB-05 due to blank contamination. Antimony was qualified as estimated in sample SB-B13-724-05(0-2)dup due to low recovery of the analyte in the MS. The LCS for antimony was acceptable.

Other Comments – Precision in field duplicate pair SB-B13-757-04(0-2) was not met for arsenic, beryllium, lead and selenium. Data were not qualified based on field duplicate results.

SDG 9910125

Volatiles – NA

Semivolatiles – N-nitroso-di-n-proplylamine and 1,4-dichlorobenzene were qualified as estimated for sample SB-A13-1-01(0-2) due to low MS recovery. Compounds associated

with unacceptable internal standard results were qualified as estimated for sample SB-B11-513-02(0-2).

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – All compounds were qualified as estimated for sample SB-A12-8-05(0-2) due to the surrogate recovery. Samples SB-A12-7-03(0-1), SB-A12-7-03(0-1), SB-A13-1-01(0-2), SB-B12-237-01(0-1.5), and SB-B11-513-05(0-1) were qualified as estimated for 2-amino-4,6-dinitrotoluene due to the LCS. There were several compounds in several samples that were qualified as estimated due to the percent difference for detected results between the two analytical columns being exceeded. All samples in the SDG were qualified as estimated for 2,4,6-trinitrotoluene due to low MS and MSD recoveries.

TPH/TOC/NC - Sample SB-A13-1-01(0-2) was qualified as estimated for nitrocellulose for low MS and MSD recoveries.

Metals – All samples in the SDG were qualified as estimated for antimony for low MS recovery. All samples were qualified as estimated for lead because of laboratory duplicate precision.

Other Comments – none.

SDG 9910157

Volatiles – NA

Semivolatiles – Internal standard recoveries were below limits for samples SB-F12-8206-03(0-1) and SB-C12-274-05(0-1) which resulted in estimated qualification of associated compounds which are quantified from the unacceptable internal standards.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-C12-274-05(0-1) was qualified as estimated for 2,4-dinitrotoluene due to the percent difference between the primary and secondary column greater than 25%.

TPH/TOC/NC – No qualification.

Metals – Antimony in sample SB-F12-8206-03(0-1) was qualified as ‘U’ due to blank contamination. Antimony was also qualified as estimated in all soil samples in the SDG for low MS recovery and low LCS recovery.

Other Comments – Field blank FB-10 had copper (2.6 ug/L), lead (1.5 ug/L) and selenium (2.7 ug/L). Field data were not qualified based on field blank results because the field sample concentrations were above five times the field blank concentrations.

SDG 9910174

Volatiles – NA

Semivolatiles – The surrogate criteria was exceeded for sample SB-D12-2073-03(0-2) for the original analysis. The laboratory re-extracted and analyzed the sample outside of the holding time. In the LIMS report, the original sample results are provided. All compounds for the sample were qualified as estimated due to surrogate recovery. Internal standards were outside control criteria for samples SB-D12-289-03(0-1.25), SB-D12-289-03(0-1.25)DL, and SB-D12-2073-03(0-2). Compound associated with the unacceptable internal standards were qualified as estimated. The initial calibration for 2,4-dinitrophenol for the aqueous matrix was exceeded, resulting in 'UJ' qualification of the compound for FB-11.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Several detected results for samples SB-D14-667-03(0-2), SB-D14-667-03(0-2)DUP and SB-D12-289-03(0-1.25) were qualified as estimated since the percent difference between the primary column result and the secondary column result was greater than 25%. The result form for sample SB-D14-667-03(0-2)DUP was incorrect. The laboratory was contacted and a revised form was submitted with revisions for 2,4,6-TNT, 2-amino-4,6-DNT and 4-amino-2,6-DNT.

TPH/TOC/NC – No qualification of data.

Metals – Cadmium for sample SB-D12-208D-03(0-2) was qualified as undetected due to blank contamination. All soil samples were qualified as estimated for mercury due to the laboratory duplicate precision results.

Other Comments – Field blank FB-11 contained copper at 1.9 ug/L. Field duplicate precision for pair SB-D14-667-03(0-2)/DUP was not met for copper and lead. Field samples were not qualified based on duplicate results.

SDG 9910100/9910109

Volatiles – NA

Semivolatiles – One internal standard for sample SB-B13-2-01(0-3) had a low recovery. Compounds in this sample that was associated with the internal standard were qualified as estimated.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – The laboratory control sample result for 2-amino-4-6-dinitrotoluene was below the control limit which resulted in estimated qualification of

this compound for samples SB-B10-503-06(0-2), SB-B10-656-02(0-1.5), and SB-B13-2-01(0-3). There were a few soil samples in which the detected results from the primary and secondary column differed in concentration by greater than 25%. These compounds were qualified as estimated. One sample, SB-B13-2-01(0-3) was qualified as rejected for 4-amino-2,6-dinitrotoluene due to the percent difference exceeding 90%. All soils in the SDG were qualified as estimated due to zero recovery of 2-amino-4,6-dinitrotoluene.

TPH/TOC/NC – No data qualification.

Metals – No data qualification.

Other Comments – Field blank FB-06 contained chromium (1.1 ug/L), copper (2.5 ug/L) and lead (6.6 ug/L).

SDG 9910128

Volatiles – Trip blank TB-03 was not written on the chain of custody documentation but was requested for analysis for VOCs per the MW project manager. Dibromochloromethane, 1,1,1-trichloroethane were qualified as estimated in samples FB-07 and TB-03 due to the LCS results. Chloromethane was qualified as estimated in all soil samples due to the initial calibration results. All samples in the SDG were qualified as undetected for methylene chloride due to the blank.

Semivolatiles – Methylene chloride in sample FB-07 was qualified as 'U' due to blank contamination. Sample FB-07 was re-extracted outside the holding time. The laboratory provided the original analysis in the LIMS report. Acenaphthene in sample SB-B10-20-01(0-1) was reported as BQL whereas the raw data indicated the result is 43 J ug/Kg. The laboratory was contacted and a new results form was submitted by the laboratory. The laboratory noted that the EDD for this result was correct. Sample SB-B9-02-05(0-2) was qualified as estimated for n-nitrosodimethylamine, phenol, isophorone, 1,2-diphenylhydrazine, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,i)perylene due to the continuing calibration for this sample exceeding the acceptance criteria.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Several compounds for samples SB-B12-450-03(0-2) and Sb-B11-663-04(0-1) were qualified as estimated due to a percent difference between the primary and secondary column being greater than 25%. Also, 4-amino-2,6-dinitrotoluene and 2,4-dinitrotoluene for sample SB-B11-663-04(0-1) were qualified as estimated due to MS recovery.

TPH/TOC/NC - No data qualification.

Metals – Field blank FB-07 was not written on the chain of custody documentation but was requested for analysis for metals per the MW project manager. Antimony was

qualified as 'U' in samples SB-A13-4-01(0-1), SB-B10-3-03(0-2) and SB-B10-4-01(0-2) due to blank contamination. Antimony was also qualified as estimated in all samples in the SDG due to low matrix spike and LCS recoveries. All mercury results for soil samples were qualified as estimated due to the laboratory duplicate results.

Other Comments – Field blank FB-07 also contained copper at 2.6 ug/L. Field duplicate precision was met for pair SB-B10-20-01(0-1) with the exception of nickel and lead. Field samples are not qualified based on field duplicate results.

SDG 9910187

Volatiles – NA

Semivolatiles – Results for sample SB-E12-2860-05(0-2) were corrected and resubmitted by the laboratory. The results were originally submitted as BQL for several compounds on page 2 of the result form, whereas, there were several compounds detected. The laboratory project manager noted that he would resubmit the EDD for this sample. Also, the sample ID was incorrect for sample SB-E12-286D-05(0-2), which was originally submitted as E13 on the raw data form

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – No data qualification.

TPH/TOC/NC – No data qualification.

Metals – Antimony in samples SB-E13-325-02(0-2) and SB-E11-12-04(0-2) were qualified as undetected due to blank contamination. Antimony MS and LCS recoveries were very low, therefore, antimony was qualified as estimated for all samples in the SDG.

Other Comments – Field blank sample FB-12 contained zinc at 8.1 ug/L. Associated field data were not qualified for zinc since the levels contained in the field samples was significantly higher than in the field blank.

SDG 9911012

Volatiles – NA

Semivolatiles – Sample SB-F12-2075-05(0-2) was qualified as estimated for pyrene since the MS recovery for pyrene was above the control limits. The sample ID for SB-F12-2075-05(0-2) was reported as SB-F12-2075-03(0-2) on the Form I. The LIMS form was correct. The laboratory provided corrected Form Is for this sample. The laboratory noted that the EDD did not need to be corrected since the LIMS form was correctly reported. Benzidine was slightly high for the CCAL which resulted in 'UJ' qualification of benzidine for samples SB-F12-2075-05(0-2), SB-F12-2075-03(0-0.5), SB-

D11-B232-07(0-2), SB-C13-2-14(0-2) and SB-C13-2-10(0-2).

Pesticides/PCBs – AR1260 was qualified as estimated for all soil samples because of the continuing calibration criteria.

Explosives/ Nitroglycerine – No data qualification.

TPH/TOC/NC – Samples SB-C13-2-10(0-2) and SB-C13-2-14(0-2) were qualified as estimated for nitrocellulose due to the holding time exceeding 28 days.

Metals – Samples SB-C13-2-10(0-2) and SB-F12-2075-03(0-0.5) were qualified as 'U' for selenium and samples SB-F12-2075-03(0-0.5) and SB-D11-B232-07(0-2) were qualified as 'U' for cadmium due to blank contamination. All soil samples in the SDG were qualified as estimated for antimony due to MS recovery. All soil samples were qualified as estimated for nickel due to the laboratory duplicate precision exceedance.

Other Comments – Field blank FB-16 contained nitrocellulose (0.172 mg/L) and copper (3.3 ug/L).

SDG 9910197

Volatiles – NA

Semivolatiles – Sample SB-D12-282A-05(0-2) was qualified as estimated for 1,2,4-trichlorobenzene, 4-chloro-3-methylnaphthalene, acenaphthene, 2,4-dinitrotoluene and pyrene.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-D12-282A-05(0-2) was qualified as rejected 'R' for 1,3-dinitrobenzene due to the percent difference between the primary and secondary columns being greater than 90%. Also, sample SB-D12-282A-05(0-2) was qualified as estimated for 2,4-dinitrobenzene for a percent difference greater than 25% but less than 90%.

TPH/TOC/NC – No data qualification.

Metals – Cadmium was qualified a undetected in samples SB-D12-1-02(0-2), SB-E14-668-03(0-2), SB-D12-282A-05(0-2), SB-D11-7-01(0-2), and SB-D12-1-02(0-2)DUP because of method blank contamination. Sample FB-14 was qualified as 'U' for copper and silver. Antimony, arsenic, copper and zinc were qualified as estimated for sample SB-D12-282A-05(0-2) due to low matrix spike recovery. All soil samples were qualified as estimated for arsenic and lead due to the laboratory duplicate precision.

Other Comments – Field blank FB-14 contained zinc (15.3 ug/L). The precision for field duplicate pair SB-D12-1-02(0-2)/DUP was not met for arsenic, lead and selenium.

SDG 9911032

Volatiles – NA

Semivolatiles – Phenol, 2-chlorophenol, n-nitroso-di-n-propylamine, 4-chloro-3-methylphenol, 2,4-dinitrotoluene, acenaphthene and 4-nitrophenol were qualified as estimated for sample SB-E10-2-03(0-2). Detected results for samples SB-F12-R1-01(0-2)RE, SB-E11-2064-01(0-2), SB-E11-2064-01(0-2)DUP were qualified as estimated due to internal standard recovery. Sample 9911032-02A (SB-F12-2221-05(0-1) reported acenaphthylene as BQL but the raw data indicates this sample was detected at 110 J ug/Kg. This correction was made manually by the data validator with a note on the result form for the MW data entry personnel. This data package has already been revised once by the laboratory and this item was not included in the original revision.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Samples SB-F12-2221-06(0-2), SB-E11-2064-05(0-2), SB-E11-2064(0-2)DUP, and SB-E11-R12-03(0-2) were qualified as estimated for all compounds due to the surrogate recoveries. The re-extracted results were also considered estimated for all results the above samples since the holding times were exceeded for the re-extraction. Only the original results were reported on the LIMS forms. Sample SB-E11-2064-05(0-2) was qualified as estimated for LCS recovery. Sample SB-E13-2040-07(0-2) was qualified as estimated for HMX, and sample SB-E11-2064-01(0-2) was qualified as estimated for 2,4,6-trinitrotoluene and nitrobenzene due to the percent difference between the primary and secondary columns exceeding 25%. Sample 9911032-17 was originally reported as 5000 ug/Kg for NG. This value was corrected and resubmitted by the laboratory as 6000 ug/Kg. Since the result was resubmitted as a LIMs form, the EDD should also reflect this change.

TPH/TOC/NC - No data qualification.

Metals – Cadmium for samples SB-F12-2221-04(0-2), SB-E13-2040-07(0-2), SB-E13-2040-04(0-2), SB-E11-2064-01(0-2), SB-E11-2064-01(0-2)DUP, SB-E10-2-03(0-2), SB-E12-9317-04(0-2), SB-E11-R2-03(0-2) were qualified as undetected due to blank contamination. Copper was qualified as 'U' for field blank sample FB-15 due to the preparation blank also containing copper. All soil samples in the SDG were qualified as estimated for antimony due to low matrix spike recovery. All soil samples were qualified as estimated for zinc due to the serial dilution results.

Other Comments – Di-n-butylphthalate, fluoranthene, pyrene, arsenic, copper, lead and zinc precision criteria were not met for field pair SB-E11-2064-01(0-2)/DUP. Field data were not qualified as a result of field duplicate precision.

SDG 9909149/150

Volatiles – NA

Semivolatiles – No data qualification.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-E11-2-03(0-1.5) was originally analyzed and reported as BQL for nitroglycerin. The reanalysis of this sample was 22,714. The LIMS form reported BQL. The laboratory was contacted and resubmitted the LIMS form for this sample with the NG being reported as 22,714.3 ug/Kg. Sample SB-E11-2-03(0-1.5) was qualified as estimated for explosive compounds due to low surrogate recovery and missed holding time for the re-extraction of the sample. Sample SB-C12-275-02(0-2) was qualified as estimated for 2,4-dinitrotoluene due to an elevated surrogate recovery. Sample SB-C12-275-02(0-2) was qualified as estimated for 2,4,6-dinitrotoluene, 4-amino-2,6-dinitrotoluene, 2-amino-4,6-dinitrotoluene and 2,4-dinitrotoluene, and sample SB-C12-275-02(0-2)DUP was qualified as estimated for 2,4-dinitrotoluene due to the percent difference between the primary and secondary column exceeding the requirements.

TPH/TOC/NC - No qualification of data.

Metals – Several samples were qualified as 'U' for cadmium and selenium due to blank contamination. Antimony was qualified as 'U for all samples in the SDG due to the LCS and matrix spike recoveries. The laboratory precision criteria were not met, which resulted in estimated qualification of lead for all samples in the SDG.

Other Comments – Field duplicate precision was not met for chromium for pair SB-E11-8228-02(0-2)/DUP, zinc and lead for pair SB-C12-275-02(0-2)/DUP. Field blank FB-09 contained chromium (1.1 ug/L), copper (3.2 ug/L). Field blank FB-08 contained silver (1.0 ug/L), copper (2.5 ug/L) and lead (1.7 ug/L). Data were not qualified based on field duplicate or field blank results. The field blank concentrations were not sufficiently elevated to use to qualify data.

SDG 9911044

Volatiles – NA

Semivolatiles – Sample SB-C13-1-17(0-2)MS/MSD was qualified as estimated for 1,4-dichlorobenzene, 1,2,4-trichlorobenzene, 4-chloro-3-methylphenol, acenaphthene, 2,4-dinitrotoluene, and pyrene.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Samples SB-D13-264B-03(0-2) and SB-B13-262A-05(0-2) were qualified as estimated for 2,4-dinitrotoluene due to high LCS recovery of this compound and for the percent difference between the primary and secondary columns

being greater than 25%. The reporting limits for sample SB-F13-8209-03(0-1)DUP were originally reported as 250/500, the correct values are 200/400. The laboratory was contacted and the LIMS form was revised and resubmitted.

TPH/TOC/NC – Sample SB-C13-1-17(0-2) and the MS/MSD fraction were both reported. Since both samples were analyzed, they are a field duplicate pair. The precision comparison for the NC analysis exceeds the control criteria. These samples were qualified for NC due to low matrix spike and LCS recoveries.

Metals – Cadmium and silver for several samples were qualified as 'U' due to blank contamination. Antimony for all soil samples in the SDG were qualified as estimated due to the low MS and LCS recoveries. Selenium was qualified in samples SB-C13-1-17(0-2) and SB-C13-1-17(0-2)MS/MSD for matrix spike recovery.

Other Comments – For this SDG, both the original sample, SB-C13-1-17(0-2) and the spike SB-C13-1-17(0-2)MS/MSD were reported for metals, TOC and explosives. Only the MSD sample was reported on the LIMS forms for the SVOC analysis. Field blank FB-19 contained chromium (25.7 ug/L) and copper (2.4 ug/L).

SDG 9911037

Volatiles – NA

Semivolatiles –

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-C13-282B-03(0-2) was qualified as estimated for 2,4-dinitrotoluene, and sample FB-18 was qualified as estimated for 2,4,6-trinitrotoluene due to the percent difference between the two analytical columns exceeding the Region II criteria.

TPH/TOC/NC – No data qualification.

Metals – Several samples were qualified as 'U' for antimony and cadmium as a results of blank contamination. Sample FB-18 was qualified as 'U' for silver due to the associated blank containing silver. Antimony was qualified as estimated for several samples due to the matrix spike recovery and slightly low LCS recovery. Arsenic in sample SB-F13-1-01(0-2) was qualified as estimated due to the elevated matrix spike recovery of this analyte.

Other Comments – Field blank FB-18 contained copper at 2.0 ug/L. **Nitroso-di-methylamine was not analyzed or reported for sample FB-18 as noted in the laboratory narrative.**

SDG 9911066

Volatiles – NA

Semivolatiles – Pyrene for samples SB-D13-265A-06(0-2), SB-D13-264A-05(0-2), SB-C13-133-05(0-2), SB-D12-209B-06(0-2) was qualified as estimated due to the LCS recovery. Sample FB-21 was qualified as estimated for 3,3'-dichlorobenzidine, di-n-octylphthalate, and benzidine, due to the CCAL percent difference. All soil samples in the SDG except for sample SB-C14-1-05(0-2) were qualified as estimated for hexachlorocyclopentadiene and 1,2-diphenylhydrazine due to the CCAL percent difference.

Pesticides/PCBs – AR1260 was qualified as estimated for sample SB-E11-8-01(0-2) since the continuing calibration verification criteria were not met.

Explosives/ Nitroglycerine – Sample SB-E10-1-05(0-2) was qualified as estimated for 2,4-dinitrotoluene due to the LCS recovery of this compound.

TPH/TOC/NC - No qualification of data.

Metals – Cadmium was qualified as 'U' in samples SB-C13-3-02(0-2), SB-C13-1-05(0-2), SB-C13-133-05(0-2), SB-D11-208A-01(0-2), SB-D11-218C-03(0-2), SB-D12-3-04(0-2), SB-E10-11-13(0-2), SB-E10-1-05(0-2) due to the method blank. Antimony, chromium, copper, selenium and zinc were qualified as estimated in sample SB-C14-1-05(0-2). All soil samples in the SDG were qualified as estimated for copper and mercury as a result of the laboratory duplicate precision. Also, chromium and nickel were qualified as estimated in FB-21 for the field duplicate precision.

Other Comments – Field blank FB-21 contained arsenic (2.6 ug/L) and copper (4.7 ug/L). Field duplicate precision was not met for arsenic, lead and zinc.

SDG 9910188

Volatiles – NA

Semivolatiles – The surrogate recoveries for sample SB-D14-6-01(0-2) were outside control limits in the original analysis. The laboratory re-extracted and reanalyzed the sample outside the holding time (>2x the HT). The laboratory provided the re-extracted data in their LIMs report and subsequently in their EDD. Upon request, the laboratory revised and submitted the original sample data, which was subsequently qualified as estimated for surrogate recovery. The re-extracted data is considered unusable and the laboratory was contacted and requested to provide the original analysis for this sample. Since the surrogate recoveries were exceeded. Field blank sample FB-13 was analyzed outside the holding time, which resulted in estimated qualification of this sample for all compounds. Hexachlorocyclopentadiene and hexachlorobenzene for sample FB-13, and

4-nitrophenol and benzidine for samples SB-E13-2074-01(0-2), SB-E13-2074A-01(0-2) and SB-D14-204B-04(0-2) were qualified as estimated due to the CCAL.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – All 8330 compounds for sample SB-E13-2074A-01(0-2) were qualified as estimated due to surrogate recovery. Sample SB-E13-2074-01(0-2) was qualified as estimated for 2,4,6-trinitrotoluene and 4-amino-2,6-dinitrotoluene, due to the percent difference between the primary and secondary column exceeded the criteria set forth in the Region II SOP. A 'U' qualification was applied to the following: sample SB-E13-2074-01(0-2) for RDX; SB-E13-2074A-01(0-2)for 2,4,6-trinitrotoluene and SB-D14-204B-01(0-2) for HMX, due to the percent difference as described above. Sample SB-E13-2074A-01(0-2) was qualified as estimated for nitrobenzene, and SB-D14-204B-04(0-2), due to the percent difference. Sample SB-E13-2074-09(0-2) was originally reported as BQL for NG, whereas the data package indicates this sample was detected at 4800 J. The laboratory was contacted and resubmitted with the suggested revision.

TPH/TOC/NC – No qualification of data.

Metals – Cadmium in sample SB-D14-6-01(0-2), and antimony in sample SB-E13-2074-06(0-2) were qualified as 'U' due to blank contamination.

Other Comments – none.

SDG 9911068

Volatiles – NA

Semivolatiles – Samples SB-C14-2-03(0-2), SB-C14-2-03(0-2)RE, SB-C14-125-01(0-2), , SB-C14-125-01(0-2)RE, SB-B14-3-05(0-2) and SB-B14-3-05(0-2)RE were qualified as estimated for all compounds due to the surrogate recovery. Samples SB-D14-120-04(0-2) and SB-D14-120-04(0-2)MS/MSD were qualified as estimated for acenapthene due to the LCS and spike recovery of this compound. Several internal standards were outside acceptance limits for several samples. Since these samples were already qualified as estimated due to the surrogate recoveries, further qualification was not necessary. One additional sample, SB-B14-128-02(0-2) was qualified as estimated for compounds associated with the internal standards that were out of complicance. Benzidine was qualified as estimated in field blank sample FB-20 due to the CCAL. Benzidine, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benz(g,h,i)perylene were qualified as estimated in samples SB-B12-422-06(0-2), SB-D14-129-05(0-2), SB-D14-120-04(0-2), SB-C14-121-0(0-2), SB-C14-125-01(0-2), SB-B14-128-02(0-2) and SB-B14-3-05(0-2) due to the CCAL. Samples SB-D13-268-01(0-2), SB-D14-360-03(0-2), SB-C14-4-01(0-2), and SB-C14-2-03(0-2) were qualified as estimated for 1,2-diphenylhydrazine due to the CCAL. Samples SB-D13-3-04(0-2), SB-D14-129-05(0-2), and SB-D14-120-04(0-2) were qualified as estimated for n-nitrosodiphenlyamine, 2,2'oxybis(1-chloropropane),

hexachlorocyclopentadiene, 2,4-dinitrophenol and 4,6-dinitro-2-methylphenol due to the CCAL.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample FB-20 was qualified as estimated for all 8330 compounds due to the sample being re-extracted outside of the holding time. Sample SB-D13-3-04(0-2) was qualified as estimated for 4-amino-2,6-dinitrotoluene due to the percent difference between the two instrument columns exceeding the Region II criteria.

TPH/TOC/NC – No qualification of data.

Metals –The laboratory reported the spike sample designation instead of the original sample for SB-D14-120-02(0-2). Several samples were qualified as 'U' for cadmium due to blank contamination. All soil samples were qualified as estimated for antimony due to the matrix spike recovery and a slightly low LCS recovery. Field blank FB-20 was qualified as estimated for mercury, chromium and nickel due to the laboratory duplicate precision.

Other Comments – The laboratory submitted the LIMs result form for the spike sample, SB-D14-120-04(0-2)MS/MSD in addition to the unspiked sample. Typically the only sample reported on the LIMs forms are the original samples. Matrix spikes are generally only reported on the spike form and used for QC purposes. Field blank FB-20 contained chromium (0.7 ug/L) and copper (3.3 ug/L). Field duplicate precision for pair SB-D14-129-05(0-2)/DUP was exceeded for mercury.

SDG 9911126

Volatiles – NA

Semivolatiles – Benzidine in sample SB-C11-7-02(0-1) was qualified as estimated due to the CCAL associated with this sample. The holding time for the dilution of sample SB-D10-2041-03(0-1) was exceeded, which resulted in estimated qualification of fluoranthene, pyrene and benzo(b)fluoranthene since they were the only compounds reported from the diluted sample analysis. Several samples were qualified with a 'U' for di-n-butylphthalate due to blank contamination. There were several samples in the SDG that had concentrations of di-n-butylphthalate that exceeded the blank criteria and thus could not be qualified. Methylene chloride in sample SB-D10-2230-03(0-0.5) was qualified as estimated due surrogate recovery. Several samples were qualified as estimated for compounds n-nitrosodimethylamine, 2,2'-oxybis(1-chloropropane), pyrene, butylbenzylphthalate, 3,3'-dichlorobenzidine, bis(2-ethylhexyl) phthalate, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,i)perylene due to the 12/31/99 CCAL. Also, several samples were qualified as estimated for butylbenzylphthalate, bis(2-ethylhexyl) phthalate and di-n-octylphthalate due to the 1/4/00 CCAL.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Sample SB-C11-7-02(0-1) was qualified as estimated for 2-amino-4,6-dinitrotoluene due to the LCS recovery. The sample was also qualified as estimated for 1,3,5-trinitrobenzene due to the percent difference between the two instrument columns exceeding 25%, which is a requirement in the Region II SOP.

TPH/TOC/NC – No qualification of data.

Metals – The chain of custody specified sample SB-D10-N4-01(0-1) for the matrix spike and duplicate. The laboratory analyzed sample SB-D10-2041-05(0-1) instead. Several samples were qualified with a 'U' for antimony, selenium and cadmium due to blank contamination. Mercury in sample Sb-D10-6-02(0-1) was qualified as estimated due to the matrix spike recovery of this analyte. Antimony was qualified as estimate in all soil samples in the SDG due to the matrix spike recovery and slightly low LCS recovery.

Other Comments – Field duplicate precision was not met for copper and lead for pair SB-E10-2031C-01(0-1), and for arsenic, lead and zinc for pair SB-E10-8277-01(0-1)/DUP. Data are not qualified based on field duplicate results.

SDG 9911085

Volatiles – NA

Semivolatiles – All compounds in sample SB-C11-18-02(0-2) were qualified as estimated due to surrogate recovery. This sample was re-extracted outside the holding time due to poor matrix spike recovery. The re-extracted results were acceptable. N-nitroso-di-n-propylamine was qualified as estimated in sample SB-C11-18-02(0-2) due to the matrix spike recovery. Benzidine in FB-22 was qualified as estimated due to the CCAL recovery. Also, all soil samples in the SDG were qualified as estimated for indeno(1,2,3-cd)pyrene and dibenz(a,h)anthracene due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC – No qualification of data.

Metals – Selenium in sample SB-C11-18-02(0-2) and copper and zinc in field blank FB-22 were qualified as 'U' due to blank contamination. Selenium and antimony in sample SB-B11-2044C-01(0-2) were qualified as estimated due to matrix spike recovery. Mercury in all soil samples was qualified as estimated due to the laboratory duplicate precision.

Other Comments – none.

SDG 9911197

Volatiles – NA

Semivolatiles – Field blank FB-22 was extracted one day outside the holding time. All compounds in the sample were qualified as estimated. Additionally, the surrogate recovery for the sample was also outside of the control limits, however, no further qualification was made since the sample had been previously qualified due to the holding time. N-nitroso-di-n-propylamine was qualified as estimated in all soil samples due to the LCS recovery of the compound. Benzo(g,h,i)perylene was qualified as estimated in sample SB-E10-4-03(0-0.75) due to the initial calibration of this compound. Bis(2-chloroethyl)ether and 2,2'-oxybis(1-chloropropane) were qualified in several samples due to the 1/2/00 CCAL recovery. N-nitroso-di-n-methylamine, bis(2-chloroethyl)ether, 2,2'-oxybis(1-chloropropane), 2,4-dinitrophenol, 4,6-dinitro-2-methylphenol, pentachlorophenol and di-n-octylphthalate were qualified in sample SB-D10-4-03(0-0.75) due to the 1/3/00 CCAL. Bis(2-ethylhexyl)pthalate was qualified as 'U' in sample FB-28 due to blank contamination.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-E10-4-04(0-0.75) was qualified as estimated for 2,4-dinitrotoluene for LCS recovery and percent difference between the instrument columns, and with an 'R' for 4-amino-2,6-dinitrotoluene and 2-amino-4,6-dinitrotoluene for percent difference between the instrument columns.

TPH/TOC/NC – No qualification of data.

Metals – Cadmium was qualified as 'U' in sample SB-E10-5-06(0-1) and selenium for sample SB-E10-4-03(0-0.75) due to blank contamination. Mercury, antimony and zinc were qualified as estimated in all soil samples in the SDG due to the laboratory duplicate precision.

Other Comments – none.

SDG 9911241

Volatiles – NA

Semivolatiles – Samples SB-B10-2178-03(0-1) and SB-C10-13-01(0-1.5) was qualified as estimated for all compounds due to the surrogate recovery. Phenanthrene and bis(2-ethylhexyl)phthalate were qualified as estimated in sample SB-D10-2233-04(0-1.5) due to the surrogate recovery for the diluted sample results. Phenol, 2-chlorophenol, 1,4-dichlorobenzene, n-nitroso-di-n-propylamine, 4-nitrophenol and acenaphthene were qualified as estimated in sample SB-C10-2179-03(0-0.5) due the matrix spike recovery.

All soil samples in the SDG were qualified as estimated for n-nitroso-di-n-propylamine due to the LCS recovery. Compounds associated with various internal standards for samples SB-D10-2233D-03(0-2), SB-D9-8279-01(0-1), SB-D10-16-03(0-1), SB-D10-9119-01(0-1), SB-C10-13-01(0-1.5), SB-C10-13-01(0-1.5)DUP, SB-D10-16-03(0-1) and SB-D10-9119-01(0-1) that were outside acceptance criteria were qualified as estimated. Sample FB-30 was qualified as estimated for bis(2-chloroethyl)ether and 2,2'oxybis(1-chloropropane) due to the CCAL. Samples associated with the 1/12/00 calibration were qualified as estimated for n-nitroso-di-n-methylamine, phenol, hexachlorocyclopentadiene, 2,4-dinitrophenol, di-n-butylphthalate and fluoranthene due to the recoveries of these compounds.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Samples SB-B10-2178-05(0-1) and SB-B10-2178-05(0-1)DUP were qualified as estimated for 2,4-dinitrotoluene due to a holding time exceedence. Sample FB-30 was qualified as estimated for all compounds due to the holding time. Compound 2,4-dinitrotoluene was qualified as estimated due to the LCS recovery, for samples SB-D10-04-02(0-0.5), SB-B10-2178-03(0-1), SB-B10-2178-05(0-1), SB-B10-2178-05(0-1)DUP, SB-B10-511-03(0-2), and SB-C10-2176-01(0-1.5). Samples SB-D10-4-02(0-0.5) and SB-B10-2178-03(0-1) were qualified as estimated for 2,4-dinitrotoluene, and sample SB-A12-7-04(0-2) for 4-amino-2,6-dinitrotoluene, due to the percent difference between the results from the two analytical columns. Nitrobenzene, 2,4-dinitrotoluene and 1,3,5-trinitrobenzene were qualified as estimated for sample SB-B10-2178-05(0-1) for column percent difference. Sample SB-B10-2178-05(0-1) was also qualified as 'R' for 4-amino-2,6-dinitrotoluene and 2-nitrotoluene due to column percent difference. Sample SB-B10-2178-05(0-1)DUP was qualified as estimated for 2,4-dinitrotoluene, 2-nitrotoluene, 4-nitrotoluene, 1,3,5-trinitrobenzene and 2,4,6-trinitrobenzene due to the column percent difference, and was qualified with an 'R' for 4-amino-2,6-dinitrotoluene. Sample SB-B10-511-03(0-2) was qualified as estimated for 2-amino-4,6-dinitrotoluene, 1,3,5-trinitrobenzene, 1,3-dinitrobenzene and 2,4-dinitrotoluene due to the column percent difference and as 'R' for 4-amino-2,6-dinitrotoluene. Sample SB-C10-2176-01(0-1.5) was qualified as estimated for 1,3,5-trinitrobenzene and 2,4-dinitrotoluene due to the column percent difference and as 'R' for 4-amino-2,6-dinitrotoluene and 2-amino-4,6-dinitrotoluene. All samples in the SDG were qualified as estimated for nitroglycerine due to holding times. Also, the soils were qualified as estimated for PETN due to the missed extraction holding time.

TPH/TOC/NC - No qualification of data.

Metals – The following samples were qualified with a 'U' for the following method blank contaminants: silver for SB-C10-13-01(0-1.5), SB-C10-13-01(0-1.5)DUP, SB-B10-2178-05(0-1)DUP, SB-C10-2179-03(0-0.5) and FB-30; antimony for SB-D10-16-03(0-1), SB-D10-9119-01(0-1), SB-C10-2176-02(0-1), SB-B10-511-03(0-2) and SB-C10-2179-03(0-0.5); and cadmium for SB-D9-8279-01(0-1). Sample SB-C10-2179-03(0-0.5) was qualified as estimated for antimony and zinc. Field blank FB-30 was used to qualify

samples SB-D10-2233D-03(0-2), SB-D10-2233B-03(0-1), SB-C10-13-01(0-1.5) for copper, and SB-D10-241B-03(0-1.5) and SB-D10-2233B-03(0-1) for zinc.

Other Comments – Field duplicate precision criteria were not met for arsenic, copper and antimony for pair SB-C10-13-01(0-1.5)/DUP and for copper, nickel and zinc for pair SB-B10-2178-05(0-1). Field data are not qualified based on field duplicate results.

SDG 9911225

Volatiles – NA

Semivolatiles – Benzidine was qualified as estimated in samples SB-D9-2-04(0-1)DUP, SB-D10-2228-01(0-1), SB-D10-2231-03(0-1), SB-C11-1-04(0-1)DUP, SB-C11-1-04(0-1), and SB-C11-1-09(0-0.75) due to the continuing calibration recovery. All compounds in samples SB-B10-7-10(0-1) and SB-B10-7-02(0-1) were qualified as estimated due to surrogate recovery. Acenaphthene was qualified as estimated in samples SB-C11-9-04(0-0.5), SB-C11-1-17(0-1) and SB-C11-1-09(0-0.75) due to the LCS recovery. Compounds associated with internal standards that exceeded control limits were qualified as estimated for samples SB-C10-241A-03(0-0.5), SB-C10-241A-03(0-0.5)RE, SB-E10-2169-03(0-1), SB-D10-2233C-01(0-1), SB-D9-2-04(0-1)DUPRE, SB-D10-2228-01(0-1)RE, SB-C11-1-04(0-1)RE, SB-C11-1-04(0-1)DUPRE, SB-B10-7-01(0-1), SB-B10-7-02(0-1) and SB-D10-2231-03(0-1). Naphthalene was qualified as estimated in samples SB-C11-1-17(0-1) and SB-C11-9-04(0-0.5) due to the initial calibration recovery for this compound. Hexachloroethane, bis(2-chloroethyl)ether, 4-nitrophenol and 3,3'dichlorobenzidine were qualified as estimated in sample SB-E10-2169A-01(0-1) and SB-C10-241A-03(0-0.5) due to the initial calibration. Also, butylbenzylphthalate, 4-nitrophenol, bis(2-ethylhexyl)phthalate and di-n-octylphthalate were qualified as estimated in samples SB-E10-2169-03(0-1) and SB-D10-2233C-01(0-1). Field blank FB-29 was qualified as estimated for bis(2-chloroethoxy)ether, 2,2'oxybis(1-chloropropane), n-nitroso-di-methylamine, 2,4-dinitrophenol, 4,6-dinitro-2-methylamine, pentachlorophenol, di-n-octylphthalate and benzidine due to the initial calibration.

Pesticides/PCBs – Samples SB-B11-3-01(0-1.5) and SB-C10-1-01(0-1) were qualified as estimated for AR1016 due to the continuing calibration recovery for this aroclor.

Explosives/ Nitroglycerine – Samples SB-C11-1-05(0-1.5), SB-B10-7-02(0-1) and SB-B10-7-10(0-1) were qualified as estimated for nitroglycerine due to surrogate recovery. Sample SB-C11-1-05(0-1.5) was qualified as 'R' for 2-amino-4,6-dinitrotoluene and 4-amino-2,6-dinitrotoluene due to the column percent difference.

TPH/TOC/NC - No qualification of data.

Metals – Samples SB-D10-2233E-02(0-1), SB-C11-9-04(0-0.5), SB-D9-2-04(0-1), SB-D9-2-04(0-1)DUP, and SB-B10-7-10(0-1) were qualified as 'U' for cadmium, and samples), SB-D9-2-04(0-1)DUP, SB-D10-2233A-01(0-2), SB-B10-7-02(0-1), SB-B10-7-10(0-1), SB-C11-1-09(0-0.75), SB-C11-1-04(0-1)DUP, and SB-C11-1-04(0-1) were

qualified as 'U' for antimony due to the associated blank. Antimony and selenium were qualified as estimated for sample SB-D10-2233A-01(0-2) due to the matrix spike recovery of these analytes. All soil samples in the SDG were qualified as estimated for beryllium.

Other Comments - Arsenic precision was not met for pair SB-C11-1-04(0-1)/DUP.

SDG 9911242

Volatiles – Methylene chloride was qualified as 'U' for all samples in the SDG and naphthalene was qualified as 'U' for sample SB-C10-2-04(0.5) due to blank contamination. Acrolein, vinyl chloride, bromomethane and trichloroethene were qualified as estimated in all soils in the SDG due to the continuing calibration recovery for these compounds. Samples TB and FB-31 were qualified as estimated for 1,1,2,2-tetrachloroethene and chloroethane due to the continuing calibration recovery for these compounds.

Semivolatiles – Sample SB-C10-2-04(0-1) was qualified as estimated for all compounds due to the surrogate recovery. Sample SB-G9-8182-05(0-1) was qualified as estimated for acenaphthene due to the matrix spike recovery of this compound. Compounds associated with specific internal standards for samples SB-G10-9100-01(0-0.5), SB-G10-2-03(0-1), SB-C10-2-07(0-1.67), SB-C10-3-02(0-1), SB-G9-8182-05(0-1), and SB-C10-2-04(0-1) were qualified as estimated due to the recovery of the internal standards. Field blank FB-31 was qualified as estimated for bis(2-chloroethoxy)ether and 2,2'oxybis(1-chloropropane) due to the initial calibration results. Sample SB-G10-9100-01(0-0.5) was qualified as estimated for naphthalene due to the initial calibration results. All soil samples in the SDG were given an estimated qualifier for various compounds, because of continuing calibration results.

Pesticides/PCBs – AR1016 was qualified as estimated in all samples in the SDG due to the continuing calibration recovery.

Explosives/ Nitroglycerine – Sample SB-C10-3-02(0-1) was qualified as estimated for 2-amino-4,6-dinitrotoluene due to the LCS recovery and with an 'R' for 4-amino-2,6-dinitrotoluene, nitrobenzene, 2,4-dinitrotoluene and 2-amino-4,6-dinitrotoluene due to the column percent difference. The laboratory noted in the case narrative that 2,4-dinitrotoluene and 2,6-dinitrotoluene co-elute and are therefore reported as 2,4-dinitrotoluene.

TPH/TOC/NC - No qualification of data.

Metals – Selenium was qualified as 'U' due to blank contamination in samples SB-C10-8204-05(0-0.5), SB-C10-2-05(0-1), SB-C10-2-07(0-1.67), SB-C10-2-07(0-1.67)DUP, SB-C10-3-02(0-1), SB-E10-2314-02(0-2), SB-G9-8182-05(0-1), SB-G10-108B-0(0-2), and SB-G10-108B-05(0-0.5). Sample SB-G9-8182-05(0-1) was qualified as estimated for antimony, cadmium, copper and zinc due to the matrix spike recovery. All soils in

the SDG were qualified as estimated for copper and silver due to the laboratory duplicate precision results. Field duplicate precision was not met for pair SB-C10-2-07(0-1.67). Data are not qualified based on field duplicate results.

Other Comments – Field blank FB-31 contained chromium (0.79 ug/L), copper (2.4 ug/L) and zinc (8.3 ug/L).

SDG 9912015

Volatiles – NA

Semivolatiles – Bis(2-ethylhexyl)phthalate was qualified as estimated in sample FB-33 due to blank contamination. All compounds in samples SB-G10-2009-03(0-1), SB-D10-164B-01(0-1), and SB-G10-8224-03(0-1) were qualified as estimated due to poor surrogate recovery. Sample FB-33 was qualified as estimated for 4-nitrophenol due to the CCAL. Also, for samples analyzed on 1/21/00, 2,4-dinitrophenol, di-n-octylphthalate were qualified as estimated due to the CCAL recovery. For samples analyzed on 1/23/00,

2,2'-oxybis(1-chloropropane), hexachlorobutadiene, 4-nitrophenol and 4,6-dinitro-2-methylphenol were qualified as estimated due to the CCAL recovery.

Pesticides/PCBs – AR1016 was qualified as estimated in sample SB-G10-2008-03(0-1) due to the matrix spike not being recovered for this aroclor. All compounds were qualified as estimated for sample SB-G10-2008-03(0-1), due to poor surrogate recovery. Samples FB-33 and SB-G10-2008-03(0-1) were qualified as estimated for AR1016 due to the continuing calibration recovery.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - The soils in the SDG were qualified as estimated for nitrocellulose due to the LCS recovery.

Metals – Antimony was qualified as estimated in sample SB-G10-8106C-04(0-2) due to the matrix spike recovery for the analyte.

Other Comments – Field duplicate precision was not met for arsenic in pair SB-G10-16-02(0-1)/DUP. N-nitroso-di-n-propylamine was reported as 330 ug/Kg and the raw indicated that the concentration should be 390 ug/Kg for sample SB-G10-8106B-04(0-1). The result form was revised and submitted by the laboratory.

SDG 9912003

Volatiles – NA

Semivolatiles – Compounds associated with internal standards that were outside acceptance limits were qualified as estimated in the following samples: SB-G10-8108-08(0-0.5) and SB-G9-2-03(0-1.33). All soil samples in the SDG were qualified as estimated for acenaphthene and pyrene due to the LCS recoveries of these compounds. Naphthalene was qualified as estimated in all samples in the SDG due to the initial calibration recovery. Di-n-butylphthalate was qualified as estimated in samples that were analyzed on 1/14/00 due to the CCAL; phenol, 2,2'-oxybis(1-chloropropane);, hexachloroethane, nitrobenzene, hexachlorobutadiene, hexachlorocyclopentadiene, 1,2-diphenylhydrazine, di-n-butylphthalate, butylbenzylphthalate, bis(2-ethylhexyl)phthalate and di-n-octylphthalate were qualified as estimated in samples analyzed on 1/15/00 due to the CCAL recovery of these compounds.

Pesticides/PCBs – AR1260 was qualified as estimated in sample SB-G9-2-03(0-1.33) due to the matrix spike recovery. All samples in the SDG were qualified as estimated for AR1016 due to the CCAL recovery of the aroclor.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - Sample SB-F10-1-01(0-1) was qualified as estimated for nitrocellulose due to the slightly low LCS recovery.

Metals – Antimony, chromium and mercury were qualified as estimated in sample SB-G9-2-03(0-1.33) due to the matrix spike recovery. All soils in the SDG were qualified as estimated for copper, lead, nickel and zinc due to the laboratory duplicate precision.

Other Comments – Field blank FB-32 contained nitrocellulose (0.232 mg/L), silver (4.2 ug/L), chromium (2.1 ug/L), copper (3.4 ug/L), and lead (1.9 ug/L).

SDG 9911184

Volatiles – NA

Semivolatiles – Compounds associated with internal standards that were outside control limits were qualified as estimated in samples SB-D10-164B-02(0-1), SB-D10-8284-03(0-1), SB-D10-8234(0-1), SB-D10-8-02(0-1) and SB-D10-8-02(0-1)DUP. Compound 4,6-dinitro-2-methylphenol was qualified as estimated in sample FB-27 due to the CCAL recovery of the compound. Benzo(g,h,i)perylene was qualified as estimated in samples SB-C10-5-01(0-1), SB-D10-8284-03(0-1), SB-D10-165B-02(0-1), and SB-D10-10-01(0-1) due to the initial calibration recovery of the compound. N-nitroso-di-n-propylamine, bis(2-chlorethoxy)ether, 2,2'oxybis(1-chlorpropane), 2,4-dinitrophenol, 4,6-dinitro-2-methylphenol, pentachlorophenol, di-n-octylphthalate and benzidine were qualified as estimated in samples analyzed on 1/3/00 due to the CCAL recoveries of these compounds. Also, Hexachlorocyclopentadiene, di-n-octylphthalate, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene, benzo(g,h,I)perylene and benzidine were qualified as

estimated in samples analyzed on 1/7/00 due to the CCAL recoveries of these compounds.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Samples SB-C10-7-01(0-1), SB-D10-8-02(0-1)DUP, and SB-C10-211C-06(0-1) were qualified as estimated for 2,4-dinitrotoluene due to the high LCS recovery and low matrix spike recovery for this compound. Samples SB-D10-8-02(0-1)DUP and SB-C10-211C-06(0-1) were qualified as estimated for 2,4-dinitrotoluene due to the column percent difference exceeding 25%.

TPH/TOC/NC - No qualification of data.

Metals – Cadmium was qualified as 'U' in samples SB-D10-8-02(0-1), SB-D10-8-02(0-1)DUP, SB-D10-10-01(0-1), SB-C10-211C-04(0-2), SB-C10-211C-07(0-1), SB-C10-241C-04(0-2), SB-C10-12-03(0-1), SB-D10-14-05(0-1) and SB-C10-10-01(0-1) due to blank contamination. Also, samples SB-C10-211C-07(0-1), SB-C10-241C-04(0-2), SB-C10-12-03(0-1), SB-D10-14-05(0-1) and SB-C10-10-01(0-2) were qualified with a 'U' for selenium due to blank contamination. Sample SB-C10-10-01(0-1) was qualified as estimated for antimony and selenium due to the matrix spike recoveries of these analytes. The associated LCS results were acceptable.

Other Comments – Field blank FB-27 contained copper (3.8 ug/L) and zinc (9.3 ug/L). For the original analysis of sample SB-D10-8-02(0-1), all results were BQL for explosives. The duplicate sample, SB-D10-8-02(0-1)DUP contained 3400 ug/Kg of 2,4-dinitrotoluene. The laboratory re-extracted and reanalyzed both the original sample and the duplicate and all results were BQL. The laboratory noted in the case narrative that the duplicate sample could have contained a nonhomogenous piece of 2,4-dinitrotoluene. The original results for both samples are reported. Therefore, the field duplicate precision was not met for this sample pair.

SDG 9911229

Volatiles – NA

Semivolatiles – Pyrene was qualified as estimated in sample SB-G14-1-01(0-2) due to poor surrogate recovery. Acenaphthene was qualified as estimated in samples SB-C08-1-01(0-0.5) and SB-G14-1-01(0-2), due to the LCS recovery. Hexachlorocyclopentadiene, acenaphthylene, 4-bromophenyl phenyl ether, hexachlorobenzene, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,I)perylene were qualified as estimated in samples analyzed with the 1/7/00 CCAL, due to the recovery of these compounds.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - No qualification of data.

Metals – Selenium was qualified as undetected in samples SB-D16-1-01(0-0.8), SB-A12-3-03(0-1.5) and SB-G14-1-01(0-2) due to method blank contamination. Mercury was qualified as estimated in sample SB-C08-1-01(0-0.5) due to the matrix spike recovery of mercury. All samples in the SDG were qualified as estimated for antimony, mercury and selenium due to the laboratory duplicate precision criteria not being met.

Other Comments – none

SDG 9912078

Volatiles – NA

Semivolatiles – Bis(2-ethylhexyl)phthalate was qualified as 'U' in all samples in the SDG and di-n-butylphthalate was also qualified with a 'U' in FB-37 due to the method blank contamination. Benzidine and 4-nitrophenol were qualified as estimated in all soil samples in the SDG except SB-H11-761-03(0-1) due to the continuing calibration recovery. Compounds 2,4-dinitrophenol, 4-nitrophenol, pentachlorophenol, fluoranthene and pyrene were qualified as estimated in all soil samples except SB-H11-761-03(0-1) in the SDG due to the CCAL recovery.

Pesticides/PCBs – Sample FB-37 was qualified as estimated for AR1260 due to the CCAL recovery. Also, sample SB-H11-762-03(0-1.5) was qualified as estimated for AR1016 and AR1260 due to the CCAL recoveries.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - No qualification of data.

Metals – Antimony, chromium and copper were qualified as estimated in sample SB-H11-761-03(0-1) due to the matrix spike recovery. All soil samples in the SDG were qualified as estimated for antimony, chromium, copper, lead and nickel due to the laboratory duplicate precision.

Other Comments – Field blank FB-37 contained NC (0.274 mg/L).

SDG 9912073

Volatiles – NA

Semivolatiles – All samples in the SDG were qualified with a 'U' for bis(2-ethylhexyl)phthalate, due to method blank contamination. Compounds 4-chloro-3-

methylphenol, acenaphthene and 4-nitrophenol were qualified as estimated in all soil samples in the SDG due to the matrix spike and LCS recoveries. Compounds associated with internal standards that were outside acceptance limits were qualified as estimated for samples SB-H11-9335-05(0-2), SB-F11-8227-01(0-1), SB-H11-9335-06(0-1), SB-H10-9000-01(0-1.5) and SB-H11-763-03(0-1). Sample FB-38 was qualified as estimated for n-nitroso-di-n-propylamine, 2,2'oxybis(1-chloropropane) and n-nitrosodimethylamine, due to the CCAL recoveries of these compounds. Samples analyzed on 1/27/00 were qualified as estimated for benzidine, 2,4-dinitrophenol, 4-nitrophenol, fluoranthene and pyrene, and samples analyzed on 1/28/00 were qualified as estimated for hexachlorocyclopentadiene and 4-nitrophenol. Samples SB-H10-269-03(0-1) and SB-F11-6813-01(0-2) were qualified as estimated for n-nitrosodimethylamine and 2,2'oxybis(1-chloropropane) due to the CCAL.

Pesticides/PCBs – AR1016 and AR1260 were qualified as estimated in the samples SB-G11-4-01(0-2) and SB-H13-5-01(0-2) due to the CCAL recoveries of these compounds.

Explosives/ Nitroglycerine – Sample SB-H10-9000-01(0-1.5) was qualified as estimated for 1,3-dinitrobenzene, 2,4,6-trinitrotoluene and 2,4-dinitrotoluene due to the column percent difference exceeding 25%.

TPH/TOC/NC - NA

Metals – Sample SB-F11-456-02(0-2) was qualified as estimated for antimony due to the matrix spike recovery.

Other Comments – Chromium, copper, nickel, lead and selenium precision was not met for field duplicate pair SB-H11-2-02(0-1.25)/DUP. Field data are not qualified based on duplicate precision. Field blank FB-38 contained nitrocellulose (0.196 mg/L).

SDG 9912053

Volatiles – Acrolein and acrylonitrile were qualified as estimated in samples TB and FB-36 due to the poor calibration response of these two compounds. All soil samples were qualified as estimated for acrylonitrile due to the poor calibration response of this compound. All samples were qualified with a 'U' for methylene chloride.

Semivolatiles – Sample SB-H11-6-01(0-1) was qualified as estimated for all compounds in the sample due to the MS and LCS recoveries being outside control limits. Compounds associated with internal standards that were outside acceptance limits were qualified as estimated for samples SB-H11-9310-03(0-1), SB-G11-9309-05(0-1), SB-H10-9320-03(0-1), SB-H10-9002-02(0-1), SB-H11-9336-01(0-1), SB-H11-9336-02(0-1), SB-H10-14-01(0-1), SB-H11-06-01(0-1) and SB-H11-2295-02(0-1). Field blank FB-36 was qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), n-nitroso-di-n-propylamine, hexachlorocyclopentadiene, 2,4-dinitrophenol, 1,2-diphenylhydrazine, pyrene and di-n-octylphthalate due to the CCAL recoveries of these

compounds. There were also several compounds that exceeded the CCAL on 1/25/00 and 1/26/00; associated compounds were qualified as estimated.

Pesticides/PCBs – All soil samples were extracted outside holding time and were thus qualified as estimated for all compounds.

Explosives/ Nitroglycerine – Samples SB-H10-10-02(0-1.5), SB-H10-14-01(0-1), SB-H10-14-02(0-2) and SB-H10-14-02(0-2)DUP were qualified as estimated due to the LCS recovery. Samples SB-H10-10-02(0-1.5), SB-H10-14-01(0-1) and SB-H10-14-02(0-2) were qualified with an 'R' for 1,3-dinitrobenzene due to the column percent difference. Samples SB-H10-10-02(0-1.5), SB-H10-14-01(0-1), SB-H10-14-02(0-2)DUP were qualified as estimated for 2,4-dinitrotoluene due to the column percent difference. Sample SB-H10-14-02(0-2)DUP was also qualified as estimated for 1,3-dinitrobenzene due to the column percent difference. Field blank FB-36 was qualified as estimated for RDX and 1,3,5-trinitrobenzene due to the column percent difference.

TPH/TOC/NC - All samples analyzed for nitrocellulose were qualified as estimated for NC due to the LCS recovery.

Metals – Sample SB-H11-6-01(0-1) was qualified as estimated for selenium and antimony due to the matrix spike recovery of these analytes. All soil samples were qualified as estimated for beryllium due to the serial dilution result of beryllium.

Other Comments – Field blank FB-36 contained 1,3,5-trinitrobenzene (0.1 ug/L), 2,4,6-trinitrotoluene (0.6 ug/L), RDX (1.1 ug/L), nitrocellulose (0.173 mg/L) and selenium (2.3 ug/L). Trip blank 'TB' and field blank FB-36 contained chloroform at 1 ug/L. Field duplicate precision was not met for mercury, arsenic, antimony, zinc and 2,4-dinitrotoluene for pair SB-H10-14-02(0-2)/DUP; zinc was not met for pair SB-H10-9320-03(0-1)/DUP. Nitrobenzene was detected in sample SB-H10-14-02(0-2) at 3400 ug/Kg, but was reported as BQL in the field duplicate sample.

SDG 9912040

Volatiles – All compounds in samples SB-H9-1-04(0.5) and SB-G9-8207-05(0.5) were qualified as estimated due to surrogate recovery. Sample FB-25 was qualified as estimated for acrolein, bromomethane, methylene chloride, 2-chloroethyl vinyl ether, cis-1,3-dichloroethene, bromoform and 1,1,2,2-tetrachloroethane, due to the CCAL recoveries of these compounds. All samples in the SDG were qualified with a 'U' for methylene chloride due to blank contamination. Sample SB-G10-8682-05(0-2) was also qualified as 'U' for naphthalene due to the blank. All soil samples were qualified as estimated for acrolein and acrylonitrile due to the poor initial response of this compound.

Semivolatiles – Several compounds associated with an internal standard that exceeded control limits were qualified as estimated for sample SB-G11-8212-04(0-0.5). Field blank FB-35 was qualified as estimated for n-nitrosodimethylamine, 2,2'-oxybis(1-

chloropropane), n-nitroso-di-n-propylamine, hexachlorocyclopentadiene, 2,4-dinitrotoluene, 1,2-diphenylhydrazine, pyrene and di-n-octylphthalate due to the CCAL recoveries of these compounds. Compounds 2,2'-oxybis(1-chloropropane), hexachlorobutadiene, 4-nitrophenol and 4,6-dinitro-2-methylphenol exceeded the CCAL recovery limits for the 1/23/00 analysis, 2,4-dinitrophenol, 2,4-dinitrotoluene, 4-nitrophenol, diethylphthalate, butylbenzylphthalate, di-n-octylphthalate, bis(2-ethylhexyl)phthalate and 3,3'dichlorobenzidine for the 1/24/00 analysis, and n-nitrosodimethylamine, bis(2-chloroethyl)ether and 2,4-dinitrophenol for the 1/25/00 analysis. Samples analyzed on these dates were qualified as estimated for the compounds listed.

Pesticides/PCBs – Sample SB-H9-2261-04(0-1.25) was qualified as estimated for AR1016 due to the matrix spike recovery of the aroclor.

Explosives/ Nitroglycerine – Samples SB-H9-2261-04(0-1.25), SB-H9-3-01(0-1.25), SB-G11-253-03(0-1) and SB-H10-16-02(0-0.75) were qualified as estimated for all 8330 compounds due to the holding time exceedance. All soils in the SDG were qualified as 'R' for tetryl due to the LCS recovery being less than ten percent. Sample SB-H10-16-02(0-0.75) was qualified as estimated for 2,4-dinitrotoluene due to the LCS exceeding 125%. Sample SB-H9-2261-04(0-1.25) was qualified as estimated for 4-amino-2,6-dinitrotoluene due to the column percent difference exceeding 90%. Sample SB-H10-16-02(0-0.75) was qualified as estimated for 2,4-dinitrotoluene due to the column percent difference exceeding 25%.

TPH/TOC/NC - Sample SB-H10-16-02(0-0.75) was qualified as estimated for nitrocellulose due to the matrix spike recovery of the compound.

Metals – Sample SB-H10-16-02(0-0.75) was qualified as estimated for antimony, arsenic, copper and selenium due to the matrix spike recovery of these analytes. All soil samples were qualified as estimated for all analytes except beryllium and silver, due to the laboratory duplicate precision not being met.

Other Comments – Field blank FB-35 contained chloroform (1 ug/L), lead (2.2 ug/L), selenium (2.6 ug/L) and nitrocellulose (0.34 mg/L). Field duplicate precision was not met for arsenic, copper and nickel for pair SB-G11-9304-02(0-2). Field duplicate precision was not met for pyrene, benzo(a)anthracene and benzo(b)fluoranthene for pair SB-H9-10-052(0-1).

SDG 9912140

Volatiles – Field blank FB-41 and trip blank TRIP 12/14 were qualified as estimated for dibromochloromethane due to the LCS recovery of the compound. Acrolein was originally reported on the LIMs for as being detected in samples SB-H10-503-02(0.5) and SB-H10-262-02(0.5) at 2800 and 3900 ug/Kg, respectively. The raw data indicated that while the raw data Form 1 had acrolein listed as detected in the samples, the

quantitation report did not contain acrolein, and the mass spectra for acrolein was not provided. Acrolein was qualified as estimated in all samples in the SDG due to the poor response in the initial and continuing calibrations. All soil samples were qualified as estimated for trans-1,2-dichloroethene, acrylonitrile, 1,1,1-trichloroethene and carbon tetrachloride due to the CCAL recoveries of these compounds. Samples TRIP 12/14 and FB-41 were qualified as estimated for bromomethane, methylene chloride and 2-chloroethyl vinyl ether due to the CCAL. Methylene chloride was qualfied as 'U' for all samples in the SDG, due to blank contamination.

Semivolatiles – Raw data for samples -07A and -06A were not initally provided in the data package, but was submitted by the laboratory upon request. Acenaphthalene was qualified as estimated in all soil samples due to the LCS recovery. One internal standard in sample SB-G10-4-02(0-0.8) was outside control limits and thus, associated compounds were qualified as estimated. Compounds 2,2'oxybis(1-chloropropane), 4-nitrophenol were qualified as estimated for samples analyzed on 1/31/00 and 2/1/00 due to the CCAL. Also, benzidine was qualified as estimated in samples analyzed on 2/1/00 due to the CCAL. Due to method blank contamination, bis(2-ethylhexyl)phthalate was qualified as 'U' in all samples in the SDG, with the exception of SB-H10-262-02(0-0.5) (the concentration was too high to qualify).

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - No qualification of data.

Metals – Sample SB-H12-3-01(0-1.5) was qualified as estimated for antimony due to the matrix spike recovery of the analyte. Field blank FB-41 was qualified with a 'U' for copper and lead due to method blank contamination.

Other Comments – Field blank FB-41 contained nitrocellulose (0.217 mg/L).

SDG 9912142

Volatiles – Vinyl chloride was qualified as estimated for all samples in the SDG, and dibromochloromethane was qualifies as estimated in samples TRIP 12/17 and FB-44, due to the LCS recovery. Bromomethane, methylene chloride and 2-chloroethyl vinyl ether were qualified as estimated for TRIP 12/17 and FB-44 due to the CCAL recoveries of these compounds. Bromomethane, chloroethane, acrolein, 1,2-dichloropropene, cis-1,3-dichloropropene, toluene, 1,1,2-trichloroethane, perchloroethane, bromodichloromethane, ethylbenzene were qualified as estimated for all soil samples in the SDG due to the CCAL recoveries. Methylene chloride was qualified as 'U' in all samples in the SDG, and naphthalene for samples SB-G10-8503-03(0.5) and SB-G10-8503-03(0.5)DUP due to blank contamination. Acrolein was qualified as estimated in all samples for low response in the initial calibration.

Semivolatiles – Several compounds for several CCAL were outside acceptance limits, thus, samples associated with the CCALs were qualified as estimated. All compounds in samples SB-G9-2123-05(0-1.5), SB-G10-8503-03(0-2)DUP and SB-G8-C3-02(0-1) were qualified as estimated due to holding time exceedance. Samples SB-G8-2114-03(0-1), SB-F8-575-02(0-2), SB-G8-2114-06(0-1), SB-G8-2204-05(0-1) and SB-G8-2210-02(0-2) were qualified as estimated for all compounds, due to surrogate recovery. All compounds in sample SB-F8-575-02(0-1) were qualified as estimated due to the matrix spike recovery. All soil samples in the SDG were qualified as estimated for pentachlorophenol due to the LCS recovery of this compound. Specific compounds associated with internal standards that were outside control limits were qualified as estimated for samples SB-G8-2114-03(0-1), SB-F8-575-02(0-1), SB-G8-2210-02(0-2), SB-G10-8503-03(0-2), SB-G10-8503-03(0-2)DUP and SB-G8-2114-06(0-1). Compound n-nitrosodimethylamine for sample SB-G9-2123-05(0-1.5) was reported at 1600 ug/Kg but is BQL in the raw data. However, n-nitrosodiphenylamine was reported as BQL, but should have been 1600 ug/Kg. The laboratory was contacted and revised the data as described above.

Pesticides/PCBs – All aroclors for sample SB-G8-5-01(0-2) were qualified as estimated due to a holding time exceedance. Aroclors AR1016 and AR1260 were qualified as estimated in FB-44 due to the CCAL recovery.

Explosives/ Nitroglycerine – The following samples and compounds were qualified as estimated due to surrogate recovery: 2,4-dinitrotoluene for samples SB-F8-575-02(0-1), SB-G8-2114-06(0-1) and SB-G8-2210-02(0-2); HMX for SB-G8-2114-06(0-1) and SB-G8-2249-01(0-1). Tetryl was qualified as 'R' in all soils in the SDG since the LCS recovery was less than ten percent. Samples SB-G8-2114-06(0-1) and SB-G8-2210-02(0-2) were qualified as estimated for 2,4-dinitrotoluene, and sample SB-G8-2249-01(0-1) was qualified as estimated for HMX due to the column percent difference exceeding 25%.

TPH/TOC/NC - Sample SB-F8-575-02(0-1) was qualified as estimated for nitrocellulose due to the matrix spike recovery of the compound. Field duplicate precision was not met for

Metals – Selenium was qualified as 'U' for samples SB-G8-2114-03(0-1) and SB-G8-2210-03(0-1.5)DUP and copper was qualified as 'U' for FB-44 due to blank contamination. Sample SB-F8-575-02(0-1) was qualified as estimated for antimony, arsenic, selenium, chromium and copper due to the matrix spike recovery of these analytes. All soil samples in the SDG were qualified as estimated for chromium, nickel and mercury due to the laboratory duplicate precision not being met.

Other Comments – Field duplicate precision was not met for nitrocellulose for pair SB-G8-2210-03(0-1.5)/DUP. Field blank FB-44 contained bis(2-ethylhexyl)phthalate at 5 ug/L.

SDG 9912025

Volatiles – All samples in the SDG were qualified as estimated for acrolein due to the poor response in the initial calibration. Samples TB 12/1/99 and FB-34 were qualified as estimated for bromomethane, acrolein, methylene chloride, 2-chloroethyl vinyl ether, cis-1,3-dichloropropene, bromoform, 1,1,2,2-tetrachloroethane and napthalene due to the CCAL. All samples were qualified with a 'U' for methylene chloride due to blank contamination. Trichloroethene was qualified with a 'U' in samples SB-G10-8106-02(0.5), SB-G10-8106-02(0.5)DUP, SB-G10-172A-01(0.5) and SB-H10-9103-03(0.5) due to blank contamination. There were several samples that had a JB qualifier for selected compounds. While the concentration of these compounds is at a 'J' concentration, it was not detected in the associated blank, which is indicated by the 'B' qualification. The laboratory was contacted and resubmitted the data which contained the extra 'B' qualifier, eliminating the 'B.

Semivolatiles – Compounds associated with specific internals for samples SB-G12-8203-01(0-2), SB-G12-8203-03(0-2), SB-G10-8106-02(0-2), SB-H10-9103-01(0-1), SB-H9-8155-02(0-1), SB-H10-9103-03(0-1) SB-G10-8106-02(0-1)DUP, SB-G10-8106-01(0-1), SB-G12-6-04(0-0.5), SB-H10-2092/2002-03(0-0.5), SB-H10-9104-02(0-1) and SB-H8-69E-01(0-2) due to the internal standard criteria not being met. All soils were qualified with a 'U' for), bis(2-ethylhexyl)phthalate with the exception of sample SB-H10-2092/2002-03(0-0.5), which contained a concentration that was too high to qualify, due to blank contamination. Field blank FB-34 was qualified as estimated for n-nitrosodimethylamine, 2,2'-oxybis(1-chloropropane), n-nitroso-di-n-propylamine, hexachlorocyclopentadiene, 2,4-dinitrophenol, 1,2-diphenylhydrazine, pyrene and di-n-octylphthalate due to the CCAL. All soil samples were qualified as estimated for hexachlorocyclopentadiene, 2,4-dinitrophenol, 2,4-dinitrotoluene, 4-nitrophenol and pyrene due to the CCAL.

Pesticides/PCBs – Aroclor AR1260 was qualified as estimated in sample SB-G10-7-01(0-2)DUP due to the matrix spike recovery. All soil samples were qualified as estimated for AR1016, due to the CCAL recovery for the compound.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - Nitrocellulose was qualified as estimated for all soil samples in the SDG due to the LCS recovery.

Metals – Antimony was qualified as estimated for SB-G12-8203-03(0-2) due to the matrix spike recovery. All soil samples were qualified as estimated for beryllium due to the serial dilution results. Field blank FB-34 was qualified as 'U' for silver due to blank contamination.

Other Comments – Field duplicate precision was not met for pair SB-G12-7-01(0-2)/DUP, nitrocellulose, AR1254 and AR1260. Field duplicate precision was not met for

for fluoranthene, pyrene, benzo(a)anthracene, chrysene, benzo(b)fluoranthene, benzo(k)fluoranthene, benzo(a)pyrene for pair SB-G10-8106-02(0-2)/DUP. Field blank FB-34 contained chromium (4.0 ug/L), copper (2.0 ug/L), nickel (1.5 ug/L), lead (2.1 ug/L), bis(2-ethylhexyl)phthalate and nitrocellulose (0.278 mg/L).

SDG 9912141

Volatiles – NA

Semivolatiles – Internal standards for samples SB-G7-2-04(0-1), SB-G11-2017A-06(0-2), SB-F11-485-02(0-2), SB-F10-8576-05(0-1), SB-G10-8501-06(0-1) and SB-G7-1-01(0-1) were outside limits, thus, compounds associated with the specific internal standards were qualified as estimated. Sample SB-G7-2-04(0-1) was qualified as estimated for 4-chloro-3-methylphenol, acenaphthene and 2,4-dinitrotoluene due to matrix spike recovery. Field blank FB-43 was qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane) and hexachlorocyclopentadiene due to the CCAL recovery. Naphthalene was qualified as estimated in samples SB-G11-2017A-06(0-2) and SB-F10-8576-05(0-1.5) due to the ICAL recovery of the compound. All soil samples were qualified as estimated for 1,2-dichlorobenzene, hexachloroethane, naphthalene, 4,6-dinitro-2-methylphenol, anthracene and benzo(g,h,I)perylene, due to the CCAL recovery.

Pesticides/PCBs – All soil samples were qualified with an 'R' for all aroclors due to the holding time exceeding 2x for the extraction of the samples. The LCS for AR1260 was also outside limits and the CCAL for AR1660 was also exceeded. Since the data were rejected due to the holding time, no further qualification could be applied.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - No qualification of data.

Metals – Sample SB-G8-A12-05(0-1) was qualified with a 'U' for selenium, and sample FB-43 was qualified with a 'U' for copper and lead, due to method blank contamination. Antimony, selenium and zinc were qualified as estimated in sample SB-G7-2-04(0-1) for matrix spike recovery. All soil samples in the SDG were qualified as estimated for arsenic, nickel, zinc and mercury due to the laboratory duplicate precision results. All soil samples in the SDG were qualified as estimated for beryllium, due to the serial dilution result for beryllium.

Other Comments – Field blank FB-43 contained bis(2-ethylhexyl)phthalate (2 ug/L).

SDG 9912113

Volatiles –

Semivolatiles – Sample SB-G11-3-01(0-1.5) was lost by the laboratory after extraction, thus there data was not provided for this sample. Sample SB-H11-9313-02(0-1) was qualified as estimated for 4-chloro-3-methylphenol and acenaphthene due to the matrix spike recoveries of these compounds. Internal standards were outside control limits for samples SB-H11-2319-04(0-1.75), SB-G11-8257-03(0-1.5) and SB-G11-66-03(0-1.5), thus the compounds specific to the internal standards were qualified as estimated. Sample FB-39 was qualified as estimated for 1,2-diphenylhydrazine, di-n-butlyphthalate, bis(2-ethylhexyl)phthalate and di-n-octylphthalate; samples analyzed on 1/28/00 were qualified as estimated for n-nitrosodimethylamine and 2,2'oxybis(1-chloropropane); samples analyzed 1/29/00 were qualified as estimated for 2,2'oxybis(1-chloropropane), hexachlorocyclopentadiene, 4-nitrophenol and 4,6-dinitro-2-methylphenol; and samples analyzed 1/31/00 were qualified as estimated for n-nitrobenzene due to the CCAL recovery. Several samples in the SDG were qualified with a 'U' for bis(2-ethylhexyl)phthalate and di-n-butylphthalate due to blank contamination.

Pesticides/PCBs – Sample FB-39 was qualified as estimated for all aroclors due to the surrogate recovery. All soil samples were qualified as estimated for AR1016 due to the CCAL recovery.

Explosives/ Nitroglycerine – Sample SB-H10-68-03(0-1) was qualified as estimated for 1,3-dinitrobenzene and 2,4-dinitrotoluene due to the surrogate recovery and column percent difference. Sample SB-H10-68-03(0-1) was qualified as estimated for 2,4-dinitrotoluene due to the LCS recovery.

TPH/TOC/NC - No data qualification.

Metals – Selenium was qualified as 'U' for samples SB-G9-8205-05(0-0.5), SB-F12-4-03(0-2) and SB-H11-9313-02(0-1) due to blank contamination. Mercury, antimony and selenium were qualified as estimated for sample SB-H11-9313-02(0-1) due to the matrix spike recovery. Chromium and mercury were qualified as estimated in all soil samples due to the laboratory duplicate precision. Sample FB-39 was qualified as estimated for copper and lead due to method blank contamination. All samples in the SDG were qualified as estimated for acrolein due to the poor response in the initial calibration. Soil samples analyzed 12/21/99 were qualified as estimated for chloroethane, acrolein, carbon tetrachloride; water samples analyzed 12/21/99 were qualified as estimated for bromomethane, 2-chloroethylvinyl ether and acrylonitrile due to the CCAL recovery. All samples were qualified with a 'U' for methylene chloride due to blank contamination.

Other Comments – Zinc for pair SB-G11-3-01(0-1.5)/DUP and lead for pair SB-H10-8225-03(0-1) were outside control limits for the field duplicates. Data were not qualified based on field duplicate results. Trip blank TRIP 1219 contained toluene (1 ug/L).

SDG 9912146

Volatiles – Sample SB-G10-8159-05(0.5) was qualified as estimated for all compounds due to the surrogate recovery. Dibromochloromethane was qualified as estimated in FB-

42 and TB12/15 due to the LCS recovery. Methylene chloride and naphthalene were qualified with a 'U' in associated samples if the concentration in the sample was less than five times the blank concentration. All samples were qualified as estimated for acrolein due to the initial calibration response of the compound. Samples FB-42 and TB12/15 were qualified as estimated for bromomethane, methylene chloride, acrolein, acrylonitrile and 2-chloroethylvinyl ether due to the CCAL. Samples SB-G10-8159-05(0.5), SB-G10-8159-03(0.5) and SB-G10-8159-06(0.5) were qualified as estimated for methylene chloride and acrolein; also, chloroethane, acrolein and carbon tetrachloride were qualified as estimated in several samples, due to the CCAL.

Semivolatiles – Compounds associated with the internal standard for SB-G10-8502-07(0-1) were qualified as estimated due to internal standard criteria not being met. All compounds for sample SB-G10-5-02(0-1) were qualified as estimated due to the surrogate recovery exceeding control limits. Phenol and acenaphthene were qualified as estimated for sample SB-G11-8114-03(0-2) due to the matrix spike recovery of these compounds. Acenaphthene was qualified as estimated in all soils in the SDG due to the LCS recovery of the compound. Sample FB-42 was qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), n-nitroso-di-n-propylamine and hexachlorocyclopentadiene due to the CCAL. Also, samples analyzed on 2/3/00 octylphthalate were qualified as estimated for hexachlorocyclopentadiene, 2,4-dinitrophenol and di-n-octylphthalate; samples analyzed on 2/4/00 were qualified as estimated for hexachlorocyclopentadiene, 2,4-dinitrophenol and 4,6-dinitro-2-methylphenol, due to the CCAL.

Pesticides/PCBs – All soil samples were qualified as estimated for all aroclors due to a holding time exceedance of greater than two times the extraction allowance. Sample FB-42 was qualified as estimated for AR1016 due to the CCAL recovery.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - Sample SB-G10-8114-03(0-2) was qualified as estimated for TOC due to the matrix spike recovery. Nitrocellulose was qualified as estimated for all samples, due to the LCS recovery.

Metals – Selenium was qualified as 'U' for samples SB-G11-2017B-08(0-2), SB-H12-8563-03(0-1), SB-H12-689-03(0-1), SB-11-8-01(0-2), c and SB-G10-8159-06(0-2); and copper was qualified a 'U' in FB-42 due to blank contamination. Selenium and thallium were qualified as estimated in sample SB-G10-8114-03(0-2) due to the matrix spike recovery.

Other Comments – Mercury precision was not met for field duplicate pair SB-G10-3-01(0-0.5)DUP. AR1254 precision was not met for field duplicate pair SB-G10-8522-01(0-1.5)DUP.

SDG 9912115

Volatiles – Samples SB-F11-2-03(0.5), SB-F10-37B-02(0.5), SB-G9-1-02(0.5), SB-H10-2003-01(0.5) and FB-40 were qualified as estimated for all compounds due to the surrogate recovery. All samples in the SDG were qualified with a 'U' for methylene chloride due to blank contamination. Acrolein was qualified as estimated for all samples in the SDG due to low response in the initial calibration. Samples FB-40 and TRIP 210 were qualified as estimated for bromomethane, acrolein and 2-chloroethylvinyl ether due to the CCAL recovery. Samples analyzed 12/21/99 were qualified as estimated for chloroethane, acrolein and carbon tetrachloride; samples analyzed 12/22/99 were qualified as estimated for trans-1,2-dichloroethene, acrolein, 1,1,1-trichloroethane and trichloroethene due to the CCAL recovery.

Semivolatiles – All compounds in sample SB-G9-15-01(0-1) were qualified as estimated due to the surrogate recovery. Sample SB-F10-37B-02(0-0.5) was originally reported with phenanthrene as BQL and chrysene as 120 ug/Kg. The laboratory revised and resubmitted the data which shows phenanthrene at 200 J ug/Kg and chrysene as 210 ug/Kg.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - No qualification of data.

Metals – Sample SB-G11-8208-05(0-1.5) was qualified as estimated for antimony due to the matrix spike recovery. All soil samples were qualified as estimated for arsenic due to the laboratory duplicate precision. Sample FB-40 was qualified with a 'U' for copper due to blank contamination.

Other Comments – Field blank FB-40 contained selenium (2.6 ug/L), butylbenzylphthalate (1 ug/L), bis(2-ethylhexyl)phthalate (7 ug/L) and toluene (1 ug/L); trip blank TRIP 210 contained toluene (1 ug/L). Mercury, lead and antimony were outside precision criteria for field duplicate pair SB-G9-15-01(0-1)/DUP; mercury and chromium were outside precision criteria for duplicate pair SB-H11-9312-02(0-1).

SDG 9911128/9911137

Volatiles – NA

Semivolatiles – Sample SB-E10-618A-04(0-0.5) was qualified as estimated for phenol, 2-chlorophenol, 1-4-dichlorobenzene, n-nitroso-di-n-propylamine, 1,2,4-trichlorobenzene and acenaphthene due to the matrix spike recovery. Samples FB-25 and FB-26 were qualified as estimated for indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,i)perylene due to the CCAL recovery. Samples analyzed 12/29/00 were qualified as estimated for n-nitrosodimethylamine, 2,4-dinitrophenol, 4,6-dinitro-2-methylphenol and benzidine; samples analyzed 12/30/00 were qualified as estimated for

2,2'oxybis(1-chloropropane), hexachlorocyclopentadiene, 2,4-dinitrophenol, , 4,6-dinitro-2-methylphenol, benzo(b)fluoranthene and benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – All compounds in sample SB-C11-4-20(0-1) were qualified as estimated due to the surrogate recovery. Sample SB-E10-618A-04(0-0.5) was qualified as estimated for 2,4-dinitrotoluene due to the column percent difference exceeding 25%. Sample SB-C11-27-03(0-0.5) was qualified as estimated for 1,3-dinitrobenzene, nitrobenzene, 2-nitrotoluene and 2,4-dinitrotoluene; and qualified as 'R' for 2-amino-4,6-dinitrotoluene and 4-amino-2,6-dinitrotoluene due to the column percent difference. Sample SB-C11-4-02(0-1) was qualified as 'R' for 1,3-dinitrobenzene and with a 'J' qualification for 2,4-dinitrotoluene due to the column percent difference.

TPH/TOC/NC - No qualification of data.

Metals – Sample SB-C11-4-09(0-1.5) was qualified as estimated for antimony, selenium, arsenic and mercury due to the matrix spike recovery. Sample FB-26 was qualified as 'U' for copper and sample FB-25 was qualified as 'U' for chromium, copper and lead due to blank contamination.

Other Comments – Field duplicate precision was not met for zinc for pair SB-D10-2227E-01(0-2)/DUP.

SDG 9911112

Volatiles – NA

Semivolatiles – Sample FB-24 was qualified as estimated for all compounds due to the missed holding time. Samples analyzed 12/28/99 were qualified as estimated for hexachlorocyclopentadiene, indeno(1,2,3-cd)pyrene and dibenz(a,h)anthracene; samples analyzed 12/30/99 were qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), hexachlorobutadiene, hexachlorocyclopentadiene, hexachlorobenzene, pyrene, 3,3'-dichlorobenzidine and di-n-octylphthalate; samples analyzed 12/31/99 were qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), pyrene, butylbenzene, 3,3'-dichlorobenzidine, bis(2-ethylhexyl)phthalate, di-n-octylphthalate, benzo(g,h,i)perylene, indeno(1,2,3-cd)pyrene and dibenz(a,h)anthracene, due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-B11-11-05(0-0.5) was qualified as estimated for 2-amino-4,6-dinitrotoluene due to the LCS recovery. Sample SB-C11-12-02(0-1) was qualified as estimated for 4-amino-2,6-dinitrotoluene and sample SB-B11-11-05(0-0.5) for 2,4-dinitrotoluene and nitrobenzene, due to the column percent difference exceeding

25%. Sample SB-B11-11-05(0-0.5) was qualified with and 'R' for 2-amino-4,6-dinitrotoluene and 4-amino-2,6-dinitrotoluene due to the column percent difference exceeding 90%.

TPH/TOC/NC - Sample SB-C11-N3-03(0-1) was originally reported as 147000 mg/Kg for TOC. The correct value is 14700 mg/Kg. The laboratory was contacted and the lab noted that the raw data was incorrect. The correct value is 147000 and remains unchanged in the LIMS form.

Metals – Antimony was qualified as 'U' in samples SB-D9-9108-01(0-0.5), SB-D09-N1-03(0-0.5), SB-C11-2223-01(0-1), SB-C11-N3-03(0-1), SB-D9-4-03(0-1) and SB-D9-4-03(0-1)DUP and selenium was qualified as 'U' for samples SB-C11-2223-01(0-1), SB-41-2223-03(0-2), SB-C11-23-02(0-1), SB-C11-N3-03(0-1), SB-C11-15-05(0-2), SB-D9-9108-01(0-0.5), SB-D9-9108-04(0-1), SB-D9-9108-07(0-1) and SB-D9-9108-10(0-0.5), due to blank contamination. Sample SB-D9-9108-07(0-1) was qualified as estimated for antimony, arsenic and copper due to the matrix spike recovery.

Other Comments – Field blank FB-24 contained lead (1.5 ug/L). Field duplicate precision was not met for chromium for pair SB-D9-4-03(0-1)/DUP and precision for benzo(a)pyrene, lead and selenium were not met for pair SB-C11-12-02(0-1)/DUP.

SDG 9912183

Volatiles – NA

Semivolatiles – Sample SB-G7-2149-04(0-1) was qualified as estimated for all compounds due to a holding time exceedance. Samples SB-G7-2164-05(0-0.5), SB-G7-2115-04(0-1), SB-G7-2115-07(0-1), SB-G7-2149-04(0-0.5), SB-G7-2149-04(0-1)DUP, SB-G9-2108-02(0-2), SB-F9-5-03(0-1.25), SB-G7-2115-06(0-0.5), SB-G7-2149-04(0-1), SB-F9-16-04(0-1), SB-F9-2105A-01(0-1) and SB-F9-8188-01(0-1) were qualified as estimated for all compounds, due to surrogate recovery. Samples SB-F9-C1-04(0-1.25), SB-G9-A11-02(0-0.75), SB-F9-16-05(0-1.5)DUP, SB-F9-16-04(0-1), SB-F9-2105A-01(0-1) and SB-F9-2188-01(0-1) were qualified with a 'U' for di-n-butylphthalate due to blank contamination. All soil samples were qualified as estimated for all compounds due to poor matrix spike and LCS recoveries. Compounds specific to internal standards that were outside control limits were qualified as estimated for samples SB-F9-16-04(0-1), SB-F9-2105A-01(0-1), SB-G7-2164-05(0-0.5), SB-G7-2115-04(0-1) and SB-G7-2149-01(0-0.5). Sample FB-45 was qualified as estimated for 2,2'oxybis(1-chloropropane), 2,4-dinitrophenol, benzidine and 4,6-dinitro-2-methylphenol due to the CCAL. Samples analyzed 2/9/00 were also qualified as estimated for hexachloroethane, hexachlorobutadiene, 1,2-diphenylhydrazine, hexachlorobenzene, bis(2-ethylhexyl)phthalate, di-n-octylphthalate and benzidine due to the CCAL recovery of these compoounds.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Samples SB-F9-5-03(0-1.25), SB-F9-8188-01(0-1), SB-G7-2115-04(0-1), SB-G7-2115-07(0-1) and SB-G7-2115-06(0-0.5) were qualified as estimated for 2,4,6-trinitrotoluene and 2,4-dinitrotoluene due to the surrogate recovery. Samples SB-F9-5-03(0-1.25), SB-F9-8188-01(0-1), SB-G7-2115-04(0-1), SB-G7-2115-07(0-1) and SB-G7-2115-06(0-0.5) were qualified as estimated for 1,4,6-trinitrotoluene due to the column percent difference exceeding 25%.

TPH/TOC/NC - Sample SB-F9-5-03(0-1.25) was qualified as estimated for NC due to the matrix spike results. All soils were qualified as estimated for NC due to the laboratory duplicate precision.

Metals – Samples SB-F9-5-03(0-1.25), SB-F9-2105A-01(0-1), SB-F9-C1-04(0-1.25), SB-G7-2164-05(0-0.5), SB-G7-2115-07(0-1), SB-G7-2149-04(0-1)DUP, SB-G7-2108-02(0-2), SB-F9-7-03(0-1), SB-G9-A11-02(0-0.75), SB-F9-16-05(0-1.5), SB-F9-16-05(0-1.5)DUP and SB-F9-2109D-03(0-1) were qualified with a 'U' for cadmium; samples SB-G7-2164-01(0-1.5), SB-G7-2164-05(0-0.5), SB-G7-2115-06(0-0.5), SB-G7-2115-07(0-1), SB-G7-2149-04(0-1), SB-G7-2149-01(0-0.5), SB-G7-2149-04(0-1)DUP, SB-G7-2108-02(0-2), SB-G9-2108-05(0-1) and SB-F9-C1-04(0-1.25) were qualified with a 'U' for antimony; samples SB-G7-2164-05(0-0.5), SB-G7-2115-06(0-0.5), SB-G7-2115-07(0-1), SB-G7-2149-01(0-0.5), SB-G9-2108-02(0-2), SB-F9-16-05(0-1.5)DUP, SB-F9-2109D-03(0-1), SB-F9-8188-01(0-1) and SB-F9-2105A-01(0-1) were qualified with a 'U'

for silver due to blank contamination. Samples SB-F9-16-05(0-1.5)DUP and SB-F9-5-03(0-1.25) were qualified as estimated for antimony and sample SB-F9-5-03(0-1.25) was also qualified as estimated for arsenic due to matrix spike recovery of these analytes. All soil samples were qualified as estimated for mercury due to the laboratory duplicate precision.

Other Comments – Copper was outside precision limits in field duplicate pair SB-G7-2149-04(0-1).

SDG 9911114

Volatiles – Sample FB-23 was qualified as estimated for chloroform, 1,2-dichloroethane, 1,1,1-trichloroethane, carbon tetrachloride and dibromochloropropane due to the LCS recovery of these compounds. All samples in the SDG were qualified as 'U' for methylene chloride due to blank contamination. Sample SB-E11-207B-04(6) was qualified with a 'U' for naphthalene due to blank contamination. Sample FB-23 was qualified as estimated for acrolein due to the ICAL, and acrylonitrile, 1,1,2-trichloroethane, 1,3-dichlorobenzene, 1,2,4-trichlorobenzene, 1,4-dichlorobenzene, hexachlorobutadiene, naphthalene, 1,2-dichlorobenzene and 2-chloroethylvinyl ether for the CCAL recoveries of these compounds. All soil samples were qualified as estimated for acrolein and methylene chloride, due to the CCAL.

Semivolatiles – All soils in the SDG were qualified as estimated for n-nitroso-di-n-propylamine due to the LCS recovery. Sample FB-23 was qualified as estimated for indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,i)perylene, due to the CCAL recovery. Soil samples were qualified as estimated for n-nitrosodimethylamine, 2,4-dinitrophenol due to the CCAL. Samples analyzed on 12/29/99 were also qualified as estimated for 4,6-dinitro-2-methylphenol due to the CCAL.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-B11-2044-06(0-0.67) was qualified as estimated for all compounds due to the surrogate recovery. Samples SB-B11-2044-03(0-0.5) and SB-B11-2044-06(0-0.67) were qualified as estimated for 2-amino-4,6-dinitrotoluene due to the LCS recovery. Sample SB-B11-2044-03(0-0.5) was qualified as 'R' for 4-amino-2,4-dinitrotoluene and as estimated for 2-amino-4,6-dinitrotoluene, due to the column percent difference. Sample SB-B11-2044-06(0-0.67) was qualified as 'R' for 4-amino-2,6-dinitrotoluene, due to the column percent difference exceeding 90%.

TPH/TOC/NC - Nitrocellulose was qualified as estimated in all soils due to the matrix spike and LCS recoveries.

Metals – Sample FB-23 was qualified with a 'U' for chromium and lead due to blank contamination. Samples SB-C11-2233D-06(0-2), SB-C11-10-01(0-2), SB-**C**11-6-03(0-1) and SB-C11-2044-03(0-0.5) were qualified with a 'U' for antimony due to blank contamination. Sample SB-C11-24-04(0-2)MS/MSD was qualified as estimated for

antimony and chromium due to the matrix spike recoveries of these analytes. All soil samples in the SDG were qualified as estimated for chromium due to the laboratory duplicate precision.

Other Comments – Field blank FB-23 contained nitrocellulose (0.139 mg/L). Chromium precision was not met for field pair SB-B11-2044-04(0-1.25).

SDG 0003120

Volatiles – NA

Semivolatiles – Sample FB-48 was qualified as estimated for 2,2'oxybis(1-chloropropane) due to the CCAL. Also, samples analyzed on 4/6/00 were qualified as estimated for 2,2'oxybis(1-chloropropane) and n-nitroso-di-n-propylamine; on 4/7/00 for ,2'oxybis(1-chloropropane), n-nitroso-di-n-propylamine, n-nitrosodimethylamine, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene, benzo(g,h,I)perylene and benzidine; on 4/10/00 for 2,2'oxybis(1-chloropropane), due to the CCAL.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Samples SB-F10-2096-06(0-1) and SB-E9-2296-05(0-1) were qualified as estimated for all compounds due to samples being extracted outside of the holding time. Samples SB-F10-2097-08(0-1) and SB-F9-2109C-01(0-0.75) were qualified as estimated for 2,4-dinitrotoluene, sample SB-F8-2144-04(0-1.5) for 2,4,6-trinitrotoluene and sample SB-F9-2106-04(0-1) for 1,3-dinitrobenzene due to the column percent difference exceeding 25%.

TPH/TOC/NC - All samples in the SDG were qualified for as estimated for nitrocellulose due to the LCS recovery.

Metals – The laboratory notes that antimony, selenium, silver and thallium reporting limits were slightly higher than specified in the QAPP. Data were not qualified. All antimony results were qualified as estimated due to the matrix spike recovery. All soil samples were qualified as estimated for zinc due to the serial dilution results. Silver was qualified as estimated for sample SB-F9-2109C-05(0-0.5) due to the matrix spike. All soils in the SDG were qualified as estimated for arsenic, chromium, copper, lead, zinc and nickel due to the laboratory duplicate precision. Sample FB-48 was qualified as 'U' for copper due to blank contamination.

Other Comments – Samples SB-F8-2107-05(0-0.5), SB-F8-2107-05(0-0.5)DUP and SB-F8-2107-02(0-1) were on the COC but were not analyzed in this SDG. The laboratory remarked via e-mail that the samples are in SDG 0003122 due to the current package containing over 20 samples for a single analysis. Field precision was not met for arsenic, chromium, copper, lead and zinc. Field blank FB-48 contained zinc at 4.9 ug/L.

SDG 0003122/0003131

Volatiles – NA

Semivolatiles – Sample SB-F8-2107-05(0-0.5) was qualified as estimated for 4-chloro-3-methylphenol due to the matrix spike recovery. Compounds associated with internal standards that were outside control limits for samples SB-F10-2356-06(0-2), SB-F8-2107-01(0-1), SB-F8-2107-01(0-1) and SB-F8-2107-05(0-0.5)DUP were qualified as estimated. Samples analyzed on 4/5/00 were qualified as estimated for 2,2'oxybis(1-chloropropane) and hexachlorocyclopentadiene; on 4/10/00 for 2,2'oxybis(1-chloropropane; and on 4/14/00 for hexachlorocyclopentadiene due to the CCAL. The laboratory noted in the case narrative that several samples could not be concentrated down to the final extract volume, thus several samples are reported at elevated reporting limits.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Samples SB-F8-2107-05(0-0.5), SB-F8-2107-05(0-0.5)DUP, SB-F8-2107-01(0-1) and SB-F10-2356-06(0-2) were qualified as estimated for all detected 8330 compounds due to the surrogate recovery. The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: 2,4,6-trinitrotoluene for samples SB-F8-2107-05(0-0.5), SB-F8-2107-05(0-0.5)DUP, SB-F8-2107-01(0-1); nitrobenzene for SB-F10-2356-06(0-2). Samples SB-F8-2107-05(0-0.5)DUP and SB-F8-2107-01(0-1) were qualified as estimated for 2,4-dinitrotoluene due to the column percent difference exceeding 25%.

TPH/TOC/NC - All soil samples were qualified as estimated for nitrocellulose due to the LCS.

Metals – Sample SB-F10-2365-07(0-1) was qualified as estimated for antimony, chromium, selenium, silver and zinc due to the low matrix spike recovery of these analytes. All soil samples in the SDG were qualified as estimated for nickel and chromium due to the laboratory duplicate precision. Sample FB-49 was qualified as 'U' for copper and cadmium due to blank contamination.

Other Comments – Field blank FB-49 contained nitrocellulose at 0.180 mg/L. The field duplicate pair SB-F8-2107-05(0-0.5)/DUP did not compare for 2,4-dinitrotoluene, sample SB-F8-2107-05(0-0.5) contained 2,4-dinitrotoluene at 50000 ug/Kg while the DUP was BQL. Possible carryover may exist since the sample was analyzed just after another sample containing a high concentration of 2,4-DNT.

SDG 0003106

Volatiles –NA

Semivolatiles – All soils in the SDG were qualified as estimated for 4-nitrophenol due to the matrix spike and LCS recovery of this compound. Samples analyzed on 3/30/00 were qualified as estimated for 3,3'dichlorobenzidine, and samples analyzed 4/5/00 were qualified as estimated for n-nitrosodimethylamine and 1,2-diphenlyhydrazine due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Samples SB-F9-2105-05(0-0.5), SB-F10-8564-01(0-0.5) and SB-F10-8237-04(0-1) were qualified as estimated for all 8330 compounds due to the extraction holding time exceedance. Samples SB-E9-2161-04(0-2), SB-E9-610-04(0-1), SB-F9-2105-01(0-1), SB-F9-A6-01(0-1), SB-F9-9-01(0-0.5) and SB-F9-9-05(0-0.5)DUP were qualified as estimated for 2,4-dinitrotoluene; samples SB-F10-2323-02(0-1), SB-F9-2105-05(0-0.5) and SB-F9-A6-01(0-1) were qualified as estimated for 2,4,6-trinitrotoluene, and sample SB-F9-2105-01(0-1) was qualified as 'R' for 2,4,6-trinitrotoluene due to the analytical column percent difference. Sample SB-F9-2105-05(0-0.5) was qualified as estimated for nitroglycerine due to the surrogate recovery.

TPH/TOC/NC - All samples in the SDG were qualified as estimated for nitrocellulose due to the LCS recovery. All soil samples were qualified as estimated for nitrocellulose due to the laboratory duplicate precision.

Metals – All soil samples were qualified as estimated for antimony due to the matrix spike and LCS recovery of the analyte. All soil samples were qualified as estimated for arsenic, chromium, lead and nickel due to the laboratory duplicate precision. Sample FB-47 was qualified with a 'U' for copper and zinc due to blank contamination.

Other Comments – Field duplicate precision was not met for field pair SB-F9-9-05(0-0.5)/DUP for nitrocellulose and for pair SB-E9-2161-04(0-2) for lead. Antimony, selenium, silver and thallium reporting limits were higher than those specified in the QAPP.

SDG 003103

Volatiles – NA

Semivolatiles – Sample SB-E10-2101-12(0-1) was qualified as estimated for acenaphthene, due to the LCS recovery. Samples analyzed on 4/5/00 and 4/6/00 were qualified as estimated for n-nitrosodimethylamine and 1,2-diphenylhydrazine due to the CCAL.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Samples SB-E10-2101-05(0-2)DUP, SB-F8-2116-07(0-1), SB-F9-567-05(0-0.5), SB-F9-567-05(0-0.5)DUP and SB-F8-2116-03(0-0.5) were qualified as estimated for nitroglycerine and sample SB-E10-2101-12(0-1) was qualified as estimated for 2,4-dinitrotoluene due to the surrogate recovery. Sample SB-F8-2116-03(0-0.5) was qualified as 'R' for 2,4,6-trinitrotoluene and as estimated for RDX and 2,4-dinitrotoluene; sample SB-F8-2116-07(0-1) with an 'R' for 2,4,6-trinitrotoluene; sample SB-F9-567-05(0-0.5)DUP as estimated for 2,4,6-trinitrotoluene and 2,4-dinitrotoluene; and SB-E10-2101-12(0-1) due to the column percent difference exceedances.

TPH/TOC/NC - No qualification of data.

Metals – All soil samples were qualified as estimated for antimony due to the matrix spike and LCS recovery of this analyte. Sample SB-F9-611-02(0-0.5) was qualified as estimated for arsenic and copper due to the matrix spike recovery. All soil samples were qualified as estimated for copper and mercury due to the laboratory duplicate precision. Sample FB-46 was qualified with a 'U' for copper and zinc due to blank contamination.

Other Comments – The reporting limits for antimony, selenium, silver and thallium were not met since the samples were prepared using a 2x dilution prior to analysis. Field duplicate precision was not met for pair SB-F9-567-05(0-0.5)/DUP for copper.

SDG 0003149

Semivolatiles – Sample SB-G7-8140-02(0-2)DUP was qualified as estimated for n-nitrosodimethylamine, 4-nitrophenol, 1,2-diphenylhydrazine, 3,3'dichlorobenzidine and benzidine due to the CCAL.

Metals – No qualification of data.

Other Comments – The COC contained samples that were not submitted with this SDG. The laboratory was contacted and the samples are in SDG.

SDG 0003141

Volatiles – NA

Semivolatiles – Pentachlorophenol was qualified as estimated for sample SB-F11-2016-01(0-1.5) due to the matrix spike recovery. Samples analyzed 4/5/00 were qualified as estimated for 2,2'oxybis(1-chloropropane) and hexachlorocyclopentadiene; on 4/11/00 as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), 4-nitrophenol, 1,2-diphenylhydrazine, hexachlorobenzene and benzidine; on 4/12/00 for n-nitrosodimethylamine, 4-nitrophenol, 1,2-diphenylhydrazine, 3,3'dichlorobenzidine and benzidine due to the CCAL recovery.

Pesticides/PCBs – Sample sample SB-F9-3-01(0-1.5) was qualified as estimated for AR1016 and AR1260 due to the matrix spike recovery.

Explosives/ Nitroglycerine – Samples SB-F11-2016-06(0-2) and SB-E9-2-03(0-1) were qualified as estimated for 2,4,6-trinitrotoluene due to the surrogate recovery. Sample SB-F8-2112-08(0-1.5) was qualified as 'R' for 2,4,6-trinitrotoluene; samples SB-F11-2016-06(0-2), SB-F11-2016-07(0-2) and sample SB-E9-2-03(0-1) as estimated for 2,4,6-trinitrotoluene; sample SB-G9-7-05(0-1) and sample SB-G9-7-05(0-1)DUP as estimated for 2,4-dinitrotoluene due to the column percent difference exceedances.

TPH/TOC/NC - All samples in the SDG were qualified as estimated for nitrocellulose due to the LCS and matrix spike recoveries.

Metals – Sample SB-F11-2016-01(0-1.5) was qualified as estimated for antimony, arsenic and zinc due to the matrix spike recovery.

Other Comments – Sample FB-50 contained copper at 2.1 ug/L. Field duplicate precision was not met for copper and n-nitrosodimethylamine for pair SB-G9-7-05(0-1)DUP, and for lead for pair SB-E10-2097-07(0-2).

SDG 0004001

Volatiles – NA

Semivolatiles – Compounds associated with internal standards for samples SB-H7-15-02(0-1.5), SB-H7-4-04(0-1.5), SB-H7-8131-04(0-1) and SB-H7-8131-04(0-1)DUP were qualified as estimated due to the internal standard criteria not being met. Samples analyzed on 4/13/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), hexachlorocyclopentadiene, 1,2-diphenylhydrazine, acenaphthene and 3,3'dichlorobenzene due to the CCAL recovery. Samples analyzed on 4/18/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane) and 4,6-dinitro-2-methylphenol due to the CCAL recovery. Sample SB-H7-8131-04(0-1) was reported as BQL for 2,4-dinitrotoluene when the raw data indicated that the compound was detected at 47 J ug/Kg. The laboratory was contacted and data was resubmitted.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Samples SB-H7-8145-03(0-1.5), SB-I6-E3-05(0-1.5), and SB-H7-8131-04(0-1) were qualified as estimated for RDX; sample SB-H7-4-04(0-1.5) was qualified as estimated for nitrobenzene; sample SB-I7-8-03(0-2) was qualified as estimated for HMX, and sample SB-H7-8131-04(0-1)DUP was qualified as estimated for RDX, HMX and 2,4,6-trinitrotoluene due to the column percent difference.

TPH/TOC/NC - All soils in the SDG were qualified as estimated for nitrocellulose due to the LCS recovery.

Metals – All soils in the SDG were qualified as estimated for antimony due to the LCS recovery. Also, all soil samples were qualified as estimated for arsenic, cadmium and lead due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for mercury, chromium, bis(2ethylhexyl)phthalate, nitrocellulose and di-n-butylphthalate for pair SB-H7-8131-04(0-1)/DUP.

SDG 0003129

Volatiles – NA

Semivolatiles – Samples analyzed on 4/7/00 were qualified as estimated for n-nitrosodimethylamine, 1,2-diphenylhydrazine and di-n-butylphthalate; samples analyzed 4/10/00 were qualified as estimated for n-nitrosodimethylamine, 1,2-diphenylhydrazine and benzidine; samples analyzed on 4/10/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), 4-nitrophenol, 1,2-diphenylhydrazine, hexachlorobenzene and benzidine, due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Samples SB-E9-2153-02(0-1.5), SB-F8-2118-02(0-1), SB-F8-2118-02(0-1)DUP and SB-F8-9-02(0-0.5) were qualified with an 'R' for 2,4,6-trinitrotoluene; samples SB-F8-2118-02(0-1)DUP and SB-F8-2118-10(0-1) were qualified as estimated for 2,4-dinitrotoluene; sample SB-E9-2153-02(0-1.5) was qualified as 'R' for nitrobenzene due to the column percent difference.

TPH/TOC/NC - All samples in the SDG were qualified as estimated for nitrocellulose due to the LCS and matrix spike recoveries.

Metals – All soil samples were qualified as estimated for antimony due to the LCS recovery. Arsenic and zinc were qualified as estimated in sample SB-F8-1-02(0-2) due to the matrix spike recovery.

Other Comments – Field duplicate precision was not met for nitrocellulose for pair SB-F8-2118-02(0-1)/DUP. Several samples in this SDG were not reported in this package due to the total number of samples for an analysis exceeding 20 per SDG. The remaining samples are in another data package.

SDG 0003128

Volatiles – NA

Semivolatiles – All soil samples were qualified as estimated for 4-nitrophenol due to the LCS and matrix spike recoveries. Samples analyzed on 4/6/00 were qualified as

estimated for benzidine; samples analyzed 4/7/00 were qualified as estimated for 3,3'-dichlorobenzidine; samples analyzed on 4/15/00 were qualified as estimated for 2,4-dinitrophenol, due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-F9-2104-03(0-0.5) was qualified with an 'R' for 2,4,6-trinitrotoluene; samples SB-F9-2105B-01(0-1), SB-E10-615-04(0-0.74), and SB-E10-615-04(0-0.75) were qualified as estimated for 2,4-dinitrotoluene due to the column percent difference.

TPH/TOC/NC - All soil samples were qualified as estimated for nitrocellulose due to the LCS and matrix spike recoveries.

Metals – All soil samples were qualified as estimated for antimony due to the LCS and matrix spike recoveries. All soil samples were qualified as estimated for copper due to the laboratory duplicate precision.

Other Comments – The data for three samples on the COC were not reported in this SDG. Field precision was not met for 2,4-dinitrotoluene for pair SB-E10-615-04(0-0.75).

SDG 0003146

Volatiles – NA

Semivolatiles – All compounds for sample SB-H7-8134-02(0-1.5) were qualified as estimated due to the surrogate recovery. Compounds associated with specific internal standards were qualified as estimated for samples SB-G6-8129-05(0-0.5), SB-H7-8134-02(0-1.5) and SB-H7-9-04(0-1) due to the internal standard recoveries. Samples analyzed on 4/24/00 were qualified as estimated for di-n-octylphthalate or benzo(g,h,I)perylene; samples analyzed 4/28/00 were qualified as estimated for n-nitrosodimethylamine, hexachloroethane, 4,6-dinitro-2-methylphenol, dibenz(a,h)anthracene and 1,2-diphenylhydrazine due to the CCAL recovery.

Pesticides/PCBs – Sample SB-G7-8139-08(0-0.5) was qualified as estimated for all PCB compounds due to the surrogate recovery.

Explosives/ Nitroglycerine – Sample SB-H7-13-05(0-1)DUP was qualified as estimated for 2,4-dinitrotoluene, sample SB-G7-8139-02(0-1) was qualified as 'R' for 2,4,6-trinitrotoluene, and sample SB-G7-8139-02(0-1) was qualified as estimated for nitrobenzene due to the column percent difference.

TPH/TOC/NC - All samples were qualified as estimated for nitrocellulose due to the LCS recovery.

Metals – All soil samples were qualified as estimated for antimony due to the matrix spike and LCS recoveries. Sample SB-G6-3-01(0-2) was qualified as estimated for copper due to the matrix spike recovery. All samples were qualified as estimated for arsenic and copper due to the laboratory duplicate precision. Sample FB-51 was qualified as 'U' for beryllium due to blank contamination.

Other Comments – Field duplicate precision was not met for nickel, lead and antimony for pair SB-H7-13-05(0-1)/DUP.

SDG 0003162

Volatiles – All compounds in samples SB-G6-8243-03(0.5), SB-H6-8120-05(0.5) and SB-H6-8120-06(0.5) were qualified as estimated due to the surrogate recovery. Compounds associated with the internal standard that was outside acceptance limits were qualified as estimated in sample SB-H6-8120-06(0-1.5). Trichloroethene and 1,1-dichloroethene were qualified as estimated in sample SB-F10-2162-04(0.5) due to the matrix spike and LCS recoveries. Samples analyzed on 4/12/00 were qualified as estimated for hexachlorocyclopentadiene; samples analyzed 4/24/00 were qualified as estimated for methylene chloride; samples analyzed 4/13 were qualified as estimated for methylene chloride, trans-1,2-dichloroethene, 1,1-dichloroethane, acrylonitrile and 2-chloroethylvinyl ether due to the CCAL recovery. Several samples in the SDG were qualified as 'U' for methylene chloride, bromomethane, naphthalene and chloroform due to blank contamination.

Semivolatiles – Sample SB-H7-8145-01(0-2) was qualified as estimated for n-nitrosodimethylamine and 4-nitrophenol due to the matrix spike recovery. Compounds associated with the internal standard that was outside acceptance limits were qualified as estimated in sample SB-H6-8130-06(0-1.5). Samples analyzed on 4/13/00 were qualified as estimated for hexachlorocyclopentadiene; samples analyzed 4/24/00 were qualified as estimated for 3,3'-dichlorobenzidine, benzo(g,h,I)perylene and benzidine; samples analyzed 4.27 were qualified as estimated for n-nitrosodimethylamine, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,I)perylene due to the CCAL recovery. Several samples were qualified as 'U' for di-n-butylphthalate and bis(2-ethylhexyl)phthalate due to blank contamination. There were a few samples that had elevated concentrations of these contaminants, and therefore could not be qualified with a 'U'.

Pesticides/PCBs – Samples SB-H6-8520-01(0-1) and SB-H6-8520-02(0-1) were reported as dilutions instead of the original analysis and a 'D' qualifier for high concentrations of target compounds that were analyzed at dilutions. The laboratory was contacted and the data with the lower detection limit was reported on the revision.

Explosives/ Nitroglycerine – Sample SB-H7-8142-05(0-1) had 110,000 ug/Kg HMX when the laboratory analyzed it undiluted. A blank was not analyzed after this sample and HMX was reported in the preceeding sample, SB-H7-8145-01(0-2) at 350J ug/Kg. This detection is considered suspect due to the fact that the laboratory failed to analyze a

blank prior to running this sample. All compounds in sample SB-F9-1-04(0-1) with the exception of 2,4-dinitrotoluene and nitrobenzene were qualified as estimated due to the surrogate recovery. All compounds in samples SB-F9-1-04(0-1)DUP, SB-H7-8145-01(0-2) and SB-H6-8130-06(0-1.5) were qualified as estimated due to the surrogate recovery. The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: HMX, 2,4,6-trinitrotoluene and RDX for sample SB-H6-8130-03(0-1);m 2,4,6-trinitrotoluene and RDX for sample SB-H6-8130-06(0-1.5), 2,4,6-trinitrotoluene for sample SB-H6-8116-01(0-1); 2,4,6-trinitrotoluene and 2,4-dinitrotoluene for sample SB-H7-8142-05(0-1); nitrobenzene for sample SB-F9-1-04(0-1). The following compounds were qualified as estimated for the indicated samples due to the column percent difference exceeding 25%: 2,4-dinitrotoluene for sample SB-H6-8130-03(0-1), 2,4-dinitrotoluene for sample SB-H6-8130-06(0-1.5), RDX for sample SB-H7-8142-05(0-1), HMX, RDX and 4-amino-2,6-dinitrotoluene for sample SB-H7-8144-05(0-1.5), nitrobenzene and 2,4-dinitrotoluene for sample SB-F9-1-04(0-1)DUP and RDX for sample SB-H7-8145-01(0-2). The nitroglycerine results for samples SB-H6-8127-02(0-1.5) and SB-H7-8144-05(0-1.5) were reported as detects when the raw data indicated the compound was BQL. The LIMs forms for these samples were corrected by the laboratory and resubmitted.

TPH/TOC/NC - Nitrocellulose was qualified as estimated for all soil samples in the SDG due to the LCS and matrix spike recoveries.

Metals – Sample SB-H7-8145-01(0-2) was qualified as estimated for antimony, arsenic, copper, selenium and zinc due to the LCS recoveries for these analytes. All soil samples were qualified as estimated for mercury due to the laboratory duplicate precision. Sample FB-52 was qualified as 'U' for zinc for blank contamination.

Other Comments – Field duplicate precision was not met for nitrocellulose and copper for pair SB-F9-1-04(0-1). Field blank FB-52 contained copper (1.4 ug/L).

SDG 0004037

Volatiles – The majority of the soil samples in this SDG were qualified as estimated for all compounds due to surrogate recovery. Compounds associated with the internal standard that was outside acceptance limits were qualified as estimated in samples SB-F10-5-01(0.5), SB-E9-2296A-01(0.5), SB-F10-3-01(0.5), SB-E9-2296C-01(0.5), SB-H7-8252-01(0.5) and SB-F10-3-07(0.5). Samples analyzed on 4/14/00 were qualified as estimated for chloromethane, acrolein, acrylonitrile, hexachlorobutadiene and napthalene due to the CCAL recovery. All samples were qualified with a 'U' for methylene chloride due to blank contamination. The trip blank was used to qualify FB-53 with a 'U' for tetrachloroethene due to contamination. The field blank was also used to qualify the trip blank as 'U' for this compound.

Semivolatiles – Samples SB-H6-8152-04(0-1), SB-H6-8152-05(0-2), SB-H6-8152-07(0-1.5), SB-H6-8122-01(0-0.75), SB-H6-9219-05(0-1.5) and SB-G6-2-03(0-1) were

qualified as estimated for all compounds due missed holding times for extraction. Compound 4-nitrophenol was qualified as estimated in sample SB-H6-9219-05(0-1.5) due to the matrix spike and LCS recovery. Samples analyzed on 4/27/00 were qualified as estimated for n-nitrosodimethylamine, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,i)perylene; samples analyzed 4/28/00 were qualified as estimated for n-nitrosodimethylamine, hexachloroethene, 4-nitrophenol, 4,6-dinitro-2-methylphenol, 1,2-diphenylhydrazine and dibenz(a,h)anthracene; samples analyzed 4/29/00 were qualified as estimated for benzo(g,h,i)perylene, dibenz(a,h)anthracene, n-nitrosodimethylamine, hexachloroethene, hexachlorobutadiene, hexachlorocyclopentadiene, 4-nitrophenol, 4-bromophenyl phenylether, hexachlorobenzene, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,i)perylene due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The nitroglycerin results for several samples were reported with a 'U' in the raw data and were reported as detects in the LIMs results. The laboratory was contacted and the sample data was re-submitted with the results being 'BQL'….

TPH/TOC/NC - All soil samples in the SDG were qualified as estimated for nitrocellulose due to the matrix spike and LCS recoveries.

Metals – Antimony was qualified as 'U' in several samples due to the blank contamination. Sample SB-H6-9219-05(0-1.5) was qualified as estimated for antimony, chromium and lead due to the matrix spike recovery. All soil samples in the SDG were qualified as estimated for chromium, lead and nickel due to the laboratory duplicate precision. Sample FB-53 was qualified as 'U' for zinc due to method blank contamination.

Other Comments – Field blank FB-53 contained bromomethane (3 ug/L) and chloromethane (5 ug/L). Field duplicate precision was not met for selenium for pair SB-H7-8248-02(0-1)/DUP.

SDG 0004074

Volatiles – NA

Semivolatiles – No qualification of data.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - No qualification of data.

Metals – All soil samples in the SDG were qualified as 'U' for mercury due to blank contamination. All soils were qualified as estimated for antimony due to the LCS and matrix spike recoveries. Lead was qualified as estimated in sample SB-N5-8-02(0-1) due to the matrix spike recovery. Sample FB-55 was qualified with a 'U' for zinc due to blank contamination.

Other Comments – NA

SDG 0004097

Volatiles – NA

Semivolatiles – Compounds associated with the internal standard that was outside acceptance limits were qualified as estimated in samples SB-K6-2-03(0-1), . SB-L6-9-01(0-1), SB-L5-6-02(0-1), SB-J5-5-04(0-1.5) and SB-J6-8167-02(0-1.5). Samples analyzed on 5/15/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'-oxybis(1-chloropropane), 1,2-diphenylhydrazine, bis(2-ethylhexyl)phthalate and di-n-octylphthalate; samples analyzed 5/16/00 were qualified as estimated for 2,2'-oxybis(1-chloropropane), 3,3'-dichlorobenzidine and benzidine; samples analyzed on 5/18/00 were qualified as estimated for benzidine due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: 4-amino-2,6-dinitrotoluene for sample SB-L5-8318-02(0-2)DUP; the following were qualified as estimated for the column percent difference exceeding 25%: 2,4-dinitrotoluene for samples SB-L5-8318-02(0-2), SB-J6-8133-05(0-2). and SB-L5-8318-02(0-2)DUP; nitrobenzene for sample SB-J5-5-04(0-1.5); RDX and 2,4-dinitrotoluene for sample SB-L5-6-03(0-2).

TPH/TOC/NC - All nitrocellulose samples were qualified as estimated due to the LCS and matrix spike recoveries.

Metals – Sample FB-57 was qualified as 'U' for lead and samples SB-L5-6-05(0-2) and SB-L5-6-10(0-1.5) were qualified as 'U' for cadmium, due to blank contamination. Sample SB-J6-8133-01(0-2) was qualified as estimated for antimony, arsenic, copper and selenium due to the matrix spike recovery.

Other Comments – Field duplicate precision was not met for pair SB-K6-9214-05(0-1)/DUP for nitrocellulose and for pair SB-L5-8318-02(0-2) for lead. Field blank FB-57 contained bis(2-ethylhexyl)phthalate (33 ug/L), beryllium (0.12 ug/L), chromium (1.6 ug/L), copper (28.2 ug/L) and nickel (2.4 ug/L).

SDG 0004070

Volatiles – NA

Semivolatiles – Samples analyzed 5/8/00 were qualified as estimated for hexachlorocyclopentadiene and 3,3'dichlorobenzidine; samples analyzed 5/10/00 were qualified as estimated for benzidine due to the continuing calibration.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: RDX and nitrobenzene for sample SB-L5-4-02(0-1); the following were qualified as estimated for the column percent difference exceeding 25%: 2,4-dinitrotoluene for sample SB-I6-8184-02(0-1.5); 4-amino-2,6-dinitrotoluene, 2-amino-4,6-dinitrotoluene and 2,4-dinitrotoluene for sample SB-L5-4-02(0-1).

TPH/TOC/NC - All samples were qualified as estimated for nitrocellulose due to the matrix spike and LCS recovery.

Metals – Samples SB-L5-10-05(0-2), SB-I5-4-03(0-1) and SB-I5-5-02(0-2) were qualified as 'U' for mercury due to blank contamination. All soil samples were qualified as estimated for antimony due to the matrix spike recovery. Selenium and zinc were qualified as estimated in sample SB-L5-4-02(0-1) due to the matrix spike recovery. All soil samples were qualified as estimated for copper and zinc due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for mercury, chromium and 2,4-dinitrotoluene for pair SB-H6-8246-01(0-1).

SDG 0004051

Volatiles – NA

Semivolatiles – Sample SB-I6-8175-04(0-1)DUP was qualified as estimated due to the surrogate recovery. All compounds associated with the internal standard for sample SB-H7-8176-01(0-1.5) were qualified as estimated. Samples analyzed 4/15/00 were qualified as estimated for 2,2'oxybis(1-chloropropane) and benzo(g,h,i)perylene; samples analyzed 4/29/00 were qualified as estimated for n-nitrosodimethylamine, hexachloroethane, hexachlorobutadiene, hexachlorocyclopentadiene, 4-nitrophenol, 4-bromophenyl phenylether, hexachlorobenzene, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene; samples analyzed 5/3/00 were qualified as estimated for 3,3'dichlorobenzidine and benzidine; samples analyzed 5/4/00 were qualified as estimated for bis(2-ethylhexyl)phthalate and benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – On the LIMs form, NG for sample SB-H7-8123A-05(0-1) was reported at a concentration of 2,400 ug/Kg. On the raw data form this result was 24,000 ug/Kg. The laboratory was contacted and the higher number was reported for the sample. All soil samples were qualified with an 'R' for tetryl due to the low LCS recovery. Sample SB-G7-E49-02(0-1) was qualified as estimated for nitrobenzene due to the column percent difference exceeding 25%.

TPH/TOC/NC - All soil samples were qualified as estimated for nitrocellulose due to the LCS and matrix spike recoveries.

Metals – All soils were qualified as estimated for antimony due to the LCS and matrix spike recovery. Sample SB-H7-8123A-05(0-1) was qualified as estimated for chromium and nickel due to the matrix spike recovery. All soil samples in the SDG were qualified as estimated for silver due to the laboratory duplicate precision. Sample FB-54 was qualified as 'U' for zinc due to blank contamination.

Other Comments – Field duplicate precision was not met for lead for pair SB-I6-8175-04(0-1)/DUP and for mercury for pair SB-H7-8176-01(0-1.5).

SDG 0004081

Volatiles – Sample SB-G9-9322-04(0-1) was qualified as estimated for bromomethane and sample Trip Blank was qualified as estimated for chloroethane, acrolein, acrylonitrile and hexachlorobutadiene due to the CCAL recovery. Sample SB-G9-9322-04(0-1) was qualified with a 'U' for bromomethane, methylene chloride and chloroform, and sample Trip Blank was qualified with a 'U' for methylene chloride, chloroform and toluene due to blank contamination.

Semivolatiles – Sample SB-G9-9322-04(0-1) was qualified as estimated for 2,2'oxybis(1-chloropropane), n-nitrosodimethylamine, 2,4-dimethylamine and benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-G9-9322-04(0-1) was qualified as estimated for tetryl and 2,4-dinitrotoluene, due to the column percent difference exceeding 25%.

TPH/TOC/NC - Sample SB-G9-9322-04(0-1) was qualified as estimated for nitrocellulose due to the matrix spike and LCS recovery.

Metals – Antimony was qualified as estimated in sample SB-G9-9322-04(0-1) due to the matrix spike recovery. Sample SB-G9-9322-04(0-1) was also qualified as estimated for copper and lead due to the laboratory duplicate precision.

Other Comments – Sample 'Trip Blank' contains 1,2,4-trichlorobenzene (1 ug/L), hexachlorobutadiene (1 ug/L), naphthalene (2 ug/L) and trichloroethene (2 ug/L).

SDG 0004072

Volatiles – NA

Semivolatiles – Compounds associated with internal standards that exceeded acceptance criteria were qualified as estimated for samples SB-M5-3-02(0-1) and SB-M5-3-04(0-1). Samples analyzed 5/11/00 were qualified as estimated for hexachlorocyclopentadiene and di-n-octylphthalate; samples analyzed 5/12/00 were qualified as estimated for hexachlorocyclopentadiene and benzidine; samples analyzed 5/10/00 were qualified as estimated for benzidine due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: RDX for sample SB-M5-3-02(0-1), 2,4,6-trinitrotoluene and RDX for sample SB-M5-3-17(0-0.75), RDX for samples SB-M5-3-19(0-0.75) and SB-M5-3-19(0-0.75)DUP; the following were qualified as estimated for the column percent difference exceeding 25%: 2,4-dinitrotoluene for sample SB-M5-3-02(0-1); 1,3-dinitrobenzene for sample SB-M5-3-17(0-0.75); 1,3-dinitrobenzene and 2,4-dinitrotoluene for sample SB-M5-3-19(0-0.75); 1,3-dinitrobenzene for sample SB-M5-3-19(0-0.75)DUP. Sample SB-M5-3-01(0-2) was qualified as estimated for 2,4-dinitrotoluene, and SB-M5-3-16(0-0.7) for RDX and nitrobenzene due to the surrogate recovery.

TPH/TOC/NC - Sample SB-M5-3-01(0-2) was reported as BQL for nitrocellulose in the LIMS, and the raw data has the sample result as 27,600 mg/Kg and 195,000 mg/Kg. The laboratory provided revised data. All nitrocellulose data was qualified as estimated due to missed holding times and low LCS recovery.

Metals – All samples were qualified as estimated for antimony due to the LCS recovery,and as estimated for beryllium, cadmium and lead due to the laboratory duplicate precision. Sample SB-N5-8-01(0-1) was qualified as estimated for selenium and chromium, and SB-G9-9322-04(0-1) was qualified as estimated for mercury, due to the matrix spike recovery. Samples SB-M5-3-04(0-1), SB-M5-3-17(0-0.751) and SB-M5-3-19(0-0.75) were qualified as estimated for mercury, due to missed holding times. Mercury was reported as 0.03 mg/Kg in sample SB-N4-2-02(0-2) and the RL was 0.04. The sample results should either be BQL or have a 'B' qualifier attached since the

mercury result was below the reporting limit. Revised data was submitted by the laboratory.

Other Comments – Field duplicate precision was not met for pair SB-M5-3-19(0-0.75)/DUP for di-n-butlyphthalate.

SDG 0004149

Volatiles – Sample SB-J6-942A-04(0.5) was qualified as estimated for all compounds due to the surrogate recovery. Samples analyzed 4/27/00 were qualified as estimated for acrylonitrile, methylene chloride, 2-chlorovinyl ether, 1,2-dichloroethane, cis-1,3-dichloropropene, 1,1,2-trichloroethane, tetrachloroethene, dibromochloromethane, bromodichloromethane, bromoform, 1,1,2,2-tetrachloroethane, hexachlorobutadiene and naphthalene due to the CCAL recovery. Methylene chloride and chloroform were qualified as estimated in samples which contained these compounds at concentrations less than five times the associated blank concentration.

Semivolatiles – Sample SB-I5-8-01(0-2) was qualified as estimated for 2-chlorophenol, due to the matrix spike recovery. Acenaphthene was qualified as estimated for samples SB-H5-938-01(0-1) and SB-J6-942A-04(0-2), due to the LCS recovery. Compounds associated with the internal standard that was outside the control limits was qualified as estimated for sample SB-I5-8-01(0-2). Samples analyzed 5/26/00 were qualified as estimated for hexachlorocyclopentadiene, hexachlorobutadiene and benzene; samples analyzed 5/27/00 were qualified as estimated for bis(2-chloroethyl)ether, pyrene, di-n-octylphthalate and benzidine due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - Samples FB-58 and SB-J6-8134-05(0-1) were qualified as estimated for nitrocellulose due to the LCS. All samples were qualified as estimated for nitrocellulose due to missed extraction holding times.

Metals – Sample SB-I5-8-01(0-2) was qualified as estimated arsenic, copper and zinc due to the matrix spike recovery. All soil samples were qualified as estimated for antimony because of the LCS, and for copper and lead due to the laboratory duplicate precision.

Other Comments – Field blank sample FB-58 contains copper (1.7 ug/L), nickel (2.2 ug/L) and zinc (10.1 ug/L).

SDG 0004080

Volatiles – All compounds for sample SB-I6-8171-06(0.5) were qualified as estimated due to the surrogate recovery. Several samples were qualified as 'U' for methylene chloride, bromomethane and chloroform due to blank contamination.

Semivolatiles – Compounds associated with the internal standard that was outside control limits for sample SB-L6-1-01(0-1.5) were qualified as estimated. Several compounds for FB-56 were qualified as estimated due to the CCAL recovery. Also, all soil samples were qualified as estimated for benzidine, due to the CCAL recoveries.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - All samples were qualified as estimated for nitrocellulose due to the LCS recovery and holding time exceedance.

Metals – All soil samples were qualified as estimated for antimony due to the LCS and matrix spike recoveries. Sample SB-M5-14-04(0-1) was qualified as estimated for arsenic and zinc due to the matrix spike recovery. All soil samples were qualified as estimated for arsenic, lead, mercury and zinc for the laboratory duplicate precision and beryllium for the serial dilution. Sample FB-56 was qualified with a 'U' for zinc due to blank contamination.

Other Comments – Field duplicate precision was not met for arsenic, copper and lead for pair SB-M5-15-01(0-1)/DUP, and for copper and zinc for pair SB-L5-2313-17(0-2)/DUP. Field blank FB-56 contained 1,2,4-trichlorobenzene (1 ug/L), naphthalene (1 ug/L) and tetrachloroethene (2 ug/L).

SDG 0005009

Volatiles – NA

Semivolatiles – Sample FB-62 was extracted outside holding time, thus was qualified as estimated for all compounds. Samples SB-I9-3-01(0-1), SB-J9-1-02(0-0.75), SB-J9-2142-04(0-1), SB-I8-8336-01(0-1.25), SB-J9-1-02(0-0.75) and SB-J9-2142-04(0-1) were qualified as estimated for pyrene and 2,4-dinitrotoluene due to the LCS recoveries. Compounds associated with the internal standard that was outside control limits were qualified as estimated for sample SB-J9-1-02(0-0.75). All soil samples were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, phenol, 2,2'oxybis(1-chloropropane), n-nitroso-di-n-propylamine, isophorone, hexachlorobutadiene and 3,3'-dichlorobenzidine due to the CCAL, and benzidine due to the ICAL.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine — No qualification of data.

TPH/TOC/NC - – No qualification of data.

Metals – All soil samples were qualified as estimated for antimony due to the LCS recovery. Sample SB-I9-3-13(0-1.5) was qualified as estimated for arsenic and selenium due to the method blank.

Other Comments – Field duplicate precision was not met for chromium and nickel for pair SB-I9-3-11(0-1.5)/DUP.

SDG 0004148

Volatiles – All samples were qualified as estimated due to missed holding times. All samples were qualified with a 'U' for several compounds due to blank contamination. Trichloroethene was qualified as estimated in samples SB-I5-7-05(0.5) and SB-H6-8247-02(0.5) due to the initial calibration. All samples were qualified as estimated for acrolein, acrylonitrile and 2-chloroethylvinyl ether due to the CCAL.

Semivolatiles – Sample SB-J6-2-03(0-2) was qualified as estimated for all compounds due to the surrogate recovery. Acenaphthene was qualified as estimated in samples SB-H7-8255-02(0-1) and SB-I6-8171A-02(0-1) due to the LCS recovery. All samples were qualified as estimated for benzidine due to the initial calibration. Samples analyzed 5/29/00 were qualified as estimated for n-nitrosodimethylamine and bis(2-ethylhexyl)phthalate; samples analyzed 5/30/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether and hexachlorocyclopentadiene; samples analyzed 5/31/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, 2,2'oxybis(1-chloropropane) and hexachlorocyclopentadiene due to the CCAL recovery.

Pesticides/PCBs – Samples SB-I5-1-02(0-1.5) and SB-I5-1-02(0-1.5)DUP were qualified as estimated for all PCBs due to the surrogate recovery.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: 2,4,6-trinitrotoluene, 1,3-dinitrobenzene and nitrobenzene for sample SB-I6-8132-05(0-0.5), 4-amino-2,6-dinitrotoluene for sample SB-J6-8133-09(0-2); the following were qualified as estimated for the column percent difference exceeding 25%: 2,4-dinitrotoluene for sample SB-I6-8132-05(0-0.5); nitrobenzene for sample SB-J6-2-03(0-2). Nitrobenzene was qualified as estimated for sample SB-J6-2-03(0-2) due to the surrogate recovery.

TPH/TOC/NC - All nitrocellulose results were qualified as estimated due to missed holding times.

Metals – All samples were qualified as estimated for antimony due to the LCS recovery. Thallium and zinc were qualified as estimated in sample SB-I6-8181-01(0-0.5) due to the

matrix spike. All samples were qualified as estimated for arsenic, beryllium, chromium, copper, lead, nickel and zinc due to the laboratory duplicate precision.

Other Comments – Arsenic, zinc, nitrocellulose and diethylphthalate field precision were not met for pair SB-J6-2-03(0-2)/DUP. Fluoranthene, pyrene, benzo(b)fluoranthene, benzo(a)pyrene precision was not met for pair SB-H7-8255-02(0-1)/DUP.

SDG 0004152

Volatiles – NA

Semivolatiles – Samples analyzed 5/27/00 were qualified as estimated for n-nitrosodimethylamine, hexachlorobutadiene, hexachlorocyclopentadiene, pyrene and butylbenzylphthalate; samples analyzed 5/28/00 were qualified as estimated for n-nitrosodimethylamine, pentachlorophenol, indeno(1,2,3-cd)pyrene and benzo(g,h,i)perylene due to the CCAL recovery.

Pesticides/PCBs – The reporting limits for sample SB-H6-4-01(0-2) were incorrectly reported. The laboratory was contacted and the correct reporting limits were submitted. Data qualification was not required.

Explosives/ Nitroglycerine – Samples SB-L5-9546-03(0-1) and SB-L5-9546-03(0-1)DUP were qualified as estimated for nitrobenzene and sample SB-I5-3-03(0-1) was qualified as estimated for 2,4-dinitrotoluene due to the column percent difference exceeding 25%. Sample SB-L5-9546-03(0-1)DUP was qualified as estimated for nitrobenzene due to the surrogate recovery. The laboratory was contacted regarding the reporting of sample SB-I5-3-03(0-1). Compound 2,4-dinitrotoluene was reported as BQL and should have been reported as 230 J ug/Kg as shown in the raw data. The laboratory re-submitted the correct (230 ug/Kg) result for the sample.

TPH/TOC/NC - All nitrocellulose results were qualified as estimated due to missed holding times. Sample FB-59 was qualified as estimated for nitrocellulose, due to the LCS recovery.

Metals – All soil samples were qualified as estimated for antimony due to the LCS recovery. All samples were qualified as estimated for lead due to the laboratory duplicate precision. Sample SB-L5-539-03(0-1) was qualified as estimated for thallium due to the matrix spike recovery.

Other Comments – Field duplicate precision was not met for nitrocellulose, di-n-butylphthalate, chromium and lead for pair SB-L5-9546-03(0-1). Field blank FB-59 contained copper (1.4 ug/L) and zinc (5.1 ug/L).

SDG 0005014

Volatiles – NA

Semivolatiles – Sample SB-I7-2-03(0-1.5) was qualified as estimated for 2,4-dinitrotoluene and sample SB-J6-2340-02(0-1.5) due to the LCS recovery. Sample FB-63 was qualified as estimated for di-n-octylphthalate due to the CCAL recovery. Samples analyzed 6/12/00 were qualified as estimated for bis(2-chloroethyl)ether due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: 2,4,6-trinitrotoluene for samples SB-I7-2133-03(0-1), SB-J7-2281-05(0-2) and SB-J7-2133-06(0-1.5); nitrobenzene for sample SB-J7-2133-01(0-1.5), 2,4-dinitrotoluene for sample SB-K6-8273-03(0-1); the following were qualified as estimated for the column percent difference exceeding 25%:2,4,6-trinitrotoluene, 2,4-dinitrotoluene and nitrobenzene for sample SB-I7-2133A-01(0-1.5); 2,4,6-trinitrotoluene and 2,4-dinitrotoluene for sample SB-J7-2-03(0-1.5) 2,4-dinitrotoluene for sample SB-I7-2133A-03(0-1); nitrobenzene for samples SB-J6-2340-02(0-1.5)DUP, SB-J7-2281-05(0-2) and SB-J6-2340-04(0-2), 2,4,6-trinitrotoluene for sample SB-J7-2133-01(0-1.5), 2,4-dinitrotoluene for samples SB-J7-2133-06(0-1.5) and SB-J7-241-05(0-1), 2,4,6-trinitrotoluene and 2,4-dinitrotoluene for sample SB-J7-2-03(0-1.5).

TPH/TOC/NC - Sample FB-63 was qualified as estimated for nitrocellulose due to the LCS recovery.

Metals – All soil samples were qualified as estimated for antimony, and sample SB-J7-2-03(0-1.5) was qualified as estimated for mercury due to the LCS. All soil samples were qualified as estimated for lead, nickel and zinc due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for pair SB-J6-2340-02(0-1.5)/DUP for phenanthrene, fluoranthene, pyrene, benzo(a)anthracene and benzo(b)fluoranthene and for mercury for pair SB-J7-2218B-03(0-2). Field blank FB-63 contained zinc at 4.1 ug/L.

SDG 0004191

Volatiles – NA

Semivolatiles – Sample SB-J7-3-03(0-0.5) was qualified as estimated for 2,4-dinitrotoluene due to the matrix spike recovery. Compounds associated with internal standards that exceeded control limits were qualified as estimated for samples SB-L6-5-01(0-1.5), SB-F12-4-01(0-1.5), SB-F12-F6-01(0-2)DUP and SB-F8-575-04(0-1). Samples analyzed 5/31/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, hexachlorobutadiene, hexachlorocyclopentadiene and di-n-octylphthalate; samples analyzed 6/07/00 and 6/08/00 were qualified as estimated for n-

nitrosodimethylamine, 1,2-diphenylhydrazine, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene, benzo(g,h,i)perylene and benzidine due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Sample SB-F8-575-04(0-1) was qualified as 'R' for 2,4,6-trinitrotoluene due to the column percent difference exceeding 90%.

TPH/TOC/NC - Sample FB-60 was qualified as estimated for nitrocellulose, due to the LCS recovery.

Metals – All soil samples were qualified as estimated for antimony due to the LCS recovery. Copper, lead and zinc were qualified as estimated for all soil samples due to the laboratory duplicate. The holding time for mercury for all samples except FB-60 and SB-J7-3-03(0-0.5) were exceeded, thus mercury was qualified as estimated.

Other Comments – Field blank FB-60 contained zinc (4.9 ug/L). Field duplicate precision was not met for pair SB-F12-F6-01(0-2)/DUP and for copper and lead for pair SB-H8-2171-05(0-1.25)/DUP.

SDG 0004204

Volatiles – NA

Semivolatiles – All compounds were qualified as estimated for sample SB-I8-2328A-02(0-2) due to the surrogate recovery. Phenol, 2-chlorophenol, n-nitrosodi-n-propylamine, 4-chloro-3-methylphenol were qualified as estimated in sample SB-I8-2328A-02(0-2) due to the matrix spike recovery. Samples analyzed 5/31/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, 2,2'-oxybis (1-chloropropane), hexachlorocyclopentadiene and benzidine; samples analyzed 6/01/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether and benzidine due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: 2,4,6-trinitrotoluene for samples SB-I8-2328-02(0-2), SB-I8-2328-07(0-1.5), SB-I7-2124-06(0-2), SB-I7-566-02(0-1.5) and SB-I7-15-05(0-1.5); the following were qualified as estimated for the column percent difference exceeding 25%:2,4,6-trinitrotoluene and 2,4-dinitrotoluene for samples SB-I8-2138-03(0-2) and SB-I7-15-05(0-1.5), 2,4-dinitrotoluene for sample SB-I7-566-02(0-1.5) and SB-I7-15-05(0-1.5); 2,4,6-trinitrotoluene and HMX for samples SB-I8-2328A-02(0-2) and SB-I8-2328A-02(0-2); 2,4-dinitrotoluene and RDX for sample SB-I7-2305-02(0-1.25); 2,4,6-trinitrotoluene for sample SB-I7-2124-04(0-1.5). Sample SB-I8-9334-01(0-1) was qualified as estimated for 2,4,6-trinitrotoluene due to surrogate recovery.

TPH/TOC/NC - Samples SB-I8-9334-01(0-1), SB-I8-2328-02(0-2) and SB-I8-2138-03(0-2) were qualified as estimated for nitrocellulose due to missed holding times.

Metals – All soil samples were qualified as estimated for antimony and lead due to the LCS and laboratory duplicate precision, respectively. Sample SB-I8-2328A-02(0-2) was qualified as estimated for selenium, chromium, copper and mercury due to the LCS recovery.

Other Comments – Field duplicate precision was not met for pair SB-I7-15-05(0-1.5)/DUP for nitrocellulose.

SDG 0004192

Volatiles – NA

Semivolatiles – Sample SB-F9-2105A-04(0-1) was qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), hexachlorocyclopentadiene, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene, benzidine and benzo(g,h,i)perylene due to the CCAL recovery. Di-n-butylphthalate was qualified as 'U' in sample SB-F9-2105A-04(0-1) due to blank contamination. Sample SB-F9-2105A-04(0-1) was reported 10-fold higher than the normal reporting limits, due to matrix interference.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-F9-2105A-04(0-1) was qualified as estimated for 2,4,6-trinitrotoluene and 2,4-dinitrotoluene due to the column percent difference exceeding 25%.

TPH/TOC/NC - No qualification of data.

Metals – Sample SB-F9-2105A-04(0-1) was qualified as estimated for antimony due to the LCS and matrix spike recoveries and for arsenic, copper, lead and zinc due to the laboratory duplicate precision.

Other Comments – NA

SDG 0004190

Volatiles – NA

Semivolatiles – Sample SB-H6-4-02(0-1) was qualified as estimated for all compounds due to missed holding times. Samples analyzed 5/30/00 were qualified as estimated for hexachlorocyclopentadiene; samples analyzed 5/31/00 were qualified as estimated for indeno(1,2,3-cd)pyrene and dibenz(a,h)anthracene; samples analyzed 6/01/00 were

qualified as estimated for n-nitroso-di-n-propylamine, 2,4-dinitrophenol, 4-nitrophenol, 4,6-dinitro-2-methylphenol and benzidine; ; samples analyzed 6/02/00 were qualified as estimated for n-nitroso-di-n-propylamine, 4-chloro-3-methylphenol, 2,4-dinitrophenol, 4-nitrophenol, and benzidine, due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – NA

TPH/TOC/NC - No qualification of data.

Metals – All samples with the exception of SB-K5-4-01(0-0.5), SB-K5-4-01(0-0.5)DUP and SB-L5-8-05(0-2) of were qualified with a 'U' for mercury due to blank contamination. All samples were qualified as estimated for antimony due to the matrix spike and LCS recoveries. Thallium was qualified as estimated in sample SB-L6-4-02(0-1) due to the matrix spike.

Other Comments – Field duplicate precision was not met for lead for pair SB-K5-4-01(0-0.5)DUP.

SDG 0005026

Volatiles –Samples SB-L5-5-01(0.5) and SB-I9-515-01(0.5) were qualified with a 'U' for methylene chloride and chloroform due to blank contamination.

Semivolatiles – Pyrene was qualified as estimated in samples SB-I9-520-03(0-1) and SB-I9-516-04(0-1) due to the LCS recovery. Compounds associated with the internal standard that exceeded control limits for sample SB-L5-5-01(0-2)DUP were qualified as estimated. Samples analyzed 6/08/00 were qualified as estimated for n-nitrosodimethylamine, 1,2-diphenylhydrazine, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene, benzidine and benzo(g,h,i)perylene; samples analyzed 6/09/00 were qualified as estimated for benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-I9-523-03(0-0.5) was qualified as estimated for 2,4-dinitrotoluene, and SB-I9-2311-01(0-1.5) was qualified as 'R' for 2,4,6-trinitrotoluene due to the column percent difference.

TPH/TOC/NC - No qualification of data.

Metals – All soil samples were qualified as estimated for antimony due to the matrix spike recovery and LCS recovery, and for arsenic due to the laboratory duplicate. Sample SB-I9-519-04(0-0.5) was qualified as estimated for selenium due to the matrix spike.

Other Comments –NA

SDG 0005062

Volatiles – NA

Semivolatiles – Compounds associated with the internal standard that exceeded control limits for samples SB-N7-2-07(0-1) and SB-N7-2-06(0-1) were qualified as estimated. Samples analyzed 6/12/00 were qualified as estimated for hexachlorocyclopentadiene, 2,4-dinitrophenol and di-n-octylphthalate; also, field blank FB--65 was qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), n-nitroso-di-n-propylamine, 4-nitrophenol, benzidine and 1,2-diphenylhydrazine due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: 2,4,6-trinitrotoluene for samples SB-L7-2131-04(0-1), SB-L7-2131-05(0-1.5), SB-L7-2131-05(0-1.5)DUP, SB-L6-2129-03(0-2), SB-L6-2129-05(0-1.5); the following were qualified as estimated for the column percent difference exceeding 25%: 2,4-dinitrotoluene for samples SB-L7-2131-04(0-1), SB-L6-2129-05(0-1.5) and SB-08-392-02(0-2). Sample SB-L6-2129-05(0-1.5) was qualified as estimated for nitroglycerine due to the matrix spike and spike duplicate recovery results.

TPH/TOC/NC - Sample FB-65 was qualified as estimated for nitrocellulose due to the LCS recovery. Sample SB-L6-2129-05(0-1.5) was qualified as estimated for nitrocellulose due to the matrix spike recovery.

Metals – All soil samples in the SDG were qualified as estimated for arsenic, copper and lead due to the laboratory duplicate precision, and for antimony due to the LCS recovery.

Other Comments – Field blank FB-65 contained zinc at 5.4 ug/L. Field duplicate precision was not met for pair SB-L7-2131-05(0-1.5)/DUP for nitrocellulose.

SDG 0005015

Volatiles – NA

Semivolatiles – Samples analyzed 6/03/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, phenol, 2,2'oxybis(1-chloropropane), n-nitroso-di-n-propylamine, isophorone, hexachlorobutadiene and benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-I9-524-01(0-1) was qualified as estimated for 2,4-dinitrotoluene due to the column percent difference exceeding 25%.

TPH/TOC/NC - No qualification of data.

Metals – All soil samples were qualified as estimated for antimony due to the matrix spike recovery. Mercury was estimated in sample SB-I10-2-02(0-2) due to the matrix spike recovery. Arsenic was qualified as estimated in all soil samples due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for mercury, lead and antimony for pair SB-I10-2-02(0-2)/DUP.

SDG 0005025

Volatiles – Sample FB-64 was qualified as 'U' for chloroform as a result of the trip blank containing chloroform, and as estimated for all compounds due to surrogate and internal standard recoveries. The laboratory submitted the re-analysis of sample FB-64 instead of the original run, which was incorrect in the case narrative. The holding time of the re-analysis exceeded two times the normal holding time, warranting rejection of the field blank. The laboratory was contacted and the original run was submitted. Samples FB-64 and trip -4/28/00 were qualified as estimated for chloroform, 1,1,1-trichloroethane, 1,2-dichloroethane and benzene due to the LCS recovery. Samples analyzed on 5/11/00 were qualified as estimated for methylene chloride and acrolein.

Semivolatiles – Compounds associated with the internal standard outside specification were qualified as estimated for sample SB-K8-393-05(0-0.5). All compounds were qualified as estimated in sample SB-K8-393-05(0-0.5) due to surrogate recovery. N-nitroso-di-n-propylamine was qualified as estimated in sample SB-J9-4-03(0-1.25) due to the matrix spike recovery. Pyrene and 2,4-dinitrotoluene were qualified as estimated in samples SB-J9-4-03(0-1.25), SB-J9-3-03(0-0.75), and SB-K8-393-05(0-0.5), and pyrene was qualified in samples SB-I10-5878B-02(0-2) and SB-K8-1-01(0-1), due to the LCS recovery. Samples analyzed 5/14/00 were qualified as estimated for di-n-octylphthalate and benzidine; samples analyzed 6/02/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, 2,4-dinitrophenol and benzidine; samples analyzed 6/03/00 were qualified as estimated for nitrosodimethylamine, bis(2-chloroethyl)ether, phenol, 2,2'oxybis(1-chloropropane), n-nitroso-di-n-propylamine, isophorone, hexachlorobutadiene and benzidine; samples analyzed 6/05/00 were qualified as estimated for nitrosodimethylamine, bis(2-chloroethyl)ether, 2,2'oxybis(1-chloropropane), nitrobenzene, isophorone, hexachlorocyclopentadiene, 2,4-dinitrophenol, 4,6-dimethyl-2-chlorophenol and di-n-octylphthalate ; samples analyzed 6/08/00 were qualified as estimated for nitrosodimethylamine, bis(2-chloroethyl)ether, n-nitroso-di-n-propylamine and benzidine;; samples analyzed 6/06/00 were qualified as estimated for benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: 2,4,6-trinitrotoluene for samples SB-J9-4-03(0-1.25), SB-L6-2128-05(0-1), SB-K7-2126-03(0-2), and SB-K7-2126-05(0-1.5); the following were qualified as estimated for the column percent difference exceeding 25%: 2,4-dinitrotoluene for samples SB-J9-4-03(0-1.25), SB-K8-1-01(0-1), SB-K7-2132-05(0-2), SB-K7-2126-03(0-2) and for 2,4,6-trinitrotoluene for sample SB-K7-2125-05(0-2).

TPH/TOC/NC - Nitrocellulose was qualified as estimated in samples SB-J9-4-03(0-1.5) and SB-K7-2132-05(0-2) due to the matrix spikes.

Metals – Sample SB-J9-4-03(0-1.25) was qualified as estimated for copper and antimony due to the matrix spike.

Other Comments – Field blank FB-64 contained copper (2.8 ug/L) and zinc (6.4 ug/L). Trip blank Trip-4/28/00 contained chloroform at 2J ug/L.

SDG 0005077

Volatiles – NA

Semivolatiles – Samples analyzed 6/14/00 were qualified as estimated for hexachlorobenzene; samples analyzed 6/15/00 were qualified as estimated for 1,2-diphenylhydrazine, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,i)perylene due to the CCAL recovery. The reported date of analysis for sample SB-N7-574-02(0-2) was incorrect on the LIMS form, and should be corrected to 6/14/00.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: nitrobenzene for sample SB-07-9319-01(0-1.25),4-amino-2,6-dinitrotoluene and 2-amino-4,6-dinitrotoluene for sample SB-K8-9207-02(0-1.25), 4-amino-2,6-dinitrotoluene for samples SB-M6-1-07(0-0.5), SB-M6-1-15(0-0.5) and 2,4,6-trinitrotoluene for sample SB-M8-9201-01(0-2); the following were qualified as estimated for the column percent difference exceeding 25%: 2,4,6-trinitrotoluene for sample SB-07-9319-01(0-1.25), nitrobenzene for sample SB-07-9319-01(0-1.25)DUP. Sample SB-07-9319-01(0-1.25) was qualified as estimated for 2,4,6-trinitrotoluene and nitrobenzene due to the surrogate recovery.

TPH/TOC/NC - All samples were qualified as estimated for nitrocellulose due to the LCS recovery.

Metals – Antimony, selenium and thallium were qualified as estimated for sample SB-N7-574-02(0-2) due to the LCS recoveries. All samples were qualified as estimated for zinc due to the serial dilution.

Other Comments – Field duplicate precision was not met for arsenic, nickel and lead for pair SB-L7-8115-02(0-2)/DUP and for chromium, lead and nitrocellulose for pair SB-07-9319-01(0-1.25)/DUP.

SDG 0005124

Volatiles – NA

Semivolatiles – Samples analyzed 6/15/00 and 6/19/00 were qualified as estimated for bis(2-chloroethyl)ether, hexachlorocyclopentadiene, 2,4-dinitrophenol and 4,6-dinitro-2-methylphenol due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-K11-3-02(0-1)DUP was qualified as estimated for 2,4,6-trinitrotoluene, 2,4-dinitrotoluene, HMX and nitrobenzene due to the surrogate recovery. Sample SB-M8-2-05(0-1.5) was qualified as 'R' for 2,4,6-trinitrotoluene and 2,4-dinitrotoluene, and sample SB-K11-3-02(0-1)DUP for HMX, 2,4,6-trinitrotoluene and 2,4-dinitrotoluene due to column percent difference exceeding 25%..

TPH/TOC/NC - No qualification of data.

Metals – All soil samples were qualified as estimated for antimony due to the LCS and matrix spike recoveries. Sample SB-K11-3-02(0-1)DUP was qualified as estimated for arsenic due to the matrix spike.

Other Comments – Only the duplicate sample, SB-K11-3-02(0-1)DUP was on the chain-of-custody form and submitted for analysis. An original sample was not on the custody form. Field duplicate precision was not met for pair SB-P7-4-01(0-2)/DUP for nitrocellulose.

SDG 0005079

Volatiles – NA

Semivolatiles – Sample SB-J10-9334-01(0-0.5) was qualified for all compounds due to surrogate recovery. Compounds associated with the internal standard that was outside specification was qualified as estimated for sample SB-J10-9334-01(0-0.5). Samples analyzed 6/14/00 were qualified as estimated for hexachlorobenzene; samples analyzed 6/16/00 were qualified as estimated for hexachlorocyclopentadiene, 3,3'dichlorobenzidine, bis(2-ethylhexyl)phthalate, di-n-octylphthalate and

benzo(g,h,i)perylene due to the CCAL recovery. Sample FB-67 was qualified as estimated for 2,2'-oxybis(2-chloroethyl)ether and pentachlorophenol due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: 4-nitrotoluene for sample SB-J10-9334-01(0-0.5); the following were qualified as estimated for the column percent difference exceeding 25%: 2,4-dinitrotoluene, 2-nitrotoluene, nitrobenzene and 3-nitrotoluene for sample SB-J10-9334-01(0-0.5), and samples SB-J10-2-08(0-1), SB-J10-2-04(0-0.5), and SB-J10-2-11(0-1.5) for nitrobenzene.

TPH/TOC/NC - No qualification of data.

Metals – Field blank FB-67 was qualified as 'U' for zinc due to blank contamination.

Other Comments – Field blank FB-67 contained silver (0.7 ug/L) and lead (1,6 ug/L).

SDG 0005015

Volatiles – NA

Semivolatiles – Pyrene was qualified as estimated in samples SB-K8-9212A-01(0-1.5), SB-J9-2-02(0-1.5), SB-I11-9301-05(0-1) and SB-K8-9212-02(0-2), and 2,4-dinitrotoluene was qualified as estimated in sample SB-I11-9301-05(0-1) due to the LCS recovery. Samples analyzed 6/23/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, 2,2'oxybis(1-chloropropane), n-nitroso-di-n-propylamine, 2,4-dinitrophenol, 1,2-diphenylhydrazine and benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-06-9224-03(0-2) was qualified as estimated for 2,4,6-trinitrotoluene due to the surrogate recovery. The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: HMX for sample SB-06-9223-07(0-1.5) and SB-06-9223-07(0-1.5)DUP; the following were qualified as estimated for the column percent difference exceeding 25%: 2,4-dinitrotoluene for sample SB-J8-9220-02(0-1.5), nitrobenzene for sample SB-J8-9220-05(0-2), and 2,4,6-trinitrotoluene and 2,4-dinitrotoluene for sample SB-06-9223-07(0-1.5).

TPH/TOC/NC - Several samples in the SDG were qualified as estimated due to the LCS recovery.

Metals – Sample SB-K8-9212A-01(0-1.5) was qualified as estimated for arsenic and selenium, and sample SB-P7-575-04(0-0.5). Sample FB-68 was qualified as estimated for zinc due to blank contamination.

Other Comments – Field blank FB-68 contained lead (1.7 ug/L).

SDG 0005121

Volatiles – NA

Semivolatiles – N-nitrosodi-n-propylamine was qualified as estimated in sample SB-M7-2-11(0-1.5) due to the matrix spike recovery. Samples analyzed 6/15/00 were qualified as estimated for bis(2-chloroethyl)ether, hexachlorocyclopentadiene, 2,4-dinitrophenol and 4,6-dinitro-2-methylphenol; samples analyzed 6/23/00 were qualified as estimated for n-nitrosodimethylamine , bis(2-chloroethyl)ether, 2,2'oxybis(1-chloropropane), n-nitroso-di-n-propylamine, 2,4,6-trichlorophenol, 2,4-dinitrophenol and 4,6-dinitro-2-methylphenol due to the CCAL recovery.

Pesticides/PCBs – Sample FB-69 was qualified as estimated for all PCBs due to the extraction holding time being exceeded.

Explosives/ Nitroglycerine – Sample SB-L7-2130-01(0-2)DUP was qualified as estimated for 2,4,6-trinitrotoluene due to the column percent difference exceeding 25%. Sample FB-69 was qualified as estimated for 2,6-dinitrotoluene due to the CCAL recovery.

TPH/TOC/NC - Nitrocellulose was qualified as estimated in sample SB-L7-2130-06(0-1) due to the LCS recovery. Total organic carbon (TOC) was qualified as estimated in sample SB-M7-2-05(0-1) due to the matrix spike recovery.

Metals – Sample SB-M7-2-04(0-2) was qualified as estimated for antimony and copper due to the matrix spike recovery. Sample FB-69 was qualified as estimated for zinc due to blank contamination.

Other Comments – Field blank FB-69 contained lead (1.7 ug/L) and bis(2-ethylhexyl)phthalate (4 ug/L). Field duplicate precision was not met for pair SB-L7-2130-06(0-1) for nitrocellulose.

SDG 0005120

Volatiles –NA

Semivolatiles – Acenaphthene was qualified as estimated in sample SB-S7-1-02(0-1) due to the LCS recovery. All samples were qualified as estimated for bis(2-chloroethyl)ether, 2,4-dinitrophenol and benzidine due to the CCAL recoveries.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Sample SB-P5-535-04(0-1) was qualified as estimated for 2,4,6-trinitrotoluene and nitrobenzene due to the surrogate recovery. Sample SB-L7-2130-01(0-2) was qualified as estimated for 2,4,6-trinitrotoluene due to the column percent difference exceeding 25%.

TPH/TOC/NC - No qualification of data.

Metals – Samples SB-P7-9209-03(0-2) and SB-P7-9209-03(0-2)DUP were qualified as estimated for mercury due to missed holding times. Sample SB-O7-576-02(0-1.5) was qualified as estimated for antimony, arsenic and selenium due to the matrix spike. All soil samples in the SDG were qualified as estimated for mercury due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for pair SB-P7-9209-03(0-2)/DUP

SDG 0005123

Volatiles – NA

Semivolatiles – Sample SB-K11-2225B-02(0-1.5) was qualified as estimated for n-nitroso-di-n-propylamine due to the LCS recovery. Sample FB-70 was qualified as estimated for bis(2-chloroethyl)ether, hexachlorocyclopentadiene and 4,6-dinitro-2-methylphenol due to the CCAL recovery. Samples analyzed 6/19/00 were qualified as estimated for bis(2-chloroethyl)ether, hexachlorocyclopentadiene, 2,4-dinitrophenol and 4,6-dinitro-2-methylphenol and samples analyzed 6/20/00 were qualified as estimated for bis(2-chloroethyl)ether and 3,3'dichlorobenzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-K11-2225B-04(0-1) was qualified as estimated for 2,4,6-trinitrotoluene and nitrobenzene, sample SB-M8-2196-07(0-1.5) for 2,4,6-trinitrotoluene, and sample SB-M9-2193-01(0-1) for 2,4,6-trinitrotoluene and 2,4-dinitrotoluene due to surrogate recovery. The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: 4-amino-2,6-dinitrotoluene for sample SB-O5-580.75-05(0-1.5), 2,4,6-trinitrotoluene and nitrobenzene for sample SB-K11-2225B-04(0-1), 2,4,6-trinitrotoluene for sample SB-K11-601-01(0-0.5), 2,4,6-trinitrotoluene and 2,4-dinitrotoluene for sample SB-K11-3-02(0-1), 2,4,6-trinitrotoluene for sample SB-M8-2196-07(0-1.5), 2,4,6-trinitrotoluene and 2,4-dinitrotoluene for sample SB-M9-2193-01(0-1), 2,4,6-trinitrotoluene for sample SB-M9-2192-05(0-1), and tetryl for sample SB-N6-640-03(0-1); the following were qualified as estimated for the column percent difference exceeding 25%: nitrobenzene for sample

SB-K11-3-02(0-1), 2,4-dinitrotoluene for sample SB-M9-2192-03(0-1) and 2,4-dinitrotoluene for sample SB-M9-2192-05(0-1).

TPH/TOC/NC - Samples SB-N6-640-03(0-1) and SB-N6-640-03(0-1)DUP were qualified as estimated for nitrocellulose due to the LCS recovery. Samples SB-N6-640-03(0-1) and SB-M9-2192-05(0-1) were qualified as estimated for nitrocellulose due to the matrix spike recovery. The date of extraction for nitrocellulose for samples SB-K11-2225B-04(0-1) and SB-K11-3-02(0-1) were incorrectly reported as being 6/13/00. The laboratory was contacted and revisions were submitted.

Metals – The holding time for mercury for samples SB-L9-8210-05(0-1) and FB-70 were exceeded, thus the results were qualified as estimated. Sample FB-70 was qualified as estimated for zinc due to blank contamination. The majority of the samples in the SDG were qualified with a 'U' for cadmium due to blank contamination. Sample SB-K11-2225B-02(0-1.5) was qualified as estimated for arsenic, antimony and selenium due to the LCS recovery. All soil samples were qualified as estimated for arsenic, beryllium, chromium, copper, lead, nickel and zinc due to the laboratory duplicate.

Other Comments – Field duplicate precision was not met for pair SB-N6-640-03(0-1)/DUP for nitrocellulose, chromium, nickel and zinc.

SDG 0004205

Volatiles – NA

Semivolatiles – All soils were extracted on day past the holding time, thus all soil samples were qualified as estimated for al compounds. Compounds associated with the internal standard that was outside control limits were qualified as estimated for sample SB-J8-2354-02(0-1.5). The concentration of di-n-butylphthalate was too high to apply a 'U' for blank contamination. Samples SB-I9-2-01(0-1), SB-I9-2-01(0-2)DUP and SB-I8-2405-06(0-2)DUP were qualified as estimated for 2,4-dinitrophenol due to the LCS recovery. Several samples were qualified with a 'U' for di-n-butylphthalate and bis(2-ethylhexyl)phthalate due to blank contamination. Samples analyzed 5/30/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether and hexachlorocyclopentadiene; samples analyzed 5/31/00 were qualified as estimated for indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,i)perylene; samples analyzed 6/02/00 were qualified as estimated for n-nitroso-di-n-propylamine, 4-chloro-3-methylphenol, 2,4-dinitrophenol, 4-nitrophenol and benzidine; samples analyzed 6/03/00 were qualified as estimated for n-nitrosodimethylamine, 4-nitrophenol and di-n-octylphthalate; samples analyzed 6/09/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, phenol, 1,2-diphenylhydrazine and benzidine; and samples analyzed 6/12/00 were qualified as estimated for hexachlorocyclopentadiene and di-n-octylphthalate due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Nitroglycerine for sample SB-I8-588E-06(0-1) was reported as 6600 BQL but should have been 6500. The LIMs form was manually corrected and submitted to Montgomery Watson. Sample SB-06-9224-03(0-2) was qualified as estimated for 2,4,6-trinitrotoluene due to the surrogate recovery. The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: 2,4,6-trinitrotoluene for sample SB-J8-2354-02(0-1.5), 4-amino-2,6-dinitrotoluene for samples SB-I8-2405-06(0-2) and SB-I8-2405-06(0-2)DUP; the following were qualified as estimated for the column percent difference exceeding 25%: 2-amino-4,6-dinitrotoluene for samples SB-I8-2405-06(0-2) and SB-I8-2405-06(0-2)DUP.

TPH/TOC/NC - No qualification of data.

Metals – Cadmium was qualified as estimated for SB-I9-2-01(0-1), SB-J8-2354-05(0-1) and SB-I8-588E-06(0-1) due to blank contamination. Sample FB-61 was qualified as 'U' for zinc due to blank contamination.

Other Comments – Field blank FB-61 contained mercury (0.1 ug/L) and copper (1.3 ug/L). Field duplicate precision was not met for pair SB-I8-2405-06(0-2)/DUP for arsenic, chromium, copper, nickel and zinc and for pair SB-I9-29-01(0-1)/DUP for di-n-butylphthalate.

SDG 0005067

Volatiles – NA

Semivolatiles – Phenol was qualified as estimated in sample SB-N7-573-01(0-1) due to the matrix spike. Compounds associated with internal standards that exceeded control limits were qualified as estimated for samples SB-R5-1-01(0-1.25) and SB-N7-573-01(0-1). Samples analyzed 6/9/00 were qualified as estimated for bis(2-chloroethyl)ether and pentachlorophenol, and samples analyzed 6/14/00 were qualified as estimated for benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%:), 4-amino-2,6-dinitrotoluene and 1,3-dinitrobenzene for sample SB-K9-9204-01(0-1.5), 1,3-dinitrobenzene for sample SB-K9-9204-05(0-2) and 2,4,6-trinitrobenzene for sample sample SB-K9-9203-07(0-0.5); the following were qualified as estimated for the column percent difference exceeding 25%: nitrobenzene for sample SB-K9-9204-05(0-2) and 2,4-dinitrotoluene for sample SB-N7-573-01(0-1).

TPH/TOC/NC - No qualification of data.

Metals – Sample SB-N7-573-01(0-1) was qualified as estimated for antimony, copper, selenium and thallium due to the matrix spike. All soil samples were qualified as estimated for copper, mercury and nickel due to the laboratory duplicate precision.

Other Comments – Field blank FB-66 contained chromium (2.9 ug/L) and zinc (6.1 ug/L).

SDG 0005175

Volatiles – Na

Semivolatiles – Compounds associated with internal standards that exceeded control limits were qualified as estimated for sample SB-K10-2266-04(0-1). Samples analyzed 5/30/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, hexachlorobutadiene and hexachlorocyclopentadiene; samples analyzed 6/25/00 were qualified as estimated for hexachlorocyclopentadiene, n-nitrosodiphenylamine, bis(2-ethylhexyl)phthalate, di-n-octylphthalate and benzidine; samples analyzed 6/26/00 were qualified as estimated for 2,4-dinitrophenol, 4-nitrophenol, 4,6-dinitro-2-methylphenol, di-n-octylphthalate and benzidine due to the CCAL recovery. The laboratory reported dimethylphthalate at 630 and 88 ug/Kg in samples SB-K10-1-01(0-1.25) SB-L10-2191-02(0-1.5). These detects should have been for diethylphthalate. Revisions were submitted.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%:), 2,4,6-trinitrotoluene and HMX for sample SB-L10-2191-02(0-1.5), 2,4,6-trinitrotoluene for sample SB-K10-2090-01(0-1.5), 2,4-dinitrotoluene for sample SB-K10-2090-04(0-1.25); the following were qualified as estimated for the column percent difference exceeding 25%: 2,4-dinnitrotoluene for samples SB-K10-2090-08(0-1), SB-K10-2090-08(0-1)DUP and SB-K10-2266-04(0-1).

TPH/TOC/NC - No qualification of data.

Metals – Samples SB-K10-2090-08(0-1) and SB-K10-2090-08(0-1)DUP were qualified with a 'U' for cadmium due to blank contamination. Sample SB-O8-2274-01(0-1) was qualified as estimated for antimony, lead and selenium and sample SB-K10-1-01(0-1.25) due to the matrix spike recovery.

Other Comments – Field duplicate precision was not met for lead and chromium for pair SB-L10-1-02(0-1.5)/DUP and for lead and nitrocellulose for pair SB-K10-2090-08(0-1)/DUP.

SDG 0005186

Volatiles – Compounds associated with internal standards that exceeded control limits were qualified as estimated for samples SB-J11-1-14(0.5), SB-J11-1-17(0.5) and SB-K10-6-02(0.5). All samples were qualified as estimated for methylene chloride, acrolein, trans-1,2-dichloroethene, acrylonitrile and dibromochloromethane due to the CCAL. Methylene chloride, 1,2,4-trichlorobenzene and naphthalene were qualified as 'U' in samples, due to the blank.

Semivolatiles – Samples SB-K11-2302-05(0-0.75)DUP and SB-J11-1-07(0-1.25) were qualified as estimated for all compounds due to surrogate recovery. Samples analyzed 6/21/00 were qualified as estimated for bis(2-chloroethyl)ether, hexachlorocyclopentadiene and benzidine; samples analyzed 6/22/00 were qualified as estimated for hexachlorocyclopentadiene and di-n-octylphthalate; samples analyzed 6/23/00 were qualified as estimated for hexachlorocyclopentadiene, 4-nitrophenol and benzidine due to the CCAL recovery**.**

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%:), 2,4,6-trinitrotoluene for samples SB-J11-1-02(0-1), SB-K11-2300-05(0-1.5), SB-K11-2302-03(0-1.5) and SB-K11-2302-05(0-0.75)DUP; 2,4,6-trinitrotoluene and 2,4-dinitrotoluene for samples SB-K11-1-04(0-1), SB-K11-2300-01(0-1); tetryl and 2,4,6-trinitrotoluene for sample SB-K11-2302-05(0-0.75).

TPH/TOC/NC - – No qualification of data.

Metals – Samples SB-K11-604-02(0-1.25) and SB-K11-2300-05(0-1.5) were qualified as 'U' for cadmium due to blank contamination. Sample SB-K11-2264-04(0-1.5) was qualified as estimated for antimony due to matrix spike recovery.

Other Comments – Field duplicate precision was not met for pair SB-K11-1-05(0-1.25)/DUP for nitrocellulose.

SDG 0005188

Volatiles – Methylene chloride was qualified as estimated in several samples due to blank contamination. All soil samples were qualified as estimated for methylene chloride, trans-1,2-dichloroethene, acrolein, acrylonitrile and dibromochloromethane due to the CCAL recovery.

Semivolatiles – Sample SB-L10-2316-02(0-1) was qualified as estimated due to the matrix spike recovery. Compounds that were associated with internal standards outside control limits were qualified as estimated in samples SB-L10-8215-02(0-1), SB-L10-725-01(0-1), SB-L11-1-04(0-1) and SB-L10-2088-02(0-1). Field blank FB-72 was qualified with a 'U' for bis(2-ethylhexyl)phthalate and di-n-butylphthalate in several samples due to blank contamination. There were concentrations of di-n-butylphthalate that were too

high to qualify as 'U' based on the associated blank concentration. Samples analyzed 6/26/00 were qualified as estimated for 2,2'oxybis(1-chloropropane), 4,6-dinitro-2-methylphenol and benzo(g,h,i)perylene; samples analyzed 6/30/00 were qualified as estimated for 4-nitrophenol samples analyzed 6/23/00 were qualified as estimated for hexachlorocyclopentadiene, butylbenzylphthalate, bis(2-chloroethyl)ether, di-n-octylphthalate and benzo(g,h,i)perylene, due to the CCAL recovery**.**

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%:, 2,4,6-trinitrotoluene for samples SB-L10-2088-02(0-1), SB-M10-724-01(0-0.5) and SB-M10-7-02(0-0.5); 2,4-dinitrotoluene for sample SB-L10-725-01(0-1); 2,4,6-trinitrotoluene and 2,4-dinitrotoluene for sample SB-L10-2-02(0-1); and sample SB-L11-2089-01(0-1) was qualified as estimated for 2,4-dinitrotoluene due to the percent difference exceeding 25%.

TPH/TOC/NC - All soil samples were qualified as estimated for nitrocellulose due to the LCS recovery. Sample SB-L10-2088-02(0-1) was qualified as estimated for nitrocellulose due to the holding time.

Metals – Antimony, chromium and copper were estimated in sample SB-L10-2316-02(0-1) due to the matrix spike.

Other Comments – Field duplicate precision was not met for nitrocellulose for pair SB-L10-6-05(0-2) and benzo(k)fluoranthene for SB-L11-2226-02(0-1.5).

SDG 0005192

Volatiles –

Semivolatiles – Samples SB-K10-2197-05(0-1.25), SB-K10-2197A-01(0-1) and SB-J11-10-05(0-1.5) were qualified as estimated due to the surrogate recovery. Compounds associated with internal standards that exceeded control limits were qualified as estimated for samples SB-K10-2197A-01(0-1), SB-K10-2197-05(0-1.25) and SB-J11-10-05(0-1.5). Samples analyzed 6/28/00 were qualified as estimated for n-nitrosodiphenylamine, 1,2-diphenylhydrazine, 4-bromophenyl phenylether, pyrene, butlybenzylphthalate, bis(2-ethylhexyl)phthalate, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene, benzo(g,h,i)perylene and benzidine; samples analyzed 6/29/00 were qualified as estimated for benzo(g,h,i)perylene; samples analyzed 6/30/00 were qualified as estimated for hexachlorocyclopentadiene , 2,4-dinitrophenol, 4-nitrophenol, 4,6-dinitro-2-methylphenol, dibenz(a,h)anthracene and benzidine; samples analyzed 6/22/00 were qualified as estimated for 4,6-dinitro-2-methylphenol, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,i)perylene, due to the CCAL recovery. Several samples were qualified with a 'U' for di-n-butylphthalate due to blank contamination. However, there were samples that remained unqualified since the sample concentrations exceeded the criteria for blank adjustment.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Samples SB-J11-14-03(0-1.25) and SB-M9-2261-01(0-2) were qualified as estimated for 2,4,6-trinitrotoluene and nitrobenzene, and sample SB-M10-6-02(0-2) for nitroglycerine, due to the surrogate recovery. The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%:, 2,4,6-trinitrotoluene for samples SB-K10-2197A-01(0-1), SB-K10-2197-05(0-1.25) and SB-M9-2292-01(0-1); 2,4,6-trinitrotoluene and nitrobenzene for samples SB-J11-14-03(0-1.25) and SB-M9-2261-01(0-1); 2,4-dinitrotoluene for sample SB-M9-3-01(0-1.25); and sample SB-K10-2197A-05(0-1.25) was qualified as estimated for 2,4,6-trinitrotoluene and 2,4-dinitrotoluene due to the percent difference exceeding 25%.

TPH/TOC/NC - No qualification of data.

Metals – Arsenic, chromium and copper were qualified as estimated for all soil samples due to the laboratory duplicate. Chromium, selenium and zinc were qualified as estimated in sample SB-M10-6-02(0-2) due to the matrix spike recovery. Field blank FB-73 was qualified with a 'U' for zinc due to blank contamination.

Other Comments – Field duplicate precision was not met for nitrocellulose for pair SB-K10-602B-03(0-1.5)/DUP and zinc for pair SB-M10-B14-01(0-1)/DUP. Several SVOC samples had higher reporting limits than normal due to the extract, which could not be evaporated to the level needed to achieve the lowest reporting limits.

SDG 0005205

Volatiles – All soil samples were qualified as estimated for chloroethane and bromomethane, due to the CCAL recovery. Methylene chloride and naphthalene were qualified as estimated for sample TB-5-25 due to the CCAL recovery. Sample SB-M9-2251-03(0.5) was qualified as 'U' for 1,2,4-trichlorobenzene, hexachlorobutadiene, naphthalene and methylene chloride, and the remaining samples were qualified with a 'U' for methylene chloride and naphthalene due to blank contamination.

Semivolatiles – Sample SB-I11-1-03(0-1) was qualified as estimated for all compounds, due to the surrogate recovery. Samples analyzed 7/11/00 were qualified as estimated for 3,3'-dichlorobenzidine, samples analyzed 7/12/00, 7/14/00 and 7/18/00 were qualified as estimated for benzidine, due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%:, 2,4,6-trinitrotoluene for sample SB-N9-2269-04(0-1.5), tetryl for sample SB-L11-2225-02(0-1.5) and sample SB-L11-2225-02(0-1.5) was qualified as estimated for 2,4,6-

trinitrotoluene and SB-L11-2225-05(0-1) for nitrobenzene, due to the percent difference exceeding 25%.

TPH/TOC/NC - Nitrocellulose was qualified as estimated in sample SB-N8-2304-01(0-1) due to the matrix spike recovery.

Metals – Sample SB-I11-7-03(0-2) was qualified with a 'U' for cadmium due to blank contamination. All soil samples in the SDG were qualified as estimated for zinc due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for 2,4-dinitrotoluene for pair SB-M9-2251-03(0-1)/DUP.

SDG 0005207

Volatiles – Samples analyzed 5/25/00 were qualified as estimated for chloromethane, bromomethane, acrolein, carbon tetrachloride, 2-chloroethylvinyl ether, 1,2,4-trichlorobenzene and naphthalene; samples analyzed 5/31/00 were qualified as estimated for for chloromethane, bromomethane, acrolein, 2-chloroethylvinyl ether and cis-1,3-dichloropropene; samples analyzed 6/1/00 were qualified as estimated for bromomethane, chloroethane, acrolein, acrylonitrile and 2-chloroethylvinyl ether, due to the CCAL recovery.

Semivolatiles – Sample SB-K10-2-02(0-1.5) was qualified as estimated for all compounds due to surrogate recovery. Sample SB-J11-2296-04(0-1.5) was qualified as estimated for 4-chloro-3-methylphenol due to the matrix spike recovery. Compounds associated with internal standards that exceeded control limits for sample SB-K10-2-02(0-1.5) were qualified as estimated. Samples analyzed 6/21/00 were qualified as estimated for 1,2-diphenylhydrazine, bis(2-ethylhexyl)phthalate and benzidine; samples analyzed 7/8/00 were qualified as estimated for 3,3'-dichlorobenzidine, due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Samples SB-K10-2-02(0-1.5) and SB-J11-2296-04(0-1.5) were qualified as estimated for nitrobenzene and 2,4,6-trinitrotoluene, respectively, due to surrogate recovery. Sample SB-K10-2-02(0-1.5) was qualified as R for nitrobenzene, and samples SB-J11-B25-02(0-1.5) and SB-J10-8280-01(0-1)DUP for 2,4-dinitrotoluene, due to the column percent difference exceeding 90%.

TPH/TOC/NC - No qualification of data.

Metals – Sample SB-J11-2296-04(0-1.5) was qualified with a 'U' for cadmium and FB-75 for zinc, due to blank contamination. All soil samples were qualified as estimated for zinc due to the laboratory duplicate precision. Sample SB-J11-2296-04(0-1) was qualified as estimated for antimony, selenium and zinc due to the matrix spike.

Other Comments – Field duplicate precision was not met for pair SB-J10-8280-01(0-1)/DUP for zinc and pair SB-K10-2-05(0-1.5)/DUP for nitrocellulose.

SDG 0005208

Volatiles – NA

Semivolatiles – Compounds associated with internal standards that exceeded control limits for samples SB-L11-2298-04(0-1.25) and SB-M10-2262-05(0-1) were qualified as estimated. Samples analyzed 6/30 were qualified as estimated for 4-nitrophenol; samples analyzed 7/1/00 were qualified as estimated for 1,2,4-trichlorobenzene, hexachlorobutadiene, 2,4-dinitrophenol and benzo(g,h,i)perylene; samples analyzed 7/5/00 were qualified as estimated for benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Samples SB-J11-8265-04(0-1) and SB-J11-2188-03(0-1.25) were qualified as estimated for 2,4,6-trinitrotoluene, 2,4-dinitrotoluene and nitrobenzene due to the surrogate recovery. The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%:, 2-amino-4,6-dinitrotoluene for sample SB-J12-3-02(0-2), nitrobenzene for sample SB-J11-2188-06(0-1.25), and 2,4,6-trinitritoluene for sample SB-J11-2298-04(0-1.25); and samples SB-J11-317-01(0-1.5) and SB-J11-2298-04(0-1.25) were qualified as estimated for 2,4-dinitrotoluene, and SB-J11-8265-04(0-1) for nitrobenzene and 2,4-dinitrotoluene due to the percent difference exceeding 25%.

TPH/TOC/NC - Nitrocellulose was qualified as estimated for samples SB-J11-8265-04(0-1), SB-J11-2188-03(0-1.25), SB-J11-2188-06(0-1.25) , SB-J11-2188-06(0-1.5) and SB-J11-2298-04(0-1.25), due to the LCS recovery. All soil samples were qualified as estimated for TOC due to missed holding times.

Metals – All soil samples in the SDG were qualified as estimated for mercury due to missed holding times. Cadmium was qualified as 'U' for samples SB-N9-2195-02(0-1.5), SB-N9-2195-05(0-1), SB-M10-2262-05(0-1), SB-J12-3-02(0-2), SB-J12-2-03(0-1.5), SB-J12-2-03(0-1.5)DUP, SB-J11-317-03(0-1), SB-J11-317-05(0-1) and SB-J11-317-06(0-2) due to blank contamination. Sample SB-J11-317-06(0-2) was qualified as estimated for antimony and arsenic due to the matrix spike recovery. All soil samples were qualified as estimated for copper and lead due to the laboratory duplicate precision.

Other Comments – Field blank FB-74 contained silver (0.7 ug/L), copper (1.7 ug/L) and zinc (4.4 ug/L). Field duplicate precision was not met for pair SB-J12-2-03(0-1.5)/DUP for zinc.

SDG 6010

Volatiles – NA

Semivolatiles – Samples analyzed 7/13/00 were qualified as estimated for bis(2-chloroethyl)ether, 2,2'-oxybis(1-chloropropane), hexachlorobenzene, 3,3'-dichlorobenzidine; samples analyzed 6/28/00 were qualified as estimated for bis(2-ethylhexyl)phthalate and benzidine. Sample FB-77 was qualified as 'U' for bis(2-ethylhexyl)phthalate due to blank contamination.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – NA

TPH/TOC/NC - No qualification of data.

Metals – The prep data for mercury on sample FB-77 was listed as 8/8/00 when the analysis data was 7/7/00. The laboratory was contacted and revisions were submitted.…All soil samples were estimated for lead due to the laboratory duplicate precision. Field blank FB-77 was qualified as 'U' for copper due to blank contamination.

Other Comments – Field duplicate precision was not met for copper for pair SB-I12-11-08(0-1)/DUP.

SDG 0005068

Volatiles – NA

Semivolatiles – Acenaphthene was qualified as estimated for sample .SB-O8-3-18(0-1) due to the laboratory control sample recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - No qualification of data.

Metals – All soil samples were qualified as estimated for antimony and lead due to the laboratory control sample and laboratory duplicate, respectively.

Other Comments – none.

SDG 6042

Volatiles – Samples analyzed 6/14/00 were qualified as estimated for 2-chloroethyl vinyl ether and samples analyzed 6/15/00 were qualified as estimated for bromomethane and acrolein due to the CCAL. The trip blank sample was qualified as estimated for carbon

tetrachloride due to the CCAL. The trip blank sample should have been reported with a 'B' qualifier due to blank contamination. The laboratory was contacted and revisions were submitted... Trip blank was qualified with a 'U' for methylene chloride due to blank contamination. Samples SB-I12-13-03(0.5), SB-I12-8581-04(0.5), SB-I11-9111-04(0.5), SB-I11-8504-06(0.5), SB-I11-8504-04(0.5) and SB-I11-8504-03(0.5) were qualified with a 'U' for methylene chloride; sample SB-I12-12-01(0.5) for 1,2,4-trichlorobenzene,hexachlorobutadiene, naphthalene and methylene chloride; sample SB-I11-8504-04(0.5) for naphthalene; sample SB-I11-8504-03(0.5) for naphthalene and 1,2,4-trichlorobenzene, due to blank contamination.

Semivolatiles – Sample SB-I12-10-03(0-2) was qualified as estimated for 1,2,4-trichlorobenzene due to the matrix spike recovery. Samples analyzed 7/15/00 were qualified as estimated for bis(2-ethylhexyl)phthalate; samples analyzed 7/19/00 were qualified as estimated for hexachlorocyclopentadiene, 4-nitrophenol, di-n-butylphthalate and bis(2-ethylhexyl)phthalate; samples analyzed 7/20/00 were qualified as estimated for hexachlorocyclopentadiene and benzidine due to the CCAL.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – All samples were qualified with an 'R' for tetryl due to the LCS recovery being less than 10 percent. Samples SB-I11-8504-04(0-1) and SB-I11-8504-06(0-0.5) were qualified as 'R' for nitrobenzene, and sample SB-H13-2014-01(0-1.5) for HMX, 2,4,6-trinitrotoluene and nitrobenzene due to the column percent difference exceeding 90%. Sample SB-H13-2014-01(0-1.5) was qualified as estimated for 2,4-dinitrobenzene due to the column percent difference exceeding 25%. Sample SB-H13-2014-01(0-1.5) was reported as BQL for 2,4-dinitrotoluene for the undiluted sample. The result should have been reported as 140000E ug/KG. The laboratory was contacted and the data were revised in the electronic data provided to Montgomery Watson.

TPH/TOC/NC - Nitrocellulose was qualified in all samples in the SDG due to the holding time being exceeded. The laboratory was contacted regarding the nitrogen nitrate/nitrite values being slightly higher in the raw data spreadsheets than in the LIMS forms. The numbers reported appeared to be more that rounding differences.

Metals – The holding time for mercury for samples SB-I12-2010-05(0-1.5), SB-I12-9112-04(0-1)DUP, SB-I12-2186-13(0-1), SB-I12-2186-06(0-1), SB-I12-2186-03(0-1) and SB-I11-8504-03(0-1) was exceeded, which resulted in estimated qualification of the results. All antimony results were qualified as estimated due to the LCS and matrix spike recoveries. Sample SB-I12-10-03(0-2) was qualified as estimated for arsenic due to the matrix spike. All soil samples were qualified as estimated for mercury due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for pair SB-I12-9-01(0-1)/DUP for PCB 1254. The trip blank contained naphthalene (2 J ug/L).

SDG 6078

Volatiles – NA

Semivolatiles – All samples in the SDG were qualified as estimated for n-nitrosodinpropylamine due to the LCS recovery. Sample SB-A11-8-02(0-1.5) was qualified as estimated for 4-chloro-3-methylphenol and phenol due to the matrix spike. Compounds associated with internal standards that exceeded control limits for samples SB-A12-4-02(0-1.25) and SB-B11-523-01(0-2) were qualified as estimated. Samples analyzed 7/10/00 were qualified as estimated for 2,2'-oxybis(1-chloropropane), n-nitrosodi-n-propylamine, hexachlorocyclopentadiene and 3,3'-dichlorobenzidine; samples analyzed 7/14/00 were qualified as estimated for 2,2'-oxybis(1-chloropropane), n-nitrosodi-n-propylamine, nitrobenzene, hexachlorocyclopentadiene, 2,4-dinitrophenol and 4,6-dinitro-2-methylphenol; samples analyzed 7/17/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'-oxybis(1-chloropropane), n-nitrosodi-n-propylamine, nitrobenzene and 3,3'dichlorobenzidine, due to the CCAL. Field blank FB-80 was qualified as estimated for hexachlorocyclopentadiene due to the CCAL. Bis(2-ethylhexyl)phthalate was qualified as estimated in samples SB-A11-8-02(0-1.5), SB-A12-4-02(0-1.25), SB-A11-570-01(0-2), SB-B11-523-01(0-2) and SB-B11-663-06(0-4) due to blank contamination. Several samples have a 'B' handwritten on the LIMs forms. The laboratory was contacted to ensure that the 'B' qualifier will be included in the EDD to Montgomery Watson.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-B11-663-06(0-4) was qualified as estimated for 2,4,6-dinitrotoluene and FB-80 for nitroglycerine, due to the holding time being exceeded. Sample SB-B11-663-06(0-4) was qualified as estimated for 1,3,5-trinitrobenzene and 2,4-dinitrotoluene the column percent difference exceeding 25% and as 'R' for 4-amino-2,6-dinitrotoluene, 2-amino-4,6-trinitrotoluene and nitrobenzene for the column percent difference exceeding 90%.

TPH/TOC/NC - No qualification of data.

Metals – The mercury preparation data for all soil samples was incorrect for the SDG. The laboratory was contacted and revised data were submitted. Copper was qualified as 'U' for FB-80, and cadmium for samples SB-A11-8-02(0-1.5)MS/MSD, SB-A11-8-02(0-1.5), SB-A12-6-02(0-2)DUP, and SB-A12-6-02(0-2) due to blank contamination. Sample SB-B11-663-06(0-4) was qualified as estimated for antimony, copper, thallium and zinc due to the matrix spike.

Other Comments – Field duplicate precision was not met for lead for pair SB-A11-8-02(0-1.5).

SDG 6044

Volatiles – NA

Semivolatiles – Sample H8-2181-05(0-1.5) was qualified as estimated for all compounds due to the surrogate recovery. Acenaphthene was qualified as estimated in samples SB-I11-9303-02(0-1) and SB-G13-1-03(0-2)DUP due to the LCS recoveries. The LIMS identification for FB-79 should be FB-78 for one of the two samples reported. Samples analyzed 7/19/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'-oxybis(1-chloropropane), n-nitroso-di-n-propylamine, nitrobenzene, isophorone, benzidine, hexachlorocyclopentadiene, 3,3'-dichlorobenzidine; samples analyzed 7/19/00 were qualified as estimated for , 2,2'-oxybis(1-chloropropane), 2,4-dinitrophenol and 3,3'-dichlorobenzidine; samples analyzed 7/14/00, 7/18/00 and 7/19/00 were qualified as estimated for benzidine, due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Samples FB-78 and FB-79 were qualified as estimated for nitroglycerine due to missed holding times. All soil samples in the SDG were qualified as estimated for tetryl due to the low LCS recovery (<10%). Sample SB-I11-9303-02(0-1) was qualified as 'R' for nitrobenzene due to the column percent difference exceeding 90%, and sample SB-I11-9303-02(0-1) was qualified as estimated for 2,4-dinitrotoluene, due to the column percent difference exceeding 25%.

TPH/TOC/NC - All soil ammonia-nitrogen, nitrocellulose and nitrate/nitrite nitrogen results on the raw LIMS forms were not reflected in the raw data. The laboratory was contacted and revised data were submitted.

DDNP - Sample H8-2181-0510-1) was qualified as estimated for DDNP due to the matrix spike recovery. Sample FB-79 was qualified as estimated for DDNP due to holding time exceedance.

Metals – Sample SB-G13-1-03(0-2) was qualified as estimated for antimony due to the LCS recovery. Sample FB-79 was qualified as 'U' for copper and lead and sample FB-78 was qualified as 'U' for copper and zinc due to blank contamination. Lead was reported at too high a concentration to qualify the lead due to the method blank.

Phenolics - No qualification of data.

Other Comments – Field duplicate precision was not met for pair SB-I12-1-04(0-1)/DUP for 2,4-dinitrotoluene. Field blank FB-78 contained cadmium (0.438 ug/L), chromium (4.94 ug/L) and lead (39 ug/L).

SDG 6104

Volatiles – NA

Semivolatiles – All soil samples were qualified as estimated for n-nitroso-di-n-propylamine, due to the LCS and matrix spike recoveries. Sample SB-H9-3-03(0-2) was qualified as estimated for 1,2,4-trichlorobenzene, 4-chloro3-methylphenol and pyrene due to the matrix spike. Samples analyzed 7/18/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'-oxybis(1-chloropropane), n-nitroso-di-n-propylamine, 2,4-dinitrophenol, 4,6-dinitro-2-methylphenol and 3,3'-dichlorobenzidine; samples analyzed 7/19/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'-oxybis(1-chloropropane), n-nitroso-di-n-propylamine, nitrobenzene, 2,4-dinitrophenol, 4,6-dinitro-2-methylphenol and benzidine; samples analyzed 7/17/00 were qualified as estimated for benzidine, due to the CCAL recovery.

Pesticides/PCBs – Sample SB-H10-9308-03(0-2) was reported at a 2x dilution and should have been reported at the undiluted analysis with the exception of AR1260 which should have been reported from the 2x dilution... Also, the preparation date for sample SB-G9-8205-02(0-1.25) was incorrect. The laboratory was contacted and revisions were submitted.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - All nitrocellulose results were qualified as estimated due to missed holding times (1 day out).

Metals – Sample SB-H9-3-03(0-2) was qualified as estimated for copper and zinc due to the matrix spike recoveries. All soil samples were qualified as estimated for antimony and lead due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for mercury, chromium, zinc, thallium, beryllium, copper and lead for pair SB-G9-15-02(0-2)/DUP.

SDG 6105

Volatiles – NA

Semivolatiles – Several samples were qualified as 'U' for benzo(a)pyrene and/or benzo(g,h,i)perylene due to blank contamination. All compounds for FB-82 were qualified as estimated due to the surrogate recovery. Sample SB-F10-3-07(0-1) was qualified as 'R' for 2,4-dinitrotoluene and as estimated for 1,2,4-trichlorobenzene, 4-chloro-3-methylphenol, acenaphthene and pentachlorophenol. Sample SB-N9-2267-03(0-1.5) was qualified as estimate for di-n-butylphthalate and n-nitrosodiphenylamine due to missed holding times and also compounds associated with internal standards outside control limits were qualified as estimated for samples SB-N9-2267-03(0-1.5) and SB-E9-2296C-01(0-2). Samples analyzed 7/20/00 were qualified as estimated for hexachlorocyclopentadiene and benzidine; samples analyzed 7/21/00 were qualified as estimated for hexachlorocyclopentadiene, 2,4-dinitrophenol, 4-nitrophenol, di-n-butlyphthalate, butyl benzylphthalate, bis(2-ethylhexyl)phthalate, di-n-octylphthalate and benzidine; samples analyzed 7/22/00 were qualified as estimated for hexachloroethene,

hexachlorocyclopentadiene, 4-nitrophenol, butyl benzylphthalate, benzidine and bis(2-ethylhexyl)phthalate; samples analyzed 7/26/00 were qualified as estimated for hexachloroethene, hexachlorocyclopentadiene, 4-nitrophenol and benzidine.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – Sample SB-F10-3-07(0-1) was qualified as estimated for al compounds due to the surrogate recovery. All soil samples were qualified as 'R' for tetryl due to the very low LCS recovery. . The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%:, 2,4,6-trinitrotoluene and nitrobenzene for sample SB-N9-2267-03(0-1.5), 2,4,6-trinitrotoluene for sample SB-F10-3-07(0-1), nitrobenzene for sample SB-E9-2-01(0-1.5); and nitrobenzene and 2,4-dinitrotoluene for sample SB-H10-9001-03(0-1). The following compounds were qualified as 'J' for the indicated samples due to the column percent difference exceeding 25%: nitrobenzene for sample SB-G12-6-03(0-1), 1,3,5-trinitrobenzene for sample SB-F10-3-07(0-1). Samples FB-81 and FB-82 were qualified as estimated for nitroglycerin due to the holding times being exceeded. All of the preparation holding times were incorrectly reported on the LIMS forms. The laboratory was contacted and revisions were submitted.

TPH/TOC/NC - All nitrocellulose result were qualified as estimated due to missed holding times.

Metals – Samples FB-81 and FB-82 were prepared outside the required holding times for samples FB-81 and FB-82. The mercury results for these samples were qualified as estimated. Cadmium was qualified as 'U' for samples SB-G12-8109-01(0-2), SB-N9-2267-05(0-2), SB-G8-2249-01(0-1), SB-G8-2204-03(0-1), SB-B10-3-01(0-1), SB-B10-4-02(0-2), SB-E9-2296B-04(0-2), SB-E9-2296D-03(0-2) and SB-E9-2296D-03(0-2)DUP due to blank contamination. All soil samples were qualified as estimated for antimony due to the matrix spike and LCS recoveries. Sample SB-N9-2267-05(0-2) was qualified as estimated for arsenic due to the matrix spike. All soil samples were qualified as estimated for mercury due to the laboratory duplicate precision.

Other Comments – Field blank FB-81 contained cadmium (0.83 ug/L), copper (1.3 ug/L), mercury (0.33 ug/L), nickel (9 ug/L) and zinc (11.6 ug/L) and FB-82 contained nickel (5.7 ug/L) and zinc (7.5 ug/L). Field duplicate precision was not met for n-nitrosodiphenylamine for pair SB-N9-2267-05(0-2)/DUP. Sample SB-F10-3-07(0-1) was qualified as 'R' for 2,4-dinitrotoluene and as estimated for 1,2,4-trichlorobenzene, 4-chloro-3-methylphenol, acenaphthene and pentachlorophenol. Sample SB-N9-2267-03(0-1.5) was qualified as estimate for di-n-butylphthalate and n-nitrosodiphenylamine due to missed holding times and also compounds associated with internal standards outside control limits were qualified as estimated for samples SB-N9-2267-03(0-1.5) and SB-E9-2296C-01(0-2).

SDG 7055

Volatiles – Na

Semivolatiles – Several samples were qualified as estimated for benzidine due to the CCAL recovery.

Pesticides/PCBs – Samples SB-F8-5-01(0-1) and SB-F8-8-01(0-1.5) were qualified as estimated for AR1260 due to the CCAL recovery.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - No qualification of data.

Metals – Sample SB-Q6-9311-03(0-2) was qualified as estimated for selenium, and all soil samples were qualified as estimated for antimony due to the matrix spike recovery.

Other Comments – Field duplicate precision was not met for chromium for pair SB-G10-18-04(0-1.25)/DUP.

SDG 7061

Volatiles – All soil samples in the SDG were qualified as estimated due to surrogate problems. Sample SB-L5-5-03(0.5) was qualified as estimated for benzene and trichloroethene due to the LCS recovery. Compounds associated with internal compounds that were outside control limits were qualified as estimated for samples SB-I6-8-01(0.5), SB-L5-1-01(0.5), SB-L5-1-01(0-5)DUP and SB-L5-5-03(0.5). Samples FB-93 and Trip Blank 7-14-00 were qualified as estimated for acrolein due to the CCAL recovery. All samples in the SDG were qualified as 'U' for methylene chloride, due to blank contamination.

Semivolatiles – Samples analyzed 8/23/00 were qualified as estimated for hexachlorocyclopentadiene, 3,3'-dichlorobenzidine, indeno(1,2,3-cd)pyrene, benzo(g,h,i)perylene and dibenz(a,h)anthracene, and sample analyzed 8/24/00 were qualified as estimated for hexachlorocyclopentadiene, 2,4-dinitrophenol and benzidine due to the CCAL recovery.

Pesticides/PCBs – Sample FB-92 was qualified as estimated for all PCBs due to holding time exceedance.

Explosives/ Nitroglycerine – Sample SB-L5-1-01(0-1.5) was qualified as estimated for 2,4,6-trinitrotoluene, and as 'R' for 4-amino-2,6-dinitrotoluene due to the column percent difference.

TPH/TOC/NC - All soil samples were qualified as estimated for nitrocellulose due to the LCS recovery.

Metals – Sample FB-92 was qualified as 'U' for copper and zinc, and FB-93 for copper, lead and zinc due to blank contamination. All soil samples were qualified as estimate for antimony due to the matrix spike, and for copper and nickel due to the laboratory duplicate. Sample SB-L5-1-01(0-1.5) was qualified as estimated for arsenic, thallium and zinc due to the matrix spike.

Other Comments – Field blank FB-92 contained chromium (1.12 ug/L), nickel (10 ug/L) and selenium (3.58 ug/L) and field blank FB-93 contained nickel (9.18 ug/L) and silver (0.747 ug/L).

SDG 6126

Volatiles – NA

Semivolatiles –All samples in the SDG were qualified as estimated for n-nitrosodi-n-propylamine due to the LCS recovery. Sample SB-I6-8181-02(0-1) was qualified as estimated for n-nitrosodi-n-propylamine, 1,2,4-trichlorobenzene, phenol and pyrene due to the matrix spike. Sample SB-H6-8116-02(0-1.25) was qualified as estimated for n-nitrosodi-n-propylamine and 1,2,4-trichlorobenzene due to the matrix spike recovery. Samples analyzed 7/21/00 were qualified as estimated for hexachlorocyclopentadiene, 2,4-dinitrophenol, 4-nitrophenol, 4,6-dinitro-2-methylphenol, benzo(g,h,I)perylene, and benzidine; samples analyzed 7/22/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), hexachlorocyclopentadiene, 4-nitrophenol, 4,6-dinitro-2-methylphenol and benzidine; samples analyzed 7/24/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'oxybis(1-chloropropane), hexachlorocyclopentadiene, 4-nitrophenol, diethylphthalate, di-n-butylphthalate and benzidine; field blank FB-83 was qualified as estimated for nitrobenzene, dibenz(a,h)anthracene and benzo(g,h,i)perylene due to the CCAL recoveries. Samples SB-H6-8116-02(0-1.25), SB-H7-8134-04(0-1.25), SB-H7-8146-04(0-1.5) and SB-H7-8282-02(0-1.25) were qualified as 'U' for di-n-butylphthalate due to blank contamination.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Samples SB-H7-8144-01(0-1) was qualified as 'R' for HMX due to the column percent difference exceeding 90%. Samples SB-H7-8144-01(0-1) was qualified as estimated for RDX and samples SB-I6-E3-04(0-1) and SB-I6-9210-02(0-2) for 2,4-dinitrotoluene due to the column percent difference exceeding 25%. All compounds were qualified as estimated for sample SB-I6-9210-02(0-2) due to the surrogate recovery. All samples in the SDG were qualified as 'R' for tetryl due to the low LCS recovery.

TPH/TOC/NC - All soil samples were qualified as estimated for nitrocellulose due to the holding times being exceeded (2 days past).

Metals – All mercury samples were qualified as estimated due to missed holding times. Cadmium was qualified as estimated for sample SB-H6-941C-03(0-1) due to blank

contamination. Sample SB-H6-8116-02(0-1.25) was qualified as estimated for antimony, zinc and selenium due to the matrix spike recoveries of these analytes.

Other Comments – Field blank FB-83 contained nickel (6.4 ug/L).

SDG 7054

Volatiles – NA

Semivolatiles – Sample SB-F9-2109-05(0-1.5) was qualified as estimated for all compounds due to surrogate recovery. Compounds associated with internal standards that exceeded control limits were qualified as estimated for samples SB-F9-2109-08(0-1), SB-F9-2109-08(0-1)DUP and SB-F9-2109-05(0-1.5). Samples analyzed 7/27/00 were qualified as estimated for hexachlorocyclopentadiene and benzidine; samples analyzed 8/17/00 were qualified as estimated for hexachlorocyclopentadiene; samples analyzed 8/18/00 were qualified as estimated for hexachlorocyclopentadiene and 2,4-dinitrophenol; samples analyzed 8/19/00 were qualified as estimated for hexachlorocyclopentadiene and 3,3'-dichlorobenzidine, due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine –. The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%: m-nitrotoluene for sample SB-F10-20-03(0-1.25), 2,4,6-trinitrotoluene and nitrobenzene for samples SB-F9-2109-08(0-1) and SB-E9-2297-02(0-1), RDX for sample SB-F9-2109-05(0-1.5), 2,4-dinitrotoluene for sample SB-C10-432-02(0-1). The following compounds were qualified as 'J' for the indicated samples due to the column percent difference exceeding 25%: 2,4-dinitrotoluene for samples SB-C12-418-04(0-1.5) and SB-F9-2109-05(0-1.5), HMX and 2,4,6-trinitrotoluene for sample SB-F9-2109-05(0-1.5), HMX for sample SB-F9-2109-08(0-1), HMX, 2,4-dinitrotoluene and 2,4,6-trinitrotoluene for sample SB-F9-2109-08(0-1)DUP, nitrobenzene for sample SB-G7-58-04(0-0.75), and 2,4,6-trinitrotoluene for sample SB-C10-432-02(0-1). Sample SB-E9-2297-02(0-1) was qualified as estimated for 2,4,6-trinitrotoluene and nitrobenzene, sample SB-F9-2109-05(0-1.5) for 2,4,6-trinitrotoluene, 2,4-dinitrotoluene, HMX and RDX, and sample SB-F9-2109-08(0-1) for 2,4,6-trinitrotoluene, 2,4-dinitrotoluene, HMX and nitrobenzene due to the surrogate recovery.

TPH/TOC/NC - Sample SB-G7-58-04(0-0.75) has 2560 mg/Kg in the raw data and 557 on the LIMS, also sample SB-C10-432-02(0-1) shows 1990 in the raw data and the LIMS form shows 82.3. The laboratory was contacted and … All soil samples were qualified as estimated for nitrocellulose due to the LCS recovery.

Metals – Sample FB-91 was qualified as 'U' for copper, lead and nickel due to blank contamination. All soil samples were qualified as estimated for antimony due to the matrix spike and LCS recovery, and for lead due to the laboratory duplicate. Sample SB-F12-6-06(0-2) was qualified as estimated for thallium and lead due to the matrix spike.

Other Comments – Field duplicate precision was not met for pair SB-F9-2109-08(0-1)/DUP for nitrocellulose, lead, zinc, cadmium and 2,4-dinitrotoluene and for pair SB-E12-325B-02(0-2)DUP for benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, chrysene, fluoranthene and pyrene. Field blank FB-91 contained bis(2-ethylhexyl)phthalate (3.19 ug/L) and nickel (9.96 ug/L).

SDG 7059

Volatiles – All soil samples in the SDG were qualified as estimated for all compounds due to the surrogate and internal standard recoveries. All samples in the SDG were qualified with a 'U' for methylene chloride due to blank contamination. The laboratory failed to include the 'B' qualifiers on the LIMS forms which indicates associated blank contamination. The laboratory was contacted and the 'B' will be include in the electronic data deliverable.

Semivolatiles – Phenol was qualified as estimated for sample SB-H7-2172A-05(0-1.25) due to the matrix spike. Compounds associated with internal standards that were outside control limits were qualified as estimated for sample SB-H6-8258-08(0-1) Samples analyzed 8/28/00 on HP#H were qualified as estimated n-nitrosodimethylamine, bis(2-chloroethyl)ether, 2,2'-oxybis(1-chloropropane), 1,2,4-trichlorobenzene, hexachlorobutadiene, 4-chlorophenyl phenylether, 1,2-diphenylhydrazine, 4-bromophenyl phenylether, hexachlorobenzene and benzidine; samples analyzed 8/28/00 on HP#P were qualified as estimated for hexachlorocyclopentadiene, 4,6-dinitro-2-methylphenol, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracen and benzo(g,h,i)perylene due to the CCAL.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - No qualification of data.

Metals – All mercury samples were qualified as estimated due to missed holding times, for thallium due to the matrix spike and post digestion spike, and for arsenic due to the laboratory duplicate. Sample SB-H7-2172A-05(0-1) was qualified as estimated for antimony due to the matrix spike.

Other Comments – Field duplicate precision was not met for bis(2-ethylhexyl)phthalate for pair SB-H5-8254-04(0-1.25)/DUP.

SDG 6128

Volatiles – Sample SB-H12-8607-01(0.5) was qualified as estimated for all compounds due to missed holding times. Carbon tetrachloride was qualified as estimated in samples SB-F9-1-01(0.5), SB-G9-8105-05(0.5), SB-F10-2162-02(0.5), SB-H11-3-03(0.5), SB-

H10-9101-02(0.5)DUP and SB-H10-9101-02(0.5) and 1,1-dichloroethene, 1,1,1-trichloroethane and carbon tetrachloride for sample SB-H12-8607-01(0.5), due to the LCS recovery. Samples analyzed 7/6/00 were qualified as estimated for 1,1,1-trichloroethane, carbon tetrachloride and trichloroethene; samples analyzed 7/10/00 were qualified as estimated for bromomethane, methylene chloride, 1,1,1-trichloroethane and carbon tetrachloride due to the CCAL recovery. All samples in the SDG were qualified as 'U' for methylene chloride and sample SB-F9-1-01(0.5) for naphthalene, due to blank contamination.

Semivolatiles – Sample FB-84 was qualified as estimated for nitrobenzene, dibenz(a,h)anthracene and benzo(g,h,i)perylene, and samples analyzed 7/24/00 as estimated for n-nitrosodimethylamine, 2,2'-oxybis(1-chloropropane), hexachlorocyclopentadiene, 4-nitrophenol, diethylphthalate, di-n-butylphthalate, bis(2-ethylhexyl)phthalate and benzidine; samples analyzed 7/25/00 for n-nitrosodimethylamine, bis(2-chloroethyl)ether, 2,2'-oxybis(1-chloropropane), hexachloroethane, 2,4-dimethylphenol, 4-chloro-3-methylphenol, 4-nitrophenol, diethylphthalate, 1,2-diphenylhydrazine, butyl benzyl phthalate, di-n-butylphthalate and benzidine; and samples analyzed 7/29/00 for benzidine, due to the CCAL recoveries.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – The following samples were qualified as estimated for the indicated compounds due to poor surrogate recovery: nitrobenzene for sample SB-E10-2-04(0-2), 2,4,6-trinitrotoluene, 2,4-dinitrotoluene and nitrobenzene for sample SB-F9-1-01(0-1), and nitroglycerine for sample SB-E10-2-04(0-2). Sample FB-84 was qualified as 'R' for tetryl due to poor LCS recovery. –. The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%:, nitrobenzene for sample SB-E10-2-04(0-2) and SB-E10-2-04(0-2)DUP, 4-amino-2,6-dinitrotoluene for sample SB-L12-275-01(0-2), 4-amino-2,6-dinitrotoluene and 2-amino-4,6-dinitrotoluene for sample SB-D11-B232-06(0-2), nitrobenzene for sample SB-E11-2-02(0-1.5), and 2,4,6-trinitrotoluene and nitrobenzene for sample SB-F9-1-01(0-1).. The following compounds were qualified as 'J' for the indicated samples due to the column percent difference exceeding 25%: 2,4-dinitrotoluene for samples SB-L12-275-01(0-2), SB-D11-B232-06(0-2) and SB-F9-1-01(0-1).

TPH/TOC/NC - No qualification of data.

Metals – Sample FB-84 was qualified as estimated for mercury due to holding time exceedance. All soil samples were qualified as estimated for antimony due to the LCS recovery, and for selenium and thallium for sample SB-H12-8607-01(0-2) due to the matrix spike recovery. All samples were qualified as estimated for mercury, chromium, nickel and zinc due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for arsenic, beryllium, chromium, copper, lead, nickel and zinc for pair SB-H10-9101-02(0-1)/DUP. Field blank FB-84 contained nickel (6.8 ug/L).

SDG 6129

Volatiles – Samples analyzed 6/30/00 were qualified as estimated for bromomethane, methylene chloride, 1,1,1-trichloroethane, carbon tetrachloride and methylene chloride; samples analyzed 7/6/00 were qualified as estimated for 1,1,1-trichloroethane, carbon tetrachloride, trichloroethene and methylene chloride, due to the CCAL recovery. All samples were qualified as estimated for methylene chloride due to blank contamination.

Semivolatiles – All samples in the SDG were qualified as estimated for n-nitroso-di-n-propylamine due to the matrix spike. Sample FB-85 was qualified as estimated for nitrobenzene, dibenz(a,h)anthracene and benzo(g,h,i)perylene, and the soil samples were qualified as estimated for n-nitrosodimethylamine, 2,2'-oxybis(1-chloropropane),n-nitroso-di-n-propylamine, nitrobenzene, 3,3'-dichlorobenzidine and benzidine due to the CCAL.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Field blank FB-85 was qualified as 'R' for tetryl due to poor LCS recovery.

TPH/TOC/NC - No qualification of data.

Metals – Antimony was qualified as estimated in sample SB-H12-8563-01(0-1) due to the matrix spike recovery. All soil samples were qualified as estimated for nickel due to the serial dilution. Field blank FB-85 was qualified as 'U' for zinc due to blank contamination.

Other Comments – Field blank FB-85 contained naphthalene (9.4 ug/L) and trip blank TRIP BLANK 6/23 contained naphthalene (3.8 ug/L).

SDG 7002

Volatiles – NA

Semivolatiles – Samples analyzed 8/8/000 were qualified as estimated for n-nitrosodimethylamine and hexachlorocyclopentadiene; samples analyzed 8/9/00 were qualified as estimated for 2,4-dinitrotoluene; samples analyzed 8/10/00 were qualified as estimated for n-nitrosodimethylamine, hexachlorocyclopentadiene, 3,3'-dichlorobenzidine and benzidine due to the CCAL recoveries.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-D13-3-02(0-2) was qualified as 'R' for 4-amino-2,6-dinitrotoluene and 2-amino-4,6-dinitrotoluene, and sample SB-E13-2074A-05(0-2) for HMX due to the column percent difference exceeding 90%. Sample SB-E13-2074A-

05(0-2)DUP was qualified as estimated for HMX and RDX due to the column percent difference exceeding 25%.

TPH/TOC/NC - NA

Metals – Sample SB-F9-2251-01(0-1) was qualified as estimated for mercury due to a missed holding time. All samples were qualified as estimated for antimony due to the LCS and matrix spike. All samples were also qualified as estimated for beryllium, chromium, silver and thallium due to the LCS recoveries and for mercury due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for beryllium, chromium, copper, lead, nickel and selenium for pair SB-F13-8209-02(0-1.5)/DUP.

SDG 7011

Volatiles – NA

Semivolatiles – Phenol was qualified as estimated in sample SB-D10-2233C-02(0-2), due to the matrix spike. Samples analyzed 7/18/00 were qualified as estimated for n-nitrosodimethylamine, hexachlorocyclopentadiene, 4-nitrophenol and 3,3'-dichlorobenzidine; samples analyzed 7/19/00 were qualified as estimated for 2,2'-oxybis(1-chloropropane), hexachlorocyclopentadiene, 2,4-dinitrophenol and 4-nitrophenol; samples analyzed 7/27/00 were qualified as estimated for hexachlorocyclopentadiene and benzidine, due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample FB-86 was qualified as estimated for all compounds and sample FB-87 was qualified estimated for nitroglycerin, due to missed holding times.

TPH/TOC/NC - NA

Metals – The mercury results for FB-86 and FB-87 were qualified as 'R' due to the holding time exceedance (>2x). All soil samples were qualified as estimated for antimony, thallium, arsenic, beryllium, cadmium, chromium and silver due to the matrix spike and LCS recoveries. All soil samples were qualified as estimated for arsenic due to the laboratory duplicate precision. Sample FB-86 was qualified as 'U' for silver, and FB-87 for cadmium due to blank contamination.

Other Comments – Field blank FB-86 contained di-n-butylphthalate (7.96 ug/L) and nickel (10.1 ug/L) and FB-87 contained nickel (8.9 ug/L).

SDG 7018

Volatiles – NA

Semivolatiles – Phenol, 1,2,4-trichlorobenzene, acenaphthene and pentachlorophenol were qualified as estimated for sample SB-C11-18-01(0-2)DUP due to the matrix spike recovery**.** Field blank FB-88 was qualified as estimated for 3,3'-dichlorobenzidine and samples analyzed 8/10/00 were qualified as estimated for hexachlorocyclopentadiene, 3,3'-dichlorobenzidine and benzidine; samples analyzed 8/11/00 were qualified as estimated for hexachlorocyclopentadiene and 3,3'-dichlorobenzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample FB-88 was qualified as estimated for nitroglycerin due to the holding time being exceeded. All compounds for sample SB-C11-18-01(0-2) were qualified as estimated due to the surrogate recovery. All soil samples in the SDG were qualified as estimated for o-nitrotoluene, HMX and 2,4-dinitrotoluene due to the LCS recoveries.

TPH/TOC/NC - NA

Metals – Samples SB-E10-2031C-03(0-1.5), SB-C11-18-01(0-2), SB-C11-18-01(0-2)DUP, SB-C11-N3-02(0-1), SB-B11-9-03(0-1), SB-C10-10-02(0-1), SB-C10-241A-05(0-1.5) and SB-C10-241C-03(0-2) were qualified as estimated for mercury due to blank contamination. All soil samples were qualified as estimated for antimony due to the matrix spike and LCS recoveries, and for mercury and lead due to the laboratory duplicate precision. Sample SB-C10-241A-05(0-1.5) was qualified as estimated for thallium and mercury due to the matrix spike recovery. Sample FB-88 was qualified as estimated for selenium due to the matrix spike.

Other Comments – Field blank FB-88 contained copper (1.38 ug/L), lead (2.36 ug/L), nickel (9.14 ug/L) and zinc (9.45 ug/L).

SDG 7017

Volatiles – NA

Semivolatiles – Samples analyzed 8/14/00 were qualified as estimated for hexachlorocyclopentadiene, and samples analyzed 8/15/00 were qualified as estimated for 2,2'-oxybis(1-chloropropane) and hexachlorocyclopentadiene due to the CCAL recoveries.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - NA

Metals – Sample SB-O13-8604-03(0-1) was qualified as estimated for mercury due to missed holding times. Selenium was qualified as 'U' for several samples due to blank contamination. Antimony and selenium were qualified as estimated in sample SB-D10-2007-04(0-2) due to the matrix spike recoveries. All soil samples in the SDG were qualified as estimated for beryllium and selenium due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for pair SB-O14-8603-04(0-2)/DUP for antimony.

SDG 7129

Volatiles – NA

Semivolatiles - All soil samples were qualified as estimated for hexachlorocyclopentadiene and 3,3'-dichlorobenzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample FB-94 was qualified as estimated for nitroglycerin due to holding time exceedance.

TPH/TOC/NC - No qualification of data.

Metals – Sample FB-94 was qualified as 'U' for chromium due to blank contamination. All soil samples were qualified as estimated for antimony due to the matrix spike and LCS recoveries.

Other Comments – Field blank FB-94 contained copper (3.45 ug/L), nickel (8.16 ug/L) and zinc (4.49 ug/L).

SDG 7031

Volatiles – NA

Semivolatiles – Samples SB-C14-4-03(0-2) and SB-D14-6-02(0-2) were qualified as estimated for all compounds due to surrogate recovery. Compounds associated with internal standards that exceeded control limits were qualified as estimated for samples SB-D14-129-03(0-2) and SB-D14-129-03(0-2)DUP. Samples analyzed 8/15/00 were qualified as estimated for hexachlorocyclopentadiene, 3,3'-dichlorobenzidine and benzidine; samples analyzed 8/16/00 were qualified as estimated for hexachlorocyclopentadiene, 3,3'-dichlorobenzidine, and samples analyzed 8/17/00 were qualified as estimated for hexachlorocyclopentadiene due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - The reported concentrations for nitrocellulose were incorrect - the laboratory was contacted and revisions were submitted. All samples were qualified as estimated for nitrocellulose due to the LCS recovery.

Metals – Sample FB-89 was qualified as estimated for mercury due to a holding time exceedance, and qualified as 'U' for cadmium, copper and zinc due to blank contamination. All soil samples were qualified as estimated for antimony due to the matrix spike and LCS recoveries, and as estimated for mercury and nickel due to laboratory duplicate precision. Sample SB-B14-3-02(0-2) was qualified as estimated for thallium due to the matrix spike recovery.

Other Comments – Field duplicate precision was not met for pair SB-D14-120-03(0-2)/DUP for arsenic. Field blank FB-89 contained nickel (4.22 ug/L).

SDG 7186

Volatiles – NA

Semivolatiles – Sample FB-97 was qualified as estimated for bis(2-chloroethyl)ether, hexachlorocyclopentadiene and 3,3'-dichlorobenzidine due to the CCAL. Samples analyzed 9/5/00 were qualified as estimated for 4-chloro-3-methylphenol and samples analyzed 9/7/00 were qualified as estimated for 4-chloro-3-methylphenol and 4-nitrophenol. Sample FB-97 was qualified as 'U' for bis(2-ethylhexyl)phthalate due to blank contamination.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – All soil samples were qualified as estimated for HMX, RDX and nitrobenzene due to the LCS recoveries. Sample SB-K8-393-01(0-1) was qualified as 'J' for 2,4-dinitrotoluene, sample SB-K8-9207-04(0-1.5) for 2-amino-4,6-dinitrotoluene due to the column percent difference exceeding 25%. Sample SB-K8-9207-04(0-1.5) was qualified as 'R' for 4-amino-2,6-dinitrotoluene and sample SB-K11-598-02(0-0.5) for nitrobenzene, due to the column percent difference exceeding 90%. Samples SB-K8-393-01(0-1) and SB-J9-6-01(0-1) were qualified as estimated for nitroglycerine due to the surrogate recovery, and sample SB-K8-9207-04(0-1.5) for nitroglycerine due to the matrix spike recovery.

TPH/TOC/NC - All soil samples were qualified as estimated for nitrocellulose due to missed holding times.

Metals – Sample SB-L8-8235-02(0-1) was qualified as estimated for antimony, arsenic, selenium and thallium due to the matrix spike. Sample FB-97 was qualified as 'U' for copper and zinc due to blank contamination. All soil samples were qualified as estimated

for nickel due to the laboratory duplicate precision, and for beryllium and zinc due to the serial dilution.

Other Comments – Field blank FB-97 contained chromium (2.14 ug/L) and nickel (5.8 ug/L) and di-n-butyl phthalate (1.02 ug/L).

SDG 8004

Volatiles – Sample SB-G10-8224-05(3.5) was qualified as estimated for all compounds due to the surrogate recovery. The 'B' qualifiers are handwritten on the LIMS forms, the laboratory was contacted to ensure the EDD submitted to MW contains the 'B's. All samples were qualified as estimated for chloromethane, 2-chloroethyl vinyl ether and 1,2,4-trichlorobenzene due to the CCAL recovery. All samples were qualified with a 'U' for methylene chloride, and sample SB-H6-10-A(10) for naphthalene due to blank contamination.

Semivolatiles – Sample SB-H6-8152A/8152B(7) was qualified as estimated for phenol due to the matrix spike, and all samples for pyrene due to the LCS recovery. Samples analyzed 9/6/00 were qualified as estimated for bis(2-chloroethyl)ether and pyrene, and samples analyzed 9/7/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, n-nitrosodi-n-propylamine, di-n-butylphthalate and benzidine due to the CCAL recoveries.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-I10-PA8(5.5) was qualified as estimated for 2,4-dinitrotoluene due to the absence of the second column confirmation.

TPH/TOC/NC - No qualification of data.

Metals – NA

Other Comments – NA

SDG 8010

Volatiles – All compounds were qualified as estimated for sample SB-E16-8561-02(0.5) due to the surrogate recovery. All samples were qualified as estimated for bromomethane due to the CCAL recovery. Sample SB-E16-8561-02(0.5) was qualified as estimated for methylene chloride, and sample TB 7/27/00 for methylene chloride and naphthalene, due to blank contamination.

Semivolatiles – Compounds associated with internal standards that exceeded the control limits were qualified as estimated for samples SB-Q6-8-05(0-.5), SB-E12-286D-07(0-1) and SB-E12-286D-07(0-1)DUP. Sample FB-99 was qualified as estimated for hexachlorocyclopentadiene and 3,3'-dichlorobenzidine and samples analyzed 9/8/00 were

qualified as estimated for di-n-octylphthalate due to the CCAL recovery. Blank SBLKB had the wrong units for the soil matrix, they should have been reported in mg/Kg but were as ug/L.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – All soil samples were qualified a estimated for tetryl and 2,4-dinitrotoluene due to the LCS recovery. Sample FB-99 was qualified as estimated for HMX, RDX and nitrobenzene due to the LCS recovery. Sample SB-Q6-8-05(0-.5) was qualified as estimated for 2,4,6-trinitrotoluene due to the column percent difference exceeding 25% and as 'R' for nitrobenzene for sample SB-Q6-8-05(0-.5) due to the column percent difference exceeding 90%.

TPH/TOC/NC - All samples were qualified as estimated for nitrocellulose due to missed holding times.

Metals – Samples SB-P5-2-03(0-1.5), SB-08-732-04(0-2), SB-Q6-8-05(0-.5), SB-R5-1-03(0-1), SB-R5-1-03(0-1)DUP, SB-S6-1-02(0-1), SB-S7-1-01(0-1.5), SB-E12-286D-07(0-1) and SB-E12-286D-07(0-1)DUP were qualified as 'U' for cadmium, and samples SB-R5-1-03(0-1), SB-R5-1-03(0-1)DUP, SB-S6-1-02(0-1.5),SB-E12-286D-07(0-1) and SB-E12-286D-07(0-1) for antimony, due to blank contamination. All soil samples were qualified as estimated for antimony due to the matrix spike, and for arsenic, chromium, copper, lead and nickel due to the laboratory duplicate precision. Sample SB-E12-286D-07(0-1)DUP was qualified as estimated for selenium and zinc due to the matrix spike recovery. Sample FB-99 was qualified as 'U' for copper and zinc due to blank contamination.

Other Comments – Field duplicate precision was not met for pair SB-R5-1-03(0-1)/DUP for chromium and pair SB-E12-286D-07(0-1)/DUP for arsenic, selenium and nitrocellulose. Sample TB 7/27/00 contained hexachlorobutadiene (0.7 ug/L).

SDG 8041

Volatiles –All compounds were qualified as estimated for samples TP-J11-11-01(7.5), TP-G11-9304A-01(3.5) and TP-H13-8226-06(6) due to surrogate recovery. Several samples had 'B' handwritten on the LIMS form. The laboratory was contacted to ensure that the 'B' will be included in the EDD. Samples FB-102 and Trip blank were qualified as estimated for chloromethane and 2-chlorovinyl ether due to the CCAL. All samples were qualified with a 'U' for methylene chloride, naphthalene or both compounds due to blank contamination.

Semivolatiles – Sample FB-102 was qualified as estimated for 2-chloronaphthalene, and samples TP-J11-11-01(7.5) , TP-J11-11-01(7.5)DUP, TP-G10-8204-06(2) , TP-F10-8237A-01(1.5) , TP-F9-PA4-01(3.5), TP-F9-2105-6-01(4) and TP-F9-PA5-01(5.5) for pyrene, due to the LCS recovery. Sample FB-102 was qualified as estimated for n-nitrosodimethylamine, and samples analyzed 9/9/00 for hexachlorocyclopentadiene, 2,4-

dinitrophenol and 4,6-dimitro-2-methylphenol, due to the CCAL recovery. Field blank FB-102 was used to 'U' qualify sample TP-F9-PA4-01(3.5) for di-n-butlyphthalate. There were several other samples containing di-n-butylphthalate, however, the concentrations in the samples exceeded ten-times the FB concentration, thus could not be qualified as 'U'.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample TP-F9-PA4-01(3.5) was qualified as 'R' for HMX and 2,4,6-trinitrotoluene due to the column percent difference exceeding 90%. The following samples and indicated compounds were qualified as estimated due to the column percent difference exceeding 25%: TP-F9-PA4-01(3.5) for 2,4-dinitrotoluene; TP-F9-2105-6-01(4) and TP-F9-PA5-01(5.5) for HMX.

TPH/TOC/NC - No qualification of data.

Metals – Sample FB-102 was qualified as estimated for copper and zinc due to the method blank. Sample TP-G10-8204-06(2) was qualified as estimated for nickel due to the serial dilution.

Other Comments – Sample Trip blank contained toluene (1.18 ug/L) and field blank FB-102 contained nickel (6.66 ug/L) and di-n-butlyphthalate (12.8 ug/L).

SDG 8036

Volatiles – Sample SB-J11-1-19(0.5) was qualified as estimated for all compounds due to surrogate recovery. Sample SB-J11-1-12(0.5) was qualified as estimated for 1,2,4-trichlorobenzene due to the ICAL recovery, and samples analyzed 8/9/00 were qualified as estimated for chloromethane, methylene chloride and 2-chloroethylvinyl ether due to the CCAL recovery. All samples were qualified as 'U' for methylene chloride and samples SB-J11-1-03(0.5) and SB-J11-1-12(0.5) for naphthalene due to blank contamination.

Semivolatiles – All compounds for samples SB-J11-1-08(0-1), SB-J11-1-10(0-1.5), SB-J11-1-11(0-1.5), SB-J11-1-11(0-1.5), SB-J11-1-12(0-2) and SB-J11-1-12(0-2)DUP were qualified as estimated due to surrogate recovery. Sample SB-J11-1-20(0-1) was qualified as estimated for phenol due to the matrix spike. All samples in the SDG were qualified as estimated for 2-chlorophenol, 1,4-dichlorobenzene, n-nitroso-di-n-propylamine and acenaphthene due to the LCS recoveries. Samples analyzed 9/13/00 were qualified as estimated for 4-nitrophenol and hexachlorobenzene due to the CCAL recoveries.

Pesticides/PCBs –NA

Explosives/ Nitroglycerine – Samples SB-L10-2-01(0-1.5) and SB-L10-2088-01(0-1) were qualified as 'R' for 2,4,6-trinitrotoluene due to the column percent difference

exceeding 90% and as estimated for 2,4-dinitrotoluene and 4-amino-2,6-dinitrotoluene, respectively, due to the column percent difference exceeding 25%.

TPH/TOC/NC - All samples were qualified as estimated for nitrocellulose due to the holding times being exceeded.

Metals – Samples SB-L10-2088-01(0-1), SB-L10-8215-01(0-1), SB-L10-2242-01(0-1) were qualified as 'U' for antimony, and samples SB-L10-2-01(0-1.5), SB-L10-2088-01(0-1), SB-L10-8215-01(0-1) and SB-L10-2242-01(0-1) were qualified 'U' for mercury due to blank contamination. Sample SB-L10-2242-01(0-1) was qualified as estimated for antimony and selenium due to the matrix spike recoveries. All samples were qualified as estimated for nickel due to the laboratory duplicate precision.

Other Comments – NA

SDG 8037

Volatiles – All compounds for samples TP-H9-8238-04(7.5), TP-I11-6-01(7.5) and TP-L10-1A-01(5) were qualified as estimated due to surrogate recovery. Samples analyzed 8/10/00 were qualified as estimated for chloromethane and 2-chloroethylvinyl ether and samples analyzed 8/9/00 were qualified as estimated for bromomethane due to the CCAL recovery. All samples in the SDG were qualified as estimated for methylene chloride due to blank contamination.

Semivolatiles – Acenaphthene and n-nitroso-di-n-propylamine were qualified as estimated in sample FB-101, and pyrene was qualified as estimated in the majority of the sample in the SDG due to the LCS recovery. Compounds associated with internal standards that exceeded control criteria were qualified as estimated for samples SB-L7-1-01(0-1.5), SB-I11-7-01(0-1), SB-I11-8260-03(0-1), SB-N9-3-04(0-1), SB-M10-724-03(0-1) and SB-M11-3-03(0-0.5). Samples analyzed 9/12/00 were qualified as estimated for nitrobenzene, samples analyzed 9/9/00 were qualified as estimated for hexachlorocyclopentadiene, 2,4-dinitrophenol and 4,6-dinitro-2-methylphenol; samples analyzed 9/13/00 were qualified as estimated for n-nitrosodimethylamine, 2,2'-oxybis(1-chloro)propane, 4-nitrophenol and benzidine; samples analyzed 9/14/00 were qualified as estimated for n-nitrosodimethylamine, bis(2-chloroethyl)ether, phenol, 2,2'-oxybis(1-chloro)propane, n-nitroso-di-n-propylamine, bis(2-chlorethoxy)methane, hexachlorobutadiene and benzidine due to the CCAL recoveries. The field blank was used to 'U' qualify di-n-butlyphthalate in sample SB-L7-1-01(0-1.5).

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – The following samples and indicated compounds were qualified as estimated due to the column percent difference exceeding 25%: 4-amino-2,6-dinitrotoluene and 2-amin-4,6-dinitrotoluene for sample SB-M10-7-03(0-1.5), nitrobenzene for SB-M9-2261-02(0-1), 2-amino-4,6-dinitrotoluene and 2,4-dinitrotoluene for sample SB-M10-7-03(0-1.5)DUP and 2,4-dinitrotoluene for sample TP-L11-2089-

06(9). The following samples and indicated compounds were qualified as 'R' due to the column percent difference exceeding 90%: 4-amino-2,6-dinitrotoluene for sample SB-M10-7-03(0-1.5)DUP, nitrobenzene for SB-I11-8260-03(0-1.25), SB-I11-7-01(0-1) and TP-L11-2089-06(9).

TPH/TOC/NC - All soil samples were qualified as estimated for nitrocellulose due to missed holding times. The laboratory did not originally submit the NC result for sample 8037-001. The LIMS form was then requested and submitted by the laboratory.

Metals – Sample FB-101 was qualified as 'U' for copper due to blank contamination. Samples SB-M10-724-03(0-1.5), SB-M10-2262-04(0-1.5), TP-H10-13-01(0-) were qualified as 'U' for cadmium; samples SB-M10-B14-02(0-0.5), SB-M11-3-03(0-0.5), SB-M10-1-04(0-1) and TP-H10-13-03(0-2) for antimony, and nearly all samples in the SDG for mercury, due to blank contamination. Sample SB-L10-B462-01(0-1.25) was qualified as estimated for antimony due to the matrix spike recovery.

Other Comments – Field duplicate precision was not met for nitrocellulose for pair SB-M10-7-03(0-1)/DUP and for chromium, copper, lead, nickel, chrysene, benzo(a)anthracene, benzo(a)pyrene and benzo(k)fluoranthene for pair SB-J10-609-01(0-1.5)/DUP. Field blank FB-101 contained nickel (6.8 ug/L) and di-n-butylphthalate (8.51 ug/L).

SDG 8052

Volatiles – Samples TP-I8-8236-06(8), TP-I8-8236-06(8)DUP, TP-M5-10-01(4), TP-F13-8230-05(4.5), TP-F11-8227-07(7.5) and TP-C12-8229-05(4.5) were qualified as estimated for all compounds, due to the surrogate recoveries. Soil samples analyzed 8/11/00 were qualified as estimated for chloromethane and 2-chloroethylvinyl ether; water samples analyzed 8/11/00 were qualified as estimated for tetrachloroethane due to the CCAL recoveries. All samples were qualified as estimated for methylene chloride due to blank contamination.

Semivolatiles – Sample TP-K11-2300-07(7.5) was qualified as estimated for phenol due to the matrix spike recovery. Field blank FB-103 was qualified as estimated for 2-chlorophenol due to the LCS recovery. Compounds associated with the internal standard that exceeded control limits were qualified as estimated in sample TP-J11-2188-09(4). Samples analyzed 9/14/00 were qualified as estimated for hexachlorocyclopentadiene and samples analyzed 9/15/00 were qualified as estimated for 2,4-dinitrophenol and benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine –The following samples and indicated compounds were qualified as 'R' due to the column percent difference exceeding 90%: 2,4,6-trinitrotoluene and nitrobenzene for sample TP-J11-2188-09(4); nitrobenzene, 2,4,6-trinitrotoluene and 2,4-dinitrotoluene for sample TP-J11-2188-10(4); 2,4,6-trinitrotoluene and nitrobenzene

for TP-J11-2188-11(4.5). All soil samples in the SDG were qualified as estimated for tetryl and 2,4-dinitrotoluene due to the LCS recoveries.

TPH/TOC/NC - No qualification of data.

Metals –Sample TP-E10-2031B-05(1) was qualified as estimated for mercury due to the laboratory duplicate precision. Field blank FB-103 was qualified as 'U' for copper and zinc due to blank contamination.

Other Comments – Field blank FB-103 contained nickel (7.4 ug/L). Trip blank TB 8/8/00 contained toluene (1.1 ug/L).

SDG 8138

Volatiles – All compounds were qualified as estimated for samples TP-G7-2347-02(2), TP-G7-2347-03(2), and TP-G6-906-01(2) due to the surrogate recovery. Samples analyzed 8/24/00 were qualified as estimated for acrylonitrile and 2-chloroethyl vinyl ether; samples analyzed 8/23/00 were qualified as estimated for 2-chloroethyl vinyl ether, 1,2,4-trichlorobenzene and napthalene due to the CCAL recovery. Soil samples were qualified as 'U' for naphthalene and methylene chloride and water samples were qualified as 'U' for methylene chloride and toluene due to blank contamination.

Semivolatiles – Field blank sample FB-104 was qualified as estimated for 1,4-dichlorobenzene and 1,2,4-trichlorobenzene due to the LCS recovery. Sample TP-B13-8-06(3.5) was qualified as estimated for 1,2,4-trichlorobenzene due to the LCS recovery. Pyrene was qualified as estimated in samples TP-H5-8181-03(0-2)DUPDL, TP-H5-8181-01(0-2)DL, TP-G7-2347-02(0-2)DL, TP-I11-8504-07(3), TP-I11-3-01(3) and TP-B13-8-06(3.5), due to the LCS recovery. Compounds associated with internals standards that exceeded control limits were qualified as estimated for TP-I11-8504-07(3). Samples analyzed 9/20/00 were qualified as estimated for 2,4-dinitrophenol and samples analyzed 9/21/00 were qualified as estimated for 3,3'-dichlorobenzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – The following compounds were qualified as estimated for the indicate compounds due to the column percent difference exceeding 25%: 2-amino-4,6-dinitrotoluene and 4-amino-2,6-dinitrotoluene for sample TP-B10-503-07(7.5) and 2,4,6-tritnitrotoluene for sample TP-B10-506-07(3.5). Sample TP-B10-503-07(7.5) was qualified as estimated for all compounds due to the holding time being missed.

TPH/TOC/NC - No qualification of data.

Metals – Mercury and antimony were qualified as estimated for sample TP-G7-2347-02(0-2) due to the matrix spike recoveries. All soil samples were qualified as estimated for selenium, due to the LCS recovery. The reporting limits for the soil samples were

incorrectly reported. The laboratory was contacted and … The raw data for FB-104 was not originally submitted in the package.

Other Comments – Field duplicate precision was not met for pair TP-H5-8181-03(0-2)/DUP for mercury. Field blank FB-104 contained copper (5.5 ug/L), trichloroethene (4.1 ug/L) and selenium (2.8 ug/L). Trip blank TB 8/17/00 contained naphthalene (5.1 ug/L) and trichloroethene (4 ug/L).

SDG 8078

Volatiles – Sample TP-E16-8561-05(2.5) was qualified as estimated for 1,2,4-trichlorobenzene due to the ICAL recovery. Soil samples analyzed 8/15/00 were qualified as estimated for 2-chloroethyl vinyl ether and 1,2,4-trichlorobenzene due to the CCAL recovery. All samples in the SDG were qualified as 'U' for methylene chloride and/or naphthalene due to blank contamination.

Semivolatiles – Sample TP-H13-8158A-01(5.5) was qualified as estimated for 1,2,4-trichlorobenzene due to the matrix spike recovery. Samples FB-104 and FB-105 were qualified as estimated for 2-chlorophenol, 4-nitrophenol and pentachlorophenol due to the LCS recoveries. Samples analyzed 9/14/00 were qualified as estimated for hexachloroethane, 4-nitrophenol and 1,2-diphenylhydrazine and samples analyzed 9/15/00 were qualified as estimated for hexachloroethane, n-nitroso-di-n-propylamine, 4-nitrophenol, 1,2-diphenylhydrazine, hexachlorobutadiene and benzidine due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – The following samples and indicate compounds were qualified as 'R' due to the column percent difference exceeding 90%: 2,4,6-trinitrotoluene for samples TP-I12-7-05(6) and TP-E9-2296-09(7.5); nitrobenzene for sample TP-E10-PA12-01(3.5). The following samples and indicated compounds were qualified as estimated due to surrogate recovery: 2,4,6-trinitrotoluene, nitrobenzene and nitroglycerine for sample TP-E9-2296-09(7.5). Samples TP-E10-PA12-01(3.5) and TP-E9-2296-09(7.5) were qualified as estimated for nitroglycerine due to the LCS recovery.

TPH/TOC/NC - Samples FB-104 and FB-105 were qualified as estimated for TOC due to missed holding times. All soil samples were qualified as estimated for nitrocellulose due to the LCS recovery.

Metals –NA

Other Comments – NA

SDG 8019

Volatiles – NA

Semivolatiles – Sample SB-K10-2197-04(0-2) was qualified as estimated for phenol due to the matrix spike recovery. Compounds associated with internal standards that exceeded control limits were qualified as estimated for sample SB-J11-14-01(0-1). Samples analyzed 8/9/00 were qualified as estimated for hexachlorocyclopentadiene and 3,3'-dichlorobenzidine; samples analyzed 8/10/00 were qualified as estimated for n-nitrosodimethylamine; samples analyzed 9/8/00 were qualified as estimated for di-n-octylphthalate; samples analyzed 9/13/00 were qualified as estimated for 4-nitrophenol and hexachlorobenzene; and samples analyzed 9/14/00 were qualified as estimated for hexachloroethane, 4-nitrophenol and 1,2-dichlorobenzidine due to the CCAL recoveries.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-K11-604-03(0-1) was qualified as 'R' for 2,4,6-trintrotoluene, and sample SB-J11-B83-03(0-.75) as 'R' for nitrobenzene due to the column percent difference exceeding 90%. Sample SB-K11-604-03(0-1) was qualified as estimated for nitrobenzene due to the column percent difference exceeding 25%.

TPH/TOC/NC - All soil samples were qualified as estimated for nitrocellulose due missed holding times.

Metals – Samples SB-K11-2301-02(0-1), SB-J11-14-01(0-1) and SB-J11-B83-03(0-.75) were qualified as 'U' for cadmium due to blank contamination. All soil samples were qualified as estimated for antimony, due to the LCS recovery. Sample FB-100 was qualified as 'U' for zinc due to blank contamination.

Other Comments – Field blank FB-100 contained nickel (2.8 ug/L).

SDG 9102

Volatiles – NA

Semivolatiles – All samples in the SDG were qualified as estimated for 2-chlorophenol, 1,4-dichlorobenzene, n-nitroso-di-n-propylamine, 1,2,4-trichlorobenzene, acenaphthene, 4-nitrophenol and pyrene due to the LCS recovery. Samples analyzed 10/20/00 were qualified as estimated for hexachlorocyclopentadiene and 3,3'-dichlorobenzidine, and samples analyzed 10/21/00 were qualified as estimated for hexachlorocyclopentadiene due to the CCAL recovery.

Pesticides/PCBs – NA

Ammonia(N) and Nitrate/Nitrite: No qualification of data.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - No qualification of data.

Metals – The laboratory reported an 'H' qualifier for metals and was contacted. Samples 9102-18 and 9102-21 were identified as '3' instead of the sampling ID. Cadmium was qualified as 'U' for several samples in the SDG due to blank contamination. Antimony was qualified as estimated for samples SB-I12-2012-03(0-1) and SB-H12-120-02(0-1) due to the matrix spike recovery.

Other Comments – Field duplicate precision was not met for pair SB-I12-9112-03(0-0.5)/DUP for benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(g,h,i)perylene, benzo(k)fluoranthene, chrysene and flouranthene.

SDG 9172

Volatiles – NA

Semivolatiles – Samples analyzed 10/23/00 were qualified as estimated for 3,3'-dichlorobenzidine, and samples analyzed 10/24 were qualified as estimated for bis(2-chlorethoxy)ether, hexachlorocyclopentadiene and 3,3'-dichlorobenzidine due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – NA

TPH/TOC/NC - NA

Metals – All samples were qualified as estimated for copper due to the laboratory duplicate precision.

Other Comments – NA

SDG 9103

Volatiles – All compounds were qualified as estimated for sample SB-Q6-583-02(0.5) due to surrogate recovery. Samples FB-106 and TB 9/13/00 were qualified as estimated for acrolein due to the CCAL recovery. All samples were qualified as 'U' for methylene chloride, and sample FB-106 for naphthalene due to blank contamination.

Semivolatiles – All compounds were qualified as estimated for sample FB-105 due to surrogate recovery. All soil samples in the SDG were qualified as estimated for n-nitroso-di-n-propylamine due to the LCS recovery. Samples analyzed 10/21/00 were qualified as estimated for hexachlorocyclopentadiene; samples analyzed 10/22/00 were qualified as estimated for hexachlorobutadiene and benzidine; samples analyzed 10/25/00 were qualified as estimated for 2,4-dinitrophenol, 4-nitrophenol and 4,6-dinitro-2-methylphenol due to the CCAL recovery. Di-n-butylphthalate and bis(2-ethylhexyl)phthalate were qualified as 'U' in several samples due to blank contamination.

Pesticides/PCBs – Sample FB-106 was qualified as estimated for AR1260 due to the LCS recovery.

Explosives/ Nitroglycerine – Samples FB-105 and FB-106 were qualified as estimated for nitroglycerine due to missed holding times.

TPH/TOC/NC - No qualification of data.

Metals – Several samples were reported with the identification of '8', '10' etc. The laboratory was contacted and revised data forms were submitted. Sample SB-L9-79B-03(0-1) was qualified as estimated for arsenic and thallium due to the matrix spike recovery. All soil samples were qualified as estimated for copper due to the laboratory duplicate precision. Samples FB-105 and FB-106 were qualified as 'U' for copper, and sample FB-106 for silver due to blank contamination.

Other Comments – Field blank FB-106 contained ammonia nitrogen (0.14 mg/L), di-n-butylphthalate (1.07 ug/L) and hexachlorobutadiene (1.05 ug/L). Trip blank TB 9/13/00 contained chloroform (1.2 ug/L).

SDG 8008

Volatiles – NA

Semivolatiles – Samples analyzed 9/2/00 were qualified as estimated for hexachlorocyclopentadiene and 3,3'-dichlorobenzidine, and samples analyzed 9/7/00 were qualified as estimated for 4-chloro-3-methylphenol and 4-nitrophenol due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample SB-05-579-01(0-.5) was qualified as estimated for 2,4-dinitrotoluene due to the column percent difference exceeding 25% and sample SB-07-396-03(0-2) as 'R' for nitrobenzene, due to the column percent difference exceeding 90%. Samples SB-05-578-02(0-1), SB-05-6-03(0-1) and SB-P6-541-01(0-1) were qualified as estimated for nitroglycerine, due to surrogate recovery.

TPH/TOC/NC - All samples were qualified as estimated for nitrocellulose, due to missed holding times.

Metals – Samples SB-N5-533-01(0-3), SB-N5-3-01(0-2), SB-N7-394-03(0-2), SB-07-396-03(0-2), SB-07-615E-04(0-1.25), SB-07-395-03(0-1) and SB-P6-541-01(0-1) were qualified as 'U' for cadmium due to blank contamination. All soil samples were qualified as estimated for antimony, due to the matrix spike and LCS recoveries. Sample SB-05-580.5-05(0-1) was qualified as estimated for selenium due to the matrix spike recovery.

All soil samples were qualified as estimated for mercury due to the laboratory duplicate precision.

Other Comments – Field duplicate precision was not met for pair SB-05-537-02(0-1)/DUP for nitrocellulose. Field blank FB-98 contained copper (4.32 ug/L).

SDG 7156

Volatiles – All soil samples were qualified as estimated due to surrogate recovery. All samples were qualified as 'U' for methylene chloride and several for naphthalene and 1,2,4-trichlorobenzene due to blank contamination. Samples SB-D9-8384-03(0.5) and SB-J11-8265A-03(0.5) were qualified as estimated for 1,2,4-trichlorbenzene due to the initial calibration.

Semivolatiles – Pyrene was qualified as estimated for samples SB-J7-8281-01(0-0.5), SB-I10-E50-01(0-1), SB-I10-2080-02(0-1), SB-H8-558-04(0-1) and SB-B13-8-05(0-2) due to the LCS recovery. Water samples analyzed 8/2/00 were qualified as estimated for dibenz(a,h)anthracene, benzo(g,h,i)perylene and benzidine; samples analyzed 8/30/00 were qualified as estimated for 4,6-dinitro-2-methylphenol; samples analyzed 8/31/00 were qualified as estimated for 2,6-dinitrotoluene, 2,4-dinitrotoluene, di-n-octylphthalate and benzidine, and samples analyzed 9/5/00 were qualified as estimated for 4-chloro-3-methylphenol due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Samples FB-95 and FB-96 were qualified as estimated for nitroglycerine due to missed holding times. Samples SB-B13-724-01(0-1) and SB-B13-724-01(0-1)DUP were qualified as estimated for all original undiluted results, due to surrogate recovery. The following compounds were qualified as 'R' for the indicated samples due to the column percent difference exceeding 90%:, 2,4,6-trinitrotoluenefor sample SB-J9-2111-04(0-1), 4-amino-2,6-dinitrotoluene and 2-amino-4,6-dinitrotoluene for sample SB-I10-2079-05(0-1.25); 4-amino-2,6-dinitrotoluene,nitrobenzene, 2-nitrotoluene and 3-nitrotoluene for sample SB-B10-506-04(0-2); HMX for sample SB-B13-724-01(0-2) and duplicate and 4-amino-2,6-dinitrotoluene and 2-amino-4,6-dinitrotoluene for sample SB-B13-8-05(0-2). The following compounds were qualified as 'J' for the indicated samples due to the column percent difference exceeding 25%: 2,4-dinitrotoluene for sample SB-J9-2111-04(0-1); RDX for sample SB-I10-2079-05(0-1.25); 4-nitrotoluene and 2,4-dinitrotoluene for sample SB-B10-506-04(0-2); 1,3-dinitrobenzene and 1,3,5-trinitrobenzene for sample SB-B13-724-01(0-2)DUP; 2,4,6-trinitrotoluene for , SB-B13-8-05(0-2). The following samples were qualified as estimated for nitroglycerine due to surrogate recovery: SB-I10-E50-01(0-1), SB-B13-724-01(0-2) and SB-B137-724-01(0-2)DUP. Sample SB-I9-5-05(0-1.5) was qualified as estimated for nitroglycerine due to the matrix spike recovery..

TPH/TOC/NC - All soil samples were qualified as estimated for nitrocellulose due to missed holding times.

Metals – Zinc was qualified as 'U' in samples FB-95 and FB-96, and selenium in all soil samples, due to blank contamination. Sample SB-J7-F1-02(0-2) was qualified as estimated for antimony, arsenic and selenium due to matrix spike recovery. All soil samples were qualified as estimated for beryllium due to the serial dilution recovery.

Other Comments – Field duplicate precision was not met for copper and zinc for pair SB-B13-724-01(0-2)/DUP. Field blank FB-95 contained copper (3.97 ug/L) and nickel (2.22 ug/L), and field blank FB-96 contained copper (4.37 ug/L).

SDG 7033

Volatiles – NA

Semivolatiles – Sample SB-N4-2-01(0-2) was qualified as estimated for all compounds due to surrogate recovery and also for compounds associated with internal standards that exceeded control limits. Samples analyzed 8/5 00 were qualified as estimated for hexachlorocyclopentadiene, 2,4-dinitrophenol, 4,6-dinitro-2-methylphenol and 3,3'-dichlorobenzidine; samples analyzed 8/18/00 were qualified as estimated for 4-nitrophenol, 4,6-dinitro-2-methylphenol and 3,3'-dichlorobenzidine; samples analyzed 8/21/00 were qualified as estimated for 3,3'-dichlorobenzidine and hexachlorocyclopentadiene; and samples analyzed 8/22/00 were qualified as estimated for hexachlorocyclopentadiene, 4-nitrophenol and 3,3'-dichlorobenzidine due to CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – Sample FB-90 was qualified as estimated for nitroglycerine due to the holding time. Sample SB-N4-2-01(0-2) was qualified as estimated for RDX due to the column percent difference exceeding 25%.

TPH/TOC/NC - The laboratory was contacted regarding the discrepancy between the raw data spreadsheet and the LIMS forms. Revised forms were submitted. No qualification of data.

Metals – Sample FB-90 was qualified as 'U' for copper, selenium and zinc due to blank contamination. Sample FB-90 was qualified as estimated for mercury due to missed holding times. All soil samples in the SDG were qualified as estimated for antimony due to the LCS and matrix spike recoveries, and for lead due to the laboratory duplicate precsion.

Other Comments – Field duplicate precision was not met for nitrocellulose and n-nitrosodiphenylamine for pair SB-L6-370-03(0-1.5)/DUP. Field blank FB-90 contained arsenic (3.5 ug/L), lead (1.6 ug/L) and nickel (6.5 ug/L).

SDG 7126

Volatiles – NA

Semivolatiles – All compounds for sample SB-I8-2328A-03(0-1) were qualified as estimated due to surrogate recovery. Compounds associated with internal standards that exceeded control limits were qualified as estimated for sample SB-I8-2328A-03(0-1). Samples analyzed 8/27/00 were qualified as estimated for hexachlorocyclopentadiene and 2,4-dinitrophenol and samples analyzed 8/29/00 were qualified as estimated for hexachlorocyclopentadiene, 4,6-dinitro-2-methylphenol, indeno(1,2,3-cd)pyrene, dibenz(a,h)anthracene and benzo(g,h,i)perylene due to the CCAL recovery.

Pesticides/PCBs – NA

Explosives/ Nitroglycerine – The following samples and compounds were qualified as 'R' due to the column percent difference exceeding 90%: sample SB-I7-567-02(0-2) for 2,4,6-trinitrotoluene, 2,4-dinitrotoluene for samples SB-I7-15-04(0-1.25) and SB-I7-15-04(0-1.25)DUP and 2,4,6-trinitrotoluene and nitrobenzene for sample SB-I8-2328A-03(0-1). The following samples and indicated compounds were qualified as estimated due to the column percent difference exceeding 25%: HMX for samples SB-I7-567-02(0-2) and SB-I8-2328A-03(0-1). Sample SB-I8-2170-04(0-1) was qualified as estimated for nitroglycerine due to surrogate recovery, and sample SB-I8-560-01(0-1) due to the matrix spike recovery.

TPH/TOC/NC - No qualification of data.

Metals – Antimony was qualified as estimated in all samples due to the LCS and matrix spike recoveries. Sample SB-I8-560-01(0-1) was qualified as estimated for selenium and thallium due to the matrix spike recovery.

Other Comments – Field duplicate precision was not met for arsenic for pair SB-I8-2170-04(0-1)/DUP and for chromium, lead and nickel for pair SB-I7-15-04(0-1.25)/DUP.

SDG 9189

Volatiles – The laboratory was contacted regarding the identification of sample SB-G11-1-02(0-1). The laboratory originally submitted the ID as G1 instead of G11. A revised form was submitted. Also, the laboratory was contacted regarding the possible presence of toluene in the sample. Samples analyzed 10/4/00 were qualified as estimated for acrolein, acrylonitrile and 2-chloroethylvinyl ether due to the CCAL recovery. Sample SB-G11-1-02(0.5) and the duplicate, and trip blank sample were qualified as 'U' for methylene chloride due to blank contamination.

Semivolatiles – Samples analyzed 10/21/00 were qualified as estimated for benzidine, samples analyzed 10/23/00 were qualified as estimated for 3,3'-dichlorobenzidine; samples analyzed 10/24/00 were qualified as estimated for bis(2-chloroethyl)ether,

hexachlorocyclopentadiene and 3,3'-dichlorobenzidine; and samples analyzed 10/25/00 were qualified as estimated for 2,4-dinitrophenol, 4-nitrophenol and 4,6-dinitro-2-methylphenol; and samples analyzed 10/25/00 were qualified as estimated, due to the CCAL recovery.

Pesticides/PCBs – No qualification of data.

Explosives/ Nitroglycerine – No qualification of data.

TPH/TOC/NC - Field duplicate precision was not met for nitrocellulose for pair

Metals – Sample FB-107 was qualified as 'U' for copper due to blank contamination. Antimony was qualified as 'U' in samples SB-I12-9120-03(0-1), SB-M9-8151-03(0-1.5)DUP, SB-Q6-9311-01(0-1), SB-Q5-534-02(0-1), SB-K6-1-02(0-1.25), SB-H5-8254-01(0-1), SB-C10-432-01(0-1), SB-C12-418-01(0-2), SB-D11-112-01(0-2), SB-E11-4-01(0-2) and SB-G11-1-02(0-1), due to blank contamination. Zinc was qualified as estimated in sample SB-Q6-9311-01(0-1) due to the matrix spike recovery. All soil samples were qualified as estimated for beryllium and lead due to the laboratory duplicate precision.

Other Comments – Trip blank TB 9/27/00 contained trichloroethene (1.2 ug/L) and field blank FB-109 contained di-n-butylphthalate (1.5 ug/L) and chromium (7.4 ug/L). Field duplicate precision was not met for 2,4-dinitrotoluene for pair SB-M9-8151-03(0-1.5)/DUP and for nitrocellulose for pair SB-G11-1-02(0-1)/DUP.

SDG 10171

DDNP - No qualification of data.

Phenolics - No qualification of data.

Semivolatiles - Sample WS-H08-1-01 was qualified as estimated for all compounds due to the surrogate recovery, and for benzidine due to the CCAL recovery.

Explosives - Sample WS-H08-1-01 was qualified as 'R' for 4-amino-2,6-dinitrotoluene and 2,4,6-trintrotoluene due to the column percent difference exceeding 90%.

Re: Results of Geophysical Surveys - Kenvil Works Facility; Kenvil, New Jersey

Dear Edward:

Earth Resources Technology, Inc. (ERT) performed magnetic and ground penetrating radar (GPR) surveys at the above referenced site on April 17, through April 28, 2000. The surveys were conducted at seven (7) sites (B13-2, G09-4, K05-1, K05-2, K06-1, M08-1, and N06-1) to determine the presence/absence of any subsurface ferrous materials or other objects.

1.0 Principle And Instrumentation

A Geometrics Portable Cesium Magnetometer, Model G-858, was used for the magnetic survey. Using self-oscillating split-beam Cesium Vapor (non-radioactive CS-133), this magnetometer measures the earth's total geomagnetic field at a particular location in units of gamma (nT) with an accuracy of ±1.0 gamma. It collects a maximum of 10 magnetic readings per second. The total field consists of three components: the main field, the external field, and local variations. The main field remains fixed over the period of time of a field investigation. Local variations are attributable to anomalies near the surface such as buried metal objects or above ground objects containing metallic substance. The effective penetration depth of the instrument is 50 feet.

The pulseEKKO 1000 radar from Sensors & Software, Inc. was used during the survey. The device radiates a 450 MHz electromagnetic wave from a transmitter antenna into the earth and receives at a receiving antenna the reflection of the wave from subsurface interfaces at which changes in the electrical properties (dielectric permittivity and electrical conductivity) of the subsurface materials occur. Dielectric permittivity controls wave speed; and conductivity determines the signal attenuation. Radar reflections occur when the radio waves encounter a change in the velocity or attenuation. The bigger the change in properties the more signal reflected. These properties are largely controlled by water in the material, hence by the porosity and quantity of dissolved solids in the water. For example, metallic objects usually exhibit strong subsurface reflection character due to their high electrical impedance, or contrast, versus surrounding soil or fill. Depth of penetration of the radar signal is reversely proportional to the conductivity of the soil. As a result, electrically resistive earth materials such as coarse-grained, unsaturated sediments allow a deeper radar penetration than the conductive finer-grained soils such as clay and silt. Similarly, reinforced concrete and shallow groundwater are conductive and thus attenuate the radar signals.

2.0 Field Design and Operation

The magnetic surveys were conducted along grids based on a Cartesian coordinate system with fiducial marks every 10-ft. For example, the origin of the coordinate system on the grid in Figure 3.1-1 is located in the southwest corner of the site and has the coordinates {100, 100}.

The magnetic data were collected continuously along each survey line. The 10-ft spaced fiducial marks of the grid were entered during the magnetic data collection for position calibration. The collection of the GPR data was performed by pulling the antenna along each grid line while the positions of each radar reading were recorded with an odometer attached to a survey wheel. The odometer was set up such that one radar reading would be acquired every 0.05-m (0.164-ft). Assuming the subject property is underlain by clay/silt/sand, the average velocity of the radar is estimated around 0.1-m (0.328-ft) per nanosecond (ns). The time range was thus selected as 70-ns and would allow a penetration depth of about 10-feet. The GPR data were recorded digitally in a portable computer for instant display and subsequent processing.

3.0 Results and Interpretations

Magnetic readings are measured in gamma (nT), and they reflect mainly the response from ferrous materials. The approach to interpreting the magnetic data is to distinguish the local variations from the main and external fields. The main field is created by the earth's magnetic field, while the sun and/or moon create the external field. To interpret the data, magnetic readings collected based on the survey grid were used to construct a magnetic contour map. The main field is usually represented by the average of the readings (background) or those readings with little fluctuation. In contrast, the local anomalies often occur as closed or elongated contours that have readings either above or below the background. The closed or elongated contours with readings above the background are considered as the magnetic highs; while the contours with readings below the background are considered as magnetic lows.

Along each GPR profile, the horizontal axis represents the horizontal distance in feet (See Figure 3.1-4 for reference). The left vertical axis represents the two-way travel time in ns and the right vertical axis the depth in feet (converted using the assumed velocity of 0.328 ft/ns). A GPR profile is made of individual traces that have peaks and valleys. The peaks of radar signals represent different interfaces in the subsurface encountered by the penetrating signals. Connecting and coloring the peaks and valleys of successive traces creates a GPR profile. As shown in each profile, the red reflections represent the peaks of individual traces with the highest amplitudes; while the blue reflections are the valleys of individual traces with the lowest amplitudes. The red color is replaced by dark gray of varying degrees for the lower peak amplitudes; and the blue by white for varying degrees of higher valley amplitudes. The red and blue reflections, as discussed in Section 1.0, are created by interfaces with higher dielectric contrasts.

3.1 Site M08-1 (Former Landfill)

Magnetic Survey
Site M08-1 is one of two landfill sites that were surveyed at the Kenvil Works Facility, and the magnetic survey grid that was laid out at this site can be seen in Figure 3.1-1. This site contains a large number of closely spaced, high intensity magnetic anomalies indicative of buried ferrous objects that can be seen in Figure 3.1-2.

GPR Survey
On a typical GPR profile crossing such a landfill area, one would expect strong and chaotic reflections to be associated with the buried materials. Profile A-A' on Figure 3.1-4 (Site M08-1) shows reflections typical of various ferrous debris. The geographic location of Profile A-A' can be seen on Figure 3.1-3.

3.2 Site N06-1 (Former Landfill)

Magnetic Survey
Site N06-1 is the second of two landfill sites that were surveyed at the Kenvil Works Facility, and the magnetic survey grid that was laid out at this site can be seen in Figure 3.2-1. This site also contains a number of closely spaced, high intensity anomalies indicative of buried ferrous objects that can be seen on Figure 3.2-2.

Profile B-B' and Profile C-C' on Figure 3.2-4 (Site N61) show a cross-section (B-B') and a longitudinal view (C-C') of a known process vessel. Profiles D-D' and E-E' on Figure 3.2-5 show similar cross-sectional and longitudinal views of another large known process vessel found in the vicinity. The geographic locations of the GPR lines and the approximate location of the known process vessels are shown on Figure 3.2-3.

3.3 Site K05-1 (Former Drum Disposal Area)

Magnetic Survey
Figure 3.3-1 shows the magnetic survey grid that was laid out at Site K05-1. As shown in Figure 3.3-2, this site contains a linear pattern of magnetic anomalies along with several tight groupings of high intensity anomalies. This may indicate the presence of ferrous objects beneath the subsurface.

GPR Survey
The GPR profiles acquired at site K05-1 reveal reflections typical of heavy ferrous debris. Profile F-F' on Figure 3.3-4 shows a heavy debris area found at this site. The geographic location of F-F' can be seen on Figure 3.3-3.

3.4 K05-2 (Pond)/ K06-1 (Debris Area)

Magnetic Survey
Figure 3.4-1 shows the magnetic survey grid that was laid out at the Pond/Debris Site. As shown in Figure 3.4-2, this site also contains numerous low intensity anomalies along with several tight groupings of high intensity anomalies. This may indicate isolated ferrous objects beneath the subsurface.

GPR Survey
The profiles collected at the Pond/Debris Site (Figure 3.4-4) also contain reflections typical of heavy debris, but also reveal an anomaly located at a depth. Profiles G-G' (cross-section) and H-H' (longitudinal view) show this anomaly. The location of these profiles is shown on Figure 3.4-3.

3.5 Site B13-2 (Gravel Pit)

Magnetic Survey
Figure 3.5-1 shows the magnetic survey grid that was laid out at Site B13-2. As shown in Figure 3.5-2, this site is similar in appearance to the K05-1 and K05-2 sites. A large number of low to high intensity anomalies occur at this site. These anomalies may indicate isolated ferrous objects or debris buried in the subsurface.

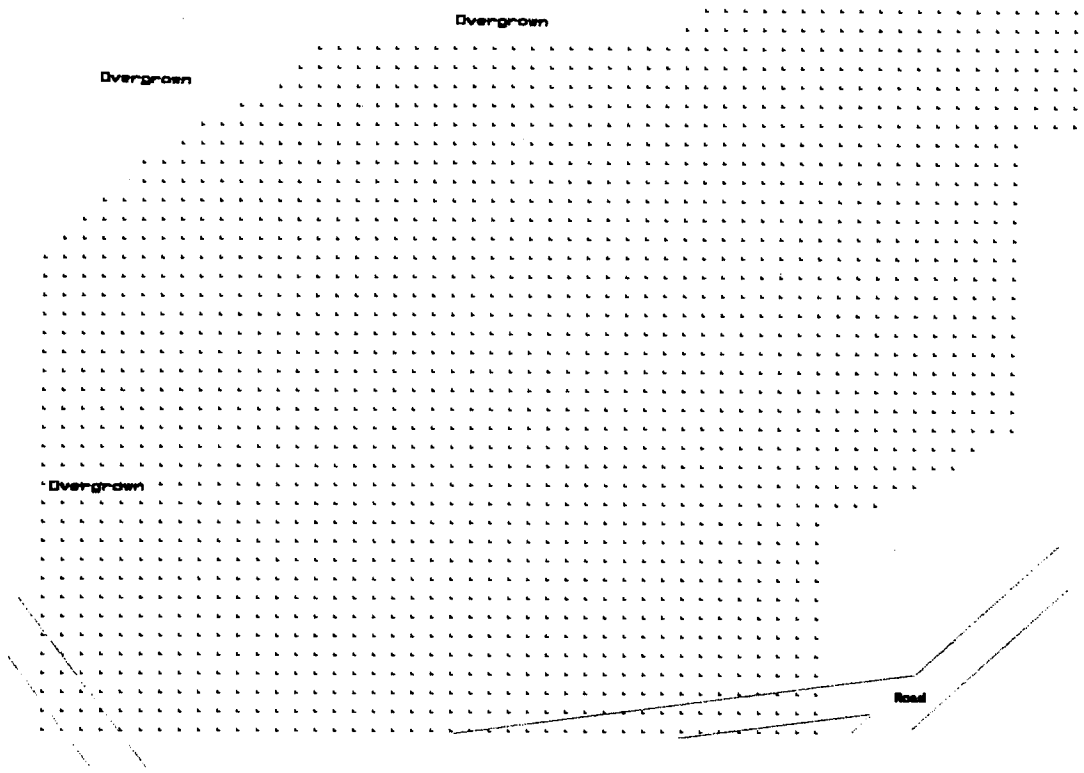
GPR Survey
Site B13-2 also contains heavy to moderate ferrous debris. A typical profile (I-I') can be seen in Figure 3.5-4, and its geographic location is shown in Figure 3.5-3.

3.6 Site G09-4 (Buried Drum Area)

Magnetic Survey
Figure 3.6-1 shows the magnetic survey grid that was laid out at Site G09-4. As shown in Figure 3.6-2, this site contains only two high intensity anomalies that may represent isolated ferrous objects or debris.

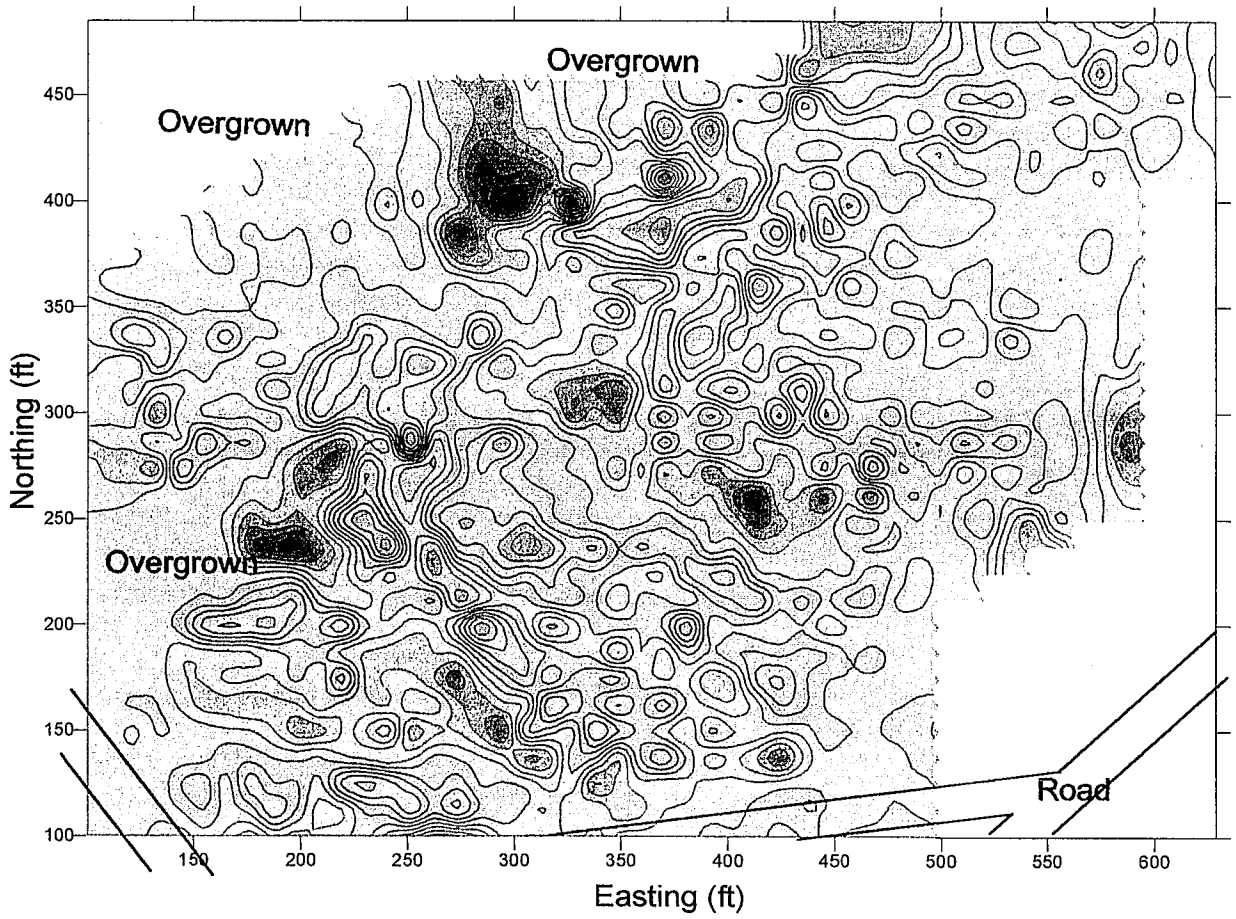
GPR Survey
Figure 3.6-4 shows a typical profile (J-J') acquired at the G09-4 site and contains light to moderate debris in the vicinity of the magnetic anomalies seen in Figure 3.6-2. Its location can be found on Figure 3.6-3.

4.0 CLOSING

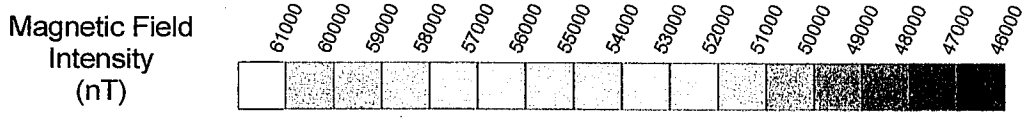


The results of the geophysical investigations suggest that the highest density of landfill materials occurs at sites M08-1 and N06-1. Site N06-1 also contains two known process vessels. Site K05-1, B13-2, and K05-2 contain numerous low intensity anomalies (possibly light debris) and linear patterns of magnetic anomalies. The Pond/Debris Site also contains an unidentified, large, ferrous object. Site

G09-4 contains light to moderate debris at isolated points. These conclusions are generalized and based on the magnetometer and GPR data acquired within the confines of this survey.



The field procedures and interpretative methodologies used in this project are consistent with standard, recognized practices in similar geophysical investigations. The correlation of geophysical responses with probable subsurface features is based on the past results of similar surveys although it is possible that some variation could exist at this site. This warranty is in lieu of all other warranties either implied or expressed. **ERT** assumes no responsibility for interpretations made by others based on work performed by, or recommendations made by, **ERT.**



Sincerely,
Earth Resources Technology, Inc.

A11-2	5	Mixed Acid Storage #3	Mixed Acid Storage # 3 50-60 ft. E of A11-7 contains tank cradles and a lower level for tank storage; pipe in S foundation no stressed vegetation (area 900 sq. ft.)			Reserved for Remedial Investigation due to the presence of lead															Metals*		Metals (5-1D & 5-14C)
A11-3	3,7	Absorption Tower #2	Rectangular structure with ten terra cotta coated cement pillars and catch tank on SE side; TNT adjacent to building	SB-A11-3-01 through SB-A11-3-05	SB-A11-3-03 SB-A11-3-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2						1	1			
A11-4	3,7	Acid Fortifier #2	Rectangular, overgrown foundation with catch tank on N side; NW corner has transite piping and vessels; no environmental impacts			Reserved for Remedial Investigation due to the presence of lead															Metals*		Metals (5-1D & 5-14C)
A11-5	3	Bi/Trinitrator #2	Old, overgrown foundation with pipes going into the ground at each corner no stressed vegetation			Reserved for Remedial Investigation due to the presence of lead and E&E materials															Metals*, E&E*		Metals (5-1D & 5-14C), E&E (5-1C & 5-14B)
A11-504	3,7	Weak Acid Storage Tanks	Weak Acid Storage Tank; several old pits along E side of former bldg. Possibly catch tanks			Reserved for Remedial Investigation due to the presence of lead															Metals*		Metals (5-1D & 5-14C)
A11-570	3	Change House	Stone foundation up slope from A11-504; level, vegetated area; 4 inch pipe in ground on E corner about 3 ft. from bldg; no stressed vegetation	SB-A11-570-01 through SB-A11-570-05	SB-A11-570-05 SB-A11-570-01	Sampling location SB-A11-570-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-A11-570-01		2	2										1	1		SVOCs	SVOCs (5-1B & 5-14A)
A11-7	3,9	Nitric Acid Storage #2	Concrete footers overgrown; two small areas less than 10 ft. in diameter of stressed vegetation approximately 15 ft. from footers SE stressed vegetation contained lead both have slag present			Reserved for Remedial Investigation due to the presence of lead															Metals*		Metals (5-1D & 5-14C)
A11-8	5	Mixed Acid Storage Tanks #4	Three 1.5'x 12' foundations with an equipment pad to the S; Pad is 12' x 12' with supports; No stressed vegetation (area 300 sq.ft.)	SB-A11-8-01 through SB-A11-8-04	SB-A11-8-03 SB-A11-8-02	Sampling location SB-A11-8 -03 was determined using E&E screening Group B E&E materials were detected using an Expray Test Kit. A confirmation sample was collected at SB-A11-8 -02		2	2		2	2	2						1	1		E&E	E&E (5-1C & 5-14B)
A11-9	9	Rock Quarry	Large several hundred foot depression formerly used as a rock quarry; broken ground and discarded drums,containers, and ceramic pipe (area 19,000 sq.ft.)	SB-A11-9-01 through SB-A11-9-20	SB-A11-9-03 SB-A11-9-04	Sampling location SB-A11-9-04 was determined using professional judgement Sample location SB-A11-9-03 was determined using XRF screening Results indicated a lead concentration of 917 ppm at SB-A11-9-03		2	2										1	1	Metals		Metals (5-1D & 5-14C)
A12-1	9	TNT in Soil	Small area S of A11-6; numerous chunks of TNT measuring several inches across;discarded terra cotta pipe and overturned soils (area 300 sq. ft.)	SB-A12-1-01 through SB-A12-1-03		Reserved for Remedial Investigation due to the presence of TNT chunks on the ground															E&E*		E&E (5-1C & 5-14B)
A12-3	3	Heater House	Heater house collapsing foundation (area 600 sq. ft.)	SB-A12-3-01 through SB-A12-3-04	SB-A12-3-03	Sampling location was determined using VOC screening The 6" to 12" depth interval had a PID reading of 14 ppm and an FID reading of 19 ppm Analytical results did not detect elevated VOC concentrations	1	1	1										1	1			
A12-4	7	Catch Tank	Catch tank associated with tank cradles of A12-5; pipe entering from N from tank cradles	SB-A12-4-01 through SB-A12-4-03	SB-A12-4-01 SB-A12-4-02	Sampling location SB-A12-4-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-A12-4-02.		2	2										1	1			

Table 2-1

TNT Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
A12-426	3	Block Breaker	Bldg. Demolished; adjacent to rail spur some brick present, but mostly a concrete foundation; rail spur overgrown	SB-A12-426-01 through SB-A12-426-05		A subsurface layer of NC was found along the SW corner of the foundation during screening activities. This AOC has been reserved for the Remedial Investigation															E&E*		E&E (5-1C & 5-14B)
A12-5	5	Former Tank Cradle	Contains four concrete tank cradles about 8 ft. wide and 32 ft. long; housed in bermed area; No evidence of release	SB-A12-5-01 through SB-A12-5-06	SB-A12-5-03 SB-A12-5-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2											1	1			
A12-6	9	Glass Debris Area	Area is covered with broken laboratory glassware (area=200 sq. ft.)	SB-A12-6-01 through SB-A12-6-03	SB-A12-6-01 SB-A12-6-02	Sampling location SB-A12-6-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-A12-6-02.		2	2										1	1			
A12-7	7	Neutralizer/Pelletizer #2, associated Catch Tank	Neutralizer/Pelletizer Catch Tank with thick walls; overgrown; no obvious environmental impact; old drum 50 ft. S of this feature (area 300 sq. ft.)	SB-A12-7-01 through SB-A12-7-04	SB-A12-7-03 SB-A12-7-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2						1	1	E&E	SVOCs	E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
A12-8	3	Debris Area	Thermally decontaminated; brick foundation remains within berm; metal bracing along berms; no stressed vegetation	SB-A12-8-01 through SB-A12-8-05	SB-A12-8-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 454 ppm at SB-A12-8-05 Group A E&E materials were also detected at SB-A12-8-05 using an Expray Test Kit		1	1		1	1	1						1	1	Metals, E&E		Metals (5-1D & 5-14C), E&E (5-1C & 5-14B)
A13-1	3,7	Filter House #3 Sump	Rectangular vegetated foundation with pit on one side; no environmental impact (area 600 sq. ft.)	SB-A13-1-01 through SB-A13-1-04	SB-A13-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1						1	1	Metals	E&E	Metals (5-1D & 5-14C), E&E (5-1C & 5-14B)
A13-625	3	Filter House #2	Thermally decontaminated building with half of former berm destroyed; metal debris remaining; no stressed vegetation			Reserved for Remedial Investigation due to the presence of E&E materials															E&E*		E&E (5-1C & 5-14B)
A13-753	3	Filter House #3	Bldg. and associated berm almost totally removed; substantial vegetation; pieces of metal machinery in center of former bldg. Small pile of metal reinforcing bars E of A13-753 (area 500 sq. ft.)	SB-A13-753-01 through SB-A13-753-04	SB-A13-753-01	Sampling location was determined using VOC screening The 6" to 12" depth interval had a PID reading of 17 ppm and an FID reading of 22 ppm Analytical results did not detect elevated VOC concentrations	1	1	1		1	1	1						1	1			
B10-2	7?,9	TNT in Soil	Piles of dirt that contain waste TNT not much vegetation in area; appears to radiate out from unknown structure possibly a catch tank to the north			Reserved for Remedial Investigation due to the presence of arsenic and E&E materials															Metals*, E&E*		Metals (5-1D & 5-14C), E&E (5-1C & 5-14B)
B10-20	NA	Former Water Tank	25 ft. diameter circular foundation made of concrete; center contains rusted, metal pails and one broken terra cotta pipe; small valve S of former tank presumably for the water tank (area 500 sq. ft.)	SB-B10-20-01 through SB-B10-20-04	SB-B10-20-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,845 ppm and a zinc concentration of 1,526 ppm at SB-B10-20-01		1	1										1	1	Metals	SVOCs	Metals (5-1D & 5-14C), SVOCs (5-1B & 5-14A)
B10-3	9	Scrap Brine Coils	Two brine coils and associated debris; no visible impact (area 100 sq. ft.)	SB-B10-3-01 through SB-B10-3-03	SB-B10-3-03 SB-B10-3-01	Sampling location SB-B10-3-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B10-3-01		2	2										1	1			
B10-4	9	Scrap Brine Coils	Remnant equipment; brine coils (area 100 sq. ft.)	SB-B10-4-01 through SB-B10-4-03	SB-B10-4-01 SB-B10-4-02	Sampling location SB-B10-4-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B10-4-02		2	2										1	1			
B10-5	7?	Possible Catch Tank for B10-508/B10-509	Three small concrete foundations covered with burnt wood; pipes from bldgs. 508 and 509 aimed toward this building; potential for stressed vegetation			Group A E&E materials were found at this location using an Expray Test Kit. This AOC has been referred to the Remedial Investigation															E&E*		E&E (5-1C & 5-14B)
B10-501	3	Nitric Acid Storage #1	Nitric Acid Storage Tanks; bldg. was burnt Bldg very degraded probably from acid; no vegetation in interior of bldg; process pipes and foundation not intact			Reserved for Remedial Investigation due to the presence of lead															Metals*		Metals (5-1D & 5-14C)
B10-502	3	Mixed Acid Storage Tanks #1	Mi1ed Acid Storage Tanks; metal debris and drums present; thermally decontaminated pipes not intact; overgrown			Reserved for Remedial Investigation due to the presence of lead															Metals*		Metals (5-1D & 5-14C)

Table 2-1

TNT Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
B10-503	3,7	Mononitrator #1	Two story brick bldg burnt to thermally decontaminate the interior; bldg still standing S side very overgrown; SW side is a loading dock; SE side is a sump; discharge pipe present	SB-B10-503-01 through SB-B10-503-06 TP-B10-503-07	SB-B10-503-01 SB-B10-503-02 SB-B10-503-06 TP-B10-503-07	Sampling locations SB-B10-503-01/02 were determined using professional judgement; Sample location SB-B10-503-06 was determined using XRF screening; Results indicated a lead concentration of 692 ppm at SB-B10-503-06. Test Pit location was placed downgradi		4	3		4	4	4						2	2	SVOCs, E&E		E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
B10-505	3	Acid Fortifier	Overgrown foundation of Acid Fortifying House thermally decontaminated;pipes inside bldg.			Reserved for Remedial Investigation due to the presence of lead															Metals*		Metals (5-1D & 5-14C)
B10-506	3,7	Absorption Tower #1	Absorption Tower # 1; Three columns standing; sump on S side; roofing and pipe debris on W side; thermally decontaminated, no stressed vegetation	SB-B10-506-01 through SB-B10-506-06 TP-B10-506-07	SB-B10-506-02 SB-B10-506-04 TP-B10-506-07	Sampling location SB-B10-506-02 was determined using XRF screening Results indicated a lead concentration of 460 ppm. A confirmation sample was collected at SB-B10-506-04. Test Pit location was placed downgradient from the sump. Analytical results did no		3	2		3	3	3						2	2	SVOCs, E&E		E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
B10-508	3	Bi/Trinitrator #1	Binitrator bldg burnt; large amount of debris and piping in center of bldg.; E of SE corner is left over brine coils			Reserved for Remedial Investigation due to the presence of lead and E&E materials															Metals*, E&E*		Metals (5-1D & 5-14C), E&E (5-1C & 5-14B)
B10-509	3	Neutralizer/Pelletizer #1	Neutralizer/Pelletizer Bldg has very high berms; piping and machinery in bldg. vegetated			Reserved for Remedial Investigation due to the presence of lead															Metals*		Metals (5-1D & 5-14C)
B10-6	9	TNT in Soil	Small area 25 ft. S-SE of bldg. 508 with stressed vegetation; one piece of TNT found here; more possible			Reserved for Remedial Investigation due to the presence of arsenic and E&E materials															Metals*, E&E*		Metals (5-1D & 5-14C), E&E (5-1C & 5-14B)
B10-656	5	Nitric Acid Storage Tanks	Nitric Acid Storage Tanks No foundations only disturbed earth	SB-B10-656-01 through SB-B10-656-03	SB-B10-656-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1					1	1	1		E&E	E&E (5-1C & 5-14B)
B11-2	9	Standpipe	Stand pipe approximately 50 ft. N of B11-523 6 inches in diameter; several 2-8 inch pipes on ground	SB-B11-2-01 through SB-B11-2-03	SB-B11-2-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1									1	1				
B11-513	3,7	Crude Screening House, associated sump	Thermally decontaminated bldg. Some brick foundation remains; scrap metal debris and pipes; no evidence for release	SB-B11-513-01 through SB-B11-513-05	SB-B11-513-02 SB-B11-513-05	Sampling location SB-B11-513-02 was determined using XRF screening Results indicated a lead concentration of 618 ppm at SB-B11-513-02 Group A E&E materials were detected at SB-B11-513-05 using an Expray Test Kit Analytical results did not detect elevated		1	1		1	1	1					1	1	E&E		E&E (5-1C & 5-14B)
B11-523	3	Change House	Rectangular bldg currently vegetated; no environmental impacts (area 900 sq. ft.)	SB-B11-523-01 through SB-B11-523-04	SB-B11-523-03 SB-B11-523-01	Sampling location SB-B11-523-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B11-523-01		2	2									1	1	SVOCs		SVOCs (5-1B & 5-14A)
B11-602C	NA	Reservoir	Large, deep foundation with trees growing in it; pipe extends from N to E; smaller area in W corner with two valves and pipe extending to N; pipe on E corner going into ground; no stressed vegetation	SB-B11-602C-01 through SB-B11-602C-08	SB-B11-602C-07 SB-B11-602C-08	Sampling location SB-B11-602C-08 was determined using XRF screening Results indicated a lead concentration of 445 ppm at SB-B11-602C-08 Group B E&E materials were detected at SB-B11-602C-07 using an Expray Test Kit		1	1		1	1	1					1	1	Metals, SVOCs	E&E	Metals (5-1D & 5-14C), E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
B11-663	3,7	Graining House #2, associated sump	Graining House # 2 surrounded by a berm foundation inside berm overgrown, broken into three tiers; several holes where pipes once were located; no stressed vegetation	SB-B11-663-01 through SB-B11-663-06	SB-B11-663-04 SB-B11-663-06	Sampling location SB-B11-663-04 was determined using E&E screening Group A E&E materials were detected using an Expray Test Kit. A confirmation sample was collected at SB-B11-663-06		2	2		2	2	2					1	1	E&E	SVOCs	E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
B12-1	3	Perchlorate Grinder	Undocumented structure very similar to Perchlorate Grinder; two large concrete foundations and a few pieces of old metal no evidence of environmental impact (area 400 sq. ft.)			Group A E&E materials were found at this location using an Expray Test Kit. This AOC has been deferred to the Remedial Investigation															E&E*		E&E (5-1C & 5-14B)
B12-234	7	Filter House #1 Sump	Rectangular shaped sump house for Filter House # 1; pit filled with water; no stressed vegetation			Reserved for Remedial Investigation due to the presence of E&E materials															E&E*		E&E (5-1C & 5-14B)

Table 2-1

TNT Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
B12-237	3	Filter House #1	Filter House # 1 most intact of demolished filter houses; rusted metal in base of bermed are that is intact; thermally decontaminated	SB-B12-237-01 through SB-B12-237-05	SB-B12-237-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 529 ppm, a copper concentration of 603 ppm and a zinc concentration of 1,870 ppm at SB-B12-237-01		1	1		1	1	1						1	1	Metals, SVOCs, E&E		Metals (5-1D & 5-14C), E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
B12-3	7	Culvert	Culvert 32 inches in diameter with 8-12 inch pipes; probably carried waste from B12-234 and B12-237; two inlet pipes to the N and a drain to the S toward B13-1; no evidence of contamination	SB-B12-3-01 through SB-B12-3-02	SB-B12-3-01 SB-B12-3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		2			2	2	2						1	1		E&E, SVOCs	E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
B12-450	3	Perchlorate Grinder	Perchlorate Grinder SW of B12-237 adjacent to rail spur; two large concrete foundations adjacent to rail spur slight depression in center filled with water no environmental impact	SB-B12-450-01 through SB-B12-450-05	SB-B12-450-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling															E&E	SVOCs	E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
B13-1	9	Settling Pond	Depressed area with a ditch entering from NW ditch originated at A13-625 Filter House # 2; 8-12 inch terra cotta pipe enters from the W possibly from A13-7543 Filter House # 3 area of brown stressed vegetation			Reserved for Remedial Investigation due to the presence of beryllium, lead and thallium															Metals*		Metals (5-1D & 5-14C)
B13-682	3,7	Weak Liquor House	Foundation overgrown with vegetation; tank cradle set and two floor drains; one drain exits foundation in NE of foundation; other drain exists to catch tank in SE corner; no apparent environmental impact	SB-B13-682-01 through SB-B13-682-06	SB-B13-682-03 SB-B13-682-04 SB-B13-682-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		3	3		3	3	3						1	1	E&E	SVOCs	E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
B13-724	3	Ether Still House	Building dismantled except for three parallel foundations 45 ft. long and 5 ft. high: area vegetated; no apparent environmental impacts; debris 30 ft. north of foundation	SB-B13-724-01 through SB-B13-724-05	SB-B13-724-05 SB-B13-724-01	Sampling location SB-B13-724-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B13-724-01	2	2	2		2	2	2						1	1	SVOCs, E&E		E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
B13-757	3	Mother Liquor House	Foundation with grass growing on it; concrete debris with rebar along south side of foundation; parking barriers north of foundation	SB-B13-757-01 through SB-B13-757-05	SB-B13-757-04	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 106 ppm at SB-B13-757-04 Analytical results did not detect elevated arsenic concentrations	1	1			1	1	1						1	1	E&E	SVOCs	E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
B13-8	7	Filter House #2 Sump	Rectangular foundation with a water filled pit pipe near SE corner goes underground no environmental impact evident	SB-B13-8-01 through SB-B13-8-05 TP-B13-8-06	SB-B13-8-04 SB-B13-8-05 TP-B13-8-06	Sampling location SB-B13-8-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B13-8-05. Test Pit location was placed downgradient from the sump.	3	2			3	3	3						2	2		E&E	E&E (5-1C & 5-14B)
B9-2	3	Water Supply Building	Two parallel foundations and several mounds with bolts protruding	SB-B9-2-01 through SB-B9-2-05	SB-B9-2-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,913 ppm at SB-B09-2-05	1	1											1	1	Metals, SVOCs		Metals (5-1D & 5-14C), SVOCs (5-1B & 5-14A)
C10-432	3	Unknown	Three 10x1.5 foot cement foundations; 12 inch diameter terra cotta pipe entering ground W of central footer; old process pipe associated with this bldg.	SB-C10-432-01 through SB-C10-432-03	SB-C10-432-02 SB-C10-432-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-C10-432-01	2	2			2	2	2						1	1		E&E, SVOCs	E&E (5-1C & 5-14B), SVOCs (5-1B & 5-14A)
C10-438	3	Mixed Acid Storage #2	Three 10x1.5 foot cement foundations; 12 inch diameter terra cotta pipe entering ground W of central footer; old process pipe associated with this bldg.	SB-C10-438-01 through SB-C10-438-06	SB-C10-438-05 SB-C10-438-01	Sampling location SB-C10-438-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C10-438-01	2	2									1		1	1	1			
C10-439	3,7	Weak Acid Storage Tanks	Old foundation; recently cleared here slight stressed vegetation on W side of ground; internal catch basin associated with tank cradles; several small pipes			Reserved for Remedial Investigation due to the presence of lead															Metals*		Metals (5-1D & 5-14C)
C10-440	3	Waste Acid Storage Tanks #2	Same as C10-439 in layout; pipes entering ground within foundation east of bldg.; between this and C10-439 visible pipes cannot locate or follow due to vegetation	SB-C10-440-01 through SB-C10-440-06	SB-C10-440-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,153 ppm at SB-C10-440-02	1	1			1	1	1				1		1	1	Metals		Metals (5-1D & 5-14C)
C10-466	3	Unknown	No foundation; building located based on Roux map and shallow rooted vegetation	SB-C10-466-01 through SB-C10-466-03	SB-C10-466-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,966 ppm at SB-C10-466-02	1	1			1	1	1						1	1	Metals		Metals (5-1D & 5-14C)
C8-1	9	Discarded Cans	Approximately 2 dozen 1-2 gallon steel cans on ground; some contained gray material (area 100 sq.ft.)	SB-C8-1-01 through SB-C8-1-03	SB-C8-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1						1	1	Metals		Metals (5-1D & 5-14C)

Notes:

All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:

NA = Not Analyzed
AOC = Area of Concern
FID = Flame-Ionization Detector
TBD = To Be Determined
PP VOC = Priority Pollutant List Volatile Organic Compounds
PP SVOC = Priority Pollutant List Semivolatile Organic Compounds
PPM = Parts Per Million
PP Metals = Proirity Pollutant List Metals
PP PEST/PCB = Priority Pollutant List Pesticides/PCB
E&E = Explosives and Energetics
TOC = Total Organic Carbon
TPH = Total Petroleum Hydrocarbons
NRDCSCC = Non Residential Direct Contact Soil Cleanup Criteria
XRF = X-ray Fluorescence
PID = Photoionization Detector

TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
No. = Number

***** = AOC reserved for RI due to presence of contamination
****** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

AOC Type

1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

TOC and GRAIN SIZE collected at each AOC

All screening samples were evaluated for VOCs, Metals, and E&E compounds

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 2-2

Dynamite Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	N/Nitra	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
B12-422	3	Dynamite Mix Houses #5 & #6	Two pipes enter ground in N central area Building is demolished and largely overgrown, footers remain No evidence of a release	SB-B12-422-01 through SB-B12-422-07	SB-B12-422-06 SB-B12-422-04	Sampling location SB-B12-422-06 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B12-422-04		2	2		2	2								1	1			
B13-262A	3	Gel Mix House #2	Old corrugated siding covering floor area Debris west of berm Slight stressed vegetation southwest of building	SB-B13-262A-01 through SB-B13-262A-05	SB-B13-262A-01 SB-B13-262A-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2		2	2							2	1	1		E&E, SVOCs	E&E (5-2C & 5-15C), SVOCs (5-2B & 5-15B)
B13-7	3	Motor House for Gel Mix House #2	Very old dismantled foundation. Two steel pipes enter ground. 10'x10' area of stressed vegetation in center of building	SB-B13-7-01 through SB-B13-7-07	SB-B13-7-01 SB-B13-7-06	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2										2	1	1			
B14-128	3	Quinan Pack House	Very old stone foundation; No evidence of a release	SB-B14-128-01 through SB-B14-128-05	SB-B14-128-01 SB-B14-128-02	Sampling location SB-B14-128-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B14-128-02		2	2		2	2								1	1			
B14-3	4	Shell Store	Very little evidence of former building exists. No evidence of a release	SB-B14-3-01 through SB-B14-3-05	SB-B14-3-05 SB-B14-3-02	Sampling location SB-B14-3-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B14-3-02		2	2											1	1			
C12-1	9	Earthen Pits	Two pits dug out of the ground, use unknown; Partially filled with water, no evidence of a release	SB-C12-1-01 through SB-C12-1-06	SB-C12-1-03 SB-C12-1-04	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2										2	1	1			
C12-274	3	Talley Gel Mix House #1	Bermed enclosed structure, only broken foundations remain; Two areas of green oxidized lead, 3" pipe enters ground in NE corner; Stressed vegetation in center	SB-C12-274-01 through SB-C12-274-06	SB-C12-274-01 SB-C12-274-05	Sampling locations were determined using XRF screening Results indicated a lead concentration of 1,432 ppm at SB-C12-274-01 and 396 ppm at SB-C12-274-05		2	2		2	2							2	1	1	Metals	E&E, SVOCs	Metals (5-2E & 5-15D), E&E (5-2C & 5-15C), SVOCs (5-2B & 5-15B)
C12-275	3	Unknown	Foundation with rubble (area=400 sq ft)	SB-C12-275-01 through SB-C12-275-04	SB-C12-275-02 SB-C12-275-01	Sampling location SB-C12-275-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C12-275-01		2	2		2	2								1	1		E&E, SVOCs	E&E (5-2C & 5-15C), SVOCs (5-2B & 5-15B)
C12-3	9	Stressed Vegetation A	Stressed vegetation center (area=200 sq ft)	SB-C12-3-01 through SB-C12-3-03	SB-C12-3-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 21,330 ppm at SB-C12-3-03		1	1										1	1	1	Metals		Metals (5-2E & 5-15D)
C12-4	9	Stressed Vegetation B	Center of stressed vegetation B (area=700 sq ft)	SB-C12-4-01 through SB-C12-4-03	SB-C12-4-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 3,570 ppm at SB-C12-4-01		1	1										1	1	1	Metals		Metals (5-2E & 5-15D)
C12-418	9	Unknown	Center of stressed vegetation B (area=700 sq ft)	SB-C12-418-01 through SB-C12-418-04	SB-C12-418-04 SB-C12-418-01	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C12-418-01		2	2		2	2								1	1		E&E, SVOCs	E&E (5-2C & 5-15C), SVOCs (5-2B & 5-15B)
C12-5	9	Stressed Vegetation C	Center of stressed vegetation C (area=200 sq ft)	SB-C12-5-01 through SB-C12-5-03	SB-C12-5-02	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1										1	1	1	Metals		Metals (5-2E & 5-15D)
C12-8229	1,6	Change House	Brick building still standing; There is an associated septic tank W of the N corner	SB-C12-8229-01 through SB-C12-8229-04 TP-C12-8229-05	SB-C12-8229-03 SB-C12-8229-01 TP-C12-8229-05	Sampling location SB-C12-8229-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C12-8229-01. Test Pit location was placed downgradient from septic.	1	3	2											2	2			
C13-1	9	Thirty Acres Area	Contains various scrap metal; No evidence of a release (area=136,000 sq ft)	SB-C13-1-01 through SB-C13-1-20	SB-C13-1-01 SB-C13-1-08 SB-C13-1-11 SB-C13-1-17	Three sample locations, SB-C12-8229-01/08/11, were determined using professional judgement; Group A E&E materials were detected at SB-C12-8229-17 using an Expray Test Kit		3	4		1	1	1							1	1	E&E		E&E (5-2C & 5-15C)
C13-133	3	Triton Store	Only one chunk of concrete and a piece of metal remain; No evidence of a release	SB-C13-133-01 through SB-C13-133-05	SB-C13-133-05 SB-C13-133-03	Sampling location SB-C13-133-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C13-133-03		2	2											1	1			

Table 2-2

Dynamite Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	N/Nitra	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
C13-2	6	Spray Field A	Large grass covered area; PVC piping underground - unknown location; No evidence of a release (area=74,000 sq ft)	SB-C13-2-01 through SB-C13-2-20	SB-C13-2-01 through SB-C13-2-20	Three sample locations (SB-C13-2-01/03/09) were determined using professional judgement; Group B E&E materials were detected at SB-C13-2-10 and SB-C13-2-14 using an Expray Test Kit. Confirmation samples were collected at the remaining sample locations (SB-C13-2-02/04/05/06/07/08/11/12/13/15/16/17/18/19/20). Analytical results did not detect elevated E&E concentrations.		20	20		2	2	2							1	1			
C13-262B	3	Gel Mix House #1	Thermally decontaminated building; Two old drum hulks within area of former building; Slight stressed vegetation south of berm; Brick debris on northeast corner	SB-C13-262B-01 through SB-C13-262B-05	SB-C13-262B-01 through SB-C13-262B-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2		2	2							1	1	1	Metals		Metals (5-2E & 5-15D)
C13-263C	3	Blower House for Gel Mix House #1	Structure dismantled; Three old blower units remain; No evidence of a release (area=100 sq ft)	SB-C13-263C-01 through SB-C13-263C-03	SB-C13-263C-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 682 ppm at SB-C13-263C-01. Analytical results did not detect elevated lead concentrations		1	1											1	1			
C13-282B	3	Dynamite Mix House #2	Old bermed area almost completely dismantled; Center filled with water	SB-C13-282B-01 through SB-C13-282B-05	SB-C13-282B-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,635 ppm at SB-C13-282B-03		1	1		1	1								1	1	SVOCs, Metals	E&E	Metals (5-2E & 5-15D), E&E (5-2C & 5-15C), SVOCs (5-2B & 5-15B)
C13-3	3	Unknown	Small bermed area, all that remains is minor amounts of metal debris (area=100 sq ft)	SB-C13-3-01 through SB-C13-3-03	SB-C13-3-02	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1		1	1								1	1			
C13-666	3	Refined Graining House	Completely dismantled; TNT chunks scattered around ground			Reserved for Remedial Investigation due to the presence of TNT on the ground																E&E*		E&E (5-2C & 5-15C)
C13-742	3	Gel Pack House	Building demolished; Concrete footers remain; Swale on east side of former building; No evidence of a release	SB-C13-742-01 through SB-C13-742-05	SB-C13-742-01 SB-C13-742-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2		2	2								1	1			
C14-1	9	Debris Area	5 Brine coils; 24 metal screens; No evidence of a release (area=3,000 sq ft)	SB-C14-1-01 through SB-C14-1-10	SB-C14-1-05 SB-C14-1-03	Sampling location SB-C14-1-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C14-1-03		2	2											1	1		SVOCs	SVOCs (5-2B & 5-15B)
C14-121	3	Superfluous Machinery Store	Very old 30'x 20' stone foundation; No evidence of a release (area=400 sq ft)	SB-C14-121-01 through SB-C14-121-04	SB-C14-121-03 SB-C14-121-04	Sampling location SB-C14-121-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C14-121-04		2	2											1	1			
C14-125	3	Pattern Store	Foundation destroyed; Only two piles of brick remain; No evidence of a release (area=400 sq ft)	SB-C14-125-01 through SB-C14-125-04	SB-C14-125-01 SB-C14-125-04	Sampling location SB-C14-125-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C14-125-04		2	2											1	1			
C14-2	9	Debris Area	24 metal screens; No evidence of a release (area=100 sq ft)	SB-C14-2-01 through SB-C14-2-03	SB-C14-2-03	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1											1	1			
C14-4	3	Store House	Very old stone foundation; No evidence of a release (area=400 sq ft)	SB-C14-4-01 through SB-C14-4-04	SB-C14-4-01 SB-C14-4-03	Sampling location SB-C14-4-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C14-4-03		2	2											1	1	SVOCs		SVOCs (5-2B & 5-15B)
D11-208A	3	Refuse Shed	All that remains are charred wooden posts; No evidence of a release (area=100 sq ft)	SB-D11-208A-01 through SB-D11-208A-03	SB-D11-208A-01	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-2E & 5-15D)
D11-218C	3	RRP Storage	Building demolished; Only footers and an earthen mound remain; Two 2" pipes enter ground, unknown termination; No evidence of a release	SB-D11-218C-01 through SB-D11-218C-07	SB-D11-218C-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 413 ppm at SB-D11-218C-03		1	1											1	1	Metals	SVOCs	Metals (5-2E & 5-15D), SVOCs (5-2B & 5-15B)
D11-7	3	Unknown	Building demolished; Six very old cement footers remain; Some metal debris and two old drum hulks present; No evidence of a release (area=200 sq ft)	SB-D11-7-01 through SB-D11-7-03	SB-D11-7-01 SB-D11-7-02	Sampling location SB-D11-7-01 was determined using XRF screening. Results indicated a lead concentration of 2,498 ppm. A confirmation sample was collected at SB-D11-7-02 Analytical results did not detect elevated lead concentrations		2	2		2	2								1	1			
D11-B232	3	DNT Screening House	The former structure has been demolished; Five brick footers remain; Three 2-inch pipes extend into ground, termination unknown; The area is marshy and heavily vegetated; No evidence of a release	SB-D11-B232-01 through SB-D11-B232-07	SB-D11-B232-07 SB-D11-B232-06	Sampling location SB-D11-B232-07 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D11-B232-06		2	2		2	2								1	1	Metals, E&E, SVOCs		Metals (5-2E & 5-15D), E&E (5-2C & 5-15C), SVOCs (5-2B & 5-15B)

Table 2-2

Dynamite Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	N/Nitra	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
D12-1	3	Blower House for D11-282A	This building was destroyed; It measured approximately 15' x 15'; Remains of old equipment are rusted hulks; No evidence of a release (area=200 sq ft)	SB-D12-1-01 through SB-D12-1-03	SB-D12-1-02 SB-D12-1-01	Sampling location SB-D12-1-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D12-1-01		2	2											1	1			
D12-2073	3	Unknown	Small 15' x 10' demolished building; Wood and metal debris present; No evidence of a release (area=200 sq ft)	SB-D12-2073-01 through SB-D12-2073-03	SB-D12-2073-03 SB-D12-2073-01	Sampling location SB-D12-2073-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D12-2073-01		2	2		2	2								1	1			
D12-208D	3	Unknown	Demolished structure approximately 10' x 20'; All remnants of building removed; Area filled with water No evidence of a release (area=200 sq ft)	SB-D12-208D-01 through SB-D12-208D-03	SB-D12-208D-03 SB-D12-208D-01	Sampling location SB-D12-208D-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D12-208D-01		2	2		2	2								1	1			
D12-209B	3	Blower House	Old foundation with rusting metal equipment; No evidence of a release (area=200 sq ft)	SB-D12-209B-01 through SB-D12-209B-03	SB-D12-209B-02	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-2E & 5-15D)
D12-282A	3	Dynamite Mix House #2	This building was previously thermally decontaminated; Some remnant footers, metal debris, and charred wood remain; The center of former building is marshy; No evidence of a release	SB-D12-282A-01 through SB-D12-282A-05	SB-D12-282A-05	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1		1	1								1	1	E&E		E&E (5-2C & 5-15C)
D12-286A	3	Hall Pack House #1	Very old demolished building; Berm has been mostly removed. Concrete foundation chunks are on ground surface; No evidence of a release	SB-D12-286A-01 through SB-D12-286A-05	SB-D12-286A-04	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1		1	1								1	1	Metals		Metals (5-2E & 5-15D)
D12-289	3	Gel Pack House	Former structure previously thermally decontaminated; Multiple concrete footers and some charred remains present; Some old pipes and machinery along southern berm; There is an old pump in the center of the former structure; No evidence of a release	SB-D12-289-01 through SB-D12-289-05	SB-D12-289-03	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1		1	1								1	1	Metals, SVOCs	E&E	Metals (5-2E & 5-15D), E&E (5-2C & 5-15C), SVOCs (5-2B & 5-15B)
D12-3	3, Sampled as single unit	Unknown	Combination of D12-208 and D12-130E; These were small structures dismantled and combined together The area contains metal and concrete debris; Two 2" diameter pipes enter ground on east side; No evidence of a release	SB-D12-3-01 through SB-D12-3-05	SB-D12-3-04 SB-D12-3-02	Sampling location SB-D12-3-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D12-3-02	2	2			2	2								1	1			
D13-2	10	Electric Pole Transformer	Transformer removed; No evidence of a release	SB-D13-2-01	SB-D13-2-01	Sample taken directly below former transformer				1										1	1			
D13-264A	3	Gel Cart House #1	Steep bermed area with brick foundation; No evidence of a release	SB-D13-264A-01 through SB-D13-264A-05	SB-D13-264A-05 SB-D13-264A-03	Sampling location SB-D13-264A-05 was determined using XRF screening; Results indicated an antimony concentration of 109 ppm, a copper concentration of 808 ppm, and a lead concentration of 886 ppm . A confirmation sample was collected at SB-D13-264A-03	2	2		2	2	2								1	1	Metals		Metals (5-2E & 5-15D)
D13-264B	3	Gel Cart House #2	Thermally decontaminated building; Old drive shaft present; Two small structures outside berm; associated with this building; Two 10' diameter areas of stressed vegetation NE of berm	SB-D13-264B-01 through SB-D13-264B-05	SB-D13-264B-03 SB-D13-264B-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling	2	2		2	2	2						2		1	1		E&E, SVOCs	E&E (5-2C & 5-15C), SVOCs (5-2B & 5-15B)
D13-265A	3	Unknown	Thermally decontaminated structure; Associated with D13-264A; Small 1" pipe enters ground at SE corner; Old drum hulk at southwest corner; No evidence of a release	SB-D13-265A-01 through SB-D13-265A-06	SB-D13-265A-06	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1		1	1	1								1	1	Metals		Metals (5-2E & 5-15D)
D13-268	3	Shrader Cart House	Old stone foundation, marshy center; Pipe coming out of center and entering ground in West; No evidence of a release	SB-D13-268-01 through SB-D13-268-06	SB-D13-268-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 774 ppm at SB-D13-268-01	1	1		1	1	1								1	1	Metals		Metals (5-2E & 5-15D)
D13-273B	3	Hand Pack House	Building demolished; Two pipes that form a square are all that remain; No evidence of a release	SB-D13-273B-01 through SB-D13-273B-07	SB-D13-273B-02 SB-D13-273B-04	Sampling location SB-D13-273B-02 was determined using XRF screening; Results indicated a copper concentration of 2,450 ppm. A confirmation sample was collected at SB-D13-273B-04. Analytical results did not detect elevated copper concentrations	2	2		2	2	2								1	1	SVOCs		SVOCs (5-2B & 5-15B)
D13-3	3	Unknown	Burnt structure with electric motor in center (area=200 sq ft)	SB-D13-3-01 through SB-D13-3-04	SB-D13-3-04 SB-D13-3-02	Sampling location SB-D13-3-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D13-3-02	2	2		2	2	2								1	1	Metals	E&E	Metals (5-2E & 5-15D), E&E (5-2C & 5-15C)
D13-303F	3	Blower House	Several old foundations; Lead solder on pipe; No evidence of a release (area=100 sq ft)	SB-D13-303F-01 through SB-D13-303F-03	SB-D13-303F-02	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling	1	1												1	1	Metals		Metals (5-2E & 5-15D)

Table 2-2

Dynamite Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	N/Nitra	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
D14-120	3	Waste Paper Store	Old stone foundation; Old metal screens and bricks 10' SE of foundation; No evidence of a release	SB-D14-120-01 through SB-D14-120-05	SB-D14-120-04 SB-D14-120-03	Sampling location SB-D14-120-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D14-120-02		2	2											1	1		SVOCs	SVOCs (5-2B & 5-15B)
D14-129	3	Powder Office	Old stone foundation; No evidence of a release	SB-D14-129-01 through SB-D14-129-05	SB-D14-129-05 SB-D14-129-03	Sampling location SB-D14-129-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D14-129-03		2	2											1	1		SVOCs	SVOCs (5-2B & 5-15B)
D14-204B	3	NC Dry House	Thermally decontaminated wooden structure; Stressed vegetation within area of former structure; Large amount of lead on ground (area=900 sq ft)	SB-D14-204B-01 through SB-D14-204B-04	SB-D14-204B-01 SB-D14-204B-04	Sampling locations were determined using XRF screening Results indicated an arsenic concentration of 521 ppm at SB-D14-204B-01 and 209 ppm at SB-D14-204B-04		2	2		2	2						2	1	1	Metals	E&E	Metals (5-2E & 5-15D), E&E (5-2C & 5-15C)
D14-360	NA	Filter Station	Multiple underground steel water pipes; Water supply lagoon; No evidence of a release	SB-D14-360-01 through SB-D14-360-04	SB-D14-360-03 SB-D14-360-01	Sampling location SB-D14-360-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D14-360-01		2	2											1	1		SVOCs	SVOCs (5-2B & 5-15B)
D14-6	9	Stressed Vegetation	Center of stressed vegetation (area=400 sq ft)	SB-D14-6-01 through SB-D14-6-03	SB-D14-6-01 SB-D14-6-02	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		2	2									2	1	1		SVOCs	SVOCs (5-2B & 5-15B)
D14-667	3	Refined Graining House	Large elevated concrete foundation; Second smaller foundation 30' E; The area is grass covered; No evidence of a release	SB-D14-667-01 through SB-D14-667-05	SB-D14-667-03	Sampling location was determined using XRF and E&E screening. Results indicated a lead concentration of 614 ppm at SB-D14-667-03; Group A E&E materials were also detected at SB-D14-667-03 using an Expray Test Kit		1	1		1	1							1	1	Metals, E&E	SVOCs	Metals (5-2E & 5-15D), E&E (5-2C & 5-15C), SVOCs (5-2B & 5-15B)
E10-1	9	Former Pond	Very little evidence of former pond, extent of pond is estimatec (area=36,000 sq ft)	SB-E10-1-01 through SB-E10-1-20	SB-E10-1-05 SB-E10-1-13 SB-E10-1-18	Sampling locations were determined using XRF and E&E screening. Group B E&E materials were detected at SB-E10-1-05 and SB-E10-1-18 using an Expray Test Kit; Results indicated a lead concentration of 435 ppm at SB-E10-1-13. Analytical results did not detect elevated lead or E&E concentrations		2	2		2	2							1	1		E&E, SVOCs	E&E (5-2C & 5-15C), SVOCs (5-2B & 5-15B)
E10-2	3	Unknown	Former structure destroyed; Eight cement footers remain; Former structure approximately 15' x 30'; No evidence of a release (area=600 sq ft)	SB-E10-2-01 through SB-E10-2-04	SB-E10-2-03 SB-E10-2-04	Sampling location SB-E10-2-03 was determined using E&E screening. Group B E&E materials were detected using an Expray Test Kit. A confirmation sample was collected at SB-E10-2-04. Analytical results did not detect elevated E&E concentrations		2	2		2	2							1	1			
E10-3	3	Unknown	Small stone cylindrical footer approximately 7' in diameter; No evidence of a release (area=100 sq ft)	SB-E10-3-01 through SB-E10-3-03	SB-E10-3-02	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-E10-3-02 using an Expray Test Kit Analytical results did not detect elevated E&E concentrations		1	1		1	1							1	1			
E11-1	1	Auxiliary Heater House	Small wooden structure 5' x 3'; Used to support E1-2064; No evidence of a release	SB-E11-1-01 through SB-E11-1-04	SB-E11-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1										1	1			
E11-11	3	Unknown	Remnants of an old foundation with brick footers; No evidence of a release (area=100 sq ft)	SB-E11-11-01 through SB-E11-11-03	SB-E11-11-02	Sampling location SB-E11-11-02 was determined using professional judgement; Screening results did not warrant biased sampling.		1	1										1	1			
E11-12	3	Unknown	Very overgrown old foundation (area=600 sq ft)	SB-E11-12-01 through SB-E11-12-04	SB-E11-12-04 SB-E11-12-02	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-E11-12-02 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations		1	1		1	1	1						1	1	Metals		Metals (5-2E & 5-15D)
E11-2	3	Unknown	Small 12' x 12' rectangular cement and brick foundation; No evidence of a release (area=400 sq ft)	SB-E11-2-01 through SB-E11-2-04	SB-E11-2-03 SB-E11-2-02	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-E11-2-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations		2	2		2	2	2						1	1			
E11-2064	1, Sampled as single unit	Talley Mix House	Two wooden structures completely encased within 40' thick berm; The second wooden structure houses the motor house; Loading areas on SE and NE sides of building within berm; Truck loading area on the SW corner outside of berm; Catch tank on NE corner of main	SB-E11-2064-01 through SB-E11-2064-08	SB-E11-2064-01 SB-E11-2064-02 SB-E11-2064-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		3	3		3	3							1	1	Metals	E&E	Metals (5-2E & 5-15D), E&E (5-2C & 5-15C)
E11-207B	3	Repair Shop	Old overgrown foundation; No evidence of release (area=900 sq ft)	SB-E11-207B-01 through SB-E11-207B-04	SB-E11-207B-04	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling	1												1	1			

Table 2-2

Dynamite Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	N/Nitra	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
E11-2083	1	Air Conditioning House	Old 12'x10' wooden structure; Contains old air conditioner/heater; Slight stressed vegetation under awnings (area=200 sq ft)	SB-E11-2083-01 through SB-E11-2083-04	SB-E11-2083-03 SB-E11-2083-04	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2										2	1	1			
E11-218B	3	Unknown	Building demolished; Three concrete footers remain; No evidence of a release	SB-E11-218B-01 through SB-E11-218B-05	SB-E11-218B-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 424 ppm at SB-E11-218B-02		1	1		1	1								1	1	Metals		Metals (5-2E & 5-15D)
E11-4	3	Dynamite Box Pack House	Building and associated structures almost totally removed; Area very vegetated	SB-E11-4-01 through SB-E11-4-03	SB-E11-4-02 SB-E11-4-01	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E11-4-01		2	2		2	2								1	1			
E11-5	9	Stressed Vegetation	Center of stressed vegetation (area=20 sq ft)	SB-E11-5-01 through SB-E11-5-03	SB-E11-5-01	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1										1	1	1			
E11-52	4	General Storage	The structure is completely removed; Marked estimated location; No evidence of a release	SB-E11-52-01 through SB-E11-52-05	SB-E11-52-04	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-E11-52-04 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations		1	1		1	1								1	1	SVOCs, Metals		Metals (5-2E & 5-15D), SVOCs (5-2B & 5-15B)
E11-6	5	Tank Saddles	Series of three double tank saddle foundations	SB-E11-6-01 through SB-E11-6-04	SB-E11-6-02 SB-E11-6-04	Sampling locations were determined using E&E screening Group B E&E materials were detected at SB-E11-6-02/04 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations	2	2			2	2								1	1	VOCs		VOCs (5-2A & 5-15A)
E11-7	3	Unknown	Two footers with a 5' x 5' area of molten lead (area=100 sq ft)	SB-E11-7-01 through SB-E11-7-03	SB-E11-7-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 18,520 ppm, a copper concentration of 4,970 ppm, and a zinc concentration of 5,240 ppm at SB-E11-7-02		1	1		1	1								1	1	Metals		Metals (5-2E & 5-15D)
E11-8	10	Electric Transformer	Base of telephone pole	SB-E11-8-01	SB-E11-8-01	Sample taken at base of telephone pole				1										1	1	PCBs**		
E11-8228	3,6	Change House	Brick structure 30' x 30'; Septic tank located 20' W of building (1 sludge sample taken during Single Phase Remediation); Several small steam blow-out lines present on east side of bldg; No evidence of a release	SB-E11-8228-01 through SB-E11-8228-05 TP-E11-8228-06	SB-E11-8228-02 SB-E11-8228-05 TP-E11-8228-06	Sampling location SB-E11-8228-02 was determined using XRF screening; Results indicated a lead concentration of 478 ppm. A confirmation sample was collected at SB-E11-8228-05. Test Pit location was placed downgradient from the septic. Analytical results did not detect elevated Metal concentrations.	1	3	2										2	2			
E11-R2	1	Talley Mix House Scrap Shed	Small 6' x 6' wooden structure; Knocked over on side; No evidence of a release (area=100 sq ft)	SB-E11-R2-01 through SB-E11-R2-03	SB-E11-R2-03	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 332 ppm at SB-E11-R2-03		1	1		1	1								1	1	Metals, SVOCs		Metals (5-2E & 5-15D), SVOCs (5-2B & 5-15B)
E12-130E	1	Air Conditioning House	Old wooden structure 12' x 15'; Contains HVAC Equipment; Several vent pipes from HVAC equipment extend through bldg wall; No evidence of a release (area=300 sq ft)	SB-E12-130E-01 through SB-E12-130E-04	SB-E12-130E-02 SB-E12-130E-03	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2											1	1			
E12-2081	1	Air Conditioning House	Old possible fiberglass sided structure 24' x 24'; Houses HVAC equipment; Two floor drains, A pipe, possibly steam blow-out line, exits building on north side; No evidence of a release	SB-E12-2081-01 through SB-E12-2081-05	SB-E12-2081-04 SB-E12-2081-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2											1	1			
E12-286B	3	Hall Pack House #2	This structure was thermally decontaminated; The building looks to have been constructed of wood; The former structure was large approximately 125' x 125'; Small amount of debris present, the area is well vegetated; No evidence of a release	SB-E12-286B-01 through SB-E12-286B-05	SB-E12-286B-02	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 197 ppm at SB-E12-286B-02		1	1		1	1							1	1	1	Metals		Metals (5-2E & 5-15D)
E12-286D	3	Dynamite Cart House	Very large concrete foundation; Some metal debris within foundation walls; Three large entrances through concrete foundations; Potential stressed vegetation within 1' of concrete foundation	SB-E12-286D-01 through SB-E12-286D-08	SB-E12-286D-05 SB-E12-286D-07	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	1						2	1	1	Metals, SVOCs		Metals (5-2E & 5-15D), SVOCs (5-2B & 5-15B)
E12-298B	3	Machine Parts House	Partially demolished brick structure measuring 15' x 8'; No evidence for a release (area=200 sq ft)	SB-E12-298B-01 through SB-E12-298B-03	SB-E12-298B-03 SB-E12-298B-02	Sampling location SB-E12-298B-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E12-298B-02		2	2											1	1			
E12-325B	4	Unknown	8' x 8' area, location based on historical maps	SB-E12-325B-01 through SB-E12-325B-03	SB-E12-325B-02	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1		1	1								1	1	SVOCs, Metals		Metals (5-2E & 5-15D), SVOCs (5-2B & 5-15B)

Table 2-2

Dynamite Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	N/Nitra	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
E12-6	3	Temp Carpenter Shop	Only old scrap remains of this 10' x 10' area; Pipe enters ground, unknown if intact	SB-E12-6-01 through SB-E12-6-04	SB-E12-6-01	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1											1	1			
E12-9317	3	Powder Line Office	Very old 20' x 20' demolished stone foundation; Some debris scattered around former structure; No evidence of a release (area=300 sq ft)	SB-E12-9317-01 through SB-E12-9317-04	SB-E12-9317-04 SB-E12-9317-01	Sampling location SB-E12-9317-04 was determined using XRF screening; Results indicated a lead concentration of 406 ppm. A confirmation sample was collected at SB-E12-9317-01. Analytical results did not detect elevated metal concentrations.		2	2											1	1			
E13-1	10	Electric Pole Transformer	No evidence of a release	SB-E13-1-01	SB-E13-1-01	Sample taken at base of pole				1										1	1			
E13-2040	1	Waxing Shed	Very old wooden structure; Rail loading area on south side; Possible stand pipe near NE corner Small shed with old machinery adjacent on north side; No evidence of a release	SB-E13-2040-01 through SB-E13-2040-07	SB-E13-2040-04 SB-E13-2040-07	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2		2	2								1	1			
E13-2074	1	Titan Cast Building	New looking building possibly renovated; Three potential loading doors; Loading dock with one loading area; No evidence of exterior catch tank; 3" PVC discharge pipe from building to ditch on north side of building	SB-E13-2074-01 through SB-E13-2074-09	SB-E13-2074-01 SB-E13-2074-06 SB-E13-2074-09	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	3		3	3								1	1	Metals	E&E	Metals (5-2E & 5-15D), E&E (5-2C & 5-15C)
E13-2074A	1	Catch Tank House	Old brick structure; Currently contains a blower piped to E13-2074; No evidence of former catch tank, may have sat on concrete	SB-E13-2074A-01 through SB-E13-2074A-05	SB-E13-2074A-01 SB-E13-2074A-05	Sampling location SB-E13-2074A-01 was determined using E&E screening; Group B E&E materials were detected at using an Expray Test Kit. A confirmation sample was collected at SB-E13-2074A-05		2			2	2								1	1			
E13-2076	1	Dynamite Blender	Small 15' x 15' cinder block structure; Loading door on NE side; No evidence of a release	SB-E13-2076-01 through SB-E13-2076-05	SB-E13-2076-02	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 185 ppm at SB-E13-2076-02		1	1		1	1								1	1	Metals		Metals (5-2E & 5-15D)
E13-2078	1	Heater House	Small 15' x 10' cinder block structure; Old heater and steam line inside building; No evidence of a release	SB-E13-2078-01 through SB-E13-2078-04	SB-E13-2078-03 SB-E13-2078-04	Sampling location SB-E13-2078-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E13-2078-04		2	2											1	1			
E13-3	1	Trash Shed	Small 10' x 6' wooden structure; Potential stressed vegetation west and south of structure	SB-E13-3-01 through SB-E13-3-05	SB-E13-3-03 SB-E13-3-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling. A confirmation sample was collected at E13-3-05.	2	2											2	1	1			
E13-325	1	Dynamite Storage	Very old wooden structure; No evidence of a release	SB-E13-325-01 through SB-E13-325-04	SB-E13-325-02	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-E13-325-02 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	1	1	1	1										1	1	Metals	SVOCs	Metals (5-2E & 5-15D), SVOCs (5-2B & 5-15B)
E13-5	3, Sampled as single unit	Debris from Bldg's 8209/2039	General debris covers approximately 15' diameter area; No evidence of a release	SB-E13-5-01 through SB-E13-5-03	SB-E13-5-02 SB-E13-5-03	Sampling location SB-E13-5-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E13-5-03	2	2	2	2										1	1			
E14-2020	3	Refuse Shed	Former structure destroyed; Small 10' x 10' pile of wood debris; No evidence of a release (area=100 sq ft)	SB-E14-2020-01 through SB-E14-2020-03	SB-E14-2020-03	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 816 ppm at SB-E14-2020-03	1	1												1	1	Metals		Metals (5-2E & 5-15D)
E14-668	3	Box Pack House	Remains of a concrete foundation; Debris covers concrete foundation; Slight stressed vegetation along eastern side of foundation	SB-E14-668-01 through SB-E14-668-05	SB-E14-668-03 SB-E14-668-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling	2	2	2	2									2	1	1			
F11-54	4	Paint and Oil Store	Overgrown area, location determined from historical maps	SB-F11-54-01 through SB-F11-54-03	SB-F11-54-02	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling	1	1												1	1	Metals		Metals (5-2E & 5-15D)
F11-79C	3	Unknown	All that remains is a 1' x 2' footer, all else has been removed; No evidence of a release (area=100 sq ft)	SB-F11-79C-01 through SB-F11-79C-03	SB-F11-79C-01	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling	1	1	1	1										1	1			
F12-191	4	Laundry and Change House	No evidence of former structures; No evidence of a release	SB-F12-191-01 through SB-F12-191-03	SB-F12-191-02 SB-F12-191-01	Sampling location SB-F12-191-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F12-191-01	2	2												1	1			
F12-2026A	1	Scrap Shed	Small 10' x 10' wooden structure; Loading door on west side; No evidence of a release	SB-F12-2026A-01 through SB-F12-2026A-05	SB-F12-2026A-05	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling	1	1												1	1	Metals		Metals (5-2E & 5-15D)

Table 2-2

Dynamite Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	N/Nitra	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
F12-2039	4	Unknown	Completely removed no evidence of location; Estimated location; May have been removed for a drainage ditch; No evidence of a release	SB-F12-2039-01 through SB-F12-2039-03	SB-F12-2039-02 SB-F12-2039-01	Sampling location SB-F12-2039-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F12-2039-01		2	2		2	2								1	1	Metals		Metals (5-2E & 5-15D)
F12-2075	1	Former Dynamite Grinder	Appears to be a refurbished building; Three loading doors on north side; One loading door on south side; Loading dock with two loading spots on south side; No evidence of environmental impact	SB-F12-2075-01 through SB-F12-2075-10	SB-F12-2075-03 SB-F12-2075-05	Sampling location SB-F12-2075-05 was determined using professional judgement Group B E&E materials were detected at SB-F12-2075-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		2	2		2	2								1	1	Metals		Metals (5-2E & 5-15D)
F12-2075A	1	Blower House for F12-2075	This is a 10' x 20' wood structure; A large ventilation pipe connects to F12-2075; There is a loading door on the north side; Potential stressed vegetation at steam blow-out on north side	SB-F12-2075A-01 through SB-F12-2075A-05	SB-F12-2075A-03 SB-F12-2075A-04 SB-F12-2075A-05	Sampling location F12-2075A-05 was determined using professional judgement; Sample locations F12-2075A-03/04 were determined using XRF screening; Results indicated an arsenic concentration of 187 ppm at F12-2075A-03 and 135 ppm at SB-F12-2075A-04		3	3										3	1	1	Metals		Metals (5-2E & 5-15D)
F12-2221	1	Unknown	This is a very old brick structure; here is a loading door to the north; A drain pipe exits at the southwest corner; No evidence of a release	SB-F12-2221-01 through SB-F12-2221-06	SB-F12-2221-04 SB-F12-2221-05 SB-F12-2221-06	Sampling locations SB-F12-2221-05/06 were determined using professional judgement; Sample location SB-F12-2221-04 was determined using XRF screening; Results indicated an arsenic concentration of 272 ppm at SB-F12-2221-04		3	3		3	3								1	1	Metals, SVOCs		Metals (5-2E & 5-15D), SVOCs (5-2B & 5-15B)
F12-3	7	Sump	Seven foot diameter cement sump; Surface mounted pump; Pipe exits sump and enters ground to south; No evidence of a release	TP-F12-3-01	TP-F12-3-01	Test Pit was placed downgradient of the sump.		1			1	1	1							1	1			
F12-6	1	Unknown	This is a very old brick structure; here is a loading door to the north; A drain pipe exits at the southwest corner; No evidence of a release	SB-F12-6-01 through SB-F12-6-20	SB-F12-6-06 SB-F12-6-12	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2		2	2								1	1			
F12-8206	1	Mule Shed	Old barn; No evidence of a release	SB-F12-8206-01 through SB-F12-8206-05	SB-F12-8206-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 649 ppm at SB-F12-8206-03		1	1											1	1	Metals		Metals (5-2E & 5-15D)
F12-R1	4	Radford Packhouse Scrap Shed	Completely removed no evidence of location; Estimated location covered in asphalt; No evidence of a release	SB-F12-R1-01 through SB-F12-R1-03	SB-F12-R1-01	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1											1	1			
F13-1	9	Former Pond	Old pond that has been filled in; One drum and several bottles evident in SE area; Area is grass covered (area=23,000 sq ft)	SB-F13-1-01 through SB-F13-1-20	SB-F13-1-15 SB-F13-1-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,024 ppm at SB-F13-1-15. Analytical results did not detect elevated metal concentrations.		2	2											1	1			
F13-2077	4	Unknown	Completely removed no evidence of location; Estimated location covered in asphalt; No evidence of a release	SB-F13-2077-01 through SB-F13-2077-03	SB-F13-2077-01	Sampling location was determined using professional judgement. Screening results did not warrant biased sampling		1	1		1	1								1	1			
F13-236B	3	Unknown	Very old 10' x 15' cement foundation; Nearly completely removed; No evidence of a release (area=200 sq ft)	SB-F13-236B-01 through SB-F13-236B-03	SB-F13-236B-03 SB-F13-236B-01	Sampling location SB-F12-236B-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F12-236B-01		2	2		2	2								1	1			
F13-8209	4	Unknown	Completely removed no evidence of location; Estimated location; No evidence of a release	SB-F13-8209-01 through SB-F13-8209-03	SB-F13-8209-03 SB-F13-8209-02	Sampling location SB-F13-8209-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F13-8209-02		2	2		2	2								1	1			

Table 2-2

Dynamite Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	N/Nitra	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
F13-8230	3,6	Change House	Building demolished approximately 20' x 20; Only bricks and cinder block remain; Septic Tank associated with the building. No evidence of a release	SB-F13-8230-01 through SB-F13-8230-04 TP-F13-8230-05	SB-F13-8230-02 SB-F13-8230-03 TP-F13-8230-05	Sampling location SB-F13-8230-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F13-8230-03. Test Pit location was placed downgradient from the septic tank.	1	3	2											2	2			

Notes:
All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:

TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
AOC = Area of Concern
XRF = X-ray Fluorescence
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector
TOC and GRAIN SIZE collected at each AOC

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
Sq Ft = Square Foot
No. = Number

AOC Type

1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

***** = AOC reserved for RI due to presence of contamination
****** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

All screening samples were evaluated for VOCs, Metals, and E&E compounds

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 2-3

Nitroglycerin Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Asbestos	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
B10-511	3	Graining House #1	Cement foundation with large amount of debris scatterred on top of it; partially thermally decontaminated; internal motor pit on W wall; pipes and scrap metal present; No evidence of release	SB-B10-511-01 through SB-B10-511-04	SB-B10-511-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1								1	1		Metals, E&E	SVOCs	Metals (5-3E & 5-16C), E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)
B10-7	9	TNT in Soil	An area of stressed vegetation N of B11-511 (Graining House # 1) TNT in soil and patches devoid of vegetation (area=3,600 sq ft)	SB-B10-7-01 through SB-B10-7-11	SB-B10-7-02 SB-B10-7-10	Sampling location was determined using XRF screening Results indicated a lead concentration of 578 ppm at SB-7-02 and a lead conentration of 1,404 ppm at SB-B10-7-10 Group A E&E materials were detected at all screening locations using an Expray Test Kit		2	2		2	2						2		1	1		Metals**, E&E	SVOCs	E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)
B11-1	9	Acid Recovery Area	Large area of stressed vegetation; bricks, glass, lead pipe present. Not completely void of vegetation, but much is missing (area=3,600 sq ft)	SB-B11-1-01 through SB-B11-1-11	SB-B11-1-08 SB-B11-1-11	Sampling locations were determined using XRF screening Results indicated a lead concentration of 6,360 ppm at SB-B11-1-08 and a lead concentration of 4,076 ppm at SB-B11-1-11		2	2		2	2						2		1	1		Metals		Metals (5-3E & 5-16C)
B11-11	4	Absorption Tower	Bldg destroyed; area vegetated; No evidence of release	SB-B11-11-01 through SB-B11-11-05	SB-B11-11-05	Sampling locations were determined using XRF screening Results indicated a lead concentration of 3,786 ppm at SB-B11-11-05; Group B E&E materials were detcted at SB-B11-11-05 using an Expray Test Kit		1	1		1	1								1	1		Metals	E&E	Metals (5-3E & 5-16C), E&E (5-3C & 5-16B)
B11-2044	1,7	Redford Paste House, Heater House Catch Tank	Currently standing-used until recently; cut into a slope creating a berm; electric from underground from C11-2; 2 loading doors in front of bldg; catch tank bldg may have sent waste to dynamite ditch to S. No evidence of release	SB-B11-2044-01 through SB-B11-2044-08	SB-B11-2044-03 SB-B11-2044-04 SB-B11-2044-05 SB-B11-2044-06 SB-B11-2044-08	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		5	5		5	5								1	1		Metals	E&E	Metals (5-3E & 5-16C), E&E (5-3C & 5-16B)
B11-2044C	1,5	Control House	Concrete and brick structure; former oil tank on eastern side; fill pipe hole in side of wall is evident; electric conduits on W side oil stain on W side; valve box NW of W corner	SB-B11-2044C-01 through SB-B11-2044C-07	SB-B11-2044C-01 SB-B11-2044C-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1			SVOCs	SVOCS (5-3B & 5-16A)
B11-3	10	Electric Transformer	Pole mounted; transformer intact; No evidence of release	SB-B11-3-01	SB-B11-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1				
B11-4	5	Tank Saddle	Three concrete tank cradles: No evidence of a release	SB-B11-4-01 through SB-B11-4-03	SB-B11-4-01 SB-B11-4-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1				
B11-5	8	NG Gutter	Old NG gutter; wooden structure removed only stanchions remain used when B11-2044 was used as the NG neutralizing and storage house # 4. No evidence of release (length = 750 feet)	SB-B11-5-01 through SB-B11-5-08		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit																			
B11-6	5	Tank Cradles	Two tall tank cradles E of B11-2044; Old trash drum between cradles. No evidence of release	SB-B11-6-01 through SB-B11-6-03	SB-B11-6-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 520 ppm at SB-B11-6-03	1	1	1											1	1		Metals		Metals (5-3E & 5-16C)
B11-9	3	Heater House	Overgrown foundation; several cement foundations visible and a steam line with asbestos like insulation; No evidence for release	SB-B11-9-01 through SB-B11-9-04	SB-B11-9-02 SB-B11-9-03	Sampling location SB-B11-9-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B11-9-03		2	2											1	1				
C10-1	10	Electric Transformer	Base of pole intact; No evidence of release	SB-C10-1-01	SB-C10-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1		PCBs**		
C10-10	7	Concrete Pipe	4' diameter concrete pipe; houses two small asbestos-wrapped pipes look to be from mixed acid store (D10-211C); probably used so they could drive over the smaller pipes; No evidence of release	SB-C10-10-01 through SB-C10-10-03	SB-C10-10-01 SB-C10-10-02	Sampling location SB-C10-10-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C10-10-02		2	2											1	1			SVOCs	SVOCS (5-3B & 5-16A)
C10-12	3	Unknown	All that remains is an old stone foundation; There are many pipes coming from the TNT area; No evidence of a release	SB-C10-12-01 through SB-C10-12-05	SB-C10-12-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,488 ppm at SB-C10-12-03		1	1		1	1								1	1		Metals	SVOCs	Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
C10-13	9	Debris	Small area of rusted drum, some concrete fragments, and 6-8" steel pipe partially buried; drum hulk contained a black,granular material: No stressed vegetation; No evidence of release (area=100 sq ft)	SB-C10-13-01 through SB-C10-13-03	SB-C10-13-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1		Metals		Metals (5-3E & 5-16C)
C10-211C	3	Mixed Acid Storage	Concrete foundation; basin-like structure in center probably for containment; two areas of stressed vegetation appear to be associated; ~40' in diameter NE of bldg and an area ~30' in diameter W of the bldg; foundation overgrown with grass (areas=1600 and 900 sq ft, respectively)	SB-C10-211C-01 through SB-C10-211C-07	SB-C10-211C-04 SB-C10-211C-06 SB-C10-211C-07	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		3	3		3	3							3	1	1		Metals, E&E	SVOCs	Metals (5-3E & 5-16C), E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)
C10-241A	3	Shot Bldg	Cratered area from when former structure shot; broken debris from what looks like an explosion extending E from cratered area. No evidence of release	SB-C10-241A-01 through SB-C10-241A-05	SB-C10-241A-03 SB-C10-241A-05	Sampling location SB-C10-241A-03 was determined using XRF screening; Results indicated a lead concentration of 2,493 ppm. A confirmation sample was collected at SB-C10-241A-05. Analytical results did not detect elevated lead concentrations.		2	2		2	2								1	1				
C10-241C	3	Former Nitrator	Wooden based bldg; only wooden floor remains in L-shape. No evidence of release	SB-C10-241C-01 through SB-C10-241C-04	SB-C10-241C-04 SB-C10-241C-03	Sampling location SB-C10-241C-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C10-241C-03		2	2		2	2								1	1				
C10-5	3	Unknown	Concrete foundation with a destroyed berm; thermally decontaminated; area vegetated. No evidence of release (area=900 sq ft)	SB-C10-5-01 through SB-C10-5-04	SB-C10-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1								1	1		Metals		Metals (5-3E & 5-16C)
C10-7	3	Concrete Footers	Three small concrete footers mostly covered with leaves and vegetation pipes in area, but need to be deferred there. No evidence of release	SB-C10-7-01 through SB-C10-7-05	SB-C10-7-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,004 ppm at SB-C10-7-01		1	1		1	1								1	1		Metals, E&E	SVOCs	Metals (5-3E & 5-16C), E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)
C11-1	9	Former pond	Generally a flat area that appears to be flyash and a large number of bottles; bottles are mostly of household variety; two areas of stressed vegetation; old, broken tower in E; black powder storage is estimated to be at point 12 (area=28,000 sq ft)	SB-C11-4-01 through SB-C11-4-20	SB-C11-4-02 SB-C11-4-09 SB-C11-4-13 SB-C11-4-19 SB-C11-4-20	Sampling locations SB-C11-4-09/13/19/20 were determined using XRF screening; Results indicated a lead concentration of 1,493 ppm at SB-C11-4-09, 419 ppm at SB-C11-4-13, 2,349 ppm at SB-C11-4-19, and 419 ppm at SB-C11-4-20 ; Group B E&E materials were detected at SB-C11-4-02/09/13/20 using an Expray Test Kit		4	4		4	4							4	1	1		Metals, E&E	SVOCs	Metals (5-3E & 5-16C), E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)

C11-10	9	Coal Pile	Old coal pile with no vegetation growing on two sections (area=600 sq ft)	SB-C11-10-01 through SB-C11-10-03	SB-C11-10-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,615 ppm at SB-C11-10-01		1	1										1	1	1		Metals		Metals (5-3E & 5-16C)
C11-12	3	Name Unknown	Very old rock and brick foundation; use unknown; probably associated with C11-10 (coal pile); possibly a power house. No evidence of release (area=900 sq ft)	SB-C11-12-01 through SB-C11-12-05	SB-C11-12-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,058 ppm at SB-C11-12-02		1	1		1	1								1	1		Metals, SVOCs		Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
C11-15	3	Shot Bldg	Foundation ripped apart and strewn about; rebar bent; may have been a nitrator or neutralizer; area is vegetated. No evidence of release	SB-C11-15-01 through SB-C11-15-05	SB-C11-15-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1								1	1		Metals		Metals (5-3E & 5-16C)
C11-18	3	Unknown	Rock foundation currently filled with some water; offset exit in SE corner. No evidence of release (area=500 sq ft)	SB-C11-18-01 through SB-C11-18-04	SB-C11-18-02 SB-C11-18-01	Sampling location SB-C11-18-02 was determined using XRF screening; Results indicated a lead concentration of 3,024 ppm. A confirmation sample was collected at SB-C11-18-01		2	2		2	2								1	1		Metals		Metals (5-3E & 5-16C)
C11-19	7	Catch Tank House	Small shed like structure with shingles for siding; housed outside catch tank; catch tank still present; entrance and exit for potential NG waste in the event of a spill; steam and water supplied to bldg. No evidence of release	SB-C11-19-01 through SB-C11-19-05	SB-C11-19-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 815 ppm at SB-C11-19-05		1	1		1	1								1	1		Metals		Metals (5-3E & 5-16C)
C11-22	5	Air Receiver Tank	4' x 10' air tank resting on two cradles; held air from NG process in bldg. C11-2233. No evidence of release	SB-C11-22-01 through SB-C11-22-03	SB-C11-22-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1				
C11-2233	2	Neutralizer # 3	Completely covered with a soil berm; two walkways and an NG gutter, wastewater pumped out of the S gutter to the outside catch tank; interior looks to be lead floor; No evidence of release	SB-C11-2233-01 through SB-C11-2233-05	SB-C11-2233-01 SB-C11-2233-02 SB-C11-2233-03	Sampling locations SB-C11-2233-02/03 were determined using professional judgement; Sampling location SB-C11-2233-01 was determined using XRF screening; Results indicated a lead concentration of 476 ppm at SB-C11-2233-01		3	3		3	3								1	1		Metals		Metals (5-3E & 5-16C)
C11-2233C	1	Storage Shed	Small wooden structure appears to be used for storage; steam and electricity. No evidence of release	SB-C11-2233C-01 through SB-C11-2233C-04	SB-C11-2233C-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1				
C11-2233D	1	A.C. House	Corrugated steel sided structure; housed AC for C11-2233; cinder block section on NE side; cannot determine utilities; E side contains steam sump and discharge pipe; 15' diameter of stressed vegetation to the W: steam sump discharge outlet covered with algae and a white precipitate	SB-C11-2233D-01 through SB-C11-2233D-06 TP-C11-2233D-07	SB-C11-2233D-05 SB-C11-2233D-06 TP-C11-2233D-07	Sampling location was determined using professional judgement Screening results did not warrant biased sampling Test Pit location was placed downgradient from the sump		3	2		1	1	1						2	2	2			E&E	E&E (5-3C & 5-16B)
C11-23	9	Stressed Vegetation	Small area of stressed vegetation W of C11-21;may be associated with C11-21 (area=100 sq ft)	SB-C11-23-01 through SB-C11-23-03	SB-C11-23-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1											1	1	1				
C11-24	1	Shed	Small shed used to store solar salt for water treatment; No evidence of release	SB-C11-24-01 through SB-C11-24-04	SB-C11-24-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1				
C11-25	9	Discharge Pipe	Terminated from steam sump at C11-21; shallow pit (2' x 2') received runoff from steam sump at C11-21; abundant algae and a white precipitate	SB-C11-25-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of pipe No positive detections were found using an Expray Test Kit																			
C11-27	3	Unknown	Two footers on NE side (1' x1' x 2.5'); ground disturbed; No evidence of release	SB-C11-27-01 through SB-C11-27-05	SB-C11-27-02 SB-C11-27-03	Sampling location was determined using XRF and E&E screening Results indicated a lead concentration of 761 ppm at SB-C11-27-02; Group B E&E compounds were detected at SB-C11-27-03 using an Expray Test Kit. Analytical results did not detect elevated metal concentrations.	1	1			1	1								1	1			E&E, SVOCs	E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)
C11-28	8	NG Gutter	Wooden structure supporting the NG gutter; begins at nitrator house and terminates at C11-2233 (length = 700 feet)	SB-C11-28-01 through SB-C11-28-07		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit																			
C11-28A	8	NG Gutter	Short NG gutter from No. 2 nitrator to C11-28; gutter intact; No evidence of release (length = 50 feet)	SB-C11-28A-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit																			
C11-29	8	NG Waste Gutter	Small wooden trough that contains a fiberglass pipe; carried waste waters from the catch tank house to final catch tank pipe looks intact; may follow an old ditch; an 8' section is made of lead. No evidence of release (length = 200 feet)	SB-C11-29-01 through SB-C11-29-02		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit																			
C11-30	3	Acid Recovery Bldg	Very old large foundation; just an area of stressed vegetation; foundation overgrown; No evidence of release	SB-C11-30-01 through SB-C11-30-09	SB-C11-30-01 SB-C11-30-05 SB-C11-30-06	Sampling location was determined using XRF screening Results indicated a lead concentration of 842 ppm at SB-C11-30-05 and 755 ppm at SB-C11-30-05	3	3			3	3							3	2	2		Metals		Metals (5-3E & 5-16C)
C11-4	9	Stressed Vegetation	Large area of stressed vegetation (area=142,000 sq ft)	SB-C11-1-01 through SB-C11-1-20	SB-C11-1-04 SB-C11-1-05 SB-C11-1-09 SB-C11-1-17	Sampling locations SB-C11-1-04/09 were determined using XRF screening; Results indicated a lead concentration of 12,190 ppm at SB-C11-1-04 and a lead concentration of 2,749 ppm at SB-C11-1-09; Group B E&E materials were detected at C11-1-05 using an Expray Test Kit	3	3			1	1							3	1	1		Metals, SVOCs	E&E	Metals (5-3E & 5-16C), E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)
C11-4A	9	Stressed Vegetation	Contains flyash and bottles; vegetation sparse or non-existent (area=300 sq ft)	SB-C11-4A-01 through SB-C11-4A-03	SB-C11-4A-01 SB-C11-4A-02	Sampling location SB-C11-4A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C11-4A-02	2	2											2	1	1				
C11-4B	9	Stressed Vegetation	Similar to stressed vegetation area A; contains flyash and bottles vegetation sparse or non-existent (area=100 sq ft)	SB-C11-4B-01 through SB-C11-4B-03	SB-C11-4B-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1											1	1	1				
C11-7	9	Stressed Vegetation	Small area stained brown that contains stressed vegetation (area=100 sq ft)	SB-C11-7-01 through SB-C11-7-03	SB-C11-7-02	Sampling location was determined from the presence of E&E compounds at SB-C11-7-02 Group A E&E compounds were detected at SB-C11-7-02 using an Expray Test Kit	1	1			1	1							1	1	1		E&E	SVOCs	E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)

Table 2-3

Nitroglycerin Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Asbestos	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
C11-8	9	Stressed Vegetation	Area stained brown that contains debris and very little plant growth; barren in most places (area=1,600 sq ft)	SB-C11-8-01 through SB-C11-8-06	SB-C11-8-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,870 ppm at SB-C11-8-05		1	1										1	1	1		Metals, SVOCs		Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
C11-8572C	1	Storage Shed	Currently existing structure; aluminum sided with large loading/unloading door on E side; associated with nearby catch tank;contains old hoses for pumps. No evidence of release			Reverved for Remedial Investigation due to the presence of Group B explosives detected using an Expray Test Kit																	E&E*		E&E (5-3C & 5-16B)
C11-8572D	1	Instrument Room	Small shed with a meter that monitored the catch tank; aluminum siding. No evidence of release			Reverved for Remedial Investigation due to the presence of Group B explosives detected using an Expray Test Kit																	E&E*		E&E (5-3C & 5-16B)
C11-9	3	Unknown	Very old stone foundation; use of bldg unknown; No evidence of release (area=500 sq ft)	SB-C11-9-01 through SB-C11-9-05	SB-C11-9-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 8,360 ppm at SB-C11-9-04		1	1											1	1		Metals, SVOCs		Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
C11-N3	1	Neutralizer # 3 Scrap Shed	Small aluminum sided shed used to store scrap temporarily; currently empty. No evidence of release	SB-C11-N3-01 through SB-C11-N3-04	SB-C11-N3-03 SB-C11-N3-02	Sampling location SB-C11-N3-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C11-N3-02		2	2											1	1				
D10-1	9	Stressed Vegetation	Small, 10' x 10', patch of ground where there is no vegetation. Slight brown staining (area=100 sq ft)	SB-D10-1-01 through SB-D10-1-03	SB-D10-1-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 3,029 ppm at SB-D10-1-02		1	1										1	1	1		Metals		Metals (5-3E & 5-16C)
D10-10	3	Brine Chiller	Square pad that contains the brine chiller; pad fairly new with secondary containment; valve to drain secondary containment at SW corner; equipment in good repair; structure covered. No evidence of release	SB-D10-10-01 through SB-D10-10-04	SB-D10-10-01 SB-D10-10-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1			SVOCs	SVOCS (5-3B & 5-16A)
D10-11	5	Air Receiver	Large air tank on two cement cradles over soil; drain on W side and air fill on E side; tank intact. No evidence of release	SB-D10-11-01 through SB-D10-11-03	SB-D10-11-01 SB-D10-11-03	Sampling location SB-D10-11-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-11-03	2	2												1	1				
D10-13	6	Septic Tank	A buried septic tank used for the No.1 and No.2 Nitrator House	TP-D10-13-01	TP-D10-13-01	Test Pit location was placed downgradient from the septic tank	1	1												1	1				
D10-14	1	Air Handler	Small concrete pad that supports the air handler for the nitrate bldg; line of stressed vegetation ~3' wide extends from the air handler south.	SB-D10-14-01 through SB-D10-14-05	SB-D10-14-05 SB-D10-14-03	Sampling location SB-D10-14-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-14-03		2	2										2	1	1			SVOCs	SVOCS (5-3B & 5-16A)
D10-15	5	Air Receiver Tank	Steel air tank associated with D10-2227 nitrator bldg; probably auxiliary to the larger air tank; tank hooked up to air and steam	SB-D10-15-01 through SB-D10-15-03	SB-D10-15-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 522 ppm and a copper concentration of 738 ppm at SB-D10-15-03 Analytical results did not detect elevated metal concentrations		1	1											1	1				
D10-16	3	Unknown		SB-D10-16-01 through SB-D10-16-04	SB-D10-16-03 SB-D10-16-02	Sampling location SB-D10-16-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-16-02	2	2	2	2										1	1				
D10-164B	1	Waste Acid House	Looks like D10-165B except there is pipe along S wall extending into ground (area=400 sq ft)	SB-D10-164B-01 through SB-D10-164B-04	SB-D10-164B-01 SB-D10-164B-02	Sampling locations were determined using XRF screening Results indicated a lead concentration of 3,132 ppm at SB-D10-164B-02 and 1,048 ppm at SB-D10-164B-01	2	2	2	2								2	1	1		Metals		Metals (5-3E & 5-16C)
D10-165B	3	Waste Acid House	Partial rock foundation remains;area disturbed and vegetated; No evidence of release (area=400 sq ft)	SB-D10-165B-01 through SB-D10-165B-04	SB-D10-165B-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,081 ppm at SB-D10-165B-02	1	1	1	1								1	1	1		Metals, SVOCs		Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
D10-18	8	NG Gutter	Old NG gutter to Bldg. 2220; gutter has been dismantled all that remains is old Stanchion footers; most likely dismantled after bldg. Shot. No evidence of release (length = 250 feet)	SB-D10-18-01 through SB-D10-18-03		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit																			
D10-2007	3	NG Pilot Plant	Totally removed with very little evidence of its existence; overturned sheet metal shed (4' x 8') resides on location; could not locate lead on foundation; Roux claims it exists; possibly overgrown (area=400 sq ft)	SB-D10-2007-01 through SB-D10-2007-04	SB-D10-2007-02 SB-D10-2007-04	Sampling location SB-D10-2007-02 was determined using XRF screening; Results indicated a lead concentration of 547 ppm. A confirmation sample was collected at SB-D10-2007-04	2	2	2	2										1	1		Metals, SVOCs		Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
D10-2041	3	Block House	Cinder block structure with steam and electric lines; 5' x 6' cement pad on SE side; possible stressed vegetation on SE side	SB-D10-2041-01 through SB-D10-2041-08	SB-D10-2041-03 SB-D10-2041-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2	2	2								2	1	1		Metals, SVOCs		Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
D10-21	8	Acid Line	2" SS acid line that runs from the acid scrubber to D10-12 and nitrator D10-2227 to the spent acid; line in good condition. No evidence of release			Pipeline removed, no evidence of release, therefore no samples were collected																			
D10-22	8	NG Gutter	Originates at No 2 nitrator house and progresses NE; joins D10-23 and enters the catch tank at D10-223; No evidence of release (length = 200 feet)	SB-D10-22-01 through SB-D10-22-02		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit																			
D10-2227	1	Nitrator No. 1 and No. 2	Supplied much if not all NG during operation; multiple NG gutters; two lines disconnected; multiple brine, glycerin and acid lines	SB-D10-2227-01 through SB-D10-2227-08	SB-D10-2227-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1	1								1	1	1		Metals		Metals (5-3E & 5-16C)
D10-2227E	1	Air Scrubber House	Concrete foundation;contains air scrubbing equipment from D10-2227 nitrating house; electric, steam, and air scrubbing lines. No evidence of release	SB-D10-2227E-01 through SB-D10-2227E-04	SB-D10-2227E-01 SB-D10-2227E-02	Sampling location SB-D10-2227E-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2227E-02	2	2												1	1				
D10-2228	1,7	Drowning House	Housed a large lead basin that received waste possibly from nitrator bldg; pipeline leaves bldg and goes to NG catch tank. No evidence of release	SB-D10-2228-01 through SB-D10-2228-06	SB-D10-2228-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 537 ppm at SB-D10-2228-01	1	1	1	1									1	1		Metals**		
D10-2230	1	Spent Acid House	Large structure used to handle spent acid; multiple brine and acid lines; one large brine tank and one removed brine tank on SW side. No evidence of release	SB-D10-2230-01 through SB-D10-2230-08	SB-D10-2230-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,148 ppm at SB-D10-2230-03 Group B E&E materials were also detected at SB-D10-2230-03 using an Expray Test Kit Analytical results did not detect elevated E&E concentrations	1	1	1	1								1	1	1		Metals		Metals (5-3E & 5-16C)
D10-2230A	1	Acid Scrubber	Wooden and houses the acid scrubber equipment for spent acid house; loading dock for soda at W corner; acid scrubber pipe on NW side of bldg to spent acid house. No evidence of release	SB-D10-2230A-01 through SB-D10-2230A-06	SB-D10-2230A-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1	1								1	1	1		Metals		Metals (5-3E & 5-16C)
D10-2231	1,7	NG Catch Tank	Small structure housed an NG catch tank; waste waters flowing into the catch tank where material was captured and water continued on; No evidence of release	SB-D10-2231-01 through SB-D10-2231-04	SB-D10-2231-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1	1										1	1		Metals**, SVOCs		SVOCS (5-3B & 5-16A)

Table 2-3

Nitroglycerin Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Asbestos	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
D10-2233	4	Neutralizer # 2	Bldg shot and left a water filled crater; associated bldgs D10-2233, D10-2048 and the catch tank were also leveled in blast; they were much closer to main structure than drawn by Roux; area covered with debris; air receiver tank thrown 200' E of former structure area vegetated with old domestic bottles at base of crater	SB-D10-2233-01 through SB-D10-2233-05	SB-D10-2233-04 SB-D10-2233-02	Sampling location SB-D10-2233-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2233-02		2	2		2	2								1	1				
D10-2233A	4	Neutralizer # 2 Support Building	Building completely removed. Debris from Neutralizer #2 has been removed. Area is currently graded.	SB-D10-2233A-01 through SB-D10-2233A-03	SB-D10-2233A-01 SB-D10-2233A-02	Sampling location SB-D10-2233A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2233A-02		2	2		2	2								1	1				
D10-2233B	4	Neutralizer # 2 Support Building	Building completely removed. Debris from Neutralizer #2 has been removed. Area is currently graded.	SB-D10-2233B-01 through SB-D10-2233B-03	SB-D10-2233B-03 SB-D10-2233B-02	Sampling location SB-D10-2233B-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2233B-02		2	2		2	2								1	1				
D10-2233C	4	Neutralizer # 2 Support Building	Building completely removed. Debris from Neutralizer #2 has been removed. Area is currently graded.	SB-D10-2233C-01 through SB-D10-2233C-03	SB-D10-2233C-01 SB-D10-2233C-02	Sampling location SB-D10-2233C-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2233C-02		2	2		2	2								1	1				
D10-2233D	4	Neutralizer # 2 Support Building	Building completely removed. Debris from Neutralizer #2 has been removed. Area is currently graded.	SB-D10-2233D-01 through SB-D10-2233D-03	SB-D10-2233D-03 SB-D10-2233D-02	Sampling location SB-D10-2233D-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2233D-02		2	2		2	2								1	1				
D10-2233E	4	Neutralizer # 2 Support Building	Building completely removed. Debris from Neutralizer #2 has been removed. Area is currently graded.	SB-D10-2233E-01 through SB-D10-2233E-03	SB-D10-2233E-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1								1	1		Metals**		
D10-23	8	NG Gutter	Short NG gutter that runs from No. 1 nitrator to catch tank house (D10-2231); joins D10-22 and continues to catch tank house. No evidence of release (length = 150 feet)	SB-D10-23-01 through SB-D10-23-02		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit																		
D10-2349	3	Unknown	Bldg removed; area covered with grass; No evidence of release (area=100 sq ft)	SB-D10-2349-01 through SB-D10-2349-03	SB-D10-2349-02	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 736 ppm at SB-D10-2349-02		1	1		1	1								1	1		Metals		Metals (5-3E & 5-16C)
D10-24	8	NG Line	NG pipe that originates at No. 1 nitrator goes to Drowning House (2228). No evidence of release. (length = 100 feet)	SB-D10-24-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of pipeline No positive detections were found using an Expray Test Kit																		
D10-241B	4	Nitrator	Bldg completely removed; No evidence of release	SB-D10-241B-01 through SB-D10-241B-05	SB-D10-241B-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1								1	1		SVOCs		SVOCS (5-3B & 5-16A)
D10-24A	8	NG Gutter	Old NG gutter used to follow same path as D10-24 but looks like it detours around the browning house D10-2228; waste line from 2228 joins gutter on S side of bldg. No evidence of release (length = 100 feet)	SB-D10-24A-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit																		
D10-25	8	Spent Acid Pipe	Small 2-inch SS line runs from spent acid house (D10-2230) to catch tank house (D10-2231); line looks intact. No evidence of release	SB-D10-25-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of pipe No positive detections were found using an Expray Test Kit																		
D10-251	4	Change House	Bldg removed; area covered with grass; No evidence of release (area=100 sq ft)	SB-D10-251-01 through SB-D10-251-03	SB-D10-251-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1		Metals		Metals (5-3E & 5-16C)
D10-26	8	Spent Acid Waste Line	Pipe from spent acid bldg (D10-2230) intersects waste line from catch tank house (D10-2231). No evidence of release	SB-D10-26-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of waste line No positive detections were found using an Expray Test Kit																		
D10-27	8	Catch Tank Waste Line	3" fiberglass line that exits D10-2231-the catch tank house; joined by a waste line from spent acid house (D10-2230) then goes S; goes underground, across road, and then cannot be followed. No evidence of release	SB-D10-27-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of waste line No positive detections were found using an Expray Test Kit																		
D10-3	10	Electric Transformer	Transformer has been removed. No evidence of release	SB-D10-3-01	SB-D10-3-01	Sample taken immediately adjacent to former pole Screening results indicated an arsenic concentration of 192 ppm Metals analysis still needs to be collected				1										1	1				
D10-4	3	Sucrose Nitrator	Bldg demolished; constructed of concrete and brick; immediate area vegetated. No evidence of release (area=900 sq ft)	SB-D10-4-01 through SB-D10-4-04	SB-D10-4-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,120 ppm and an arsenic concentration of 353 ppm at SB-D10-4-01		1	1		1	1							1	1	1		Metals, SVOCs		Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
D10-5	9	Scrap Pile	Small pile of old scrap pipes; some covered with what looks like asbestos insulation; area vegetated. Asbestos may have been released (area=100 sq ft)	SB-D10-5-01 through SB-D10-5-03	SB-D10-5-01	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 998 ppm at SB-D10-5-01		1	1											1	1	1	Metals		Metals (5-3E & 5-16C)
D10-6	3	Unknown	Concrete and brick foundation; entrance /exit in S; foundation vegetated. No evidence of release	SB-D10-6-01 through SB-D10-6-05	SB-D10-6-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 5,240 ppm at SB-D10-6-02		1	1		1	1								1	1		Metals, SVOCs		Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
D10-8	5	Unknown	Two small rock footers possibly used to support a tank; area vegetated. No evidence of release	SB-D10-8-01 through SB-D10-8-03	SB-D10-8-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1								1	1				
D10-8234	1	Parts Storage	Small steel shed with a cinder block base; bldg contains flanges some oil, and solvents (Triacitin). No evidence of release.	SB-D10-8234-01 through SB-D10-8234-04	SB-D10-8234-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,933 ppm and a zinc concentration of 8,070 ppm at SB-D10-8234-02		1	1											1	1		Metals		Metals (5-3E & 5-16C)
D10-8284	3	Unknown	Building completely removed. No evidence of release.	SB-D10-8284-01 through SB-D10-8284-04	SB-D10-8284-03	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 998 ppm at SB-D10-8284-01		1	1											1	1		Metals, SVOCs		Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
D10-9119	1	Mixed Acid Store	Bldg removed; only four concrete footers remain; footers currently being used to support pipes; No evidence of release (area=400 sq ft)	SB-D10-9119-01 through SB-D10-9119-04	SB-D10-9119-01 SB-D10-9119-02	Sampling location SB-D10-9119-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-9119-02		2	2		2	2								2	1	1			

Table 2-3

Nitroglycerin Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Asbestos	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
D10-N4	3	Spent Acid Area Scrap Shed	Siding material all that remains of the former scrap shed; No evidence of release (area=100 sq ft)	SB-D10-N4-01 through SB-D10-N4-03	SB-D10-N4-01	Sampling location was determined from the presence of E&E compounds at SB-D10-N4-02 Group B E&E compounds were detected at SB-D10-N4-02 using an Expray Test Kit Analytical results did not detect elevated E&E concentrations		1	1		1	1							1	1	1				
D11-112	3	Box Sto.	Several concrete footers; former site overgrown; No evidence of release	SB-D11-112-01 through SB-D11-112-05	SB-D11-112-05 SB-D11-112-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-D11-112-01		2	2											1	1				
D11-20	3	NG Slum House	Small depression where bldg should be. No evidence of release (area=100 sq ft)	SB-D11-20-01 through SB-D11-20-03	SB-D11-20-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 580 ppm at SB-D11-20-01		1	1		1	1								1	1		Metals**		
D11-2031	1	DNT Heater House	Intact brick structure with elevated walkway; immediate area is vegetated; doesn't appear to be any vegetative impacts.			Reserved for Remedial Investigation due to the presence of DNT																	E&E*		E&E (5-3C & 5-16B)
D11-21	8	Waste NG Line	Two 4" diameter NG waste lines contained in a metal trough; line abruptly ends S of Bldg. 2220; lines may have been dismantled after Bldg. 2220 shot; No evidence of release. (length = 150 feet)	SB-D11-21-01 through SB-D11-21-02		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit																			
D11-3	7	NG Wastewater Tank	8' x 10' wastewater tank and associated loading/unloading platform; received wastewater from the catch tank; No evidence of release	SB-D11-3-01 through SB-D11-3-03	SB-D11-3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1								1	1		Metals		Metals (5-3E & 5-16C)
D11-8572A	7	NG Final Catch Tank	Small aluminum sided structure housed final NG catch tank; two process lines enter structure from NE and NW corner for the catch tank. No evidence of release	SB-D11-8572A-01 through SB-D11-8572A-02		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of process lines No positive detections were found using an Expray Test Kit																			
D11-8572B	1	Pump House	Pump house for the NG catch tank; consisted of an 8' x 15' aluminum sided shed that housed two pumps; shed connected to a 15' diameter water tank to push the NG waste water to the wastewater tank; No evidence of release	SB-D11-8572B-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of pipes No positive detections were found using an Expray Test Kit																			
D9-2	1	Pumphouse for Glycerin	Cement floored wooden structure; fairly new; housed pumps that pumped glycerin from the storage tanks to soda house (2229). No evidence for release	SB-D9-2-01 through SB-D9-2-04	SB-D9-2-04 SB-D9-2-01	Sampling location SB-D9-2-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D9-2-01		2	2											1	1				
D9-2229	1,5	Soda Prep House	Concrete and steel structure; loading dock on W side; two large 10' diameter soda and water solution tanks on E side; pipe lines enter and exit at NE and SW sides	SB-D9-2229-01 through SB-D9-2229-10	SB-D9-2229-01 SB-D9-2229-05	Sampling location SB-D9-2229-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D9-2229-05		2	2											1	1				
D9-3	1	Dust Collector	Dust collecting machine for soda house; electrical and collects dust from soda house by way of an air duct. No evidence of release	SB-D9-3-01 through SB-D9-3-04	SB-D9-3-02 SB-D9-3-01	Sampling location SB-D9-3-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D9-3-01		2	2											1	1				
D9-4	1	Motor and Pump House	Small cinder block structure that contains a water main piping; motor and pumps have been removed; bldg sits low and is partially dug out of a hill. No evidence of release	SB-D9-4-01 through SB-D9-4-04	SB-D9-4-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1		Metals		Metals (5-3E & 5-16C)
D9-5	3	Unknown	Very old remnant of bldg that appears as flat, elevated area;some remnants of a concrete foundation; two reinforcing bars present. No evidence of release (area=800 sq ft)	SB-D9-5-01 through SB-D9-5-05	SB-D9-5-05 SB-D9-5-02	Sampling location SB-D9-5-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D9-5-02		2	2		2	2								1	1				
D9-8279	3	Unknown		SB-D9-8279-01 through SB-D09-8279-05	SB-D9-8279-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1											SVOCs		SVOCS (5-3B & 5-16A)
D9-8284	4	Solvent Storage	Former structure removed; next to no evidence of its existence; trash shed on former location. No evidence of release	SB-D9-8284-01 through SB-D9-8284-05	SB-D9-8284-05 SB-D9-8284-03	Sampling location SB-D09-8284-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D09-8284-03	2													1	1				
D9-9108	5	Glycerin Storage	Earthen bermed area with four glycerin storage tanks; three tanks ~ 6' x 25' and another ~ 8' x 25'; many pipes along S side of tank feed into pump house; tank furthest to E is oldest and largest and out of service	SB-D9-9108-01 through SB-D9-9108-12	SB-D9-9108-01 SB-D9-9108-04 SB-D9-9108-07 SB-D9-9108-10	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		4	4											1	1		SVOCs		SVOCS (5-3B & 5-16A)
D9-N1	3	Nitrator Scrap Shed	Scrap shed has been removed; area is flat and adjacent to a berm. No evidence of release (area=100 sq ft)	SB-D9-N1-01 through SB-D9-N1-03	SB-D9-N1-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1				
E10-2031B	1,6	Change House	Brick structure used as a change house; looks like it has been converted to an office with parts around; septic tank ~ 20' SW of bldg (1 sludge sample taken during Single Phase Remediation effort). No evidence of release	SB-E10-2031B-01 through SB-E10-2031B-04 TP-E10-2031B-05	SB-E10-2031B-04 SB-E10-2031B-01 TP-E10-2031B-05	Sampling location SB-E10-2031B-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E10-2031B-01. Test Pit location was placed downgradient of the septic tank.	1	3	3										2	2				
E10-2031C	3	Shed	Cement pad with a broken metal shed; shed contains fire extinguishers and general maintenance equipment; No evidence of release	SB-E10-2031C-01 through SB-E10-2031C-04	SB-E10-2031C-01 SB-E10-2031C-03	Sampling location SB-E10-2031C-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E10-2031C-03		2	2											1	1				
E10-2169	1	Emulsifier House	Wooden structure on concrete footers; floor is lead	SB-E10-2169-01 through SB-E10-2169-04	SB-E10-2169-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 485 ppm and a copper concentration of 880 ppm at SB-E10-2169-03		1	1		1	1								1	1		Metals		Metals (5-3E & 5-16C)
E10-2169A	5	Emulsifier House Catch Tank	Cement foundation and corrugated steel sides; houses a catch tank in the event NG is spilled; entrance and discharge for NG waste is on NW side of bldg. No evidence of release	SB-E10-2169A-01 through SB-E10-2169A-04	SB-E10-2169A-01 SB-E10-2169A-04	Sampling location SB-E10-2169A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E10-2169A-04		2	2		2	2								1	1			E&E, SVOCs	E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)
E10-2177	3	Former PETN Magazine	Bldg nearly completely removed; only evidence is a few rocks from the foundation, some metal debris, and burnt telephone poles; two areas of stressed vegetation one E and one W	SB-E10-2177-01 through SB-E10-2177-06	SB-E10-2177-06	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,723 ppm at SB-E10-2177-06			1		1	1								1	1		Metals		Metals (5-3E & 5-16C)
E10-2314	3	Acetone Weigh House	Bldg demolished; three 1.5' x 1.5' footers remain; area vegetated. No evidence of release.	SB-E10-2314-01 through SB-E10-2314-03	SB-E10-2314-02 SB-E10-2314-01	Sampling location SB-E10-2314-02 was determined using XRF screening; Results indicated a zinc concentration of 2,143 ppm. A confirmation sample was collected at SB-E10-2314-01. Analytical results did not detect elevated metal concentrations.	2	2	2		2	2							1	1				
E10-4	3	Concrete Pads	Two small concrete pads possibly associated with E10-618A; unknown use	SB-E10-4-01 through SB-E10-4-04	SB-E10-4-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1								1	1		Metals, E&E	SVOCs	Metals (5-3E & 5-16C), E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)

Table 2-3

Nitroglycerin Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Asbestos	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
E10-5	9	Lime Pond	Currently one long line of stone along W side and a ditch along eastern side; area has been filled in and is vegetated. No evidence of release (area=5,500 sq ft)	SB-E10-5-01 through SB-E10-5-13	SB-E10-5-06 SB-E10-5-08	Sampling location was determined using XRF screening Results indicated a lead concentration of 5,330 ppm at SB-E10-5-06 and 2,547 ppm at SB-E10-5-08		2	2											1	1		Metals	SVOCs	Metals (5-3E & 5-16C), SVOCs (5-3B & 5-16A)
E10-618A	5	NG Chemical Loading Station	Former chemical loading spot for tanker cars; ~ 150 gallon S.S. tank associated; scaffolding to get to top of tanker cars; safety shower; doesn't appear to be any vegetative impacts.	SB-E10-618A-01 through SB-E10-618A-04	SB-E10-618A-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1								1	1		Metals, SVOCs	E&E	Metals (5-3E & 5-16C), E&E (5-3C & 5-16B), SVOCs (5-3B & 5-16A)
E10-8277	1	Hose House	Brick foundation with wooden structure; two old NG pipes on E side; electric box on NW corner. No evidence of release	SB-E10-8277-01 through SB-E10-8277-04	SB-E10-8277-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 484 ppm at SB-E10-8277-01		1	1											1	1		Metals		Metals (5-3E & 5-16C)
E10-9	8	NG Gutter	Old NG gutter from Bldg. 2220 to the emulsifier house (E10-2169); cannot determine how it ran into Bldg. 2220 since it shot with little remaining. No evidence of release (length = 550 feet)	SB-E10-9-01 through SB-E10-9-06		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit																			

Notes:

All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:

TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
AOC = Area of Concern
XRF = X-ray Fluorescence
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
Sq Ft = Square Foot
No. = Number

AOC Type

1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

* = AOC reserved for RI due to presence of contamination
** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

TOC and GRAIN SIZE collected at each AOC

All screening samples were evaluated for VOCs, Metals, and E&E compounds

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 2-4

PETN Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances	Total Unrestricted Use Exceedances and Table Reference
B10-2178	3	PETN Blender	Old thermally decontaminated structure; large amount of metal scrap and drums present; lead present on the ground, and there is stressed vegetation where this occurs	SB-B10-2178-01 through SB-B10-2178-05	SB-B10-2178-03 SB-B10-2178-05	Sampling locations were determined using XRF screening Results indicated a copper concentration of 1,377 ppm and a zinc concentration of 2,550 ppm at SB-B10-2178-05 and a lead concentration of 7,430 ppm and a zinc concentration of 1,902 ppm at SB-B10-2178-03		2	2		2	2			2				2	1	1	Metals, SVOCs, E&E		Metals (5-4D & 5-17C), SVOCs (5-4B & 5-17A), E&E (5-4C & 5-17B)
C10-15	5	Tank Saddles	Two wooden tank saddles; tank is removed; No evidence of release	SB-C10-15-01 through SB-C10-15-03	SB-C10-15-02	Sampling location was determined using professional judgement screening results did not warrant biased sampling	1	1			1	1			1					1	1			
C10-2	5	PETN Crystallizer Tank Saddles	Three concrete tank saddles; foundations are 1.5' x 10' separated by about 15'; all tanks removed; a lot of debris surrounding area; area vegetated; No evidence of release	SB-C10-2-01 through SB-C10-2-09	SB-C10-2-04 SB-C10-2-05 SB-C10-2-07	Sampling locations were determined using XRF screening Results indicated a lead concentration of 1,538 ppm at SB-C10-2-04, 1,000 ppm at SB-C10-2-05 and 1,502 ppm at SB-C10-2-07	3	3	3		3	3			3					1	1	Metals		Metals (5-4D & 5-17C)
C10-2176	3	PETN Crystallizer	Old foundation, broken with rubble around; pipe in interior of bldg. use is unknown. No evidence of release	SB-C10-2176-01 through SB-C10-2176-05	SB-C10-2176-01 SB-C10-2176-02	Sampling location SB-C10-2176-01 was determined using professional judgement; Group A E&E materials were detected and analyzed at SB-C10-2176-01 using an Expray Test Kit		1	1		1	1			1					1	1	Metals, E&E, SVOCs		Metals (5-4D & 5-17C), SVOCs (5-4B & 5-17A), E&E (5-4C & 5-17B)
C10-2179	3	PETN Nitric Acid Store	Three 1' x 7' concrete foundations; area has a slight potential berm; area is vegetated; two old drums E of the foundations; No evidence of release	SB-C10-2179-01 through SB-C10-2179-05	SB-C10-2179-03	Sampling location was determined using professional judgement screening results did not warrant biased sampling		1	1									1	1	1	Metals		Metals (5-4D & 5-17C)
C10-3	5	PETN Crystallizer Tank Saddle	Wooden tank cradle designed to hold one tank; tank removed; Great deal of debris adjacent to tank cradle; No evidence of release	SB-C10-3-01 through SB-C10-3-03	SB-C10-3-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 526 ppm at SB-C10-3-02	1	1	1		1	1			1					1	1	Metals	E&E	Metals (5-4D & 5-17C), E&E (5-4C & 5-17B)
C10-4	1,5	PETN Storage	Large, old structure; series of three tank cradles in NE corner with a ceramic pipe to the ground between three additional footers; W side has three more ceramic pipes that go into the ground about one foot; look like steam sumps; three distinct levels to this structure as it moves up slope; No evidence of release	SB-C10-4-01 through SB-C10-4-07	SB-C10-4-02 SB-C10-4-07	Sampling locations were determined using XRF screening Results indicated a lead concentration of 720 ppm at SB-C10-4-02 and 500 ppm at SB-C10-4-07 Analytical results did not detect elevated metal concentrations					2	2			2					1	1	E&E		E&E (5-4C & 5-17B)

Notes:

All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:

PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector
TOC and GRAIN SIZE collected at each AOC

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
Sq Ft = Square Foot
No. = Number

* = AOC reserved for RI due to presence of contamination
** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

All screening samples were evaluated for VOCs, Metals, and E&E compounds

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

AOC Type

1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

Table 2-5

Development Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
G6-1	3	Magazine	Building demolished, minimal evidence of remains; Portions of stone foundation remain; No evidence of release	SB-G6-1-01 through SB-G6-1-03	SB-G6-1-03 SB-G6-1-02	Sampling location SB-G6-1-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G6-1-02					2	2	2							1	1			
G6-2	3	Unknown	Building demolished, old stone foundation remains; Location of building corners estimated; No evidence of release	SB-G6-2-01 through SB-G6-2-03	SB-G6-2-03 SB-G6-2-02	Sampling location SB-G6-2-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G6-2-02		2	2		2	2	2							1	1	SVOCs		SVOCs (5-5B & 5-18B)
G6-3	3	Unknown Storage House	Dilapidated wooden structure. No evidence of former contents or content description. No evidence of release.	SB-G6-3-01 through SB-G6-3-04	SB-G6-3-01 SB-G6-3-02	Sampling location SB-G6-3-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G6-3-02		2	2										1	1		SVOCs	SVOCs (5-5B & 5-18B)
G6-4	5	Unknown Storage Tank	Above ground storage tank mounted on concrete cradles. Pressure gauge mounted on S end. No evidence of release.	SB-G6-4-01 through SB-G6-4-03	SB-G6-4-01	Sampling location SB-G6-4-01 was determined using XRF screening; Results indicated a lead concentration of 535 ppm at SB-G6-4-01. Analytical results did not detect elevated metal concentrations.	1	1	1										1	1			
G6-8128	1	Surveillance Test Laboratory	Development laboratory, brick construction over concrete pad. Small surveillance room off W side with a weight on a drop string. No evidence of release	SB-G6-8128-01 through SB-G6-8128-04	SB-G6-8128-04	Sampling location SB-G6-8128-04 was determined using XRF screening; Results indicated a lead concentration of 1,637 ppm at SB-G6-8128-04		1	1		1	1	1							1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
G6-8129	1	Vacuum Pump House	Brick and corrugated metal over wooden construction; Discharge pipe and lead pipe enter ground on W side; AST on W side. No evidence of release	SB-G6-8129-01 through SB-G6-8129-08	SB-G6-8129-01 SB-G6-8129-05 SB-G6-8129-06	Sampling locations SB-G6-8129-05/06 was determined using professional judgement. Sampling location SB-G6-8129-01 was determined using XRF screening; Results indicated a lead concentration of 569 ppm and a zinc concentration of 2,450 ppm at SB-G6-8129-01		3	3										1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
G6-8242	3	Store House	Building demolished, minimal evidence of remains; location determined from historical maps; No evidence of release	SB-G6-8242-01 through SB-G6-8242-04	SB-G6-8242-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1										1	1	Metals		Metals (5-5E & 5-18E)
G6-8243	1	Chemical Store House #3	Wooden and corrugated sheet metal construction with dilapidated wood/stone foundation; Possible iron staining on S side; No evidence of release	SB-G6-8243-01 through SB-G6-8243-04	SB-G6-8243-03	Sampling location SB-G6-8243-03 was determined using XRF screening; Results indicated a lead concentration of 726 ppm at SB-G6-8243-01	1	1	1										1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
G6-8244	1	Chemical Store House #1	Wooden construction over concrete masonry unit foundation. Metal shelving inside. No evidence of release	SB-G6-8244-01 through SB-G6-8244-04	SB-G6-8244-01 SB-G6-8244-03	Sampling location SB-G6-8244-01 was determined using XRF screening; Results indicated a mercury concentration of 275 ppm. A confirmation sample was collected at SB-G6-8244-03	2	2	2										1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
G6-8261	1	Solvent Shed	Wood and corrugated sheet metal construction; One door in front for loading/unloading; No evidence of release	SB-G6-8261-01 through SB-G6-8261-05	SB-G6-8261-03 SB-G6-8261-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2												1	1			
G6-906	4	Auto Shed	Area is currently paved over, location determined from maps. No evidence of release	TP-G6-906-01 through TP-G6-906-03	TP-G6-906-01 TP-G6-906-02	Test Pits dug through asphalt in sampling locations using professional judgement.	2	2	2										1	1			
G6-9219	4	Sample Magazine	Only some bricks and metal debris remain of this former structure. Building appears to have been dismantled long ago. No evidence of release.	SB-G6-9219-01 through SB-G6-9219-05	SB-G6-9219-05 SB-G6-9219-04	Sampling location SB-G6-9219-05 was determined using professional judgement; Screening results did not warrant biased sampling.A confirmation sample was collected at SB-G6-9219-04		2	2		2	2	2							1	1			
G7-2347	4	Chemical Storage	Building demolished, area currently paved over; Location determined from historical maps; No evidence of release	TP-G7-2347-01 through TP-G7-2347-03	TP-G7-2347-02 TP-G7-2347-03	Test Pits dug through asphalt in sampling locations using professional judgement.	2	2	2										1	1	SVOCs, Metals		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
G7-8139	1,10	Medical Building	Brick building built on concrete block foundation; 3 Transformers and utility boxes on S side; No evidence of release	SB-G7-8139-01 through SB-G7-8139-10	SB-G7-8139-02 SB-G7-8139-05 SB-G7-8139-08	Sampling location SB-G7-8139-05 was determined using XRF screening; Results indicated a lead concentration of 493 ppm and a copper concentration of 722 ppm at SB-G6-8139-05. Group B E &E materials were detected at SB-G7-8139-02		1	1	1									1	1	Metals		Metals (5-5E & 5-18E)
G7-8140	1,6	Break Room	Wooden and corrugated sheet metal construction over concrete foundation. Break room sinks and tables present. Possible septic tank on E side. No evidence of release.	SB-G7-8140-01 through SB-G7-8140-04	SB-G7-8140-02 TP-G7-8140-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling Test Pit location placed downgradient from septic		2	1										1	1			
G7-8249	1	Store House	Wooden construction with corrugated sheet metal covering on concrete foundation. Appears to be mostly storage. No evidence of release	SB-G7-8249-01 through SB-G7-8249-04	SB-G7-8249-02	Sampling location SB-G7-8249-02 was determined using XRF screening; Results indicated a lead concentration of 771 ppm at SB-G7-8249-02		1	1										1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
G7-E49	1	Extra Magazine	Small wooden storage magazine with a smaller shed Electrical connection to smaller shed, 2" steam line to magazine "8249A" spray painted on the front. No evidence of release	SB-G7-E49-01 through SB-G7-E49-05	SB-G7-E49-02 SB-G7-E49-05	Sampling location SB-G7-E49-02 was determined using XRF screening; Results indicated an arsenic concentration of 233 ppm. A confirmation sample was collected at SB-G7-E49-05. Analytical results did not detect elevated metal concentrations.			1		2	2	2							2	2			
G8-2293	3	Scrap Shed	Building demolished, only minor amounts of wood present; Metal stake for former ground also present No evidence of release (area=100 sq ft)	SB-G8-2293-01 through SB-G8-2293-03	SB-G8-2293-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1										1	1	SVOCs		SVOCs (5-5B & 5-18B)
G8-8177A	1	Storage Shed	Small wooden and corrugated sheet metal storage shed; Adjacent single phase transformer and electrical controls; No evidence of release	SB-G8-8177A-01 through SB-G8-8177A-03	SB-G8-8177A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1										1	1			
G8-8178	2	Blending House	Corrugated cylindrical metal room covered in soil; Small barrel house-sheet metal front; No evidence of release	SB-G8-8178-01 through SB-G8-8178-02	SB-G8-8178-01 SB-G8-8178-02	Sampling location SB-G08-8178-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G08-8178-02		2	2		2	2	2							1	1			
H5-1	6	Septic Tank	Large septic tank covered by a S.S. lid (one sludge sample taken during IRM effort)	TP-H5-1-01	TP-H5-1-01	Test Pit location was placed downgradient from the septic.	1	1											1	1			
H5-2	10	Electric Transformer	Transformer mounted on pole adjacent to two decon ovens.	SB-H5-2-01	SB-H5-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1									1	1			
H5-3	6	Septic Tank	Possible photo reagents present; No evidence of release	TP-H5-3-01	TP-H5-3-01	Test Pit location placed downgradient from septic	1	1											1	1			
H5-4	9	Stressed Soil Area	Area of stressed soil with aggregate present (area=500 sq ft)	SB-H5-4-01 through SB-H5-4-03	SB-H5-4-03	Sampling location SB-H5-4-03 was determined using XRF screening; Results indicated a copper concentration of 2,650 ppm at SB-H5-4-03		1	1									1	1	1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)

Table 2-5

Development Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
H5-8126	1	Ballistics Building	Large brick building with multiple entrances. Two long indoor shooting ranges, laboratory areas on W end. Possible release near shooting trap areas.	SB-H5-8126-01 through SB-H5-8126-12	SB-H5-8126-06 SB-H5-8126-07 SB-H5-8126-11	Sampling locations SB-H5-8126-06/07 were determined using XRF screening; Results indicated a lead concentration of 6,420 ppm at SB-H5-8126-06, and a copper concentration of 653 ppm and a mercury concentration of 1,164 ppm at SB-H5-8126-07. Group B E&E materials were determined at SB-H5-8126-11. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
H5-8180	4	Gate House	Remnant Building, location determined from historical maps			Test Pits were dug at this AOC. Underground pipelines were found at this location. Sampling was suspended.																		
H5-8181	4	Unknown	Remnant Building, location determined from historical maps	SB-H5-8181-01 through SB-H5-8181-03	SB-H5-8181-01 SB-H5-8181-03	Test Pits dug through asphalt in sampling locations using professional judgement.		2	2		2	2	2							1	1	SVOCs		SVOCs (5-5B & 5-18B)
H5-8254	1	Photo Laboratory	Extension off NW corner of Bldg. 8126; Concrete masonry unit construction with plaster floor and wooden walls on S third of building; Marked as lead print with vertical asbestos shingles; No evidence of release	SB-H5-8254-01 through SB-H5-8254-04	SB-H5-8254-04 SB-H5-8254-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-H05-8254-01		2	2		2	2	2							1	1			
H5-938	1	Trap House	Corrugated metal top on concrete trap house; Filled with scrap wood, glass and ceramic debris; No evidence of release	SB-H5-938-01 through SB-H5-938-04	SB-H5-938-01	Sampling location SB-H5-938-01 was determined using XRF screening; Results indicated a copper concentration of 2,650 ppm at SB-H5-938-01		1	1											1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
H6-1	3	Store House	All that remains is six concrete footers; No evidence of release	SB-H6-1-01 through SB-H6-1-05	SB-H6-1-02 SB-H6-1-03	Sampling location SB-H06-1-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H06-1-03		2	2											1	1			
H6-10	6	Septic Tank	Large septic tank, large pit was excavated and timbers placed over and covered with earth	TP-H6-10-A	TP-H6-10-A	Test Pit location placed downgradient from septic	1	1												1	1			
H6-11A	6	Septic Tank	Septic tank with SS lid along path near substation (one sludge sample taken during IRM effort)	TP-H6-11-A	TP-H6-11-A	Test Pit location placed downgradient from septic	1	1												1	1			
H6-12	10	Electric Transformer	Small electric transformer on top of telephone pole; Transformer looks corroded but intact; No evidence of release	SB-H6-12-01	SB-H6-12-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
H6-4	10	Electric Transformer	Small electric transformer on telephone pole; Transformer looks corroded but intact; No evidence of release	SB-H6-4-01	SB-H6-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
H6-7	10	Electric Transformer	Electric transformer mounted to telephone pole; Gray in color, with minor rust on housing; No evidence of release	SB-H6-7-01	SB-H6-7-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
H6-8116	1	Gate House	Aluminum siding over wooden construction on a concrete foundation. No evidence of hazardous materials handled or released.	SB-H6-8116-01 through SB-H6-8116-04	SB-H6-8116-01 SB-H6-8116-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-H6-8116-01. A confirmation sample was collected at SB-H6-8116-02.		2	2	1	1	1								1	1		SVOCs	SVOCs (5-5B & 5-18B)
H6-8120	1	General Laboratory	Brick laboratory built on concrete foundation. Multiple vent hoods and discharge pipes, concrete catch pipe with gray material on NW corner	SB-H6-8120-01 through SB-H6-8120-08	SB-H6-8120-04 SB-H6-8120-05 SB-H6-8120-06	Sampling location SB-H6-8120-05 was determined using professional judgement. Sampling locations SB-H6-8120-04/06 were determined using XRF screening; Results indicated a mercury concentration of 363 ppm at SB-H6-8120-04 and a copper concentration of 673 ppm at SB-H6-8120-06	3	3	3										1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
H6-8122	1	Break Room	Concrete and brick building used for breaks and meals only. No suspected as handling hazardous substances. No evidence of release.	SB-H6-8122-01 through SB-H6-8122-04	SB-H6-8122-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	SVOCs		SVOCs (5-5B & 5-18B)
H6-8123B	1	Environmental Office	Old building identified using old maps. Door to the W, a covered concrete pad to the E, and a drain pipe that ends in the SE. No evidence of release.	SB-H6-8123B-01 through SB-H6-8123B-06	SB-H6-8123B-04 SB-H6-8123B-06	Sampling location SB-H6-8123B-06 was determined using professional judgement. Sampling location SB-H6-8120-04 was determined using XRF screening; Results indicated a lead concentration of 432 ppm at SB-H6-8123B-06		2	2											1	1	Metals		Metals (5-5E & 5-18E)
H6-8127	1	Sensitivity Test Laboratory	Very old concrete and brick building with an extension on E side; No evidence of release	SB-H6-8127-01 through SB-H6-8127-04	SB-H6-8127-02	Sampling location SB-H6-8127-02 was determined using XRF screening; Results indicated a copper concentration of 1,072 ppm at SB-H6-8127-02		1	1	1	1	1	1							1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
H6-8130	1	PETN/Stability Laboratory	Brick construction with attached wooden/corrugated metal storage area. Outside NG/smokeless powder waste storage areas. No evidence of release	SB-H6-8130-01 through SB-H6-8130-07	SB-H6-8130-03 SB-H6-8130-06	Sampling location SB-H6-8130-03 was determined using XRF screening; Results indicated a lead concentration of 563 ppm at SB-H6-8130-03 Group B E&E materials were determined at SB-H6-8130-06		2	2	2	2	2	2							1	1	Metals, SVOCs, E&E		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B),
H6-8152	1	Main Office	Brick construction on concrete foundation. Four pipe outlets on N and S sides, culvert (possibly sanitary) on center of S side. Basement entrance on W side is listed as asbestos hazard area. No evidence of release.	SB-H6-8152-01 through SB-H6-8152-08	SB-H6-8152-04 SB-H6-8152-05 SB-H6-8152-07	Sampling locations SB-H6-8152-05/07 was determined using professional judgement. Sampling location SB-H6-8152-04 was determined using XRF screening; Results indicated a lead concentration of 418 ppm at SB-H6-8152-04		3	3											1	1	Metals		Metals (5-5E & 5-18E)
H6-8152A H6-8152B	6	Main Office Septic Tanks	Two vent pipes present only; Area covered with vegetation; (one sludge sample taken from each during IRM effort); No evidence of release	TP-H6-8152A/8152B	TP-H6-8152A/8152B	One Test Pit taken for both septics using professional judgement for location	1	1												1	1			
H6-8245	1	Store House	Wood and steel structure; No evidence of release	SB-H6-8245-01 through SB-H6-8245-04	SB-H6-8245-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
H6-8246	1	Store House	Wood and steel structure; No evidence of release	SB-H6-8246-01 through SB-H6-8246-04	SB-H6-8246-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	SVOCs		SVOCs (5-5B & 5-18B)
H6-8247	1	Experimental Laboratory Store House	Brick structure on a concrete foundation; A lead pipe exits the building to septic tank; Two doors on the W side; No evidence of release	SB-H6-8247-01 through SB-H6-8247-05	SB-H6-8247-02 SB-H6-8247-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2	2											1	1			
H6-8250	1	Store House	Wood and steel structure; There are two AC units on the N side; No evidence of release	SB-H6-8250-01 through SB-H6-8250-04	SB-H6-8250-01 SB-H6-8250-04	Sampling location SB-H6-8250-01 was determined using XRF screening; Results indicated a lead concentration of 933 ppm at SB-H6-8250-01		2	2											1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
H6-8251	3	Smokeless Magazine	Very old stone structure that has collapsed on itself; No evidence of release	SB-H6-8251-01 through SB-H6-8251-04	SB-H6-8251-03 SB-H6-8251-02	Sampling location SB-H6-8251-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H6-8251-02.					2	2	2							1	1			

Table 2-5

Development Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
H6-8275	1	Nitrocellulose Storage	Wooden structure used to house NC; No evidence of release	SB-H6-8275-01 through SB-H6-8275-04	SB-H6-8275-02 SB-H6-8275-04	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-H6-8275-02. A confirmation sample was collected at SB-H6-8275-04. Analytical results did not detect elevated E&E concentrations.					2	2	2							1	1			
H6-8285	1,6	Development Area Change House	Old brick building on a concrete foundation; Two drain pipes on the N and S, a steam drain for N side of building, and a pipe that enters the ground at NE corner; In the SE there is a footer with a tank and drain with SV nearby. Scrap shed with three old water heaters in NE	SB-H6-8285-01 through SB-H6-8285-12	SB-H6-8285-05 SB-H6-8285-07 SB-H6-8285-08 TP-H6-8285-12	Sampling locations SB-H6-8285-05/07 were determined using XRF screening; Results indicated a mercury concentration of 538 ppm at SB-H6-8285-05, and a lead concentration of 493 ppm at SB-H6-8285-07. Group B E&E materials were determined at SB-H6-8285-08. Test Pit location placed downgradient from septic. Analytical results did not detect elevated E&E concentrations.	1	4	3		1	1	1							2	2	Metals, SVOCs	E&E	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B), E&E (5-5C & 5-18C)
H6-8520	10	Main Gate Substation	Fenced electric substation covered with gravel that contains five telephone poles with many insulators; No evidence of release	SB-H6-8520-01 through SB-H6-8520-05	SB-H6-8520-01 SB-H6-8520-02 SB-H6-8520-03 SB-H6-8520-04 SB-H6-8520-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling				5										1	1	PCBs		PCBs (5-5D & 5-18D)
H6-862	1	Test House	Cement structure with door on the W side; Steam enters from N, steam drain to S; No evidence of release	SB-H6-862-01 through SB-H6-862-05	SB-H6-862-04 SB-H6-862-01	Sampling location SB-H6-862-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H6-862-01.		2	2		2	2	2							1	1			
H6-9	10	Electric Transformer	New electric transformer mounted to telephone pole; Gray colored housing with no discoloration; No evidence of release	SB-H6-9-01	SB-H06-9-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
H6-918	4	Building 918	Area currently covered with gravel/soil/vegetation; Electrical connections/pole at SW corner; Area adjacent to H6-8152A; No evidence of release	SB-H6-918-01 through SB-H6-918-05	SB-H6-918-01 SB-H6-918-03	Sampling location SB-H6-918-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H6-918-03.		2	2		2	2	2							1	1			
H6-941(C)	4	Cap Test Area	Former building has been completely removed; All that remains is an elevated grass area; No evidence of release	SB-H6-941C-01 through SB-H6-941C-05	SB-H6-941C-02 SB-H6-941C-03	Sampling location SB-H6-941C-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H6-941C-03.		2	2		2	2	2							1	1			
H7-1	7	General Laboratory Discharge Area	Concrete containment basin listed as "water and contents partially unknown"; 2" steel vent (?) pipe present; No evidence of release	TP-H7-1-01	TP-H7-1-01	Test Pit location placed downgradient from the sump		1			1	1	1							1	1			
H7-10	10	Electric Transformer	Black with some dark gray discoloration; No evidence of release	SB-H7-10-01	SB-H7-10-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
H7-12	6	Unknown Tank	Steel lid cast in concrete covers water filled tank; Steel or metal sidewalls; Clear water inside-expected septic tank	TP-H7-12-01	TP-H7-12-01	Test Pit location was placed downgradient from the septic	1	1												1	1			
H7-13	3	Unknown	Building demolished, only concrete footer remains; Stressed vegetation adjacent to SW corner footer-slag present	SB-H7-13-01 through SB-H7-13-05	SB-H7-13-05	Sampling location SB-H7-13-05 was determined using XRF screening; Results indicated a lead concentration of 4,950 ppm at SB-H7-13-05		1	1		1	1	1							1	1	Metals	E&E, SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B),
H7-15	1	Store House	Small empty aluminum sided shed; No evidence of release	SB-H7-15-01 through SB-H7-15-04	SB-H7-15-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-5E & 5-18E)
H7-2	10	Electric Transformer	Intact transformer on telephone pole; No evidence of release	SB-H7-2-01	SB-H7-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
H7-2172	1	Canister House	Canister house with multiple loading areas	SB-H7-2172-01 through SB-H7-2172-08	SB-H7-2172-03 SB-H7-2172-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1		E&E	E&E (5-5C & 5-18C)
H7-4	3	Unknown	Unknown bldg.	SB-H7-4-01 through SB-H7-4-04	SB-H7-4-04 SB-H7-4-02	Sampling location SB-H7-4-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-4-02.		2	2		2	2	2							1	1			
H7-5	3	Unknown Trailer	Wooden construction sided trailer-recent installation; No evidence of release	SB-H7-5-01 through SB-H7-5-04	SB-H7-5-01 SB-H7-5-02	Sampling location SB-H7-4-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-4-02.		2	2		2	2	2							1	1			
H7-6	4	Unknown	Building demolished, area currently covered by vegetation; Location determined from historical maps; No evidence of release	SB-H7-6-01 through SB-H7-6-03	SB-H7-6-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
H7-606L	4	Unknown	Building demolished, location determined from historical maps. No evidence of release	SB-H7-606L-01 through SB-H7-606L-03	SB-H7-606L-01	Sampling location SB-H7-606L-01 was determined using XRF screening; Results indicated an arsenic concentration of 331 ppm at SB-H7-606L-01. Analytical results did not detect elevated metal concentrations.		1	1		1	1	1							1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
H7-8123A	1	Propellant Development	Wood and steel structure on concrete foundation with a small concrete pad to the S that held an air handler. Two doors on each the E and W sides, and a pipe outlet on the N side with a steam drain. SV associated with the air handler pad	SB-H7-8123A-01 through SB-H7-8123A-08	SB-H7-8123A-03 SB-H7-8123A-06	Sampling locations SB-H7-8123A-03/06 were determined using XRF screening; Results indicated a lead concentration of 808 ppm at SB-H7-8123A-03 and 15,980 ppm at SB-H7-8123A-05 and a mercury concentration of 343 ppm at SB-H7-8123A-05		2	2		2	2	2							1	1	Metals, SVOCs	E&E	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B), E&E (5-5C & 5-18C)
H7-8124	1	SW Sampler Concrete Pad	Concrete pad constructed for mounting surface water sampler. No evidence of release	SB-H7-8124-01 through SB-H7-8124-04	SB-H7-8124-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
H7-8131	1,7	Smokeless Military Building	Wooden and concrete structure with a series of doors; 2 catch tanks and an air handler with a drain pipe to the S; The drain pipe has SV associated with discharge there	SB-H7-8131-01 through SB-H7-8131-09	SB-H7-8131-04 SB-H7-8131-06	Group B E&E materials were detected using an Expray Test Kit at sampling location SB-H7-8131-04. Sampling location SB-H7-8131-06 was determined using professional judgement. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
H7-8134	1	Glaze House Scrap Shed	Temporary storage shed built of wooden and corrugated metal. No evidence of release	SB-H7-8134-01 through SB-H7-8134-04	SB-H7-8134-02 SB-H7-8134-04	Sampling location SB-H7-8134-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-8134-04.		2	2											1	1			
H7-8142	1	Experimental Smokeless Office	Concrete and wood construction, steam pipes enter in rear (west). Concrete pad on N side probably for AC or electrical unit; No evidence of release	SB-H7-8142-01 through SB-H7-8142-05	SB-H7-8142-05	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-H7-8142-05		1	1											1	1	Metals	E&E	Metals (5-5E & 5-18E), E&E (5-5C & 5-18C)

Table 2-5

Development Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
H7-8143	1	Dry House	Wooden building over concrete foundation; Small air handler present at S corner; No evidence of release	SB-H7-8143-01 through SB-H7-8143-04	SB-H7-8143-04 SB-H7-8143-03	Sampling location SB-H7-8143-04 was determined using XRF screening; Results indicated a lead concentration of 595 ppm and a copper concentration of 1,095 ppm at SB-H7-8143-04. A confirmation sample was collected at SB-H7-8143-03. Analytical results did not detect elevated metal concentrations.		2	2		2	2	2							1	1	SVOCs	E&E	SVOCs (5-5B & 5-18B), E&E (5-5C & 5-18C)
H7-8144	1	Rest House	Rest house surrounded by magazine; Tar-like material on SE corner, black-red color and very viscous; Stressed soil area adjacent to this	SB-H7-8144-01 through SB-H7-8144-06	SB-H7-8144-05 SB-H7-8144-01	Sampling location SB-H7-8144-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-8144-01.					2	2	2							1	1		E&E	E&E (5-5C & 5-18C)
H7-8145	1	Dry House	Wooden building on concrete slab. Three loading doors cover the entire N and S side of the building. No evidence of release	SB-H7-8145-01 through SB-H7-8145-04	SB-H7-8145-01 SB-H7-8145-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	E&E		E&E (5-5C & 5-18C)
H7-8146	1	Store House	Wood structure on concrete footers; Duct and electric on W side to H7-8145; No evidence of release	SB-H7-8146-01 through SB-H7-8146-04	SB-H7-8146-03 SB-H7-8146-04	Sampling location SB-H7-8146-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-8146-04.		2	2											1	1			
H7-8176	1	Mix House	Building covered in earth with an earthen berm to the N; Electric and steam supplied to building; No evidence of release	SB-H7-8176-01 through SB-H7-8176-04	SB-H7-8176-01 SB-H7-8176-02	Sampling location SB-H7-8176-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-8176-02.		2	2		2	2	2							1	1			
H7-8248	1	Chemical Storage	Wooden construction on wooden railroad tie foundation; Tar-like seep to rear	SB-H7-8248-01 through SB-H7-8248-04	SB-H7-8248-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1											1	1			
H7-8252	1	Solvent Storage	Wooden and corrugated sheet metal construction; Area of tar-like seep in rear	SB-H7-8252-01 through SB-H7-8252-04	SB-H7-8252-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1											1	1		SVOCs	SVOCs (5-5B & 5-18B)
H7-8255	1	Unknown Laboratory Room	Concrete and plaster construction with laboratory tables inside. No evidence of release	SB-H7-8255-01 through SB-H7-8255-04	SB-H7-8255-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1											1	1	SVOCs, Metals		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
H7-8282	1	Motor House	Wooden structure on concrete slaboratory that houses an electric motor. Motor has leaked oil and is reaching the ground via E door	SB-H7-8282-01 through SB-H7-8282-04	SB-H7-8282-03 SB-H7-8282-02	Sampling location SB-H7-8282-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-8282-02.		2	2											1	1			
H7-9	3	Unknown	Old dilapidated concrete foundation; No evidence of release	SB-H7-9-01 through SB-H7-9-04	SB-H7-9-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1		SVOCs	SVOCs (5-5B & 5-18B)
H7-916	4	Fuel Oil Storage	Building or tanks demolished; Location determined from historical maps; No evidence of release	SB-H7-916-01 through SB-H7-916-03	SB-H7-916-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1	SVOCs	VOCs	SVOCs (5-5B & 5-18B), VOCs (5-5A & 5-18A)
H8-2	3	Unknown	Building demolished, only concrete footers remain; No evidence of release	SB-H8-2-01 through SB-H8-2-05	SB-H8-2-03	Sampling location SB-H8-2-03 was determined using XRF screening; Results indicated an arsenic concentration of 159 ppm at SB-H8-2-03		1	1		1	1	1							1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
H8-8102	3	PETN Lactose Laboratory	All that remains is the foundation, the laboratory structure has been removed; No evidence of release	SB-H8-8102-01 through SB-H8-8102-05	SB-H8-8102-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1			1						1	1	Metals		Metals (5-5E & 5-18E)
H8-8177	2	Glazing House	Corrugated cylindrical metal room covered in soil; Small barrel house-sheet metal front; No evidence of release	SB-H8-8177-01 through SB-H8-8177-02	SB-H8-8177-01 SB-H8-8177-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1			
H8-8179	2	Glaze/Blend House	Corrugated cylindrical metal room covered in soil-sheet metal front Small glazing house with electrical controls for "barrel". No evidence of release	SB-H8-8179-01 through SB-H8-8179-02	SB-H8-8179-01 SB-H8-8179-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1			
H8-9221	1	Development Screen House	Brick and wooden construction with small concrete pad to rear for air handler Screen trays and shelving present inside. Green anti-static material evident; loading area on E side. No evidence of release	SB-H8-9221-01 through SB-H8-9221-05	SB-H8-9221-03 SB-H8-9221-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1		SVOCs, E&E	SVOCs (5-5B & 5-18B), E&E (5-5C & 5-18C)
I5-1	10	Nitrogen Laboratory Substation	Three 1.5' cylindrical transformers mounted on steel I-beams between two poles. No evidence of release	SB-I5-1-01 through SB-I5-1-03	SB-I5-1-01 SB-I5-1-02 SB-I5-1-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling				3										1	1			
I5-2	2	Bunker	Small bunker with two shelves along each side covered by soil. One electrical connection and an insulated steam pipe at front. No evidence of release	SB-I5-2-01 through SB-I5-2-02	SB-I5-2-01 SB-I5-2-02	Sampling location SB-I5-2-01 was determined using XRF screening; Results indicated a lead concentration of 1,902 ppm and a copper concentration of 701 ppm at SB-I5-2-01. Sampling location SB-I5-2-02 was determined using professional judgement			1		2	2	2							1	1	Metals		Metals (5-5E & 5-18E)
I5-3	3	Bullet Kiln	Concrete pad surrounded by an area of residual release, minor amounts of lead, bullet shells and a few bullets with propellant not detonated (area=2,000 sq ft)	SB-I5-3-01 through SB-I5-3-07	SB-I5-3-03 SB-I5-3-06	Sampling locations SB-I5-3-03/06 were determined using XRF screening; Results indicated a lead concentration of 2,155 ppm at SB-I5-3-03 and 38,680 ppm at SB-I5-3-06 and an antimony concentration of 457 ppm at SB-I5-3-06. Group B E&E materials were detected at SB-I5-3-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.			1		1	1	1							1	1	Metals		Metals (5-5E & 5-18E)
I5-4	3	Unknown	Concrete pad with macadam and aggregate area on N side Additional wood and concrete debris off edge of E corner of pad. No evidence of release	SB-I5-4-01 through SB-I5-4-03	SB-I5-4-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals		Metals (5-5E & 5-18E)
I5-5	1	Front Face of Backstop	Soil berm with protruding rebar Metal L-shaped rebar and metal scrap at base on berm on SE end. No evidence of release	SB-I5-5-01 through SB-I5-5-04	SB-I5-5-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling			1											1	1	Metals		Metals (5-5E & 5-18E)
I5-7	9	Truck Spill	Area currently covered with vegetation; Minimal evidence of previous truck spill; No evidence of release (area = 2,600 sq ft)	SB-I5-7-01 through SB-I5-7-09	SB-I5-7-05 SB-I5-7-01	Sampling location SB-I5-7-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I5-7-01.	2	2	2											1	1			

Table 2-5

Development Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
I5-8	3	Explosive Test Tunnel	Steel tunnel extended into the hill and now mostly filled with sand. Part of the roof has been blown off, but is still covered with dirt. No evidence of release	SB-I5-8-01 through SB-I5-8-03	SB-I5-8-01 SB-I5-8-02	Sampling location SB-I5-8-01 was determined using XRF screening; Results indicated a lead concentration of 944 ppm at SB-I5-8-01. A confirmation sample was collected at SB-I5-8-02.		2	2		2	2	2							1	1	Metals		Metals (5-5E & 5-18E)
I5-8141	3	A Range Test House	Concrete rubble, reinforcing bar, sheet metal, and 1" pipe remain where this building previously stood. No evidence of release	SB-I5-8141-01 through SB-I5-8141-05	SB-I5-8141-01 SB-I5-8141-03	Sampling location SB-I5 8141-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I5-8141-03.		2	2		2	2	2							1	1	Metals		Metals (5-5E & 5-18E)
I5-8168	3	Instrument House	Concrete rubble, reinforcing bar, sheet metal, and 1" pipe remain where this building previously stood. No evidence of release	SB-I5-8168-01 through SB-I5-8168-05	SB-I5-8168-02 SB-I5-8168-01	Sampling location SB-I5-8168-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I5-8168-01.		2	2											1	1			
I5-8169	3	Drop Test House	Building demolished, only concrete and reinforced pipe remain. No evidence of release (area=100 sq ft)	SB-I5-8169-01 through SB-I5-8169-04	SB-I5-8169-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
I5-8170	1	Nitrogen Laboratory	Concrete and corrugated metal building with wooden roof; Recorder and meter room to the W; Larger room to the E with laboratory table and rectangular object with electric box mounted on back; Asbestos insulation/lining of walls; No evidence of release	SB-I5-8170-01 through SB-I5-8170-04	SB-I5-8170-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-5E & 5-18E)
I6-1	1	Heater House	Wood and steel building with a duct from the heater house to I6-8132. No evidence of release	SB-I6-1-01 through SB-I6-1-04	SB-I6-1-04	Sampling location SB-I6-1-04 was determined using XRF screening; Results indicated an arsenic concentration of 270 ppm at SB-I6-1-04		1	1											1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
I6-11	9	Stressed Soil Area	Stressed soil area containing laboratory glassware, slag, metal debris and ceramic mesh or cloth wiring wrapping (area=400 sq ft)	SB-I6-11-01 through SB-I6-11-03	SB-I6-11-01	Sampling location SB-I6-11-01 was determined using XRF screening; Results indicated a lead concentration of 3,216 ppm and a zinc concentration of 11,080 at SB-I6-11-01		1	1										1	1	1	Metals		Metals (5-5E & 5-18E)
I6-3	1	Unknown	Very old wooden structure, probably used for storage; No evidence of release	SB-I6-3-01 through SB-I6-3-04	SB-I6-3-04 SB-I6-3-03	Sampling location SB-I6-3-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-3-03.		2	2		2	2	2							1	1			
I6-5	1	Ingredient Storage	Wooden structure with three bays on the E and drain pipe on NW corner (probably a steam drain). No evidence of release	SB-I6-5-01 through SB-I6-5-08	SB-I6-5-02 SB-I6-5-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1	SVOCs		SVOCs (5-5B & 5-18B)
I6-8	1	Solvent Storage Shed	Wood and steel structure used to store solvents 20 gal neutralization tank and two old acid carboys remain. No evidence of release	SB-I6-8-01 through SB-I6-8-04	SB-I6-8-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1													1	1			
I6-8125	1,7	Research Laboratory	Wooden structure with lead floor and concrete foundation; There is a heater house and catch tank on the west side; Catch tank has a lead pipe. No evidence of release	SB-I6-8125-01 through SB-I6-8125-07	SB-I6-8125-03 SB-I6-8125-05 SB-I6-8125-07	Sampling location SB-I6-8125-03 was determined using XRF screening; Results indicated a mercury concentration of 669 ppm at SB-I6-8125-03. Sampling locations SB-I6-8125-05/07 were determined using professional judgement	3	3	3		3	3	3							1	1	Metals		Metals (5-5E & 5-18E)
I6-8132	1	Consolidated Charge Building	Old wooden structure encased within a berm with a rail loading area on the E side. Total of six doors, some doors are now covered by the berm, indicating it was added after building had been completed. No evidence of release	SB-I6-8132-01 through SB-I6-8132-10	SB-I6-8132-02 SB-I6-8132-03 SB-I6-8132-05	Sampling locations SB-I6-8132-02/03 were determined using XRF screening; Results indicated an arsenic concentration of 198 ppm at SB-I6-8132-02 and a lead concentration of 640 ppm at SB-I6-8132-03. Sampling location SB-I6-8132-05 were determined using professional judgement			2		2	2	2							1	1	Metals	E&E	Metals (5-5E & 5-18E), E&E (5-5C & 5-18C)
I6-8171	1,7	High Energy Laboratory	Concrete and wooden structure with five bays on E side. Concrete tunnel with a vent and catch tank house on NW corner. Air conditioner on a concrete pad on S side. There is a pile of scrap insulation and duct work	SB-I6-8171-01 through SB-I6-8171-09	SB-I6-8171-01 SB-I6-8171-04 SB-I6-8171-06 SB-I6-8171-07	Sampling location SB-I6-8171-07 was determined using XRF screening; Results indicated an arsenic concentration of 148 ppm at SB-I6-8171-07. Sampling locations SB-I6-8181-01/04/06 were determined using professional judgement	4	4	4		4	4	4							1	1	SVOCs, Metals		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
I6-8171A	4	Chem Storage	Chemical storage associated with the High Energy Lab; Location determined from historic maps	SB-I6-8171A-01 through SB-I6-8171A-03	SB-I6-8171A-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1											1	1	SVOCs, Metals		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
I6-8171C	1	Finished Product Bay	Wood and steel building located within the berm of I6-8171. No evidence of release	SB-I6-8171C-01 through SB-I6-8171C-03	SB-I6-8171C-01 SB-I6-8171C-03	Sampling location SB-I6-8171C-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-8171C-04.					2	2	2							1	1			
I6-8172	1	DNT Store	Concrete and wood structure with a pile of old lead flooring along the W side, building surrounded by four grounding stakes two doors on the E side and one on the west.	SB-I6-8172-01 through SB-I6-8172-07	SB-I6-8172-06	Sampling location SB-I6-8172-06 was determined using XRF screening; Results indicated an arsenic concentration of 128 ppm at SB-I6-8172-06			1		1									1	1	Metals		Metals (5-5E & 5-18E)
I6-8173	1	Store House	Concrete structure used to store explosives; No evidence of release	SB-I6-8173-01 through SB-I6-8173-05	SB-I6-8173-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	SVOCs		SVOCs (5-5B & 5-18B)
I6-8174	1	NG Storage Shed	Concrete building surrounded by an earthen berm; No evidence of release	SB-I6-8174-01 through SB-I6-8174-04	SB-I6-8174-02 SB-I6-8174-04	Sampling location SB-I6-8174-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-8174-04.						2								1	1			
I6-8175	1	Sieve Storage House	Small wooden structure used to house sieves; No evidence of release	SB-I6-8175-01 through SB-I6-8175-04	SB-I6-8175-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
I6-8181	4	Unknown	Building has been removed, all that remains is a slightly disturbed area. Location based on historical maps and topography. No evidence of release	SB-I6-8181-01 through SB-I6-8181-03	SB-I6-8181-01 SB-I6-8181-02	Sampling location SB-I6-8181-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-8181-02.		2	2		2	2	2							1	1			
I6-8183	1	AC/Heater House	Wooden structure on concrete pad. Duct and steam line to the E, entrance in the SW corner. Steam enters on W, brown stained soil from steam in NE corner.	SB-I6-8183-01 through SB-I6-8183-05	SB-I6-8183-01 SB-I6-8183-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1	Metals		Metals (5-5E & 5-18E)
I6-8184	7	Catch Tank	Small wooden structure on a concrete basin that is lead-lined. The catch tank is a lead barrel-like tank with baffles. There is a plastic pipe that exits the building to the W and ends in a field. Potential release at the drain, but no evidence of release exists.	SB-I6-8184-01 through SB-I6-8184-02	SB-I6-8184-02	Sampling location SB-I6-8184-02 was determined using XRF screening; Results indicated a lead concentration of 1,841 ppm at SB-I6-8184-02		1	1		1	1	1							1	1	Metals	E&E	Metals (5-5E & 5-18E), E&E (5-5C & 5-18C)

Table 2-5

Development Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
I6-8192	1	Storage Shed	Wood and steel structure used to store equipment; There is a floor drain on the S corner inside the building; No evidence of release	SB-I6-8192-01 through SB-I6-8192-04	SB-I6-8192-01 SB-I6-8192-03	Sampling location SB-I6-8192-03 was determined using XRF screening; Results indicated a lead concentration of 874 ppm and a zinc concentration of 4,450 ppm at SB-I6-8192-03. Sampling location SB-I6-8192-01 was determined using professional judgement		2	2											1	1	SVOCs, Metals		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
I6-8263	1	Experimental Smokeless Store	Steel shed-like structure that contains glassware; No evidence of release	SB-I6-8263-01 through SB-I6-8263-04	SB-I6-8263-01 SB-I6-8263-02	Sampling location SB-I6-8263-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-8263-02.					2	2	2							1	1			
I6-9	1,7	Catch Tank House	Wooden structure on concrete foundation with doors on E and W. Catch tank line from I6-8171 enters on E corner. No evidence of release	SB-I6-9-01 through SB-I6-9-06	SB-I6-9-04 SB-I6-9-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	SVOCs, Metals		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
I6-9210	1	Ballistics Magazine #4	Wooden building with corrugated sheet metal on concrete slab Wood-encased earthen berm on S side of building No evidence of release.	SB-I6-9210-01 through SB-I6-9210-04	SB-I6-9210-03 SB-I6-9210-02	Sampling location SB-I6-9210-03 was determined using XRF screening; Results indicated a lead concentration of 776 ppm and a zinc concentration of 5,500 ppm at SB-I6-9210-03. A confirmation sample was collected at SB-I6-9210-02. Analytical results did not detect elevated metal concentrations.					2	2	2							1	1	E&E		E&E (5-5C & 5-18C)
I6-9215	1	Charge Building Shed	Small wood and aluminum storage shed; No evidence of release	SB-I6-9215-01 through SB-I6-9215-04	SB-I6-9215-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	SVOCs		SVOCs (5-5B & 5-18B)
I6-E3	1	Explosive Waste/ Storage Shed	Wooden structure with steam pipe entering to the E; Explosive waste was stored to the N, general storage within the building. No evidence of release.	SB-I6-E3-01 through SB-I6-E3-05	SB-I6-E3-05 SB-I6-E3-04	Sampling location SB-I6-E3-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-E3-04.					2	2	2							1	1		E&E	E&E (5-5C & 5-18C)
I6-E4	1	High Energy Laboratory Scrap Shed	Small steel and wood shed with a waste barrel and old powder can inside. No evidence of release.	SB-I6-E4-01 through SB-I6-E4-04	SB-I6-E4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1		1	1	1							1	1			
I7-8	3	Unknown	Building has been removed, two large concrete foundations remain. No evidence of release.	SB-I7-8-01 through SB-I7-8-05	SB-I7-8-03	Sampling location SB-I7-8-03 was determined using XRF screening; Results indicated a zinc concentration of 2,410 ppm at SB-I7-8-03			1		1	1	1							1	1	Metals		Metals (5-5E & 5-18E)
J5-4	9	Former Dynamite Test Area	Location estimated from historical maps	SB-J5-4-01 through SB-J5-4-03	SB-J5-4-02 SB-J5-4-01	Sampling location SB-J5-4-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J5-4-01.		2	2		2	2	2							1	1			
J5-5	3	Old Decontamination Oven	Old decontamination oven sitting on a concrete pad; Charred area around oven from decontamination efforts	SB-J5-5-01 through SB-J5-5-04	SB-J5-5-04	Sampling location SB-J5-5-04 was determined using XRF screening; Results indicated a lead concentration of 4,400 ppm at SB-J5-5-04		1	1		1	1	1							1	1	SVOCs, Metals	E&E	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B),
J6-1	9	Earthen Pit	Earthen pit dug out of the hill that may have been associated with J6-8133, but the use is unknown. No evidence of release	SB-J6-1-01 through SB-J6-1-04	SB-J6-1-04 SB-J6-1-01	Sampling location SB-J6-1-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J6-1-01.	2	2			2	2	2							1	1			
J6-2	1	Blower Shed	The shed has partially been dismantled on the concrete pad. Housed what is left of a blower. No evidence of release	SB-J6-2-01 through SB-J6-2-04	SB-J6-2-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J6-2-03. Analytical results did not detected elevated E&E concentrations	1	1			1	1	1							1	1	Metals		Metals (5-5E & 5-18E)
J6-2245	3	Composite Cast House	Currently all that remains is a pile of broken foundation that has been pushed S of the building. Some vegetation is sparse and may or may not be stressed.	SB-J6-2245-01 through SB-J6-2245-05	SB-J6-2245-05 SB-J6-2245-03	Sampling location SB-J6-2245-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J6-2245-03.	2	2			2	2	2							1	1		SVOCs	SVOCs (5-5B & 5-18B)
J6-3	3	Unknown	Two story standing building that has been thermally decontaminated SV within the footprint of the building, and there is some lead associated with the SV. Building probably associated with J6-8134	SB-J6-3-01 through SB-J6-3-04	SB-J6-3-02	Sampling location SB-J6-3-02 was determined using XRF screening; Results indicated a lead concentration of 1,939 ppm at SB-J6-3-02. Analytical results did not detect elevated metal concentrations.	1	1												1	1	SVOCs		SVOCs (5-5B & 5-18B)
J6-4	10	Electric Transformer	Old transformer on pole, it is rusted and may have released. However, there is no evidence of release.	SB-J6-4-01	SB-J6-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
J6-5	10	Electric Transformer	Small intact transformer on pole; No evidence of release	SB-J6-5-01	SB-J6-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
J6-6	3	Unknown	Very old stone foundation, all remnants of structure have been removed Old metal pipe and reinforcing bar remain, 20' S of building lies a white crystalline material (area=500 sq ft). No evidence of release within the footprint of the building	SB-J6-6-01 through SB-J6-6-05	SB-J6-6-01 SB-J6-6-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2			2	2	2							1	1			
J6-8	10	Electric Transformer	Old transformer on pole, it is leaking oil; There is a discolored area at the base of the pole	SB-J6-8-01	SB-J6-8-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
J6-8133	1,7	Experimental Dynamite Mix House	Old wooden building with a narrow gauge railroad on S side for loading, and four loading doors. There is a berm on the N, E, and W sides, there is a pipe through the berm to where the catch tank is estimated. No evidence of release.	SB-J6-8133-01 through SB-J6-8133-08	SB-J6-8133-01 SB-J6-8133-04 SB-J6-8133-05	Sampling location SB-J6-8132-01 was determined using XRF screening; Results indicated a lead concentration of 435 ppm at SB-J6-8132-01. Sampling location SB-J6-8133-04 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-J6-8133-05. Analytical results did not detect elevated E&E concentrations.	3	3			3	3	3							1	1	Metals	E&E, SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B), E&E (5-5C & 5-18C)
J6-8134	3	Experimental Dynamite Packhouse	Thermally decontaminated structure, no sign of catch tank. There is lead on the ground probably from decontamination. Asbestos has been released from an asbestos covered water pipe; Blower house adjacent to the demolished structure.	SB-J6-8134-01 through SB-J6-8134-05	SB-J6-8134-01 SB-J6-8134-04 SB-J6-8134-05	Sampling locations SB-J6-8134-04/05 were determined using XRF screening; Results indicated a lead concentration of 502 ppm at SB-J6-8134-04 and a zinc concentration of 3,270 ppm at SB-J6-8134-05. Sampling location SB-J6-8134-01 was determined using professional judgement. Analytical results did not detect elevated metal concentrations.	3	3			3	3	3							1	1	SVOCs		SVOCs (5-5B & 5-18B)
J6-8136	1	Bonded Store House	Small wooden building with three doors on N side and pipe (possible drain) exiting on the W side. No evidence of a release	SB-J6-8136-01 through SB-J6-8136-08	SB-J6-8136-04 SB-J6-8136-07	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2												1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
J6-8167	1	Heater House	Small wooden structure on concrete foundation that contains a heater and duct work to J6-8133. Several pipes exit the building to the N. No evidence of release.	SB-J6-8167-01 through SB-J6-8167-04	SB-J6-8167-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1	Metals		Metals (5-5E & 5-18E)
J6-9	10	Electric Transformer	Small intact transformer on pole. No evidence of release	SB-J6-9-01	SB-J6-9-01	Sampling location SB-J6-9-01 was determined using XRF screening; Results indicated a lead concentration of 814 ppm at SB-J6-9-01			1	1										1	1	Metals		Metals (5-5E & 5-18E)

Table 2-5

Development Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
J6-915	4	Experimental Dynamite Mix House Shed	Old wooden shed used for the mix house, shed has been removed and the site is now clean. There is no evidence of a release (area=100 sq ft)	SB-J6-915-01 through SB-J6-915-03	SB-J6-915-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-5E & 5-18E)
J6-9200	3	Conditioning Bay	Small aluminum and wooden structure, the rear of the building appears to have caught fire with burnt wood and molten aluminum near an air handler. No evidence of release.	SB-J6-9200-01 through SB-J6-9200-04	SB-J6-9200-02 SB-J6-9200-01	Sampling location SB-J6-9200-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J6-9200-01.		2	2		2	2	2							1	1			
J6-941A	1	Command Post Dynamite Test Ground	Small steel shed that was used to monitor testing of experimental dynamite. No evidence of release	SB-J6-941A-01 through SB-J6-941A-04	SB-J6-941A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	SVOCs		SVOCs (5-5B & 5-18B)
J6-942(A)	1	Chemical Storage Shed	Small steel shed with wooden racks inside. There is a box of some material on the floor inside. No evidence of release.	SB-J6-942A-01 through SB-J6-942A-04	SB-J6-942A-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1											1	1	SVOCs		SVOCs (5-5B & 5-18B)
J7-3	9	Former Discarded Drums	All that remains is minor amounts of metal debris in this area. Drums have been removed. No evidence of release.	SB-J7-3-01 through SB-J7-3-03	SB-J7-3-03	Sampling location SB-J7-3-03 was determined using XRF screening; Results indicated a lead concentration of 641 ppm at SB-J7-3-03		1	1											1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
K5-4	9	Earthen Pit	Earthen pit associated with K5-9213, use unknown; May be where material was excavated for the berm; No evidence of release	SB-K5-4-01 through SB-K5-4-04	SB-K5-4-01 SB-K5-4-02	Sampling location SB-K5-9213-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K5-4-02.		2	2											1	1			
K5-9213	1	Experimental Dynamite Magazine	Old wood and steel sided structure with a lead floor and protected by a berm Building was service by rail line with loading area. No evidence of release	SB-K5-9213-01 through SB-K5-9213-05	SB-K5-9213-03 SB-K5-9213-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling					2	2	2							1	1			
K6-1	9	Debris Area	Small area of drum and metal debris. Drums and metal debris removed as part of Sinlge Phase Remediation. (perimeter=500 ft.)	SB-K6-1-01 through SB-K6-1-03	SB-K6-1-01 SB-K6-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-K06-1-02.		2	2		2	2	2							1	1	SVOCs		SVOCs (5-5B & 5-18B)
K6-2	9	Earthen Pit	Earthen pit cut out of the side of the hill; Some old railroad and berm material in NW corner; No evidence of release (area=900 sq ft)	SB-K6-2-01 through SB-K6-2-04	SB-K6-2-03 SB-K6-2-02	Sampling location SB-K6-2-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K6-2-02.		2	2											1	1			
K6-529	3	Dry House	Square rather than rectangular dry houses as before; Only concrete footers remain; No evidence of release	SB-K6-529-01 through SB-K6-529-05	SB-K6-529-02 SB-K6-529-01	Sampling location SB-K6-529-02 was determined using XRF screening; Results indicated a lead concentration of 449 ppm at SB-K6-529-02. A confirmation sample was collected at SB-K6-529-01. Analytical results did not detect elevated metal concentrations.		2	2		2	2	2							1	1			
K6-9214	1	Store House #4	Old wooden store house on concrete foundation. Wood and earthen berm to the N, two loading doors to the W. No evidence of release.	SB-K6-9214-01 through SB-K6-9214-06	SB-K6-9214-03 SB-K6-9214-05	Sampling location SB-K6-9214-03 was determined using XRF screening; Results indicated a lead concentration of 577 ppm at SB-K6-9214-03; Sampling location SB-K6-9214-05 was determined using professional judgement			1		2	2	2							1	1	Metals		Metals (5-5E & 5-18E)
K6-9217	1	Experimental Dynamite Magazine	Old wooden structure on concrete footers with a lead floor covered with wood; Canopy and wooden berm on the W side, loading dock adjacent to the S corner. No evidence of release.	SB-K6-9217-01 through SB-K6-9217-05	SB-K6-9217-01 SB-K6-9217-05	Sampling location SB-K6-9217-01 was determined using XRF screening; Results indicated a lead concentration of 443 ppm at SB-K6-9217-01; Sampling location SB-K6-9217-05 was determined using professional judgement. Analytical results did not detect elevated metal concentrations.			1		2	2	2							1	1		E&E	E&E (5-5C & 5-18C)
K7-8651	3	Hose House	Building has been completely removed, all that remains is a concrete footer and three small earthen piles No evidence of release (area=100 sq ft)	SB-K7-8651-01 through SB-K7-8651-03	SB-K7-8651-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1		SVOCs	SVOCs (5-5B & 5-18B)
L4-4	3	Lead Smelter	Building has been destroyed. Lead in front of, and around, the former building, as well as scattered metal debris (area=900 sq ft)	SB-L4-4-01 through SB-L4-4-04	SB-L4-4-02	Sampling location SB-L4-4-02 was determined using XRF screening; Results indicated a lead concentration of 1,518 ppm at SB-L4-4-02			1											1	1	Metals		Metals (5-5E & 5-18E)
L5-1	3	Former Dry Well	3' concrete pipe extending into the ground used to test shoot dynamite. Pipe filled in, so depth unknown	SB-L5-1-01 through SB-L5-1-02	SB-L5-1-01	Sampling location SB-L5-4-02 was determined using XRF screening; Results indicated a lead concentration of 1,144 ppm and copper concentration of 628 ppm at SB-L5-4-02	1	1	1		1	1	1							1	1	Metals, VOCs	E&E, SVOCs	Metals (5-5E & 5-18E), VOCs (5-5A & 5-18A), E&E (5-5C & 5-18C), SVOCs (5-5B & 5-18B)
L5-10	9	Stressed Vegetation	SV area devoid of vegetation, reason unknown. Area runs down the slope into the marsh (area=2,300 sq ft)	SB-L5-10-01 through SB-L5-10-08	SB-L5-10-04 SB-L5-10-05 SB-L5-10-06	Sampling locations SB-L5-10-04/05 were determined using XRF screening; Results indicated a lead concentration of 515 ppm at SB-L5-10-04 and 1,796 ppm at SB-L5-10-05; Sampling location SB-L5-10-06 was determined using professional judgement		3	3										3	1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
L5-11	10	Electric Transformer	Intact electric transformer on telephone pole; No evidence of release	SB-L5-11-01	SB-L5-11-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
L5-2275	4	Decon Oven	Former site of decontamination oven, currently barren with pieces of scrap metal and ash (area=1,100 sq ft). Ash has moved down the back slope toward the adjacent marsh	SB-L5-2275-01 through SB-L5-2275-04	SB-L5-2275-01	Sampling location SB-L5-2275-01 was determined using XRF screening; Results indicated a lead concentration of 6,170 ppm and a mercury concentration of 276 ppm at SB-L5-2275-01		1	1		1	1	1							1	1	Metals		Metals (5-5E & 5-18E)
L5-2313	9	Can Wash Area	Building has been removed with no evidence of existence. Several can lids and stressed vegetation remain. There is a slope leading to the marsh in the W (area = 900 sq ft)	SB-L5-2313-01 through SB-L5-2313-17	SB-L5-2313-12 SB-L5-2313-17	Sampling location SB-L5-2313-17 was determined using XRF screening; Results indicated a lead concentration of 408 ppm and a zinc concentration of 1,872 ppm at SB-L5-2313-17; Sampling location SB-L5-2313-12 was determined using professional judgement. Analytical results did not detect elevated metal concentrations.		2	2											1	1		SVOCs	SVOCs (5-5B & 5-18B)
L5-4	3	Dynamite Test Shed	Building has been nearly completely removed. Remains include a low bermed area, some old test plates, wood beams and a pulley. No evidence of release.	SB-L5-4-01 through SB-L5-4-05	SB-L5-4-02	Sampling location SB-L5-4-02 was determined using XRF screening; Results indicated a lead concentration of 1,144 ppm and a copper concentration of 628 ppm at SB-L5-4-02		1	1		1	1	1							1	1	Metals, E&E, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B),
L5-5	5	Kerosene Tank	Wooden construction over concrete base that housed kerosene tank used at the old burning ground. Tank has been removed. No evidence of release.	SB-L5-5-01 through SB-L5-5-04	SB-L5-5-01 SB-L5-5-03	Sampling location SB-L5-5-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L5-5-03.	2	2												1	1	VOCs	SVOCs	VOCs (5-5A & 5-18A), SVOCs (5-18B & 5-18B)
L5-539	3	Dry House	Former building has been removed, all that remains is a berm and old scrap pipes. No evidence of release.	SB-L5-539-01 through SB-L5-539-05	SB-L5-539-03	Sampling location SB-L5-539-03 was determined using XRF screening; Results indicated a lead concentration of 962 ppm at SB-L5-539-03		1	1		1	1	1							1	1	Metals		Metals (5-5E & 5-18E)

Table 2-5

Development Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
L5-6	9	Stressed Vegetation	Large area of SV associated with dynamite test area (area=7,600 sq ft)	SB-L5-6-01 through SB-L5-6-16	SB-L5-6-02 SB-L5-6-03 SB-L5-6-05 SB-L5-6-10	Sampling locations SB-L5-6-02/05/10 were determined using XRF screening; Results indicated a lead concentration of 756 ppm at SB-L5-6-02, a lead concentration of 1,235 ppm and a copper concentration of 773 ppm at SB-L5-6-05, and a lead concentration of 1,021 ppm at SB-L5-6-10; Group B E&E materials were detected at sampling location SB-L5-6-03		3	3		1	1	1						3	1	1	SVOCs, Metals, E&E		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B), E&E (5-5C & 5-18C)
L5-7	10	Electric Transformer	Small electric transformer on top of telephone pole; Transformer looks corroded but intact; No evidence of release	SB-L5-7-01	SB-L5-7-01	Sampling location SB-L5-7-01 was determined using XRF screening; Results indicated a lead concentration of 462 ppm at SB-L5-7-01			1	1										1	1	Metals		Metals (5-5E & 5-18E)
L5-8	9	Earthen Pit	8'-10' foot deep earthen pit that may have been used as a heater house or for berm material, small metal can in pit. No evidence of release (area=1,600 sq ft)	SB-L5-8-01 through SB-L5-8-06	SB-L5-8-05	Sampling location SB-L5-8-05 was determined using XRF screening; Results indicated a lead concentration of 1,711 ppm and a copper concentration of 676 ppm at SB-L5-8-05		1	1											1	1	Metals		Metals (5-5E & 5-18E)
L5-8318	4	Dynamite Test House	No evidence of the former building; There is stressed vegetation over the whole area	SB-L5-8318-01 through SB-L5-8318-03	SB-L5-8318-02	Sampling location SB-L5-8318-02 was determined using XRF screening; Results indicated a lead concentration of 643 ppm at SB-L5-8318-02		1	1		1	1	1							1	1	Metals	E&E, SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B),
L5-9546	1	Command Post for Old Burning Ground	Small steel building used to monitor burning activities; No evidence of release	SB-L5-9546-01 through SB-L5-9546-04	SB-L5-9546-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	SVOCs, Metals		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
L6-1	9	Debris Area and Stressed Vegetation	Dumping area along the W bank of the duck pond. Consists of general debris and wood, two drums, and many lids. S section contains large area of S.V. Soil is black and no vegetation is growing (area=7,400 sq ft)	SB-L6-1-01 through SB-L6-1-15	SB-L6-1-01 SB-L6-1-02 SB-L6-1-07	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		3	3										3	1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
L6-3	3	Heater House	Only small depression in the ground remains of the building that formerly housed the heater to dry house 370. No evidence of release (area=200 sq ft)	SB-L6-3-01 through SB-L6-3-03	SB-L6-3-02 SB-L6-3-01	Sampling location SB-L6-3-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L6-3-01.		2	2											1	1			
L6-370	3	Dry House	Building has been removed except for a fallen down wooden berm and the concrete foundation footers	SB-L6-370-01 through SB-L6-370-05	SB-L6-370-05 SB-L6-370-03	Sampling location SB-L6-370-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L6-370-03.		2	2		2	2	2							1	1	SVOCs, Metals		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
L6-371	3	Dry House	Dismantled dry house, the concrete footers have been pushed over and the berm has been mostly destroyed. No evidence of release	SB-L6-371-01 through SB-L6-371-05	SB-L6-371-01 SB-L6-371-02	Sampling location SB-L6-371-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L6-371-02.		2	2		2	2	2							1	1	SVOCs		SVOCs (5-5B & 5-18B)
L6-4	3	Heater House	Only small depression in the ground remains of the buildings that formerly housed the heaters to dry houses. No evidence of release (area=900 sq ft)	SB-L6-4-01 through SB-L6-4-04	SB-L6-4-02 SB-L6-4-03	Sampling location SB-L6-4-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L6-4-03.		2	2											1	1			
L6-5	9	Earthen Pit	Small shallow earthen pit that may have been used as a heater house or for berm material. No evidence of release (area=500 sq ft)	SB-L6-5-01 through SB-L6-5-02	SB-L6-5-01 SB-L6-5-02	Sampling location SB-L6-5-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L6-5-02.		2	2		2	2	2							1	1			
L6-9	3	Heater House	Small earthen pit used to house the heater house for dry house K6-529. Pit is larger than previous heater house pits. No evidence of release (area=700 sq ft).	SB-L6-9-01 through SB-L6-9-04	SB-L6-9-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
M4-1	3	Pistol Range	50 yard pistol range, back stop is intact and overgrown; No evidence of release (area=3,700 sq ft)	SB-M4-1-01 through SB-M4-1-13	SB-M4-1-02 SB-M4-1-05 SB-M4-1-09 SB-M4-1-11 SB-M4-1-13	Sampling location SB-M4-1-13 was determined using XRF screening; Results indicated a lead concentration of 497 ppm, a copper concentration of 1,032 ppm and a zinc concentration of 1,872 ppm at SB-M4-1-13; Sampling locations SB-M4-1-02/05/09/11 were determined using professional judgement			5											1	1	Metals		Metals (5-5E & 5-18E)
M4-2	10	Electric Transformer	Small electric transformer on telephone poles; Transformer looks corroded but intact; Potential S.V. at the base of the pole	SB-M4-2-01	SB-M4-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
M5-10	6	Septic Tank	Underground septic tank; Evidence of existence is a vent pipe and a clean out pipe (one sludge sample taken during IRM effort)	TP-M5-10-01	TP-M5-10-01	Test Pit location placed downgradient from septic	1	1												1	1			
M5-11	1	Small Storage Shed	Small steel structure used to store E & E for testing; No evidence of a release	SB-M5-11-01 through SB-M5-11-04	SB-M5-11-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
M5-12	3	Former Shed	Probably used for shooting pond operations; All that remains is an old partially destroyed wooden floor No evidence of release (area=100 sq ft)	SB-M5-12-01 through SB-M5-12-03	SB-M5-12-03	Sampling location SB-M5-12-03 was determined using XRF screening; Results indicated a lead concentration of 449 ppm at SB-M5-12-03. Analytical results did not detect elevated metal concentrations.		1	1											1	1			
M5-13	1	Storage Shed	Armored storage for E & E materials for testing; Berm to N protecting the shooting pond buildings; No evidence of release	SB-M5-13-01 through SB-M5-13-04	SB-M5-13-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
M5-14	1	Storage Shed	Small wooden structure used to house blasting caps; Several hundred caps stored in plastic bags; No evidence of release	SB-M5-14-01 through SB-M5-14-04	SB-M5-14-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
M5-15	1	Storage Shed	Locked, small steel shed used to house materials for the shooting pond. No evidence of release	SB-M5-15-01 through SB-M5-15-04	SB-M5-15-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
M5-3	9	Old Burning Ground	Area used to thermally decontaminate old equipment. Debris consists of shell casings, lead pipes, wood, old process equipment and other metal fragments. Several areas of S.V. within the boundary (area=127,000 sq ft)	SB-M5-3-01 through SB-M5-3-20	SB-M5-3-01 SB-M5-3-02 SB-M5-3-04 SB-M5-3-07 SB-M5-3-11 SB-M5-3-16 SB-M5-3-17 SB-M5-3-19	Sampling locations SB-M5-3-02/04/07/11/17/19 were determined using XRF screening; Results indicated a lead concentration of 1,232 ppm, a copper concentration of 1,410 ppm and a zinc concentration of 1,240 ppm at SB-M5-3-02; a zinc concentration of 3,670 ppm at SB-M5-3-04; a lead concentration of 1,493 ppm, a copper concentration of 1,000 ppm and a zinc concentration of 13,290 ppm at SB-M5-3-07; a lead concentration of 3,820 ppm, a copper concentration of 2,090 ppm and a zinc concentration of 6,100 ppm at SB-M5-3-11; a lead concentration of 2,358 ppm, a copper concentration of 1,073 ppm and a zinc concentration of 2,470 ppm at SB-M5-3-17; a lead concentration of 1,884 ppm, a copper concentration of 694 ppm and a zinc concentration of 7,610 ppm at SB-M5-3-19; Group B E&E materials were detected at sampling locations SB-M5-3-01/02/04/16/17/19		6	6		6	6	6							1	1	E&E, SVOCs, Metals		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B), E&E (5-5C & 5-18C)

Table 2-5

Development Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
M5-8166	2	Shooting Pond House	Earthen covered building used to test explosives at shooting pond; Building has three main rooms No evidence of a release	SB-M5-8166-01 through SB-M5-8166-07	SB-M5-8166-01 SB-M5-8166-03	Sampling location SB-M5-8166-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M5-8166-03.		2	2											1	1			
M5-8166A-B-C	1	Storage Shed	Long, thin aluminum shed used to store pipes, test plates, and alcohol. No evidence of release.	SB-M5-8166A-B-C-01 through SB-M5-8166A-B-C-03	SB-M5-8166A-B-C-03 SB-M5-8166A-B-C-01	Sampling location SB-M5-8166A-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M5-8166A-01.		2	2											1	1			
M5-8166D	1	Pump House	Small aluminum and wood structure that contains electric motor and water pump that once pumped water from shooting pond in emergencies; No evidence of release	SB-M5-8166D-01 through SB-M5-8166D-04	SB-M5-8166D-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
M5-8166E	1,6	Toilet and Water Heater House	Small cinderblock structure housing shooting block toilet and water heater. Toilet discharges to a septic tank to the S. No evidence of release	SB-M5-8166E-01 through SB-M5-8166E-04	SB-M5-8166E-01 SB-M5-8166E-02	Sampling location SB-M5-8166E-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M5-8166E-02.		2	2											1	1	SVOCs		SVOCs (5-5B & 5-18B)
N4-2	1	Blast Chamber	Circular dugout section of the hill covered with earth and made of thick reinforced steel Appeared to have tested explosives by shooting at them Sand piled and what looks like a blast area inside Inside metal has impact marks There may be residual explosive material	SB-N4-2-01 through SB-N4-2-03	SB-N4-2-02 SB-N4-2-01	Sampling location SB-N4-2-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N4-2-01.		2	2		2	2	2							1	1	Metals, SVOCs, E&E		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B), E&E (5-5C & 5-18C)
N4-3	9	Debris Pile	Small debris pile that contains blasting cap wires, three old drums and scrap metal	SB-N4-3-01 through SB-N4-3-03	SB-N4-3-02 SB-N4-3-03	Sampling location SB-N4-3-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N4-3-03.		2	2											1	1	Metals	SVOCs	Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
N5-6	9	Debris Area	Debris area containing several old drums, wood and spent blasting caps and wires (area=8,600 sq ft)	SB-N5-6-01 through SB-N5-6-17	SB-N5-6-14	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals, SVOCs		Metals (5-5E & 5-18E), SVOCs (5-5B & 5-18B)
N5-8	9	Plastic Debris Piles 1,2,3	Each pile consists of scrap plastic from detonations at shooting pond There may be residual explosives associated with debris (area=700 sq ft)	SB-N5-8-01 through SB-N5-8-06	SB-N5-8-01 SB-N5-8-03 SB-N5-8-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		3	3											1	1			

Notes:
All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:
AOC = Area of Concern
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
XRF = X-ray Fluorescence
TOC and GRAIN SIZE collected at each AOC

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector
Sq Ft = Square Foot
No. = Number

AOC Type
1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

* = AOC reserved for RI due to presence of contamination
** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

All screening samples were evaluated for VOCs, Metals, and E&E compounds

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 2-6

Diazo Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances
H8-1	9	Diazo Ponds	S pond's location evident due to stressed vegetation areas; N pond located from map; S pond shows dark brown to black soil staining with a red tint to staining (area=10,000 sq ft)			This AOC has been referred to the Remedial Investigation																E&E*		E&E
H8-2181	3	Diazo Plant	Bldg demolished-only concrete rubble remains; circular brick structure present (4' outside diameter) to NW corner; No evidence of release	SB-H8-2181-01 through SB-H8-2181-05	SB-H8-2181-01 SB-H8-2181-05	Sampling location SB-H08-2181-01 was determined using professional judgement Screening results did not warrant biased sampling; A confirmation sample was taken at SB-H08-2181-05		2	2		2					2		2		1	1			
H8-584	4	Can Stop Paint Shop	Bldg demolished-minimal evidence of former bldg; No evidence of release			This AOC has been referred to the Remedial Investigation																E&E*		E&E
H8-69F	4	Ingredients Store	Bldg demolished-evidence of former bldg largely removed; No evidence of release	SB-H8-69F-01 through SB-H8-69F-03	SB-H8-69F-01 SB-H8-69F-02	Sampling location SB-H8-69F-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-H8-69F-02.		2	2											1	1			
H8-9121	3	Nitric Acid Storage	Bldg demolished; concrete rubble remains as indication of former tank location; No evidence of release	SB-H8-9121-01 through SB-H8-9121-04	SB-H8-9121-02 SB-H8-9121-03 SB-H8-9121-04	Sampling location was determined using XRF screening; Results indicated a lead concentration of 404 ppm at SB-H8-9121-02. A confirmation sample was taken at SB-H8-9121-04. Analytical results did not detect elevated metal concentrations.		3	3										2	1	1			
H8-9328	1	Diazo Store	Wooden and corrugated sheet metal bldg on concrete footers railroad loading on W side; storage only; No evidence of release	SB-H8-9328-01 through SB-H8-9328-07	SB-H8-9328-05 SB-H8-9328-06	Sampling locations SB-H8-9328-05/06 were determined using XRF screening; Results indicated a lead concentration of 809 ppm at SB-H8-9328-05 and 1,043 ppm at SB-H8-9328-06			2		2					2		2		1	1	Metals		Metals (5-6B & 5-19A)

Notes:
All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

AOC Type
1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

All screening samples were evaluated for VOCs, Metals, and E&E compounds

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 2-7

Maintenance Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	TPH	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
F10-1	3,7	Unknown Foundation	Large concrete foundation footers present within larger pad area catch tank box on NE side; multiple 6" to 8" pipes extending into ground; lead floor present formerly.	SB-F10-1-01 through SB-F10-1-07	SB-F10-1-01 SB-F10-1-04 SB-F10-1-06 SB-F10-1-07	Group B E&E materials were detected using an Expray Test Kit at SB-F10-1-01 and was analyzed for E&E only. Sample SB-F10-1-04 was determined using XRF screening. Results indicated a copper concentration of 647 ppm at SB-F10-1-04. Samples SB-F10-1-06/07 were determined using professional judgement.		3	3	3	1	1	1							1	1	Metals	E&E	Metals (5-7E & 5-20E), E&E (5-7C & 5-20C)
F10-19	7	Concrete Sumps	Three concrete sumps: one with float switch and pump, one with float switch only, one similar to PA6 wastewater pit. Oily sheen in rectangular sump	TP-F10-19-01	TP-F10-19-01	Test Pit location was taken downgradient from the sumps		1			1	1	1							1	1				
F10-20	1	Unknown Shed	Small wooden storage shed with large diameter steam piping running through it. No evidence of release	SB-F10-20-01 through SB-F10-20-04	SB-F10-20-02 SB-F10-20-03	Group B E&E materials were detected using an Expray Test Kit at SB-F10-20-03 and was analyzed for E&E only. Sample SB-F10-20-02 was determined using XRF screening. Results indicated an arsenic concentration of 835 ppm at SB-F10-20-02. Analytical results did not detect elevated E&E concentrations.		1	1		1	1	1							1	1	Metals		Metals (5-7E & 5-20E)
F10-37B	4	Unknown	Bldg demolished-evidence largely removed; bldg debris present, brick, concrete; no foundation evident. No evidence of release.	SB-F10-37B-01 through SB-F10-37B-03	SB-F10-37B-02 SB-F10-37B-03	Sampling location SB-F10-37B-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F10-37B-03	2	2	2											1	1				
F10-44	4	Paper Store	Bldg demolished-minimal evidence of paper store; No evidence of release	SB-F10-44-01 through SB-F10-44-05	SB-F10-44-05 SB-F10-44-04	Sampling location SB-F10-44-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F10-44-04		2	2											1	1	SVOCs		SVOCs (5-7B & 5-20B)
F10-8576	3	Propane Storage	Currently dilapidated area, only two concrete footers remain, other footers, tanks, and cradles removed. Old, small pump present and a "snap switch" and pressure gauges at SW side. No evidence of release	SB-F10-8576-01 through SB-F10-8576-05	SB-F10-8576-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1	1										1	1	SVOCs		SVOCs (5-7B & 5-20B)
F11-2	4	Garage	Building demolished, minimal evidence of remains. Location determined from historical maps. No evidence of release.	SB-F11-2-01 through SB-F11-2-03	SB-F11-2-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1											1	1	Metals		Metals (5-7E & 5-20E)
F11-2292	4	Scrap Shed	Shed demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-F11-2292-01 through SB-F11-2292-03	SB-F11-2292-03 SB-F11-2292-02	Sampling location SB-F11-2292-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F11-2292-02		2	2											1	1			
F11-43	4	Ingredient Storage	Bldg demolished-minimal evidence remains; No evidence of release	SB-F11-43-01 through SB-F11-43-05	SB-F11-43-03 SB-F11-43-02	Sampling location SB-F11-43-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F11-43-02	2	2	2											1	1		SVOCs	SVOCs (5-7B & 5-20B)
F11-456	4	Hospital	Building demolished, minor amounts of concrete rubble present. Location determined from rubble and maps. No evidence of release	SB-F11-456-01 through SB-F11-456-05	SB-F11-456-02 SB-F11-456-01	Sampling location SB-F11-456-02 was determined using XRF screening; Results indicated a lead concentration of 582 ppm. A confirmation sample was collected at SB-F11-456-01. Analytical results did not detect elevated metal concentrations.		2	2											1	1			
F11-458	4	Fire Chief House	Building demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-F11-458-01 through SB-F11-458-03	SB-F11-458-02 SB-F11-458-01	Sampling location SB-F11-458-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F11-458-01		2	2	2										1	1	SVOCs		SVOCs (5-7B & 5-20B)
F11-6813	3	Glycerin Storage	Large concrete pad with rail mounted to wooden members; Rail runs perpendicular to major pad axis drum labeled "rosin" on concrete pad; No evidence of a release	SB-F11-6813-01 through SB-F11-6813-04	SB-F11-6813-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
F11-8113	4	Laboratory	Building demolished-minimal evidence of former laboratory. Location determined from historical maps. No evidence of release.	SB-F11-8113-01 through SB-F11-8113-03	SB-F11-8113-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 19,200 ppm at SB-F11-8113-02	1	1	1		1	1	1							1	1	Metals		Metals (5-7E & 5-20E)
F11-8227	3,6	Change House	Building demolished-minor amount of concrete rubble present at W corner. Area currently covered with gravel and macadam. Septic associated with the building. No evidence of release	SB-F11-8227-01 through SB-F11-8227-06 TP-F11-8227-07	SB-F11-8227-01 SB-F11-8227-06 TP-F11-8227-07	A septic tank was discovered during sampling. One additional screening sample SB-F11-8227-06 and analytical sample were collected. Sampling location SB-F11-8227-01 was determined using professional judgement. Test Pit location was taken downgradient from the septic.	2	3	2											2	2	Metals, VOCs, SVOCs		Metals (5-7E & 5-20E), VOCs (5-7A & 5-20A), SVOCs (5-7B & 5-20B)
F11-A2	4	Old Premix Scrap Shed	Shed demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-F11-A2-01 through SB-F11-A2-03	SB-F11-A2-01	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 300 ppm at SB-F11-A2-01		1	1											1	1	Metals		Metals (5-7E & 5-20E)
F12-4	4	Wagon Shed	Building demolished, area currently covered by vegetation; Location determined from maps; No evidence of release	SB-F12-4-01 through SB-F12-4-03	SB-F12-4-03 SB-F12-4-01	Sampling location SB-F12-4-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F12-4-01		2	2	2										1	1			
F12-F6	4	Cotton Breaker Scrap Shed	Building demolished, area currently covered by vegetation; Location determined from maps; No evidence of release	SB-F12-F6-01 through SB-F12-F6-03	SB-F12-F6-02 SB-F12-F6-01	Sampling location SB-F12-F6-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F12-F6-01		2	2											1	1			
G10-1	1	Transportation Office	Small wooden and corrugated sheet metal construction over concrete block foundation; steam pipe enters W corner.No evidence of release.	SB-G10-1-01 through SB-G10-1-04	SB-G10-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-7E & 5-20E)
G10-108B	3	Resin Store	Building demolished, old concrete foundation with attached rebar and 4" and 8" pipes entering the ground remain. No evidence of release.	SB-G10-108B-01 through SB-G10-108B-05	SB-G10-108B-04 SB-G10-108B-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2	2										1	1			
G10-13	1	Unknown	Wooden shed on concrete foundation with controls for Bldg. 9106. No evidence of release	SB-G10-13-01 through SB-G10-13-03	SB-G10-13-01 SB-G10-13-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-G10-13-02		2	2											1	1			
G10-16	5	Air Receiver Tank	Air receiver tank with piping to Bldg. 9106. 1' x 1' area of black staining at vent pipe below N side of tank.	SB-G10-16-01 through SB-G10-16-03	SB-G10-16-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 401 ppm at G10-16-02		1	1											1	1	Metals		Metals (5-7E & 5-20E)

Table 2-7

Maintenance Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	TPH	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
G10-172A	1	Ammonia Liquor Storage	Building demolished, only concrete foundation remains; No evidence of release	SB-G10-172A-01 through SB-G10-172A-04	SB-G10-172A-01 SB-G10-172A-03	Sampling location SB-G10-172A-01 was determined using XRF screening; Results indicated a lead concentration of 2,126 ppm at SB-G10-172A-01; Group B E&E materials were detected at SB-G10-172A-03 using an Expray Test Kit; An additional analytical sample was collected at SB-G10-172A-03 and analyzed for E&E only. Analytical results did not detect elevated E&E concentrations.	1	1	1		1	1	1								1	1	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-18	1	Acid Pump Control Shed	Wooden shed on concrete foundation with controls for Bldg. 9106. No evidence of release	SB-G10-18-01 through SB-G10-18-04	SB-G10-18-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-2	5	Former Water Tanks	Tanks removed, only foundation of larger tank remains. Most areas paved over. No evidence of release	SB-G10-2-01 through SB-G10-2-04	SB-G10-2-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 401 ppm at SB-G10-2-03		1	1											1	1	Metals		Metals (5-7E & 5-20E)
G10-2008	3	Unknown	Building demolished, only two 1' x 10' footers remain. Area covered by vegetation and gravel. No evidence of release	SB-G10-2008-01 through SB-G10-2008-03	SB-G10-2008-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1	1	1	1	1							1	1	PCBs		PCBs (5-7D & 5-20D)
G10-2009	3	Unknown	Building demolished, only two 1' x 10' footers remain; Foundation currently obscured by Bldg. G10-9106 No evidence of release	SB-G10-2009-01 through SB-G10-2009-03	SB-G10-2009-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals		Metals (5-7E & 5-20E)
G10-269	3	Unknown	Building demolished, only two 1' x 10' footers remain; Foundation currently obscured by Bldg. G10-9106 No evidence of release	SB-G10-269-01 through SB-G10-269-03	SB-G10-269-03 SB-G10-269-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1	Metals		Metals (5-7E & 5-20E)
G10-271	3	Unknown	Building demolished, only two 1' x 10' footers remain; Foundation currently obscured by Bldg. G10-9106 No evidence of release	SB-G10-271-01 through SB-G10-271-03	SB-G10-271-01 SB-G10-271-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 458 ppm at SB-G10-271-01 A confirmation sample was collected at SB-G10-271-02		2	2											1	1	Metals		Metals (5-7E & 5-20E)
G10-3	1	Boiler	Sheet metal enclosing dual boilers that are mounted on steel beams and supported on a concrete foundation. Large stack with duct work to two boilers. Minor amount of white powder present along S end of the western boiler.	SB-G10-3-01 through SB-G10-3-04	SB-G10-3-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 628 ppm at SB-G10-3-01		1	1											1	1	Metals		Metals (5-7E & 5-20E)
G10-4	5,7	Unknown Tank	Possible air receiver tank-water present in basin. Vent to concrete catch area at SE end, vent present along piping which leads away from tank to the E. 1' diameter piping leads from tank into powerhouse. No evidence of release.	SB-G10-4-01 through SB-G10-4-06	SB-G10-4-02 SB-G10-4-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 495 ppm at SB-G10-4-02 and 1,563 ppm at SB-G10-4-05		2	2		2	2	2							1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-459	3	Boiler House	Building demolished, only concrete pad remains; Piles of burnt shotgun shells evident; No evidence of release	SB-G10-459-01 through SB-G10-459-05	SB-G10-459-05 SB-G10-459-04	Sampling location SB-G10-459-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G10-459-04		2	2											1	1			
G10-5	1	A-Line Canteen	Wooden and aluminum siding construction over concrete foundation; lounge area only. No evidence of release	SB-G10-5-01 through SB-G10-5-04	SB-G10-5-02 SB-G10-5-03	Sampling location SB-G10-5-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G10-5-03		2	2	2										1	1		SVOCs	SVOCs (5-7B & 5-20B)
G10-8106	1	Millwright Shop	Brick construction over concrete foundation with rail access into building-loading doors on E/W side. Coal pit present on S side. No evidence of release	SB-G10-8106-01 through SB-G10-8106-06	SB-G10-8106-01 SB-G10-8106-02	Sampling location SB-G10-8106-01 was determined using professional judgement Group B E&E materials were detected at SB-G10-8106-02 using an Expray Test Kit Analytical results did not detect elevated SVOC concentrations	2	2	2		1	1	1						1	1	SVOCs		SVOCs (5-7B & 5-20B)
G10-8106A	1	Millwright Storage Shed	Brick storage shed with wooden racks inside; No evidence of release	SB-G10-8106A-01 through SB-G10-8106A-04	SB-G10-8106A-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 716 ppm at SB-G10-8106A-04		1	1											1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-8106B	1	Millwright Storage Shed	Wooden storage shed with metal racks inside-temporary storage only. No evidence of release.	SB-G10-8106B-01 through SB-G10-8106B-04	SB-G10-8106B-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,006 ppm and a copper concentration of 754 ppm at SB-G10-8106B-04		1	1											1	1	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-8106C	1	Cylinder Store House	Small concrete block building used to store oxygen and compressed gas. Empty canister storage on E side. No evidence of release	SB-G10-8106C-01 through SB-G10-8106C-04	SB-G10-8106C-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 3,493 ppm at SB-G10-8106C-04		1	1											1	1	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-8108	1,7	Carpenter Shop (Tin Shop on NW end)	Brick bldg built over concrete foundation; cyclone on NE side adjacent to small sheet metal and wood contaminated waste shed; sump at W corner; small heater shed at S corner. No evidence of release	SB-G10-8108-01 through SB-G10-8108-10	SB-G10-8108-06 SB-G10-8108-07 SB-G10-8108-08	Sampling locations were determined using XRF screening Results indicated a lead concentration of 431 ppm at SB-G10-8108-06, 3,090 ppm at SB-G10-8108-07, and 684 ppm at SB-G10-8108-08		3	3	3										1	1	Metals, SVOCs, PCBs		Metals (5-7E & 5-20E), SVOCs (5-7B % 5-20B), PCBs (5-7D & 5-20D)
G10-8114	1	Paint Shop	Corrugated sheet metal over concrete foundation; steam pipe enters E corner; painted signs on inside. No evidence of release.	SB-G10-8114-01 through SB-G10-8114-04	SB-G10-8114-03	Sampling location was determined using XRF screening Results indicated a copper concentration of 777 ppm at SB-G10-8114-03		1	1											1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-8159	1,7	Solvent Storage	Wooden bldg built on concrete foundation; catch tank on NW side; loading area on W corner. No evidence of release	SB-G10-8159-01 through SB-G10-8159-06	SB-G10-8159-03 SB-G10-8159-05 SB-G10-8159-06	Sampling locations SB-G10-8159-05/06 were determined using professional judgement; XRF screening results indicated a lead concentration of 722 ppm at SB-G10-8159-03	3		3										1	1	Metals		Metals (5-7E & 5-20E)
G10-8204	1,6	Change House	Old brick change house with addition built of wood; septic tank location potentially indicated by PVC pipes along SW wall. No evidence of release	SB-G10-8204-01 through SB-G10-8204-05 TP-G10-8204-06	SB-G10-8204-02 SB-G10-8204-05 TP-G10-8204-06	Sampling locations were determined using professional judgement screening results did not warrant biased sampling Test Pit located downgradient from septic tank	1	3	3										2	2	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-8213	1	Supply Storage	Concrete block, wooden and corrugated sheet metal construction. Storage only with shelving present inside. No evidence of release.	SB-G10-8213-01 through SB-G10-8213-07	SB-G10-8213-07	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,955 ppm at SB-G10-8213-07		1	1											1	1	Metals		Metals (5-7E & 5-20E)
G10-8216	9	Paint Storage Release	Area currently covered by dark black slag material	SB-G10-8216-01 through SB-G10-8216-03	SB-G10-8216-01 SB-G10-8216-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-G10-8216-02		2	2	2										1	1			

Table 2-7

Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	TPH	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
G10-8224	1,7	Laundry	Wooden construction over concrete block foundation; Sump present at SE corner, slag at S corner; No evidence of release	SB-G10-8224-01 through SB-G10-8224-04	SB-G10-8224-02 SB-G10-8224-03 SB-G10-8224-04 TP-G10-8224-05	Sampling locations were determined using professional judgement screening results did not warrant biased sampling. Test Pit placed downgradient from sump.	1	4	3		1	1	1							2	2		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-8501	1	Powerhouse	Concrete foundation with brick walls; Ammonia receiver and condenser tanks just inside building; Attached air handler tank; No evidence of release	SB-G10-8501-01 through SB-G10-8501-07	SB-G10-8501-06	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1		Metals		Metals (5-7E & 5-20E)
G10-8502	1,7	Boiler House	Large corrugated sheet metal/steel/wood construction on concrete foundation, with additional pad on N corner. Sump present on SE side, heat recovery system on E corner. Piping enters on N corner (Sump sampled as part of IRM effort). No evidence of release.	SB-G10-8502-01 through SB-G10-8502-07	SB-G10-8502-03 SB-G10-8502-07 TP-G10-8502-08 TP-G10-8502-09	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,066 ppm at SB-G10-8502-03 and an arsenic concentration of 963 ppm at SB-G10-8502-07. Test Pits placed downgradient from sump.		4	2		2	2	2							3	3		Metals		Metals (5-7E & 5-20E)
G10-8503	5	Ammonia Cooler Tank	4' x 12' tank posted as tested hydrostatically and covered by shed on a concrete footer, adjacent to Bldg. 8501. Outgoing brine line leads to west A-line area. No evidence of release.	SB-G10-8503-01 through SB-G10-8503-04	SB-G10-8503-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 555 ppm and a mercury concentration of 322 ppm at SB-G10-8503-03	1	1	1											1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-8522	10	Dual Substations	Two fenced areas holding transformers; No evidence of release	SB-G10-8522-01 through SB-G10-8522-02	SB-G10-8522-01 SB-G10-8522-02	Sampling locations were determined using professional judgement XRF results indicated a lead concentration of 954 ppm at SB-G10-8522-02			1	2										1	1		Metals		Metals (5-7E & 5-20E)
G10-8682	1,7	Oil Pump House	Corrugated sheet metal construction over concrete foundation. Minor oil staining on concrete foundation, sump on S side	SB-G10-8682-01 through SB-G10-8682-05	SB-G10-8682-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1	1										1	1	1		PCBs	PCBs (5-7D & 5-20D)
G10-9100	4	Service Shop	Building demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-G10-9100-01 through SB-G10-9100-03	SB-G10-9100-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 440 ppm at SB-G10-9100-01		1	1											1	1		Metals		Metals (5-7E & 5-20E)
G10-9106A	4	Unknown	Building demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-G10-9106A-01 through SB-G10-9106A-03	SB-G10-9106A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1	1										1	1		PCBs		PCBs (5-7D & 5-20D)
G10-9515	1	Car Barn	Brick walls, concrete foundation with corrugated sheet metal roof. Recently constructed wooden shed at SE corner. Internal floor drains evident, dark stained area (possibly oil) evident at NW corner	SB-G10-9515-01 through SB-G10-9515-13	SB-G10-9515-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 663 ppm at SB-G10-9515-02		1	1											1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G10-AAP1	8	Alcohol/Acetone Pipeline	Feed to B-Line area mixer (2188) from the maintenance area storage tanks. No evidence of release			Pipeline removed, no evidence of release, therefore no samples were collected																			
G10-BRP1	8	Brine Pipeline	6" pipeline which leads from ammonia cooler tank (adjacent toPowerhouse) to 8691-NG area brine tank; possibly associated mixed acid or acid pipe which is not marked from 9106 to this AOC			Pipeline removed, no evidence of release, therefore no samples were collected																			
G10-MAP1	8	Mixed Acid Pipelines	4"acid feed line to NG (2230) Hill from nitric/sulfuric acid storage tanks. No evidence of release			Pipeline removed, no evidence of release, therefore no samples were collected																			
G10-MAP2	8	Mixed Acid Pipeline	Feed to Bldg. 9106 from H11-4. No evidence of release.			Pipeline removed, no evidence of release, therefore no samples were collected																			
G10-OP1	8	Oil Pipeline	Oil pipeline from Bldg. G10-8681 to Bldg. G10-8501: soil stained dark black at flag # 3			Pipeline removed, no evidence of release, therefore no samples were collected																			
G11-1	4	Former Plant Lab	Building demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-G11-1-01 through SB-G11-1-03	SB-G11-1-01 SB-G11-1-02	Group B E&E materials were detected at SB-G11-1-01 using an Expray Test Kit A confirmation sample was collected at SB-G11-1-02 Analytical results did not detect elevated concentrations	2	2	2		2	2	2							1	1		VOCs		VOCs (5-7A & 5-20A)
G11-2017A	3	Shell House	Building demolished, foundation removed, minor evidence of building debris present. Minor area of dark discolored slag macadam. No confirmed area of release.	SB-G11-2017A-01 through SB-G11-2017A-06	SB-G11-2017A-02 SB-G11-2017A-	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2	2										1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G11-2017B	1	Pilot Plant	Brick construction over concrete foundation with adjacent heater house, and multiple loading areas. Waste oil/acetone labeled drums present at W corner. Stressed vegetation from heater house pipe outlet	SB-G11-2017B-01 through SB-G11-2017B-07	SB-G11-2017B-01 SB-G11-2017B-07 SB-G11-2017B-	Sampling location SB-G11-2017B-08 was collected at an area of stressed vegetation, no screening sample was collected there. Sampling location SB-G11-2017B-01 was determined using professional judgement. Sampling location SB-G11-2017B-07 was determined using XRF screening; Results indicated an arsenic concentration of 982 ppm at SB-G11-2017B-07	3	3	3		3	3	3							1	1		Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G11-2259	1	Dope House	Indicated as dope house storage, wooden and corrugated sheet metal construction over concrete foundation. No evidence of release.	SB-G11-2259-01 through SB-G11-2259-07	SB-G11-2259-01 SB-G11-2259-06	Sampling location SB-G11-2259-01 was determined using professional judgement; Sampling location SB-G11-2259-06 was determined using XRF screening; Results indicated an arsenic concentration of 222 ppm at SB-G11-2259-06		2	2											1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G11-253	4	Sample Smokeless Powder Mag. #2	Remnant Building, location determined from historical maps	SB-G11-253-01 through SB-G11-253-03	SB-G11-253-03 SB-G11-253-01	Sampling location SB-G11-253-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G11-253-01					2	2	2							1	1				
G11-3	3	Drum Storage Building	Building demolished, concrete pad evident on NW, W and E sides. No evidence of release.	SB-G11-3-01 through SB-G11-3-05	SB-G11-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1											1	1		Metals		Metals (5-7E & 5-20E)
G11-4	10	Electric Transformer	Black housing with minor amounts of discoloration present. No evidence of release.	SB-G11-4-01	SB-G11-4-01	Sample collected at base of former pole				1										1	1				
G11-5	5	Unknown Storage Tank	Steel AST insulation wrapped and covered in sheet metal. 6" pipe leads to S corner, currently cut off, no indication of feeds. No evidence of release.	SB-G11-5-01 through SB-G11-5-03	SB-G11-5-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,485 ppm at SB-G11-5-02	1	1	1											1	1		Metals		Metals (5-7E & 5-20E)

Table 2-7

Maintenance Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	TPH	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
G11-66	1	Drum Storage Building	Large concrete pad with imprints of rust from former drum storage. Adjacent dark stained soil area. Currently scrapped equipment storage area.	SB-G11-66-01 through SB-G11-66-06	SB-G11-66-03 SB-G11-66-05	Sampling location SB-G11-66-03 was determined using professional judgement; Sampling location SB-G11-66-05 was determined using XRF screening; Results indicated a copper concentration of 2,110 ppm at SB-G11-66-05	2	2	2											1	1	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G11-8208	4	Shell House Warehouse	Building demolished, foundation and structure removed. Location determined from maps. No evidence of release.	SB-G11-8208-01 through SB-G11-8208-05	SB-G11-8208-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-7E & 5-20E)
G11-8212	3	HEOD Storage	Building demolished, foundation evidence also removed. Minor amounts of building debris present. Ends of building estimated. No evidence of release.	SB-G11-8212-01 through SB-G11-8212-05	SB-G11-8212-04	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 235 ppm at SB-G11-8212-04		1	1											1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G11-8257	5	Oil Storage Tanks	Tanks have been removed; Area currently filled with orange sand; No reduced vegetation as observed during the recon event; No evidence of release	SB-G11-8257-01 through SB-G11-8257-06	SB-G11-8257-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1	1										1	1	Metals, PCBs	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B % 5-20B), PCBs (5-7D & 5-20D)
G11-9300/251	1,6	Records Keeping	Brick building used for storage only; Adjacent area of stressed soil; Septic associated with the building. No evidence of release	SB-G11-9300-01 through SB-G11-9300-05 TP-G11-9300A-01	SB-G11-9300-03 SB-G11-9300-05 TP-G11-9300A-01	Sampling locations were determined using XRF screening Results indicated a lead concentration of 482 ppm at SB-G11-9300-03 and 2,770 ppm at SB-G11-9300-05. Test Pit location down gradient from the septic tank.	1	3	2											2	2	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G11-9304	1,6	Store House	Wooden and corrugated sheet metal construction over concrete foundation with loading dock on W side. Currently misc. storage with wood flour (triacetin) stored at W end. Septic associated with the building. No evidence of release.	SB-G11-9304-01 through SB-G11-9304-05 TP-G11-9304A-01	SB-G11-9304-02 SB-G11-9304-05 TP-G11-9304A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling Test Pit location downgradient from septic tank	1	3	2											2	2	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G11-9305	1	Store House	Wooden and corrugated sheet metal construction with clay tiled walls on E and W sides and loading doors to adjacent buildings. No evidence of release.	SB-G11-9305-01 through SB-G11-9305-06	SB-G11-9305-02 SB-G11-9305-01	Sampling location SB-G11-9305-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G11-9305-01		2	2											1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G11-9309	3	Store House	Building demolished, only concrete pad remains. Loading area at N corner. No evidence of release.	SB-G11-9309-01 through SB-G11-9309-05	SB-G11-9309-01 SB-G11-9309-05	Sampling location SB-G11-9309-05 was determined using professional judgement; Sampling location SB-G11-9309-01 was determined using XRF screening; Results indicated an arsenic concentration of 341 ppm at SB-G11-9309-01		2	2											1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G11-B86	3	Chemical Ware Store	Building demolished, only old dilapidated concrete footers remain. No evidence of release (area=400 sq ft).	SB-G11-B86-01 through SB-G11-B86-04	SB-G11-B86-01 SB-G11-B86-03	Sampling location SB-G11-B86-01 was determined using professional judgement; Sampling location SB-G11-B86-03 was determined using XRF screening; Results indicated an arsenic concentration of 487 ppm at SB-G11-B86-03		2	2	2										1	1	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G12-12	4	Granary	Remnant Building, location determined from historical maps	SB-G12-12-01 through SB-G12-12-03	SB-G12-12-01 SB-G12-12-03	Sampling location SB-G12-12-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G12-12-03		2	2											1	1			
G12-252	4	Sample Smokeless Powder Mag. #1	Remnant Building, location determined from historical maps	SB-G12-252-01 through SB-G12-252-03	SB-G12-252-03 SB-G12-252-02	Sampling location SB-G12-252-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G12-252-02					2	2	2							1	1		E&E	E&E (5-7C & 5-20C)
G12-6	3	Unknown Concrete Pad	Small concrete pad with wooden box mounted on top; No evidence of release	SB-G12-6-01 through SB-G12-6-04	SB-G12-6-04 SB-G12-6-03	Sampling location SB-G12-6-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G12-6-03		2	2		2	2	2							1	1			
G12-7	10	Electric Transformer	Black housing with minor amounts of discoloration present. No evidence of release	SB-G12-7-01	SB-G12-7-01	Sample collected at base of pole, transformer has been removed XRF results indicated an arsenic concentration of 175 ppm An additional metals sample needs to be taken at this AOC Analytical results did not detect elevted metal concentrations				1										1	1			
G12-775	1	TNT Laundry	Remnant Building, location determined from historical maps	SB-G12-775-01 through SB-G12-775-03	SB-G12-775-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G12-8109	4	Transportation Office	Building demolished, area currently largely vegetated. Location determined from maps. No evidence of release.	SB-G12-8109-01 through SB-G12-8109-03	SB-G12-8109-02 SB-G12-8109-01	Sampling location SB-G12-8109-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G12-8109-01		2	2											1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G12-8203	1	Equipment Shed	Wooden and corrugated sheet metal construction over concrete foundation with garage doors facing street, and loading doors on N and E corners. Currently used for tractor storage. No evidence of release.	SB-G12-8203-01 through SB-G12-8203-06	SB-G12-8203-01 SB-G12-8203-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1			
G8-A12	3	Scrap Shed	Bldg demolished; minimal evidence of former shed; wood chips present at former foundation location. No evidence of release	SB-G8-A12-01 through SB-G8-A12-05	SB-G8-A12-05 SB-G8-A12-01	Sampling location SB-G8-A12-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G8-A12-02		2	2											1	1			
G9-1	5-Jan	Diesel Fuel Storage Tank	Demolished-tank and former cradle removed; largely vegetated; No evidence of release	SB-G9-1-01 through SB-G9-1-03	SB-G9-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1			
G9-15	3	Locomotive House	Bldg demolished- all evidence of locomotive house largely removed; machine oil between G10-4 and G10-37B; some dark colored soil present due to staining or organic activity-source unknown; No evidence of release	SB-G9-15-01 through SB-G9-15-03	SB-G9-15-01 SB-G9-15-02	Sampling location SB-G9-15-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G9-15-02		2	2											1	1	Metals		Metals (5-7E & 5-20E)
G9-2	1	Scrap Shed	Two story wooden shed built on concrete foundation, recently constructed; steel I-beam connects to rear of machine shop. white powdery material present at N corner.	SB-G9-2-01 through SB-G9-2-05	SB-G9-2-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 408 ppm and a copper concentration of 3,600 ppm at SB-G09-2-03		1	1	1										1	1	Metals, PCBs	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B % 5-20B), PCBs (5-7D & 5-20D)

Table 2-7

Maintenance Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	TPH	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
G9-8105	1,8	Machine Shop	Brick shop built on concrete foundation; concrete gutter along SE side. No evidence of release.	SB-G9-8105-01 through SB-G9-8105-07	SB-G9-8105-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 488 ppm at SB-G09-8105-05 Analytical results did not detect elevated metal concentrations.	1	1	1											1	1			
G9-8107	1	Pipe/Scale Shop	Concrete block bldg with asphalt roof; two loading areas on NW side rail line along NW side; shop only. No evidence of release.	SB-G9-8107-01 through SB-G9-8107-06	SB-G9-8107-02 SB-G9-8107-05	Sampling locations were determined using XRF screening Results indicated a lead concentration of 548 ppm at SB-G09-8107-02 and 541 ppm at SB-G09-8107-05 and an arsenic concentration of 317 ppm at SB-G09-8107-02 and 279 ppm at SB-G09-8107 -05		2	2										1	1	Metals		Metals (5-7E & 5-20E)
G9-8182	1	Carpenter Shop	Small wooden carpenter shop with attached storage area; loading doors on SE/NW sides. No evidence of release	SB-G9-8182-01 through SB-G9-8182-06	SB-G9-8182-01 SB-G9-8182-05	Sampling location SB-G09-8182-05 was determined using professional judgement XRF screening results indicated a copper concentration of 2,180 ppm and a lead concentration of 675 ppm at SB-G09-8182-01		2	2										1	1	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G9-8187	3	Unknown	Bldg demolished-evidence largely removed; area of reduced vegetation. No evidence of release	SB-G9-8187-01 through SB-G9-8187-05	SB-G9-8187-01 SB-G9-8187-02	Sampling location SB-G9-8187-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G9-8187-02		2	2		2	2	2						1	1		SVOCs	SVOCs (5-7B & 5-20B)
G9-8205	3	Electrical Shop	Only concrete footer remains along SE and portion of SW side; bldg demolished; sign for former bldg present.No evidence of release.	SB-G9-8205-01 through SB-G9-8205-05	SB-G9-8205-05 SB-G9-8205-02	Sampling location SB-G9-8205-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G9-8205-02		2	2	2									1	1			
G9-8207	1	Oil Storage Bldg	Concrete block with wooden front doors, corrugated sheet metal roof and concrete foundation; steam pipe enters front vent at rear with minor area of stressed vegetation from steam vent.	SB-G9-8207-01 through SB-G9-8207-05	SB-G9-8207-04 SB-G9-8207-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2											1	1	VOCs	SVOCs	VOCs (5-7A & 5-20A), SVOCs (5-7B & 5-20B)
G9-8267	1	Lumber/Lead Storage	Wooden storage shed with multiple bays for storage and shed on NW side; lead not evident. No evidence of release.	SB-G9-8267-01 through SB-G9-8267-06	SB-G9-8267-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 884 ppm at SB-G09-8267-04		1	1										1	1	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
G9-9321	1	Spare Parts Store	Wooden and corrugated sheet metal construction over 1 'x 1' concrete footers; storage only. No evidence of release.	SB-G9-9321-01 through SB-G9-9321-08	SB-G9-9321-02 SB-G9-9321-08	Sampling location SB-G09-9321-08 was determined using professional judgement; XRF screening results indicated a lead concentration of 444 ppm at SB-G09-9321-02. Analytical results did not detect elevated metal concentrations.		2	2										1	1		SVOCs	SVOCs (5-7B & 5-20B)
H10-1	5	Storage Tank	Concrete block containment structure, storage tank removed. No evidence of release.		SB-H10-1-02	This AOC is located on H10-10, a concrete pad. It has been combined with H10-10		1	1	1	1	1	1						1	1			
H10-10	3	Unknown Foundation	Large concrete pad with screen burner H10-2260 and H10-1 constructed on top. Currently fiber insulation pile at S corner. Piles of molten lead present on foundation.	SB-H10-10-01 through SB-H10-10-08	SB-H10-10-02 SB-H10-10-06 SB-H10-10-07	Sampling locations SB-H10-10-06/07 were determined using professional judgement; Sampling location SB-H10-10-02 was determined using XRF screening; Results indicated a lead concentration of 496 ppm at SB-H10-10-02		3	2	1	1	1	1						1	1	Metals, SVOCs, E&E, PCBs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B), E&E (5-7C & 5-20C), PCBs (5-7D & 5-20D)
H10-11	3	Acid Mix Equipment	Building demolished, concrete foundation evident but significantly dilapidated. No evidence of release	SB-H10-11-01 through SB-H10-11-05	SB-H10-11-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 552 ppm at SB-H10-11-05	1	1	1										1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H10-12	5	S.A. Store Tank	Building demolished, only concrete in NE edge remains; No evidence of release	SB-H10-12-01 through SB-H10-12-03	SB-H10-12-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,588 ppm at SB-H10-12-01	1	1	1										1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H10-13	4	Bag Store	Building demolished, minor amounts of concrete and brick remain. Location determined from historical maps. No evidence of release, however adjacent area of SV present.	SB-H10-13-01 through SB-H10-13-03	TP-H10-13-01 TP-H10-13-03	This AOC was located under asphalt. Test Pits were dug to collect samples. Screening results did not warrant biased sampling.		2	2										1	1	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H10-14	3	Unknown	Building demolished, remains of a concrete footer outline site. Adjacent area of stressed vegetation (slag present).	SB-H10-14-01 through SB-H10-14-05	SB-H10-14-01 SB-H10-14-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 6,300 ppm at SB-H10-14-01 and a concentration of 4,460 at SB-H10-14-02		2	2		2	2	2						1	1	Metals, SVOCs, E&E		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B), E&E (5-7C & 5-20C)
H10-154B	4	Dry Bag Store	Building demolished, minimal evidence remains; Location determined from historical maps; No evidence of release	SB-H10-154B-01 through SB-H10-154B-03	SB-H10-154B-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1	1									1	1	Metals, SVOCs, PCBs		Metals (5-7E & 5-20E), SVOCs (5-7B % 5-20B), PCBs (5-7D & 5-20D)
H10-16	3	Unknown Concrete Footer	Small rectangular concrete footer; 2' x 2' piece of lead present	SB-H10-16-01 through SB-H10-16-04	SB-H10-16-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 5,920 ppm at SB-H10-16-02		1	1		1	1	1						1	1	Metals	E&E, SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B), E&E (5-7C & 5-20C)
H10-17	3	Unknown	Small rectangular concrete footer; 2' x 2' piece of lead present	SB-H10-17-01 through SB-H10-17-03	SB-H10-17-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1											1	1	PCBs		PCBs (5-7D & 5-20D)
H10-2003	4	Spent Acid Tower	Building demolished, concrete foundation evident but significantly dilapidated. Location determined from foundation and maps. No evidence of release.	SB-H10-2003-01 through SB-H10-2003-05	SB-H10-2003-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 7,760 ppm at SB-H10-2003-01	1	1	1										1	1	Metals		Metals (5-7E & 5-20E)
H10-2092/ 2002	5	Spent Acid Recovery Tanks	Building demolished, evidence of foundations removed. Location determined from maps. No evidence of release.	SB-H10-2092-01 through SB-H10-2092-05	SB-H10-2092-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,087 ppm at SB-H10-2092-03	1	1	1		1	1	1					1	1	1	Metals		Metals (5-7E & 5-20E)
H10-2260	1	Screen Burner	Sheet metal construction with minor rust and black staining along bottom of sheet metal walls. Small heater unit on SW corner. No evidence of release.			This AOC is located on H10-10, a concrete pad. It has been combined with H10-10																			
H10-262	4	Nitric Acid House	Remnant Building, location determined from historical maps	SB-H10-262-01 through SB-H10-262-03	SB-H10-262-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 549 ppm at SB-H10-262-02	1	1	1	1								1	1	1	Metals, PCBs	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B % 5-20B), PCBs (5-7D & 5-20D)

Table 2-7

Maintenance Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	TPH	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
H10-267	4	Absorption Tower	Remnant Building, location determined from historical maps	SB-H10-267-01 through SB-H10-267-03	SB-H10-267-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 3,577 ppm at SB-H10-267-01	1	1	1										1	1	1		Metals		Metals (5-7E & 5-20E)
H10-269	4	Unknown	Building demolished, largely vegetated area. Location determined from maps. No evidence of release.	SB-H10-269-01 through SB-H10-269-03	SB-H10-269-03	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 241 ppm at SB-H10-269-03		1	1		1	1	1							1	1		Metals		Metals (5-7E & 5-20E)
H10-502	4	Nitric Acid Recovery Area	Remnant Building, location determined from historical maps	SB-H10-502-01 through SB-H10-502-03	SB-H10-502-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 603 ppm at SB-H10-502-01	1	1	1										1	1	1		Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H10-503	4	Sulfuric Acid Recovery	Remnant Building, location determined from historical maps	SB-H10-503-01 through SB-H10-503-03	SB-H10-503-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 2,762 ppm at SB-H10-503-02	1	1	1										1	1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H10-68	4	Spent Acid Recovery	Building demolished, evidence of building largely removed. Location determined from maps. Area covered by boiler slag, area to the E of ceramic debris and slag.	SB-H10-68-01 through SB-H10-68-03	SB-H10-68-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 871 ppm at SB-H10-68-03	1	1	1	1	1	1							1	1	1		Metals	E&E, SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B), E&E (5-7C & 5-20C)
H10-8225	4	Unknown	Concrete pad evident at NW corner only, the rest is covered in gravel. Location confirmed from historical maps. No evidence of release.	SB-H10-8225-01 through SB-H10-8225-03	SB-H10-8225-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 459 ppm at SB-H10-8225-03		1	1		1	1	1							1	1		Metals		Metals (5-7E & 5-20E)
H10-8264	4	Old Soda House	Building demolished, minimal concrete and building debris present. Location determined from maps. No evidence of release.	SB-H10-8264-01 through SB-H10-8264-04	SB-H10-8264-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 420 ppm at SB-H10-8264-01		1	1											1	1		Metals		Metals (5-7E & 5-20E)
H10-9000	3	Unknown	Building demolished, only two 1' x 6' footers remain; No evidence of release	SB-H10-9000-01 through SB-H10-9000-03	SB-H10-9000-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 547 ppm at SB-H10-9000-01		1	1		1	1	1							1	1		Metals, SVOCs	E&E	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B), E&E (5-7C & 5-20C)
H10-9001	4	Unknown	Building demolished, evidence of former concrete footer present. Location determined from maps. No evidence of release.	SB-H10-9001-01 through SB-H10-9001-03	SB-H10-9001-03	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 532 ppm at SB-H10-9001-03		1	1		1	1	1							1	1		Metals, SVOCs	E&E	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B), E&E (5-7C & 5-20C)
H10-9002	5	Oil Storage	Storage area demolished, former storage tanks and support removed. Adjacent area contains tan-brown sandy soil fill evidence where cleanup occurred. No current evidence of release.	SB-H10-9002-01 through SB-H10-9002-05	SB-H10-9002-01 SB-H10-9002-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 888 ppm at SB-H10-9002-01 and a copper concentration of 1,305 ppm at SB-H10-9002-02	2	2	2	2									1	1		Metals, SVOCs, PCBs		Metals (5-7E & 5-20E), SVOCs (5-7B % 5-20B), PCBs (5-7D & 5-20D)
H10-9101	5	Nitric Acid Storage Tanks	Building demolished, only concrete footer outline locations remain. No evidence of release.	SB-H10-9101-01 through SB-H10-9101-05	SB-H10-9101-03 SB-H10-9101-02	Sampling location SB-H10-9101-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H10-9101-02	2	2	2										1	1				
H10-9102	5	Tank	Tank removed, minor evidence of former concrete foundation. Area largely vegetated. No evidence of release.	SB-H10-9102-01 through SB-H10-9102-03	SB-H10-9102-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1											1	1				
H10-9103	5,7,8	Sulfuric Acid Store Tank	Concrete containment around steel tank (one tank removed). Floor drain in N corner, concrete gutter at SW side, brick basin at SW side. No evidence of release.	SB-H10-9103-01 through SB-H10-9103-06	SB-H10-9103-01 SB-H10-9103-03 SB-H10-9103-04	Sampling location SB-H10-9103-01 was determined using professional judgement; Sampling locations SB-H10-9103-03/04 were determined using XRF screening; Results indicated a lead concentration of 1,308 ppm at SB-H10-9103-03 and 605 ppm at SB-H10-9103-04	3	3	3									3	1	1		Metals, SVOCs	VOCs	Metals (5-7E & 5-20E), VOCs (5-7A & 5-20A), SVOCs (5-7B & 5-20B)
H10-9104	5,7	Nitric Acid Store Tank	Concrete containment basin for fuel storage, tank has been removed, No. 2 fuel oil tank is currently stored in basin. No evidence of release.	SB-H10-9104-01 through SB-H10-9104-04	SB-H10-9104-02	Sampling location was determined using XRF screening Results indicated a lead concentration of 3,086 ppm at SB-H10-9104-02	1	1	1									1	1	1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H10-9308	1	Sodium Nitrate Store	Concrete block walls to 6' elevation, then steel and wood construction. Currently white material stored inside, possibly rock salt. No evidence of release.	SB-H10-9308-01 through SB-H10-9308-06	SB-H10-9308-02 SB-H10-9308-03	Sampling location SB-H10-9308-02 was determined using XRF screening; Results indicated a lead concentration of 555 ppm. A confirmation sample was colllected at SB-H10-9308-03		2	2	2									1	1		Metals, SVOCs, PCBs		Metals (5-7E & 5-20E), SVOCs (5-7B % 5-20B), PCBs (5-7D & 5-20D)
H10-9320	1	Can Paint House	Large concrete pad with sheet metal building on SW third of pad. Currently used for equipment storage. No evidence of a release.	SB-H10-9320-01 through SB-H10-9320-04	SB-H10-9320-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 715 ppm at SB-H10-9320-03		1	1										1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H10-MAP3	8	Mixed Acid Pipeline	Acid pipeline which connects H10-9103 and G10-9100; nitric acid line ended at N corner of 9103 but may continue on; not evident. No evidence of release.			Pipeline removed, no evidence of release, therefore no samples were collected																			
H11-1	9	Former Burning Ground	Currently largely vegetated area with dark soil present towards E corner. No evidence of release (area=16,000 sq ft).			This AOC has been referred to the Remedial Investigation																	E&E*		E&E (5-7C & 5-20C)
H11-10	5	Tanks	Tanks demolished, rubble and building debris evident; Location determined from maps; No evidence of release	SB-H11-10-01 through SB-H11-10-03	SB-H11-10-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1											1	1				
H11-12	10	Electric Transformer	Black housing with minor amounts of discoloration present. No evidence of release.	SB-H11-12-01	SB-H11-12-01	Sample taken at site of former transformer				1									1	1				
H11-2	3	Unknown	Building demolished, concrete pad remains; Largely vegetated area, however extent of building evident No evidence of release	SB-H11-2-01 through SB-H11-2-04	SB-H11-2-02 SB-H11-2-03	Sampling location SB-H11-2-02 was determined using XRF screening Results indicated a lead concentration of 1,010 ppm. A confirmation sample was collected at SB-H11-2-03. Analytical results did not detect elevated metal concentrations.		2	2		2	2	2						1	1				
H11-2295	4	Cotton House/ Paint House	Building demolished, area currently covered with vegetation. Location determined from maps. No evidence of release.	SB-H11-2295-01 through SB-H11-2295-03	SB-H11-2295-02 SB-H11-2295-01	Sampling location SB-H11-2295-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-2295-01		2	2										1	1				

Table 2-7

Maintenance Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	TPH	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
H11-2319	3	Drum Storage Pad	Concrete pad with 8" high walls for containment. Posted as former storage of petroleum contaminated soil and waste oil. No evidence of release.	SB-H11-2319-01 through SB-H11-2319-05	SB-H11-2319-04 SB-H11-2319-02	Sampling location SB-H11-2319-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-2319-02	2	2	2											1	1		Metals		Metals (5-7E & 5-20E)
H11-3	5	Mixed Acid Storage Tank	All tanks and equipment removed, footers show where tanks were. Location determined from maps. No evidence of release.	SB-H11-3-01 through SB-H11-3-06	SB-H11-3-02 SB-H11-3-03	Sampling location SB-H11-3-02 was determined using XRF screening Results indicated a lead concentration of 581 ppm. A confirmation sample was collected at SB-H11-3-03	2	2	2										2	1	1		Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H11-4	9	Acid Unloading Area Release	Area currently vegetated and gravel covered, adjacent to eyewash station. Connections and piping to 9106 present. No evidence of release.	SB-H11-4-01 through SB-H11-4-03	SB-H11-4-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,435 ppm at SB-H11-4-03	1	1	1	1									1	1	1		Metals, SVOCs, PCBs		Metals (5-7E & 5-20E), SVOCs (5-7B % 5-20B), PCBs (5-7D & 5-20D)
H11-510	4	Temp. Soda Storage	Remnant Building, location determined from historical maps	SB-H11-510-01 through SB-H11-510-03	SB-H11-510-03 SB-H11-510-01	Sampling location SB-H11-510-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-510-01		2	2											1	1				
H11-6	3	Unknown	Concrete pad partially covered by macadam-paved road to Bldg. 9336. No evidence of release.	SB-H11-6-01 through SB-H11-6-04	SB-H11-6-01	Sampling location was determined using XRF screening Results indicated an arsenic concentration of 256 ppm at SB-H11-6-01		1	1		1	1	1							1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H11-696	3	Unknown	Building demolished, concrete pad remains. Largely vegetated area, brick building debris and slag from rail line present. No evidence of release.	SB-H11-696-01 through SB-H11-696-03	SB-H11-696-01 SB-H11-696-02	Group B E&E materials were detected at SB-H11-696-01 using an Expray Test Kit A confirmation sample was collected at SB-H11-696-02 Analytical results did not detect elevated E&E concentrations		2	2		1	1	1							1	1				
H11-697	3	Unknown	Building demolished, concrete pad remains. Largely vegetated area, brick building debris and slag from rail line present. No evidence of release.	SB-H11-697-01 through SB-H11-697-04	SB-H11-697-01 SB-H11-697-02	Sampling location SB-H11-697-01 was determined using XRF screening; Results indicated an arsenic concentration of 256 ppm. A confirmation sample was collected at SB-H11-697-02. Analytical results did not detect elevated metal concentrations.		2	2		2	2	2							1	1				
H11-757	4	Unknown	Area largely vegetated, building destroyed, foundation not evident. Location determined from maps. No evidence of release.	SB-H11-9312-01 through SB-H11-9312-06	SB-H11-9312-02 SB-H11-9312-04	This AOC was sampled as part of H11-9312. NFA/FA Justification and exceedances based on samples collected from H11-9312.		2	2											1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H11-761	4	Unknown	Building demolished, concrete debris present; Location determined from maps; No evidence of release	SB-H11-761-01 through SB-H11-761-04	SB-H11-761-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 814 ppm at SB-H11-761-03		1	1		1	1	1							1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H11-762	3	Unknown	Building demolished, only concrete pad remains; No evidence of release	SB-H11-762-01 through SB-H11-762-03	SB-H11-762-03 SB-H11-762-02	Sampling location SB-H11-762-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-762-02		2	2	1	2	2	2							1	1				
H11-763	4	Unknown	Building demolished, minimal evidence of former building. Location determined from maps. No evidence of release.	SB-H11-763-01 through SB-H11-763-03	SB-H11-763-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 552 ppm at SB-H11-763-03 Analytical results did not detect elevated metal concentrations		1	1		1	1	1							1	1		SVOCs		SVOCs (5-7B & 5-20B)
H11-8	5	Unknown Tank	Dilapidated steel tank with significant rust present. Extends 3' above ground surface and to an unknown depth. Two reinforcing steel I-beams present inside. Slag present surrounding and on W side.	SB-H11-8-01 through SB-H11-8-02	SB-H11-8-01 SB-H11-8-02	Sampling location was determined using professional judgement XRF results indicated a lead concentration of 419 ppm at SB-H11-8-01 Professional judgement used in determining SB-H11-8-02.	2	2	1											1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H11-9	5	Cooling Reservoir	Concrete foundation remains; Largely vegetated, however concrete walls evident; No evidence of release	SB-H11-9-01 through SB-H11-9-04	SB-H11-9-02 SB-H11-9-04	Sampling location SB-H11-9-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-9-04		2	2											1	1		Metals		Metals (5-7E & 5-20E)
H11-9307	4	Ingredient Store	Building demolished, area currently covered with vegetation. Location determined from maps. No evidence of release.	SB-H11-9307-01 through SB-H11-9307-03	SB-H11-9307-02 SB-H11-9307-01	Sampling location SB-H11-9307-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-9307-01		2	2	2										1	1				
H11-9310	4	Shook Storage	Building demolished, area paved somewhat and gravel covered, also significant vegetation present. Location determined from maps. No evidence of release	SB-H11-9310-01 through SB-H11-9310-03	SB-H11-9310-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1		Metals		Metals (5-7E & 5-20E)
H11-9312	1	Box Storage	Corrugated sheet metal/wooden storage building. Loading areas at NE and SE corners. No evidence of release.	SB-H11-9312-01 through SB-H11-9312-06	SB-H11-9312-02 SB-H11-9312-04	Sampling location SB-H11-9312-04 was determined using professional judgement; Sampling locations SB-H11-9312-02 was determined using XRF screening; Results indicated a lead concentration of 598 ppm at SB-H11-9312-02		2	2											1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H11-9313	1	Shook Storage	Corrugated sheet metal/wooden storage building on concrete pad. Loading areas at NW and SW corners. Adjacent debris area expected to be second building (rail line runs through debris area). No evidence of release.	SB-H11-9313-01 through SB-H11-9313-06	SB-H11-9313-02 SB-H11-9313-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1		Metals		Metals (5-7E & 5-20E)
H11-9335	1	Warehouse	Corrugated sheet metal and wood structure built on concrete foundation. Heater pad on SW side. Stressed vegetation with iron staining present.	SB-H11-9335-01 through SB-H11-9335-07	SB-H11-9335-05 SB-H11-9335-06	Sampling locations were determined using XRF screening Results indicated a copper concentration of 1,012 ppm at SB-H11-9335-05 and an arsenic concentration of 287 ppm at SB-H11-9335-06		2	2											1	1		Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H11-9336	1	General Warehouse	Sheet metal construction with wooden walls on concrete footers. Heater unit on E side with steam pipe vent and a small area of stressed vegetation below. No evidence of release.	SB-H11-9336-01 through SB-H11-9336-07	SB-H11-9336-01 SB-H11-9336-02	Sampling locations were determined using XRF screening Results indicated an arsenic concentration of 278 ppm at SB-H11-9336-01 and 1,310 ppm at SB-H11-9336-02		2	2	2										1	1		Metals, SVOCs, PCBs		Metals (5-7E & 5-20E), SVOCs (5-7B % 5-20B), PCBs (5-7D & 5-20D)
H12-2	4	Soda Dry House #6	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H12-2-01 through SB-H12-2-03	SB-H12-2-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1		SVOCs		SVOCs (5-7B & 5-20B)
H12-3	4	Baled Bag Store #9	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H12-3-01 through SB-H12-3-03	SB-H12-3-01 SB-H12-3-02	Sampling location SB-H12-3-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H12-3-02		2	2											1	1				

Table 2-7

Maintenance Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	TPH	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
H12-4	4	Baled Bag Store #10	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H12-4-01 through SB-H12-4-03	SB-H12-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
H12-5	4	Pulp and Sawdust Store #4	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H12-5-01 through SB-H12-5-03	SB-H12-5-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
H12-689	4	Nut Shell Grinder	Building demolished, structure and foundation not evident; Location determined from maps; No evidence of release	SB-H12-689-01 through SB-H12-689-03	SB-H12-689-03 SB-H12-689-01	Sampling location SB-H12-689-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H12-689-01		2	2	2										1	1			
H12-8563	4	Chlorinator House #2	Building demolished, area currently covered with gravel; Location determined from maps; No evidence of release	SB-H12-8563-01 through SB-H12-8563-03	SB-H12-8563-03 SB-H12-8563-01	Sampling location SB-H12-8563-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H12-8563-01	2	2	2										2	1	1		SVOCs	SVOCs (5-7B & 5-20B)
H12-8607	1	Water Treatment Building	Concrete block pad with three pipes entering the ground; No evidence of release	SB-H12-8607-01 through SB-H12-8607-04	SB-H12-8607-04 SB-H12-8607-01	Sampling location SB-H12-8607-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H12-8607-01	2	2	2											1	1			
H13-408	4	Unknown	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H13-408-01 through SB-H13-408-03	SB-H13-408-02 SB-H13-408-03	Sampling location SB-H13-408-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H13-408-03		2	2		2	2	2							1	1	Metals	SVOCs	Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H13-5	10	Electric Transformer	Gray colored with minor rust staining; No evidence of release	SB-H13-5-01	SB-H13-5-01	Sample collected at base of pole				1										1	1			
H13-8158A	7	Unknown Pit	Posted as a confined space, possibly a wastewater pit; Concrete block sump with asphalt and shingle roof; No evidence of release	TP-H13-8158A-01	TP-H13-8158A-01	Test Pit location placed downgradient of the sump.		1			1	1	1							1	1			
H13-9329	4	Pulp Dry House	Building demolished, no evidence of former building, foundation removed. Building debris present, end of rail evident. Location determined from maps. No evidence of release.	SB-H13-9329-01 through SB-H13-9329-03	SB-H13-9329-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-7E & 5-20E)
H8-585	3	Chemical Storage	Bldg demolished-concrete rubble present; No evidence of release	SB-H8-585-01 through SB-H8-585-03	SB-H8-585-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 436 ppm at SB-H08-585-01	1	1	1											1	1	Metals		Metals (5-7E & 5-20E)
H8-69E	3	Ingredient Storage	Bldg demolished-evidence of former store house largely removed. No evidence of release.	SB-H8-69E-01 through SB-H8-69E-03	SB-H8-69E-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1	1										1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H8-8262	9	Corporation Yard	Area cleared;discolored soil present in NE; No evidence of release	SB-H8-8262-01 through SB-H8-8262-03	SB-H8-8262-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals, SVOCs		Metals (5-7E & 5-20E), SVOCs (5-7B & 5-20B)
H8-9226	3	Break Room	Bldg demolished; area largely vegetated and grass covered; No evidence of release	SB-H8-9226-01 through SB-H8-9226-03	SB-H8-9226-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	SVOCs		SVOCs (5-7B & 5-20B)
H9-1	5	Former Tank Field	Currently a pine forest, some evidence of what appears to be concrete associated with four cradles. No evidence of release.	SB-H9-1-01 through SB-H9-1-08	SB-H9-1-03 SB-H9-1-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2												1	1			
H9-10	9	Former Pond	Saturated area with tall grass, currently no stressed vegetation. Location determined from maps. No evidence of release (area=1,400 sq ft).	SB-H9-10-01 through SB-H9-10-05	SB-H9-10-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1										1	1	1	1	SVOCs		SVOCs (5-7B & 5-20B)
H9-2261	1	Unknown	Wooden construction over concrete foundation; AC unit on W corner; probably an office bldg.; No evidence of release	SB-H9-2261-01 through SB-H9-2261-04	SB-H9-2261-04	Sampling location was determined using XRF screening Results indicated a lead concentration of 433 ppm at SB-H09-2261-04		1	1	1	1	1	1							1	1	Metals, E&E		Metals (5-7E & 5-20E), E&E (5-7C & 5-20C)
H9-3	3	Unknown	Building demolished, some concrete block present. S edge of building has line of stressed vegetation (area=700 sq ft)	SB-H9-3-01 through SB-H9-3-04	SB-H9-3-01 SB-H9-3-03	Sampling location SB-H9-3-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H9-3-03		2	2		2	2	2							1	1			
H9-8155	4	Engineering Office	Building demolished, area currently covered with vegetation. Location determined from maps. No evidence of release.	SB-H9-8155-01 through SB-H9-8155-03	SB-H9-8155-02 SB-H9-8155-01	Sampling location SB-H9-8155-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H9-8155-01		2	2											1	1		SVOCs	SVOCs (5-7B & 5-20B)
H9-8238	3,6	Maintenance Office	Building demolished, area of reduced vegetation indicates location. Location determined from maps. Septic tank vent pipe apparent (one sludge sample taken during IRM effort). No evidence of release.	SB-H9-8238-01 through SB-H9-8238-03 TP-H9-8238-04	SB-H9-8238-01 SB-H9-8238-02 SB-H9-8238-03 TP-H9-8238-04	Sampling location was determined using professional judgement screening results did not warrant biased sampling	1	4	3											2	2	Metals		Metals (5-7E & 5-20E)

Table 2-7

Maintenance Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	TPH	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
I11-9117	5	Ammonia Storage Tanks	Tanks and cradles removed, area now covered with vegetation. Location determined from maps. No evidence of release.	SB-I11-9117-01 through SB-I11-9117-06	SB-I11-9117-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1											1	1		Metals		Metals (5-7E & 5-20E)

Notes:

All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:

TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
AOC = Area of Concern
XRF = X-ray Fluorescence
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector

TOC and GRAIN SIZE collected at each AOC

All screening samples were evaluated for VOCs, Metals, and E&E compounds
Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
Sq Ft = Square Foot
No. = Number

* = AOC reserved for RI due to presence of contamination
** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

AOC Type

1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

Table 2-8

B-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
J11-B25	4	Unknown	Only aggregate remains at former location; Location determined from historical maps; No evidence of release	SB-J11-B25-01 through SB-J11-B25-03	SB-J11-B25-02 SB-J11-B25-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-B25-02. A confirmation sample was collected at SB-J11-B25-01. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1		SVOCs	SVOCs (5-8B & 5-21B)
I11-1	1	B-Line Canteen	Wood/vinyl construction; No indication of chemicals or potential release	SB-I11-1-01 through SB-I11-1-04	SB-I11-1-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-I11-1-03		1	1											1	1		E&E, SVOCs	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
I11-6	6	Septic Tank	Unassociated septic tank, previously unidentified; one sludge sample taken during Single Phase Remediation effort	TP-I11-6-01	TP-I11-6-01	A Test Pit was dug downgradient from the septic tank.	1	1												1	1			
I11-7	3	Unknown Foundation	Dilapidated concrete footer; No evidence of a release	SB-I11-7-01 through SB-I11-7-03	SB-I11-7-03 SB-I11-7-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-I11-7-03. A confirmation sample was collected at SB-I11-7-01. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1		SVOCs	SVOCs (5-8B & 5-21B)
I11-8260	1	Change House	Corrugated sheet metal construction ; No evidence of a release	SB-I11-8260-01 through SB-I11-8260-04	SB-I11-8260-02 SB-I11-8260-03	Sampling location SB-I11-8260-02 was determined using XRF screening; Results indicated a lead concentration of 406 ppm at SB-I11-8260-02; Group B E&E materials were also detected at SB-I11-8260-02. A confirmation sample was collected at SB-I11-8260-03.		2	2		2	2	2							1	1	Metals, SVOCs	E&E	Metals (5-8E & 5-21D), E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
I11-8504	1,7	B-Line Pump House	Wooden and corrugated sheet metal construction; Storage tank at SW corner, oil-water separator on W side; (Sampled during Single Phase Remediation); No evidence of a release	SB-I11-8504-01 through SB-I11-8504-06 TP-I11-8504-07	SB-I11-8504-03 SB-I11-8504-04 SB-I11-8504-06 TP-I11-8504-07	Sampling location SB-I11-8504-03 was determined using professional judgement; Sampling locations SB-I11-8504-04/06 were determined using an Expray Test Kit. Group B E&E materials were detected at SB-I11-8504-04/06. Test Pit location was placed downgradient from sump. Analytical results did not detect elevated E&E concentrations.	4	4	3		3	3	3							2	2	Metals, SVOCs		Metals (5-8E & 5-21D), SVOCs (5-8B & 5-21B)
I12-4	3	Foundation	Building demolished, large concrete foundations with protruding rebar, continuous footers below larger support foundations. Portions of former brick walls present. No evidence of a release	SB-I12-4-01 through SB-I12-4-05	SB-I12-4-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-I12-4-01 Analytical results did not detect elevated E&E concentrations		1	1		1	1	1							1	1	Metals, SVOCs		Metals (5-8E & 5-21D), SVOCs (5-8B & 5-21B)
I12-8101	3	Ammonia Oxidation	Building demolished, remains include concrete and rebar; foundation, parts of brick walls, and wood building; No evidence of a release	SB-I12-8101-01 through SB-I12-8101-05	SB-I12-8101-01 SB-I12-8101-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-I12-8101-01. A confirmation sample was collected at SB-I12-8101-02. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1		SVOCs	SVOCs (5-8B & 5-21B)
J10-2187	3	Filament Winding Building	Only demolition rubble in soil indicates presence of former building. No evidence of a release.	SB-J10-2187-01 through SB-J10-2187-05	SB-J10-2187-05 SB-J10-2187-01	Sampling location SB-J10-2187-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J10-2187-01.		2	2											1	1	Metals		Metals (5-8E & 5-21D)
J10-5	1	B-Line Office	Brick building over concrete foundation. No evidence of a release. Occupies half of the foundation, equipment storage the other half.	SB-J10-5-01 through SB-J10-5-06	SB-J10-5-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 653 ppm at SB-J10-5-01		1	1		1	1	1							1	1	Metals	SVOCs	Metals (5-8E & 5-21D), SVOCs (5-8B & 5-21B)
J10-6	3	Smokeless Powder Storage	Building demolished, largely vegetated area; Mound and stone foundation indicates storehouse; No evidence of a release	SB-J10-6-01 through SB-J10-6-05	SB-J10-6-01 SB-J10-6-05	Sampling locatione were determined using professional judgement Screening results did not warrant biased sampling	2	2												1	1			
J10-609	4	Office Change House	Remnant Building, location determined from historical maps	SB-J10-609-01 through SB-J10-609-03	SB-J10-609-02 SB-J10-609-01	Sampling location SB-J10-609-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J10-609-01.		2	2											1	1			
J10-8280	4	Unknown	Minor amounts of building rubble are only remaining evidence of a building. Location determined from historical maps. No evidence of a release.	SB-J10-8280-01 through SB-J10-8280-03	SB-J10-8280-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals		Metals (5-8E & 5-21D)
J11-1	9	Spray Field B	Currently heavily vegetated, little trace of former sprayfield. Ditch dug from K11-2301 to water detention basin to prevent flow into building area 2300. No evidence of a release (area=26,000 sq ft).	SB-J11-1-01 through SB-J11-1-20	SB-J11-1-01 through SB-J11-1-20	Sampling locations were determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-1-01/02/07/14/17. Confirmation samples were taken at the remaining locations.	20	20			5	5	5							1	1	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
J11-10	7	Unknown	Concrete containment structure, trailer-mounted tank on pad. Drainage to PVC pipe outlet on E end. No evidence of a release.	SB-J11-10-01 through SB-J11-10-05	SB-J11-10-05	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-10-05		1	1		1	1	1							1	1	SVOCs, E&E		E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
J11-11	6	Septic Tank	Minimal evidence, 6" vent pipe protruding from ground; Location determined from historical maps; No evidence of a release	TP-J11-11-01	TP-J11-11-01	Test Pit location downgradient from septic tank.	1	1												1	1			
J11-14	4	Final Mix #3	Building demolished, currently a vegetated area; Location determined from historical maps; No evidence of a release	SB-J11-14-01 through SB-J11-14-03	SB-J11-14-03 SB-J11-14-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-14-03. A confirmation sample was collected at SB-J11-14-01		2	2		2	2	2							1	1			
J11-2188	1,7	B-Line Mix House	Wooden construction over concrete foundation with multiple loading areas. Brick walls separate each mix house. Sumps and floor drains surround building. Potential former discharge to ground/sumps.	SB-J11-2188-01 through SB-J11-2188-08 TP-J11-2188-09 through TP-J11-2188-11	SB-J11-2188-03 SB-J11-2188-06 SB-J11-2188-08 TP-J11-2188-09 through TP-J11-2188-10 TP-J11-2188-11	Sampling locations were determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-2188-03/06/08 Test Pit locations were placed downgradient from sumps		6	3		6	6	6							4	4	Metals, E&E	SVOCs	Metals (5-8E & 5-21D), E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
J11-2296	3	Control Room	Building demolished, only concrete masonry unit foundation and ceramic steampipe vent catch remain. No evidence of release.	SB-J11-2296-01 through SB-J11-2296-05	SB-J11-2296-04 SB-J11-2296-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-2296-04. A confirmation sample was collected at SB-J11-2296-02.		2	2		1	1	1							1	1		E&E, SVOCs	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
J11-2298	1	Extruder/Cutter	Wooden construction over concrete foundation. Concrete walls divide building into thirds.	SB-J11-2298-01 through SB-J11-2298-05	SB-J11-2298-04	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-2298-04		1	1		1	1	1							1	1	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
J11-3	5	Former Tank	Two tank cradles where tanks formerly stood; No evidence of a release	SB-J11-3-01 through SB-J11-3-06	SB-J11-3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1	VOCs		VOCs (5-8A & 5-21A)
J11-317	9	Powder Testing Grounds	Stressed soil area, pieces of lead present; Small amounts of vegetation returning (area=2,200 sq ft)	SB-J11-317-01 through SB-J11-317-08	SB-J11-317-01 SB-J11-317-03 SB-J11-317-05 SB-J11-317-06	Sampling location SB-J11-317-01 was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-317-01 Sampling locations SB-J11-317-03/05/06 were determined using XRF screening; Results indicated a lead concentration of 811 ppm and a copper concentration of 1,400 ppm at SB-J11-317-03, a lead concentration of 780 ppm at SB-J11-317-05, and 427 ppm at SB-J11-317-06.Analytical results did not detect elevated E&E concentrations.		3	3		3	3	3							1	1	Metals, SVOCs	E&E	Metals (5-8E & 5-21D), E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)

Table 2-8

B-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
J11-6	5	Storage Tank	Surrounded by concrete containment. Pipe feeds to B-Line Mix House. Posted as holding water, acetone, ethanol, NG, NC, and process water. No evidence of a release.	SB-J11-6-01 through SB-J11-6-04	SB-J11-6-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-6-03 Analytical results did not detect elevated E&E concentrations.	1	1			1	1	1							1	1	VOCs		VOCs (5-8A & 5-21A)
J11-602A	4	Scrap Smokeless Powder	Building demolished, area has been covered with aggregate(area<100 sq ft); Location determined from historical maps; No evidence of a release	SB-J11-602A-01 through SB-J11-602A-03	SB-J11-602A-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-602A-01 Analytical results did not detect elevated E&E concentrations.					1	1	1							1	1			
J11-7	5	Former Tanks	Demolished, tank cradles removed; Gravel, slag-like material covers area; Location determined from historical maps; No evidence of a release	SB-J11-7-01 through SB-J11-7-03	SB-J11-7-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-7-01 Analytical results did not detect elevated E&E concentrations.	1	1			1	1	1							1	1			
J11-8265	4	Store House	Building demolished, footers and debris still present; Location determined from footers and maps; No evidence of a release	SB-J11-8265-01 through SB-J11-8265-05	SB-J11-8265-04	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-8265-04		1	1		1	1	1							1	1	Metals	E&E	Metals (5-8E & 5-21D), E&E (5-8C & 5-21C)
J11-8265A	5	Store House Tank	Tank cradles and tank removed, footers demolished; Largely vegetated area, location determined from maps; No evidence of a release	SB-J11-8265A-01 through SB-J11-8265A-03	SB-J11-8265A-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-8265A-03 Analytical results did not detect elevated E&E concentrations.		1	1		1	1	1							1	1			
J11-8570	7	Wastewater Holding #1	2 sump pumps on concrete pad, sump piping leads away to WWTP. No evidence of a release.	SB-J11-8570-01 through SB-J11-8570-04 TP-J11-8570-05	SB-J11-8570-01 TP-J11-8570-05	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-8570-02 Test Pit location was placed downgradient from sump	1	2	1		2	2	2							2	2	VOCs		VOCs (5-8A & 5-21A)
J11-B20	3	Building B-20	Building demolished, one concrete footer remaining with rubble. No evidence of a release (area=100 sq ft).	SB-J11-B20-01 through SB-J11-B20-03	SB-J11-B20-02	Sampling location was determined using XRF screening; Results indicated a copper concentration of 697 ppm at SB-J11-B20-02. Analytical results did not detect elevated metal concentrations.		1	1		1	1	1							1	1			
J11-B83	1	Unknown Storage Shed	Corrugated metal shed on concrete foundation; Electrical wire connections to NE corner; No evidence of a release	SB-J11-B83-01 through SB-J11-B83-04	SB-J11-B83-01 SB-J11-B83-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-B83-01. A confirmation sample was collected at SB-J11-B83-03. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1			
J12-2	3	Unknown	Large concrete footers with concrete basin reinforced with steel I-Beams, possible powder grinder. No evidence of release, however slag present.	SB-J12-2-01 through SB-J12-2-05	SB-J12-2-03 SB-J12-2-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J12-2-03. A confirmation sample was collected at SB-J12-2-02. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1			
J12-3	3	Unknown	Old stone wall with depression in front; Possible surface runoff from powder grinder; No evidence of a release (area=100 sq ft)	SB-J12-3-01 through SB-J12-3-03	SB-J12-3-02	Sampling location was determined using XRF screening; Results indicated a lead concentration of 1,605 ppm at SB-J12-3-02		1	1		1	1	1							1	1	Metals	E&E, SVOCs	Metals (5-8E & 5-21D), E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
K10-1	3	Concrete Pad	Concrete pad, possible heater or electrical pad for Pedry House. No evidence of a release.	SB-K10-1-01 through SB-K10-1-04	SB-K10-1-01 SB-K10-1-02	Sampling location SB-K10-1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K10-1-02.		2	2											1	1		SVOCs	SVOCs (5-8B & 5-21B)
K10-2	7	Unknown Containment Area	Large concrete containment basin with high concrete walls; Large pipe outlet in SE corner; No evidence of a release	SB-K10-2-01 through SB-K10-2-05	SB-K10-2-02 SB-K10-2-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	Metals	SVOCs	Metals (5-8E & 5-21D), SVOCs (5-8B & 5-21B)
K10-2090	1,7	Pedry House	Wooden construction over concrete foundation; Concrete culvert to adjacent control house; Two berms and multiple loading area present; Stressed vegetation at N corner	SB-K10-2090-01 through SB-K10-2090-08	SB-K10-2090-01 SB-K10-2090-04 SB-K10-2090-07 SB-K10-2090-08	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		4	4		4	4	4							1	1	SVOCs, E&E		E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
K10-2197	1	Curing House	Corrugated steel vault with wooden front doors; Blower unit at rear enters vault at back; No evidence of a release	SB-K10-2197-01 through SB-K10-2197-06	SB-K10-2197-05 SB-K10-2197-04	Sampling location SB-K10-2197-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K10-2197-04.		2	2		2	2	2							1	1	Metals	SVOC E&E	Metals (5-8E & 5-21D), E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
K10-2197A	1	Curing House	Corrugated steel vault with concrete footer, wooden front facade soil overlain; Loading area in front; No evidence of a release	SB-K10-2197A-01 through SB-K10-2197A-05	SB-K10-2197A-01 SB-K10-2197A-05	Sampling location SB-K10-2197A-05 was determined using an Expray Test Kit. Group B E&E materials were detected at SB-K10-2197A-05; Sampling location SB-K10-2197A-01 was dertermined using professional judgement.		2	2		2	2	2							1	1		E&E, SVOCs	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
K10-2266	1	Control Room	Plaster over concrete masonry unit construction; Concrete culverts leads to Pedry House on SE side; No evidence of a release	SB-K10-2266-01 through SB-K10-2266-07	SB-K10-2266-04 SB-K10-2266-05	Sampling location SB-K10-2296-04 was determined using an Expray Test Kit. Group B E&E materials were detected at SB-K10-2266-04; Sampling location SB-K10-2266-05 was dertermined using professional judgement.		2	2		1	1	1							1	1	Metals, E&E	SVOC	Metals (5-8E & 5-21D), E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
K10-3	3	Smokeless Powder Storage	Building demolished, only stone foundation remains; No evidence of a release (area=900 sq ft)	SB-K10-3-01 through SB-K10-3-04	SB-K10-3-02	Sampling location was determined using XRF screening; Results indicated a lead concentration of 1,203 ppm at SB-K10-3-02			1		1	1	1							1	1	Metals		Metals (5-8E & 5-21D)
K10-5	9	Stressed Vegetation	Aggregate and reddish stained soil (possibly iron staining); Shape follows surface drainage pattern, leading away from Pedry House (area=1,200 sq ft)	SB-K10-5-01 through SB-K10-5-04	SB-K10-5-02 SB-K10-5-04	Sampling location was determined using XRF screening; Results indicated a copper concentration of 1,310 ppm at SB-K10-5-02		2	2										2	1	1	Metals		Metals (5-8E & 5-21D)
K10-6	5	Tank Cradles	Small concrete and rebar tank cradles; Adjacent to stressed vegetation (K10-5)	SB-K10-6-01 through SB-K10-6-04	SB-K10-6-02 SB-K10-6-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2												1	1			
K10-602B	3	Smokeless Powder Storage	Building demolished, mound of soil surrounded by old stone foundation. Adjacent to rail line. No evidence of a release (area=800 sq ft).	SB-K10-602B-01 through SB-K10-602B-04	SB-K10-602B-03 SB-K10-602B-02	Sampling location SB-K10-602B-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K10-602B-02.					2	2	2							1	1			
K10-79A	4	Record Storage	Grass and vegetation covered area; Location determined from historical maps; No evidence of a release	SB-K10-79A-01 through SB-K10-79A-03	SB-K10-79A-01 SB-K10-79A-03	Sampling location SB-K10-79A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K10-79A-03.		2	2											1	1			
K11-1 K11-2	3	Unknown Foundation	Concrete foundation and former building rubble present. Pipes present at W and S corner protruding from foundation corner. No evidence of a release.	SB-K11-1-01 through SB-K11-1-05	SB-K11-1-04 SB-K11-1-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	Metals	SVOCs	Metals (5-8E & 5-21D), SVOCs (5-8B & 5-21B)
K11-2225A	7	Coating House Discharge	Same construction as valve box except ceramic pipe enters on NE and SE side. Sump associated with the building. No evidence of a release.	TP-K11-2225A-01	TP-K11-2225A-01	Test Pit location placed downgradient from the sump.		1			1	1	1							1	1			
K11-2225B	5	Coating House Paraplex Tank	Paraplex tank mounted on concrete saddles wrapped in corrugated metal. Pump on S side and piping leading to Bldg. 2225, concrete pad on S side. No evidence of a release.	SB-K11-2225B-01 through SB-K11-2225B-04	SB-K11-2225B-02 SB-K11-2225B-04	Sampling location SB-K11-2225B-04 was determined using an Expray Test Kit. Group B E&E materials were detected at SB-K11-2225B-04; Sampling location SB-K10-2225B-02 was dertermined using professional judgement.		1	1		1	1	1							1	1	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)

Table 2-8

B-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
K11-2225C	8	Paraplex Feed Line	Feed line for barrel coating house from paraplex tank; No evidence of a release			Line removed, no evidence of release, therefore no samples were collected																		
K11-2264	1	Heater House	Metal siding over metal frame construction, concrete footer; Condenser on concrete pad to SE corner; No evidence of a release	SB-K11-2264-01 through SB-K11-2264-04	SB-K11-2264-04 SB-K11-2264-03	Sampling location SB-K11-2264-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-2264-03.		2	2											1	1		SVOCs	SVOCs (5-8B & 5-21B)
K11-2300	1,7	B-Line Press and Cut	Concrete Masonry Unit/corrugated sheet metal construction. Concrete walls in separate areas. Floor drains previously discharged to ground. Sump associated with the building	SB-K11-2300-01 through SB-K11-2300-06 TP-K11-2300-07	SB-K11-2300-01 SB-K11-2300-05 TP-K11-2300-07	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling Test Pit location placed downgradient from sump		3	2		3	3	3							2	2	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
K11-2301	1	Heater House	Corrugated metal and wood construction. Duct feed to Bldg. 2300, feed from adjacent stream line into Bldg. 2301. No evidence of a release.	SB-K11-2301-01 through SB-K11-2301-04	SB-K11-2301-04 SB-K11-2301-02	Sampling location SB-K11-2301-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-2301-02.		2	2											1	1		SVOCs	SVOCs (5-8B & 5-21B)
K11-2302	1	Cut and Rest House	Wooden construction over concrete foundation. Indicated by Roux as previous wastewater release. Concrete wall on W side. No direct evidence of a release.	SB-K11-2302-01 through SB-K11-2302-05	SB-K11-2302-03 SB-K11-2302-05	Sampling locations were determined using an Expray Test Kit. Group B E&E materials were detected at SB-K11-2302-03/05		2	2		2	2	2							1	1	SVOCs, Metals, E&E		Metals (5-8E & 5-21D), E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
K11-2302A	9	Cut and Rest House Discharge/Ditch	Drainage/Discharge from Bldg. 2302A; Culvert filled in to allow roadway passage; No evidence of a release (area=3,400 sq ft)			This AOC has been referred to the Surface Water/Sediment Investigation																		
K11-3	9	Debris Area	No evidence of former debris, all has been removed; No evidence of a release	SB-K11-3-01 through SB-K11-3-03	SB-K11-3-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-K11-3-02		1	1		1	1	1							1	1	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
K11-5	10	Electrical Transformer	Transformer mounted to telephone pole; No evidence of corrosion or release	SB-K11-5-01	SB-K11-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
K11-598	4	Final Press and Grain #3	Remnant Building, location determined from historical maps	SB-K11-598-01 through SB-K11-598-03	SB-K11-598-03 SB-K11-598-02	Sampling location SB-K11-598-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-598-02.		2	2		2	2	2							1	1	SVOCs		SVOCs (5-8B & 5-21B)
K11-601	4	Cutting House #3	Remnant Building, location determined from historical maps	SB-K11-601-01 through SB-K11-601-03	SB-K11-601-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	SVOCs		SVOCs (5-8B & 5-21B)
K11-604	4	Press & Grain #4	Remnant Building, location determined from historical maps	SB-K11-604-01 through SB-K11-604-03	SB-K11-604-02 SB-K11-604-03	Sampling location SB-K11-604-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-604-03.		2	2		2	2	2							1	1	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
K11-607	4	Cutting House #4	Remnant Building, location determined from historical maps	SB-K11-607-01 through SB-K11-607-03	SB-K11-607-02 SB-K11-607-01	Sampling location SB-K11-607-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-607-01.		2	2		2	2	2							1	1			
K11-B2	4	Press and Cut House Scrap Shed	Building demolished, minimal evidence of buildings present; Location determined from historical maps. No evidence of a release.	SB-K11-B2-01 through SB-K11-B2-03	SB-K11-B2-01 SB-K11-B2-03	Sampling location SB-K11-B2-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-B2-03.		2	2											1	1			
K11-B3	3	Barrel Coat Scrap Shed	Building demolished, moss-covered foundation remains; No evidence of a release	SB-K11-B3-01 through SB-K11-B3-03	SB-K11-B3-02 SB-K11-B3-01	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-K11-B3-02. A confirmation sample was collected at SB-K11-B3-01. Analytical result did not detect elevated E&E concentrations		2	2		1	1	1							1	1			
K9-1	1	Unknown	Small storage shed of wooden construction; No evidence of a release	SB-K9-1-01 through SB-K9-1-04	SB-K9-1-02 SB-K9-1-01	Sampling location SB-K9-1-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K9-1-01.		2	2		2	2	2							1	1			
K9-4	4	Earth Mound Barricade	Remnant Building, location determined from historical maps	SB-K9-4-01 through SB-K9-4-03	SB-K9-4-02 SB-K9-4-01	Sampling location SB-K9-4-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K9-4-01.		2	2		1	1	1							1	1			
L10-1	3,6	Unknown	Building demolished, only foundation remains; Probably associated with L09-8210; No evidence of a release (area=100 sq ft). Septic associated with the building.	SB-L10-1-01 through SB-L10-1-03 TP-L10-1A-01	SB-L10-1-02 TP-L10-1A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	2	1		1	1	1						2	2			
L10-2	3	Unknown Foundation	Building demolished, only concrete foundation remaining; Currently an overgrown area; No evidence of a release	SB-L10-2-01 through SB-L10-2-05	SB-L10-2-02 SB-L10-2-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L10-2-02. A confirmation sample was collected at SB-L10-2-01.		2	2		2	2	2							1	1	E&E	SVOCs	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
L10-2088/2255/ 2256/2258	4	Former 4 Buildings	Area covered with piles of soil, building debris and pipes; Location determined from historical maps; Unable to determine if release present	SB-L10-2088-01 through SB-L10-2088-03	SB-L10-2088-02 SB-L10-2088-01	Sampling location SB-L10-2088-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L10-2088-01.		2	2		2	2	2							1	1		E&E, SVOCs	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
L10-2191	3	Cabinet Dryers 37,38,39	Only concrete footers and loading dock remain; 1" steel pipe at dock (NW side); Stressed vegetation present	SB-L10-2191-01 through SB-L10-2191-07	SB-L10-2191-02 SB-L10-2191-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2			2	2	2							1	1	SVOCs, E&E		E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
L10-2242	3	Dry House	Only concrete rubble and pad remaining as evidence of a building. No evidence of a release.	SB-L10-2242-01 through SB-L10-2242-04	SB-L10-2242-03 SB-L10-2242-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L10-2242-03. A confirmation sample was collected at SB-L10-2242-02. Analytical result did not detect elevated E&E concentrations.		2	2		2	2	2							1	1	SVOCs		SVOCs (5-8B & 5-21B)
L10-2316	4	Pump House	Building demolished. Location determined from historical maps and site features. No evidence of a release.	SB-L10-2316-01 through SB-L10-2316-03	SB-L10-2316-02	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 269 ppm at SB-L10-2316-02		1	1											1	1	Metals, SVOCs		Metals (5-8E & 5-21D), SVOCs (5-8B & 5-21B)
L10-4	3	Unknown	Two foundations associated with L10-2191. No evidence of former buildings. No evidence of a release.	SB-L10-4-01 through SB-L10-4-05	SB-L10-4-05 SB-L10-4-02	Sampling location SB-L10-4-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L10-4-02.		2	2		2	2	2							1	1			
L10-6	3	Waste Powder Storage	Building demolished, brick and concrete foundation remain. SE edge of foundation paved over. No evidence of a release.	SB-L10-6-01 through SB-L10-6-05	SB-L10-6-05 SB-L10-6-01	Sampling location SB-L10-6-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L10-6-01.					2	2	2							1	1		E&E	E&E (5-8C & 5-21C)
L10-725	4	Solvent Recovery and W. Dry House	Building demolished, macadam and vegetation currently cover area. Location determined from historical maps. No evidence of a release.	SB-L10-725-01 through SB-L10-725-03	SB-L10-725-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L10-725-01 Analytical result did not detect elevated E&E concentrations	1	1	1		1	1	1						1	1	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
L10-8210	4	Store House	Minor amounts of brick and concrete rubble only remaining evidence of a building. Location determined from historical maps. No evidence of a release.	SB-L10-8210-01 through SB-L10-8210-03	SB-L10-8210-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L10-8210-03		1	1		1	1	1							1	1		E&E, SVOCs	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)

Table 2-8

B-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
L10-8215	4	Outside Toilets	Building demolished, minimal evidence of buildings present; Location determined from historical maps; No evidence of a release	SB-L10-8215-01 through SB-L10-8215-03	SB-L10-8215-02 SB-L10-8215-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L10-8215-02. A confirmation sample was collected at SB-L10-8215-01. Analytical result did not detect elevated E&E concentrations		2	2		1	1	1							1	1		E&E, SVOCs	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
L10-8521	10	B-Line Substation	Three large transformers with associated insulators; No evidence of a release	SB-L10-8521-01 through SB-L10-8521-03	SB-L10-8521-01 SB-L10-8521-02 SB-L10-8521-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling				3										1	1			
L10-B462	4	Steeping House #2	Only concrete rubble remaining as evidence of a building; Location determined from historical maps; No evidence of a release	SB-L10-B462-01 through SB-L10-B462-03	SB-L10-B462-03 SB-L10-B462-01	Sampling location SB-L10-B462-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L10-B462-01.		2	2		2	2	2							1	1		SVOCs	SVOCs (5-8B & 5-21B)
L11-1	7	Unknown Containment Basin	Two large circular concrete pads held within a larger basin; Adjacent to L11-2089; No evidence of a release	SB-L11-1-01 through SB-L11-1-04	SB-L11-1-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1			1	1	1							1	1	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
L11-2	5	Tank Cradles	Concrete tank cradles large enough to hold 6' diameter tank; Covered in tar paper; No evidence of a release	SB-L11-2-01 through SB-L11-2-03	SB-L11-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1	SVOCs		SVOCs (5-8B & 5-21B)
L11-2089	1,7	Glazing/Coating House	New wooden construction over concrete foundation; Catch tank on W corner; Sump associated with the building. No evidence of release.	SB-L11-2089-01 through SB-L11-2089-05 TP-L11-2089-06	SB-L11-2089-01 SB-L11-2089-05 TP-L11-2089-06	Sampling location SB-L11-2089-05 was determined using professional judgement; Sampling location SB-L11-2089-01 was determined using an Expray Test Kit. Group B E&E materials were detected. Test Pit location was placed downgradient from the sump.		3	2		3	3	3							2	2	SVOCs, E&E		E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
L11-2091	3	Heater House	Concrete pad with steam pipes leading to L11-2089; Drain pipe on W corner; No evidence of release	SB-L11-2091-01 through SB-L11-2091-05	SB-L11-2091-02 SB-L11-2091-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1	SVOCs		SVOCs (5-8B & 5-21B)
L11-2225	1	Coating House	Wooden, sheet metal, and fiberglass construction over a concrete foundation. Connections to control house and paraplex tank. No evidence of a release.	SB-L11-2225-01 through SB-L11-2225-07	SB-L11-2225-02 SB-L11-2225-05	Sampling locations were determined using an Expray Test Kit. Group B E&E materials were detected at SB-L11-2225-02/05		2	2		2	2	2							1	1	Metals	E&E	Metals (5-8E & 5-21D), E&E (5-8C & 5-21C)
L11-2226	1	Control House	Concrete and wooden construction. Controls for coating barrel, screen, chem mix, rotoclone, paraplex pump, and fines collection. No evidence of a release.	SB-L11-2226-01 through SB-L11-2226-04	SB-L11-2226-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	SVOCs		SVOCs (5-8B & 5-21B)
L11-2303	1	Coating/Glazing Electrical Room	Wooden construction over concrete foundation and asphalt roof; Construction may not have been completed; No evidence of a release	SB-L11-2303-01 through SB-L11-2303-04	SB-L11-2303-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-L11-2303-03 Analytical result did not detect elevated E&E concentrations		1	1		1	1	1							1	1	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
L8-1	3	Store House	Structure removed, only loading area, stacked rail ties and mounded soil/aggregate cover remains. No evidence of a release.	SB-L8-1-01 through SB-L8-1-05	SB-L8-1-01 SB-L8-1-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1	Metals		Metals (5-8E & 5-21D)
L9-1	3	Unknown	Possible AC or heater house for M09-2192; Only concrete pad remains; No evidence of a release (area=100 sq ft)	SB-L9-1-01 through SB-L9-1-03	SB-L9-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	SVOCs		SVOCs (5-8B & 5-21B)
L9-3	10	Electrical Transformer	Transformer mounted to telephone pole; Black in color with some gray-green discoloration; No evidence of corrosion or release	SB-L9-3-01	SB-L9-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
L9-79B	4	Record Storage	Grass and vegetation covered area; Location determined from historical maps; No evidence of a release	SB-L9-79B-01 through SB-L9-79B-03	SB-L9-79B-01 SB-L9-79B-03	Sampling SB-L9-79B-01 location was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L9-79B-03.		2	2											1	1			
L9-8210	3	Store House	Only brick and concrete rubble remain, building demolished; No evidence of a release	SB-L9-8210-01 through SB-L9-8210-05	SB-L9-8210-05	Sampling location was determined using XRF screening; Results indicated a lead concentration of 3,665 ppm at SB-L9-8210-05		1	1											1	1	SVOCs, Metals		Metals (5-8E & 5-21D), SVOCs (5-8B & 5-21B)
M10-1	3	Unknown	Old building with cement footers, an old stack, a drum, and steel siding as debris.	SB-M10-1-01 through SB-M10-1-05	SB-M10-1-02 SB-M10-1-04	Sampling location SB-M10-1-02 was determined using professional judgement;Screening results did not warrant biased sampling. A confirmation sample was collected at SB-10-1-04.		2	2		2	2	2							1	1	Metals	E&E	Metals (5-8E & 5-21D), E&E (5-8C & 5-21C)
M10-2	10	Electrical Transformer	Transformer at base of pole; Corroded but intact, possible S.V. at base of pole	SB-M10-2-01	SB-M10-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
M10-2262/ B41-6/ B41-7	3	Curing House/ B11-6/B41-7	Building demolished, area has been covered with aggregate; No evidence of a release	SB-M10-2262-01 through SB-M10-2262-05	SB-M10-2262-05 SB-M10-2262-04	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-M10-2262-05. A confirmation sample was collected at SB-M10-2262-04. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1		SVOCs	SVOCs (5-8B & 5-21B)
M10-2315	3	Vacuum House	Building has been removed, broken concrete foundations remain. No evidence of release (area=100 sq ft).	SB-M10-2315-01 through SB-M10-2315-04	SB-M10-2315-02	Sampling location was determined using XRF screening; Results indicated a copper concentration of 1,600 ppm at SB-M10-2315-02		1	1											1	1	Metals		Metals (5-8E & 5-21D)
M10-4	9	Stressed Vegetation	Stressed vegetation near location of former toilet; Some foundation debris and brick present; Gray-green color (area=100 sq ft)	SB-M10-4-01 through SB-M10-4-03	SB-M10-4-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1			
M10-6	3	Unknown	Building demolished, only concrete footer and surrounding; berm indicate building location; Empty drum and bucket present; No evidence of a release	SB-M10-6-01 through SB-M10-6-05	SB-M10-6-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals		Metals (5-8E & 5-21D)
M10-7	1	B-Line Halfway Dock	Wooden construction with no walls (only roof and floor); No evidence of a release	SB-M10-7-01 through SB-M10-7-04	SB-M10-7-02 SB-M10-7-03	Sampling location SB-M10-7-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M10-7-03.					2	2	2							1	1	E&E		E&E (5-8C & 5-21C)
M10-724	4	Solvent Recovery and W. Dry House	Indication of former building removed; Location determined from historic maps; No evidence of release, however stained soil M10-4 is adjacent	SB-M10-724-01 through SB-M10-724-03	SB-M10-724-01 SB-M10-724-03	Sampling location SB-M10-724-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M10-724-03.	2	2	2		2	2	2						1	1	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
M10-8	10	Electrical Transformer	Older with black colored housing, some discoloration to gray. No stressed soil below, no evidence of release.	SB-M10-8-01	SB-M10-8-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
M10-B14	4	Toilet	Building demolished, currently overgrown with vegetation; Location determined from historical maps; Adjacent stressed vegetation	SB-M10-B14-01 through SB-M10-B14-03	SB-M10-B14-01 SB-M10-B14-02	Sampling location SB-M10-B14-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M10-B14-02.		2	2											1	1			
M11-3	3	Unknown	Building demolished, four wooden posts at corners debris on E side. No evidence of a release (area=500 sq ft).	SB-M11-3-01 through SB-M11-3-04	SB-M11-3-02 SB-M11-3-03	Sampling location SB-M11-3-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M11-3-03.		2	2		2	2	2							1	1	Metals, SVOCs		Metals (5-8E & 5-21D), SVOCs (5-8B & 5-21B)

Table 2-8

B-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
M8-2	3	Unknown	Cement foundation with four concrete footers and leftover bricks; Building probably associated with adjacent cabinet dryer. No evidence of a release.	SB-M8-2-01 through SB-M8-2-05	SB-M8-2-05	Sampling location was determined using XRF screening; Results indicated a lead concentration of 431 ppm at SB-M8-2-05		1	1		1	1	1							1	1	Metals	SVOCs	Metals (5-8E & 5-21D), SVOCs (5-8B & 5-21B)
M8-2196	3	Cabinet Dryers	Complex building that housed three cabinet dryers. Three loading areas to the S. Two stressed vegetation areas to the N. Foundations and loading area are intact and all that remain.	SB-M8-2196-01 through SB-M8-2196-08	SB-M8-2196-03 SB-M8-2196-07 SB-M8-2196-08	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling					3	3	3							1	1		E&E	E&E (5-8C & 5-21C)
M8-3	3	Concrete Pad	Cement pad associated with adjacent cabinet dryer. There is some melted aluminum on the pad and an old steam trap. No evidence of a release.	SB-M8-3-01 through SB-M8-3-05	SB-M8-3-01 SB-M8-3-02	Sampling location SB-M8-3-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M8-3-02.		2	2											1	1			
M9-2191	3	Former Rocket House	Building has been completely removed. Only a cut out portion of slope and a steam pipe junction remain. Minor debris remains. No evidence of a release.	SB-M9-2191-01 through SB-M9-2191-05	SB-M9-2191-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals		Metals (5-8E & 5-21D)
M9-2192	3	Cabinet Dryers 40,41,42	Loading dock and concrete footers remain. Line of steel supports lead to dock from near concrete footers. Stressed vegetation on N corner leading away from footers.	SB-M9-2192-01 through SB-M9-2192-06	SB-M9-2192-03 SB-M9-2192-05 SB-M9-2192-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling					3	3	3							1	1	E&E		E&E (5-8C & 5-21C)
M9-2193	3	Cabinet Dryers 43,44,45	Loading dock and concrete footers remain; Loading areas on SW loading dock; Stressed vegetation on N corner	SB-M9-2193-01 through SB-M9-2193-06	SB-M9-2193-01 SB-M9-2193-05 SB-M9-2193-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling					3	3	3							1	1	E&E		E&E (5-8C & 5-21C)
M9-2251	3	Solvent Prep House	Only one footer remains with no other evidence of a building; No evidence of a release (area=500 sq ft)	SB-M9-2251-01 through SB-M9-2251-04	SB-M9-2251-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1											1	1	SVOCs		SVOCs (5-8B & 5-21B)
M9-2254	3	A.C. House	Only concrete pad remains on the NE side of M09-2193; No evidence of a release (area=100 sq ft)	SB-M9-2254-01 through SB-M9-2254-03	SB-M9-2254-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	SVOCs		SVOCs (5-8B & 5-21B)
M9-2261	7	Catch Tank House	Building has been removed, only flat area with some reinforcing rod and electrical conduit remain. No evidence of a release.	SB-M9-2261-01 through SB-M9-2261-04	SB-M9-2261-01 SB-M9-2261-02	Sampling location SB-M9-2261-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M9-2261-02.		2			2	2	2							1	1	SVOCs		SVOCs (5-8B & 5-21B)
M9-2292	4	Waste Powder Shed	Building has been completely removed; Location based on historical map and topography; No evidence of a release	SB-M9-2292-01 through SB-M9-2292-03	SB-M9-2292-01 SB-M9-2292-02	Sampling location SB-M9-2292-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M9-2292-02.					2	2	2							1	1			
M9-3	3	Unknown	Building demolished, concrete footer with rebar protruding; No evidence of a release (area=100 sq ft)	SB-M9-3-01 through SB-M9-3-03	SB-M9-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	SVOCs		SVOCs (5-8B & 5-21B)
M9-5	3	Unknown	Concrete footer with cast-in-place metal square in center; No evidence of a release (area=100 sq ft)	SB-M9-5-01 through SB-M9-5-03	SB-M9-5-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1							1	1			
M9-8151	4	Unknown	Building has been completely removed; Location based on historical map and topography; No evidence of a release	SB-M9-8151-01 through SB-M9-8151-03	SB-M9-8151-02 SB-M9-8151-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-M09-8151-03.	2	2			2	2	2							1	1			
N8-2304	3	Utility House	Old steel sided building with stained soil at the W corner. Multiple electrical conduit lines, a steam line, steam sump, and instrument control panel.	SB-N8-2304-01 through SB-N8-2304-05	SB-N8-2304-01 SB-N8-2304-05	Sampling locations were determined using an Expray Test Kit. Group B E&E materials were detected at SB-N8-2305-01/05 Analytical results did not detect elevated E&E concentrations.	2	2			2	2	2							1	1	SVOCs		SVOCs (5-8B & 5-21B)
N9-1	10	Electrical Transformer	Transformer at base of pole. Intact but possible S.V. at base of pole.	SB-N9-1-01	SB-N9-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
N9-2195	3	Former Rocket House	Only cut-out of the berm, an air compressor, and old pipe remain. Possibility of some stained soil near pipe. Insulation and sand also present on ground.	SB-N9-2195-01 through SB-N9-2195-06	SB-N9-2195-02 SB-N9-2195-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2			2	2	2							1	1	SVOCs	E&E	E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
N9-2260	4	Unknown	Building has been completely removed; Location based on historical map and topography; No evidence of a release	SB-N9-2260-01 through SB-N9-2260-03	SB-N9-2260-01	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1							1	1	SVOCs		SVOCs (5-8B & 5-21B)
N9-2267	1	Glaze/Screen House	Two story steel sided building with a great deal of electrical conduit. Three loading docks and an wood supported earthen berm in W corner. No evidence of a release.	SB-N9-2267-01 through SB-N9-2267-05	SB-N9-2267-03 SB-N9-2267-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2			2	2	2							1	1	SVOCs, E&E		E&E (5-8C & 5-21C), SVOCs (5-8B & 5-21B)
N9-2269	1	Control House	Small concrete foundation with steel siding; No evidence of a release	SB-N9-2269-01 through SB-N9-2269-04	SB-N9-2269-04	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-N9-2269-04	1	1			1	1	1							1	1	SVOCs		SVOCs (5-8B & 5-21B)
N9-3	3	Former Rocket House	Building has been removed. All that remains is six standing cement footers and two toppled footers. No evidence of release (area=300 sq ft).	SB-N9-3-01 through SB-N9-3-05	SB-N9-3-05 SB-N9-3-04	Sampling location SB-N9-3-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N9-3-04.	2	2			2	2	2							1	1			
N9-B4	3	Glaze/Screen Scrap Shed	All that remains is a cement foundation; Building once received steam from main steam line; No evidence of a release (area=500 sq ft)	SB-N9-B4-01 through SB-N9-B4-04	SB-N9-B4-04 SB-N9-B4-01	Sampling location SB-N9-B4-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N9-B4-01.	2	2												1	1			
N9-B4-11	3	Unknown	All that remains is a partial concrete foundation and a slight berm. No evidence of a release.	SB-N9-B4-11-01 through SB-N9-B4-11-05	SB-N9-B4-11-05 SB-N9-B4-11-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-N9-B4-11-05. A confirmation sample was collected at SB-N9-B4-11-03. Analytical results did not detect E&E concentrations	2	2			2	2	2							1	1			
N9-B41-10	3	Unknown	Small building adjacent to N09-2195. All that remains is a partial cement foundation and steel siding. No evidence of a release (area=200 sq ft).	SB-N9-B41-10-01 through SB-N9-B41-10-03	SB-N9-B41-10-03 SB-N9-B41-10-01	Sampling location SB-N9-B41-10-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N9-B41-10-01.	2	2			2	2	2							1	1			
O7-2271/2272	2	X-Ray/Rest House	Buildings within one earthen covered structure; Entrances on opposite sides; No evidence of a release	SB-O7-2271-01 through SB-O7-2271-04	SB-O7-2271-04 SB-O7-2271-02	Sampling location SB-O7-2271-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-2271-02.	2	2			2	2	2							1	1			
O8-2247	3	Cast Area Pack House	Concrete foundation sided with rusted steel which has discolored adjacent soil. Asbestos steam line enters building on E side. Loading dock in SW corner, loading door in NE.	SB-O8-2247-01 through SB-O8-2247-06	SB-O8-2247-04 SB-O8-2247-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2			2	2	2							1	1			
O8-2252	1	A.C. House	Cement slab used to house an air conditioner, duct evidence; No evidence of release	SB-O8-2252-01 through SB-O8-2252-04	SB-O8-2252-02 SB-O8-2252-01	Sampling location SB-O8-2252-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O8-2252-01.	2	2												1	1			

Table 2-8

B-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
O8-2268	3	Container Storage	Building has been completely removed, several footers remain. No evidence of release.	SB-O8-2268-01 through SB-O8-2268-05	SB-O8-2268-05 SB-O8-2268-01	Sampling location SB-O8-2268-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-08-2268-01.		2	2											1	1			
O8-2274/ 2270/2273	2	X-Ray House	Earthen covered structure houses three buildings. Asbestos covered steam pipe on S side, small pad on N corner. No evidence of a release.	SB-O8-2274-01 through SB-O8-2274-04	SB-O8-2274-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	SVOCs		SVOCs (5-8B & 5-21B)
O8-4	3	Unknown Foundation	Small cement pad with an unknown use; No evidence of a release (area=300 sq ft)	SB-O8-4-01 through SB-O8-4-03	SB-O8-4-02 SB-O8-4-01	Sampling location SB-O8-4-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O8-4-01.		2	2		2	2	2							1	1			
O8-5	6	Septic Tank	Minimal evidence of former septic tank. Location determined from map. No evidence of a release.			Septic Tank could not be located, no evidence of tank exists																		

Notes:
All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
AOC = Area of Concern
XRF = X-ray Fluorescence
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector
TOC and GRAIN SIZE collected at each AOC

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
Sq Ft = Square Foot
No. = Number

* = AOC reserved for RI due to presence of contamination
** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

All screening samples were evaluated for VOCs, Metals, and E&E compounds

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

AOC Type
1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

Table 2-9

A-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
E10-11	8	A-Line Acetone Pipeline	Acetone feed to bldg 2169 from A-Line acetone piping; No evidence of release			Pipeline removed, no evidence of release, therefore no samples were collected																		
E10-20	8	Catch Tank Discharge Pipe	A 3" PVC pipe encased in fiberglass pipe runs from E10-2288; A 3" PVC pipe runs from F10-12; Both pipes unite and enter ground; No evidence of release	SB-E10-20-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of pipe. No positive detections were found using an Expray test kit.														1	1			
E10-2097/2098/2099	1,7	Premix House # 1	Wooden construction over concrete block foundation; catch tank to rear-floor drains lead into it; loading area to NW; walkway to 2169; internal controls to separator tank, neutralizer, flush tank.	SB-E10-2097-01 through SB-E10-2097-12	SB-E10-2097-02 SB-E10-2097-07	Sampling location SB-E10-2097-07 was determined using professional judgement. Group B E&E materials were detected at SB-E10-2097-02 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1			
E10-2101/ 2102/2103	1,7	Premix House # 2	Wooden and concrete block foundation; alcohol feed (2101); Floor drains to Catch Tank House (2289)	SB-E10-2101-01 through SB-E10-2101-12	SB-E10-2101-05 SB-E10-2101-12	Group B E&E materials were detected at SB-E10-2101-05 and SB-E10-2101-12 using an Expray Test Kit		2	2		2	2	2							1	1	SVOCs	E&E	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
E10-2101C	1,8	Unknown	Wooden and steel construction with sheet metal second floor gutter from 2098 enters W corner; stainless steel tank present on first floor W side; No evidence of release	SB-E10-2101C-01 through SB-E10-2101C-05	SB-E10-2101C-01 SB-E10-2101C-05	Sampling location SB-E10-2101C-01 was determined using professional judgement. Group B E&E materials were detected at SB-E10-2101C-05 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1			
E10-2159	1	Heater House	Wooden construction over concrete foundation; steam pipe enters SE corner; steam pipe vent along W side; minor area, 5' x 5' of reduced vegetation	SB-E10-2159-01 through SB-E10-2159-05	SB-E10-2159-02 SB-E10-2159-05	Group B E&E materials were detected at SB-E9-2159-02 and SB-E9-2159-05 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1			
E10-2160	1	Heater House	Wooden construction over concrete foundation; area of stressed vegetation on NW side leading to adjacent stream.	SB-E10-2160-01 through SB-E10-2160-05	SB-E10-2160-03 SB-E10-2160-05	Sampling location SB-E10-2160-05 was determined using professional judgement. Group B E&E materials were detected at SB-E10-2160-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		2	2		1	1	1							1	1			
E10-2288	1,7	Catch Tank House	6' diameter catch tank from E10-2198; gutter collected from floor drains of 2098; gutter leads out to F10-12	SB-E10-2288-01 through SB-E10-2288-05	SB-E10-2288-03 SB-E10-2288-05	Group B E&E materials were detected at SB-E9-2288-03 using an Expray Test Kit A confirmation sample was taken at SB-E10-2288-05. Analytical results did not detect elevated E&E concentrations.		2			2	2	2							1	1			
E10-23	8	NG Gutters	Two gutters;one flows out of F10-12 and ends just S of the catch tank house; other flows out of 2098 downhill to F10-12; identical path along upper gutter until lower gutter bends just S of Catch Tank House. No evidence of release.			Gutter removed, no evidence of release, therefore no samples were collected																		
E10-606	4	Unknown	Bldg demolished-minimal evidence of former bldg; area currently paved over. No evidence of release (area=100 sq ft).	SB-E10-606-01 through SB-E10-606-03	SB-E10-606-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
E10-615	3	Unknown	Bldg demolished-only portions of former foundation remains; No evidence of release (area=400 sq ft)	SB-E10-615-01 through SB-E10-615-04	SB-E10-615-04	Group B E&E materials were detected at SB-E10-615-04 using an Expray Test Kit		1	1		1	1	1							1	1	SVOCs, E&E		SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
E10-A1	3	Breaker Scrap Shed	Bldg demolished -only gravel area remains; No evidence of release (area=100 sq ft)	SB-E10-A1-01 through SB-E10-A1-03	SB-E10-A1-02	Group B E&E materials were detected at SB-E10-A1-02 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		1	1		1	1	1							1	1			
E10-PA12	7	Waste Water Pit	4' diameter wastewater collection sump; fiberglass pipe enters ground on SE side. No evidence of release.	TP-E10-PA12-01	TP-E10-PA12-01	Test Pit location placed downgradient from sump	1	1			1	1	1							1	1			
E9-1	1	Store House	Wooden construction over concrete block; seven loading; doors on SE and NW sides; stressed vegetation leads to culvert on SE side of bldg.			This AOC has been referred to the Remedial Investigation due to the presence of energetics																E&E*		E&E (5-9C & 5-22C)
E9-2	7	Unknown Containment Pad	Concrete pad with 4' high containment around perimeter; Stainless steel piping to SE; No evidence of release	SB-E9-2-01 through SB-E9-2-04	SB-E9-2-03 SB-E9-2-01	Group B E&E materials were detected at SB-E9-2-03 using an Expray Test Kit. A confirmation sample was collected at SB-E9-2-01		2	2		2	2	2							1	1		E&E	E&E (5-9C & 5-22C)
E9-2119	1	Dry House	Wooden construction over concrete foundation; rail line; loading area on NW side; two steam pipe outlets on SE side; No evidence of release			This AOC has been referred to the Remedial Investigation due to the presence of powder on the ground																E&E*		E&E (5-9C & 5-22C)
E9-2153	1	Unknown Name	Corrugated metal over wooden structure built on concrete; foundation; conduit leads to 2119; electrical controls present; inside; possible second control house adjacent to F8-6; No evidence of release	SB-E9-2153-01 through SB-E9-2153-04	SB-E9-2153-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals		Metals (5-9E & 5-22D)
E9-2161	3	Poacher House	Bldg demolished-concrete footers remain; No evidence of release	SB-E9-2161-01 through SB-E9-2161-05	SB-E9-2161-04	Group B E&E materials were detected at SB-E9-2161-04 using an Expray Test Kit		1	1		1	1	1							1	1	SVOCs, E&E		SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
E9-2296	1,7	Slurry Coat House	Wooden and fiberglass construction over concrete foundation Octagonal tank support at N corner; sump at W corner; multiple loading areas; Sump associated with the building. No evidence of release	SB-E9-2296-01 through SB-E9-2296-08 TP-E9-2296-09	SB-E9-2296-04 SB-E9-2296-05 SB-E9-2296-06 SB-E9-2296-07 TP-E9-2296-09	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling Test Pit location placed downgradient from the sump		5	4		5	5	5							2	2		E&E	E&E (5-9C & 5-22C)
E9-2296A	5	Unknown Tank	Probable air receiver tank; tag on tank (1961) lists tank as "formerly spent acid"; air vent on bottom NW side; discolored soil underneath NW side	SB-E9-2296A-01 through SB-E9-2296A-03	SB-E9-2296A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1			
E9-2296B	1	Slurry Coat Chiller Shed	Recently constructed-wooden shed with asphalt roof built on concrete block; piping removed; No evidence of release (area=100 sq ft)	SB-E9-2296B-01 through SB-E9-2296B-04	SB-E9-2296B-03 SB-E9-2296B-04	Sampling location SB-E9-2296B-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E9-2296B-04		2	2											1	1			
E9-2296C	5	Recycling Tank	Concrete pad formerly held a recycling tank; tank removed; Former connections to 2" steel pipes evident No evidence of release	SB-E9-2296C-01 through SB-E9-2296C-04	SB-E9-2296C-01	Group B E&E materials were detected at SB-E9-2296C-01 using an Expray Test Kit SVOCs were not analyzed but should have been. Analytical results did not detect elevated E&E concentrations.	1	1			1	1	1							1	1			
E9-2296D	1	Control House	Concrete bldg; conduit leads away to bldg 2337, slurry coat house; No evidence of release	SB-E9-2296D-01 through SB-E9-2296D-04	SB-E9-2296D-01 SB-E9-2296D-03	Group B E&E materials were detected at SB-E9-2296D-01 using an Expray Test Kit. A confirmation sample was collected at SB-E9-2296D-03. Analytical results did not detect elevated E&E concentrations.		2	2		1	1	1							1	1			

Table 2-9

A-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
E9-2297	3	Unknown	Bldg demolished-concrete footers remain; No evidence of release	SB-E9-2297-01 through SB-E9-2297-04	SB-E9-2297-02	Group B E&E materials were detected at SB-E9-2297-02 using an Expray Test Kit		1	1		1	1	1							1	1	Metals	E&E	Metals (5-9E & 5-22D), E&E (5-9C & 5-22C)
E9-2337	1	100-ft Dryer	Wood construction over concrete block; steam process water line leads to SE. No evidence of a release.			This AOC has been referred to the Remedial Investigation due to the presence of powder on the ground																E&E*		E&E (5-9C & 5-22C)
E9-556	3	Cotton Blend	Bldg demolished-only concrete foundation remains; No evidence of release (area=300 sq ft)	SB-E9-556-01 through SB-E9-556-04	SB-E9-556-04	Group B E&E materials were detected at SB-E9-556-04 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		1	1		1	1	1							1	1			
E9-558B	3	Dehydrator Press	Bldg demolished-minor amounts of concrete and rubble present outline of foundation evident. No evidence of a release (area=100 sq ft).	SB-E9-558B-01 through SB-E9-558B-03	SB-E9-558B-03	Group B E&E materials were detected at SB-E9-558B-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		1	1		1	1	1							1	1	Metals		Metals (5-9E & 5-22D)
E9-560	3	Block Breaker	Bldg demolished; E corner foundation evident; No evidence of release (area=100 sq ft)	SB-E9-560-01 through SB-E9-560-03	SB-E9-560-03	Group B E&E materials were detected at SB-E9-560-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		1	1		1	1	1							1	1			
E9-562	3	AL Mixing House	Bldg demolished-minimal evidence of former bldg; No evidence of release (area=100 sq ft)	SB-E9-562-01 through SB-E9-562-03	SB-E9-562-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals		Metals (5-9E & 5-22D)
E9-6	1,10	Control House	Recent construction-aluminum siding over wood with concrete foundation; electrical controls present inside; transformer pair on SW side. No evidence of a release.	SB-E9-6-01 through SB-E9-6-04	SB-E9-6-01 SB-E9-6-03 SB-E9-6-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		3	3	2										1	1			
E9-610	3	Unknown	Bldg demolished-only concrete foundation and footers remain; No evidence of release	SB-E9-610-01 through SB-E9-610-05	SB-E9-610-04	Group B E&E materials were detected at SB-E9-610-04 using an Expray Test Kit		1	1		1	1	1							1	1	SVOCs, Metals**, E&E		SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
E9-A7	4	Cont. Dryer Scrap Shed	Bldg demolished; former evidence removed; No evidence of a release (area=100 sq ft)	SB-E9-A7-01 through SB-E9-A7-03	SB-E9-A7-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
F08-7	7	Unknown Name	Unknown pit or culvert; Steel plate over sandy sides-no concrete block present; No evidence of release			Pit determined to be hydraulic access pit, no evidence of release, therefore no samples taken																		
F10-11	9	Molten Lead in Soil	Small piles of molten lead in soil (area=100 sq ft)	SB-F10-11-01 through SB-F10-11-02	SB-F10-11-01	Group B E&E materials were detected at SB-F10-11-01 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.			1		1	1	1							1	1	Metals		Metals (5-9E & 5-22D)
F10-18	8	Alcohol/Acetone Feed Line	Runs along A Line; dual feeds which lead to bldgs from two tank storage areas: F10-9116/G9-9107 No evidence of release			Pipeline removed, no evidence of release, therefore no samples were collected																		
F10-2094	1,7	NC Weigh House	Wooden construction over concrete foundation-loading area on SE side; new floor drain on NW side routed to adjacent culvert to WWTP. No evidence of release.			This AOC has been referred to the Remedial Investigation due to the presence of powder on the ground																E&E		E&E (5-9C & 5-22C)
F10-2096	1,5,7	Cotton Dehy Press	Foundation; floor drains drain to NE corner; pit A10-PVC pipe drain enters ground at NE corner; brick separation wall in center; tank cradles on NW side (storage tank removed). No evidence of release.	SB-F10-2096-01 through SB-F10-2096-08	SB-F10-2096-06 SB-F10-2096-07 SB-F10-2096-08	Group B E&E materials were detected at SB-F10-2096-06/07/08 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		3	3		3	3	3							1	1	Metals, SVOCs	E&E	Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F10-21	7	Concrete Sumps	Concrete sump with float switch, electrical alternator; piping leads from pumps into ground at W corner No evidence of release	SB-F10-21-01	SB-F10-21-01	Test Pit loacation was placed downgradient from the sump		1			1	1	1							1	1			
F10-2145	1	Heater House	Wooden construction over concrete foundation; 1' x 2' duct to 2094. No evidence of release.	SB-F10-2145-01 through SB-F10-2145-04	SB-F10-2145-01 SB-F10-2145-04	Sampling location SB-F10-2145-04 was determined using XRF screening; Results indicated a lead concentration of 416 ppm at SB-F10-2145-04 Group B E&E materials were detected at SB-F10-2145-01 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		1	1		1	1	1							1	1	SVOCs	E&E	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F10-2162	1	Caustic Storage	Small corrugated sheet metal and wooden construction over concrete foundation; indicated on front as caustic-strong alcohol	SB-F10-2162-01 through SB-F10-2162-04	SB-F10-2162-04 SB-F10-2162-02	Sampling location SB-F10-2162-04 was determined using XRF screening; Results indicated an lead concentration of 1442 ppm. A confirmation sample was collected at SB-F10-2162-02. Analytical results did not detect elevated metal concentrations.	2		1										1	1	1	1			
F10-2222	1	Alcohol Still House	Five story still house-wood and corrugated sheet metal over concrete foundation; weak and strong alcohol feed lines enter rear of bldg catch tank at S corner; No evidence of release	SB-F10-2222-01 through SB-F10-2222-04	SB-F10-2222-01 SB-F10-2222-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2													1	1	VOCs		VOCs (5-9A & 5-22A)
F10-2289	1,7	Catch Tank House	Corrugated sheet metal and wood construction over concrete foundation; gutter from 2101; No evidence of release	SB-F10-2289-01 through SB-F10-2289-04	SB-F10-2289-01	Group B E&E materials were detected at SB-F10-2289-01 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		1			1	1	1							1	1			
F10-2323	1	Heater House	Wooden construction; steam pipe vents on S side to 7" diameter area of stressed vegetation; concrete foundation.	SB-F10-2323-01 through SB-F10-2323-05	SB-F10-2323-02 SB-F10-2323-05	Sampling location SB-F10-2323-05 determined using professional judgement; Group B E&E materials were detected at SB-F10-2323-02 using and Expray Test Kit		2	2		2	2	2							1	1	Metals	E&E	Metals (5-9E & 5-22D), E&E (5-9C & 5-22C)
F10-2356	1,7	NC Block Breaker	Concrete constructed breaker house-concrete floors and walls; Two associated control houses with >7 lines of conduit running from each bldg; floor drains drain to sump at SW loading area; No evidence of a release	SB-F10-2356-01 through SB-F10-2356-12	SB-F10-2356-04 SB-F10-2356-06 SB-F10-2356-07 TP-F10-2356-12	Sampling location SB-F10-2356-04 determined using professional judgement; Group B E&E materials were detected at SB-F10-2356-06/07 using and Expray Test Kit. Test Pit location downgradient from sump. Analytical results did not detect elevated E&E concentrations.		4	3		4	4	4							2	2			
F10-2356A	4	NC Block Breaker Control Room	Control Room associated with Block Breaker House; Location determined from historical maps			This AOC has been sampled as part of F10-2356																		
F10-3	5	Tank Cradles	Concrete tank cradles-60% on S side mounted on concrete pad; 40% on N end not mounted on concrete pad; 6" pipe with valve at end extends out of ground; concrete catch pit also present; No evidence of release	SB-F10-3-01 through SB-F10-3-07	SB-F10-3-01 SB-F10-3-07	Sampling location SB-F10-3-01 was determined using professional judgement; Sampling location SB-F10-3-07 was determined using E&E screening; Group B E&E materials were detected at SB-F10-3-07	2	2			1	1	1							1	1	SVOCs, E&E		SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F10-4	7	Waste Water Pit	Recently installed concrete block culverts with 12" corrugated pipe storm drains; connects path from PA6 to PA9; water becomes orange-red downstream of former tank storage area.			Pit to be sampled during surface water and sediment sampling phase																		

Table 2-9

A-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
F10-460	3	Unknown	Bldg demolished-minimal evidence of former bldg; No evidence of release (area=100 sq ft)	SB-F10-460-01 through SB-F10-460-03	SB-F10-460-01	Sampling location SB-F10-460-01 was determined using XRF screening; Results indicated an lead concentration of1,690 ppm at SB-F10-460-01		1	1		1	1	1							1	1	Metals		Metals (5-9E & 5-22D)
F10-462	3	Dehydration House	Bldg demolished-evidence largely destroyed; No evidence of release (area=100 sq ft)	SB-F10-462-01 through SB-F10-462-03	SB-F10-462-01	Group B E&E materials were detected at SB-F10-462-01 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		1	1		1	1	1							1	1			
F10-464	3	Dehydration House	Bldg demolished-only concrete foundation remains; 2 -3" diameter pipes extend into foundation at SW corner. No evidence of release.	SB-F10-464-01 through SB-F10-464-05	SB-F10-464-01 SB-F10-464-05	Group B E&E materials were detected at SB-F10-464-01/05 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1			
F10-5	1	Solvent Recovery Air Dryer Shed	Currently empty; wooden construction; 1" pipe enters E side exits on W. No evidence of a release.	SB-F10-5-01 through SB-F10-5-03	SB-F10-5-01	Group B E&E materials were detected at SB-F10-5-01 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	1				1	1	1							1	1			
F10-7	9	Stressed Vegetation	Gray-brown discolored soil between cotton weigh house and 9116 tank storage area; very soft consistency; adjacent wet area (area=100 sq ft)	SB-F10-7-01 through SB-F10-7-03	SB-F10-7-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1									1	1	1	Metals		Metals (5-9E & 5-22D)
F10-8	1	Control House	Small wooden house over concrete foundation; >15 conduit lines lead in from 2356; small empty wooden shed on SE side. No evidence of release.	SB-F10-8-01 through SB-F10-8-04	SB-F10-8-01 SB-F10-8-04	Sampling location SB-F10-8-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F10-8-04		2	2										1	1			
F10-8237	1,5	Process Control Center	Wooden and corrugated sheet metal construction-office bldg, computers present; storage shed off N corner with tank cradles present-tank removed. Septic tank associated with the building. No evidence of release.	SB-F10-8237-01 through SB-F10-8237-07 TP-F10-8237A-01	SB-F10-8237-04 SB-F10-8237-05 TP-F10-8237A-01	Group B E&E materials were detected at SB-F10-8237-04/05 using an Expray Test Kit Test Pit location downgradient from septic	1	3	2		2	2	2							2	2		E&E	E&E (5-9C & 5-22C)
F10-8274	3	Pump House	Bldg demolished-concrete pad and associated piping remains; small catch cylinder present on S side No evidence of release	SB-F10-8274-01 through SB-F10-8274-04	SB-F10-8274-02 SB-F10-8274-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1			
F10-8564	1,5	Chlorinator House # 3	Concrete block construction; chlorine feed line from adjacent F10-8569. No evidence of release.	SB-F10-8564-01 through SB-F10-8564-04	SB-F10-8564-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
F10-8569	1,5	Chlorinator Feed House	Wooden storage shed; chlorinator feed to 8564; one of four tanks indicated as leaking.	SB-F10-8569-01 through SB-F10-8569-04	SB-F10-8569-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
F10-9	10	Transformer	Black housing with some brown discoloration towards the bottom. No evidence of release.	SB-F10-9-01	SB-F10-9-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
F10-PA8	7	Waste Water Pit	Collection sump with associated float switches, pumps, and piping steel tank cast in concrete; wastewater odor; piping enters from tank storage area and powerhouse area; No evidence of release	SB-F10-PA8-01	SB-F10-PA8-01	Test Pit location placed between F10-PA8 and F10-PA9. Labeled F10-PA8	1				1	1	1							1	1		E&E SVOCs	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F10-PA9	7	Waste Water Pit	Collection sump; 6" stainless pipe enters from PA8; fiberglass pipe exits-enters adjacent culvert; float switches, pumps present			Test Pit location placed between F10-PA8 and F10-PA9. Sampled as F10-PA8																		
F11-2016	1	Can Pack House	Sections of different construction- brick, wood, wood covered with corrugated sheet metal; loading area on SW side; heater unit and AC unit on NW side; no piping evident; No evidence of release	SB-F11-2016-01 through SB-F11-2016-08	SB-F11-2016-01 SB-F11-2016-06 SB-F11-2016-07	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	3	3			3	3	3							1	1		E&E, SVOCs	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F8-1	3	Unknown	Bldg demolished; corners of foundation evident the rest covered by soil; 4" pipe into ground at S corner. No evidence of release.	SB-F8-1-01 through SB-F8-1-06	SB-F8-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1							1	1			
F8-11	8	Process Water/Slurry Lines	Stainless steel process water lines; labeled "slurry lines" from E9-2296 to E9-2338 and "process lines" from E9-2338 to F8-2107 Discharged to a catch box.			Pipeline removed, no evidence of release, therefore no samples were collected																		
F8-2	3	Unknown	Bldg. demolished; old concrete foundations evident in S and E; remainder covered by soil; sheet metal debris present possibly due to adjacent F8-2117	SB-F8-2-01 through SB-F8-2-05	SB-F8-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1							1	1			
F8-2107	1,7	Finishing Press (5-House Area)	Wooden and corrugated sheet metal construction with concrete foundation and interior concrete wall partitions; floor drain runs along NW side; uncovered heater equipment on NW side; loading area on SE side; No evidence of release	SB-F8-2107-01 through SB-F8-2107-05	SB-F8-2107-01 SB-F8-2107-02 SB-F8-2107-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	3	3			3	3	3							1	1	SVOCs	E&E	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F8-2116	1	Dry House	Wooden construction with sheet metal lined doors and walls; Rail loading area on W side; concrete foundation; No evidence of release	SB-F8-2116-01 through SB-F8-2116-10	SB-F8-2116-03 SB-F8-2116-07 SB-F8-2116-09 SB-F8-2116-10	Sampling locations SB-F8-2116-09/10 were determined using XRF screening; Results indicated a copper concentration of 842 ppm at SB-F8-2116-09 and a lead concentration of 543 ppm at SB-F8-2116-10. Group B E&E materials were detected at SB-F8-2116-03/07 using an Expray Test Kit	2	2			2	2	2							1	1	Metals	E&E SVOCs	Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F8-2117	1	Dry House	Bldg demolished-concrete rubble, charred timbers, beams, and metal debris remains; layer of green anti-static material evident beneath former floor; appears explosion occurred here; No evidence of release, but debris very scattered	SB-F8-2117-01 through SB-F8-2117-10	SB-F8-2117-07 SB-F8-2117-08	Sampling location SB-F8-2117-07 was determined using XRF screening; Results indicated an arsenic concentration of 153 ppm at SB-F8-2117-07 Group B E&E materials were detected at SB-F8-2117-08 using an Expray Test Kit	1	1			1	1	1							1	1	Metals	E&E	Metals (5-9E & 5-22D), E&E (5-9C & 5-22C)
F8-2118	1,7	Dry House	Wood and corrugated metal over concrete foundation; concrete with wooden rail loading area on NW side; additional loading area to SE side; floor drains lead to catch tank through concrete gutter; catch tank at W corner (Catch tank sampled and removed during Single Phase Remediation effort). No evidence of release.	SB-F8-2118-01 through SB-F8-2118-10	SB-F8-2118-02 SB-F8-2118-10	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	2	2			2	2	2							1	1	Metals	E&E SVOCs	Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)

Table 2-9

A-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
F8-2144	1,7	Heater Pad	Concrete pad with heater equipment and appurtenances; no housing for equipment; drainage leads to adjacent culvert; stressed vegetation along drainage path to culvert	SB-F8-2144-01 through SB-F8-2144-06	SB-F8-2144-03 SB-F8-2144-04 SB-F8-2144-06	Sampling locations SB-F8-2144-03/06 were determined using XRF screening; Results indicated a lead concentration of 421 ppm at SB-F8-2144-03 and 1,732 at SB-F8-2144-06. Group B E&E materials were detected at SB-F8-2144-04 using an Expray Test Kit		2	2		1	1	1							1	1	Metals	E&E	Metals (5-9E & 5-22D), E&E (5-9C & 5-22C)
F8-2150	1	Heater House	Wooden construction with corrugated sheet metal over concrete foundation; stressed vegetation leads from steam pipes which protrude from S corner-area extends past RR line on SE side of G8-2116	SB-F8-2150-01 through SB-F8-2150-05	SB-F8-2150-02 SB-F8-2150-05	Sampling location SB-F8-2150-02 was determined using professional judgement; Sampling location SB-F8-2150-05 was determined using XRF screening; Results indicated a lead concentration of 719 ppm at SB-F8-2150-05		2	2											1	1	Metals		Metals (5-9E & 5-22D)
F8-2151	1	Heater House	Wooden and corrugated steel covering over concrete foundation; large footers inside for supporting mechanical equipment; stressed vegetation to NE and E of bldg	SB-F8-2151-01 through SB-F8-2151-06	SB-F8-2151-01 SB-F8-2151-06	Sampling location SB-F8-2151-06 was determined using professional judgement; Sampling location SB-F8-2151-01 was determined using XRF screening; Results indicated a copper concentration of 1,235 ppm at SB-F8-2151-01. Analytical results did not detect elevated metal concentrations.		2	2											1	1			
F8-2152	1	Control/Heater House	Small control house next to heater mounted on steel I-beam; No evidence of release	SB-F8-2152-01 through SB-F8-2152-04	SB-F8-2152-02	Sampling location was determined using XRF screening; Results indicated a zinc concentration of 4,600 ppm at SB-F8-2152-02. Analytical results did not detect elevated metal concentrations.		1	1											1	1		SVOCs	SVOCs (5-9B & 5-22B)
F8-2207	1,7	Press/Cut House	Corrugated metal house overlain by soil; acetone/alcohol feedlines from G8-3; floor drains lead to 8562A; large berm to W. No evidence of a release.	SB-F8-2207-01 through SB-F8-2207-04	SB-F8-2207-01 SB-F8-2207-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	Metals		Metals (5-9E & 5-22D)
F8-2208	1,7	Mix House # 2	Corrugated metal house overlain by soil; concrete gutter in front leads to adjacent 8562 A; large berm to W; No evidence of release	SB-F8-2208-01 through SB-F8-2208-04	SB-F8-2208-01 SB-F8-2208-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1			
F8-3	9	Stressed Vegetation	Pile of green anti-static material; no vegetation present (area=100 sq ft)	SB-F8-3-01 through SB-F8-3-03	SB-F8-3-01	Sampling location SB-F8-3-01 was determined using XRF screening; Results indicated a copper concentration of 622 ppm at SB-F8-3-01. Analytical results did not detect elevated metal concentrations.		1	1										1	1	1			
F8-4	3	Unknown Foundations	Concrete pads; W pad has cast-in-place rebar. Bldgs demolished. No evidence of release (area=200 sq ft).	SB-F8-4-01 through SB-F8-4-03	SB-F8-4-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
F8-5	10	Transformer	Dark gray colored transformer; housing-slight discoloration, minor staining on soil/stone beneath; No evidence of release	SB-F8-5-01	SB-F8-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling					1									1	1			
F8-563D	3	Change House	Dilapidated old concrete foundation; rest of former bldg demolished. No evidence of release.	SB-F8-563D-01 through SB-F8-563D-05	SB-F8-563D-02	Sampling location SB-F8-563D-02 was determined using XRF screening; Results indicated a copper concentration of 1,370 ppm at SB-F8-563D-02. Analytical results did not detect elevated metal concentrations.		1	1											1	1	SVOCs		SVOCs (5-9B & 5-22B)
F8-567	3	Final Mix House	Bldg demolished; concrete rubble at N end; No evidence of release	SB-F8-567-01 through SB-F8-567-05	SB-F8-567-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
F8-573	3	Chemical Store House	Bldg demolished-minimal evidence of former store house; No evidence of release (area=100 sq ft)	SB-F8-573-01 through SB-F8-573-03	SB-F8-573-02	Group B E&E materials were detected at SB-F8-573-02 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.		1	1		1	1	1							1	1	SVOCs		SVOCs (5-9B & 5-22B)
F8-575	3	Grinder House	Bldg demolished-concrete pad and bldg debris remain; No evidence of a release	SB-F8-575-01 through SB-F8-575-04	SB-F8-575-02 SB-F8-575-04	Sampling location SB-F8-575-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F8-575-04		2	2		2	2	2							1	1	SVOCs	E&E	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F8-8	10	Transformer	Mounted to telephone pole; gray discoloration on black housing; No evidence of release in soil beneath	SB-F8-8-01	SB-F8-8-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling					1									1	1			
F8-8562A	7	C-Line Sump	Concrete sump with wooden shed built over top; currently filled with water. No evidence of a release.	TP-F8-8562A-01	TP-F8-8562A-01	Test Pit location was placed downgradient from the Pit.		1			1	1	1							1	1			
F8-9	3	Diphenylamine Mix House	Bldg demolished-only concrete rubble remains; No evidence of release (area=100 sq ft)	SB-F8-9-01 through SB-F8-9-03	SB-F8-9-02	Sampling location SB-F8-9-02 was determined using XRF screening; Results indicated an arsenic concentration of 148 ppm at SB-F8-9-02		1	1		1	1	1							1	1	Metals	E&E	Metals (5-9E & 5-22D), E&E (5-9C & 5-22C)
F8-A5	3	Mix House Scrap Shed	Bldg demolished-evidence of shed largely removed; No evidence of release (area=100 sq ft)	SB-F8-A5-01 through SB-F8-A5-03	SB-F8-A5-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
F8-A9	3	Scrap Shed	Clearly defined area of aggregate where bldg formerly stood. Bldg demolished. No evidence of a release (area=100 sq ft).	SB-F8-A9-01 through SB-F8-A9-03	SB-F8-A9-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
F8-PA1/PA2	7	Waste Water Pit	Concrete culvert with 4" outlet pipe on SE side; Unable to view circular structure; No evidence of release	TP-F8-PA1/PA2-01	TP-F8-PA1/PA2-01	Test Pit location was placed downgradient from the Pit.	1	1			1	1	1							1	1			
F9-1	4	Former Solvent Recovery House	Bldg demolished, area largely vegetated, minimal evidence of extent of recovery house; minor amounts of bldg debris present; No evidence of release	SB-F9-1-01 through SB-F9-1-05	SB-F9-1-04 SB-F9-1-01	Group B E&E materials were detected at SB-F9-1-04 using an Expray Test Kit. A confirmation sample was collected at SB-F9-1-01	2	2	2		2	2	2							1	1		SVOCs, E&E	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-16	3	Unknown Foundation	Large concrete pad foundation-former bldg demolished 12 ' pipe enters the ground along SE side; currently G9-6 built on former bldg pad, a control house for F9-2109; No evidence of release	SB-F9-16-01 through SB-F9-16-05	SB-F9-16-04 SB-F9-16-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1		SVOCs, E&E	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-2104	1	Premix Rest House	Wooden and corrugated sheet metal construction; steam pipe enters E corner; drum of potassium sulfate inside; No evidence of release	SB-F9-2104-01 through SB-F9-2104-06	SB-F9-2104-03	Group B E&E materials were detected at SB-F9-2104-03 using an Expray Test Kit					1	1	1							1	1			

Table 2-9

A-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
F9-2105	1,7	Final Mix House	Wooden construction with concrete separation walls; floor drains to NW side; alcohol and acetone feed lines along the NW side-feed from the S corner extend to SW; electrical control room on W side. Sump associated with the building. No evidence of release.	SB-F9-2105-01 through SB-F9-2105-06 TP-F9-2105-07	SB-F9-2105-01 SB-F9-2105-05 TP-F9-2105-07	Group B E&E materials were detected at SB-F9-2105-01 using an Expray Test Kit. XRF screening results indicated a copper concentration of 621 ppm at SB-F9-2105-05. Test Pit location downgradient from sump.		3	2		3	3	3							2	2	SVOCs, E&E, Metals		Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-2105A	1	Control Room	Steel encased concrete circular control room; electrical controls inside; cutter, wiring, camera, lights, control switches evident No evidence of release.	SB-F9-2105A-01 through SB-F9-2105A-04	SB-F9-2105A-01 SB-F9-2105A-04	Sampling location SB-F9-2105A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F9-2105A-04		2	2		1	1	1							1	1	E&E	SVOCs	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-2105B	3	Unknown Foundation	Large concrete pad foundation-former bldg demolished. Similar footprint to adjacent 2105; green anti-static material present. No evidence of release.	SB-F9-2105B-01 through SB-F9-2105B-05	SB-F9-2105B-01	Sampling location SB-F8-2105B-01 was determined using XRF screening; Results indicated an copper concentration of1,590 ppm at SB-F8-2105B-01		1	1		1	1	1							1	1	Metals	E&E	Metals (5-9E & 5-22D), E&E (5-9C & 5-22C)
F9-2106	1,7	Block Press House	Concrete block and corrugated sheet metal and fiberglass construction; heater equipment and "pit" on N corner-posted as "Confined space"; steps lead into dark basement area; Thick-walled control structure on S corner directed to central press area; walkways adjacent	SB-F9-2106-01 through SB-F9-2106-04	SB-F9-2106-04	Group B E&E materials were detected at SB-F9-2106-04 using an Expray Test Kit		1	1		1	1	1							1	1	SVOCs, E&E		SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-2109	1,7	Press House (7 House)	Wooden and corrugated sheet metal construction with concrete separation walls and concrete foundation; floor drains on SE side leads to sump; press bays on NW side; boarding and cutting bays on SE side; floor drains dilapidated-potential release	SB-F9-2109-01 through SB-F9-2109-08 TP-F9-2109-09	SB-F9-2109-01 SB-F9-2109-05 SB-F9-2109-08 TP-F9-2109-09	Group B E&E materials were detected at SB-F9-2109-01/05/08 using an Expray Test Kit Test Pit location placed downgradient from sump		4	3		4	4	4							2	2	E&E	SVOCs	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-2109A	1	Control House	Wooden construction over former concrete foundation; conduit leads to F9-2109; conveyor belt controls indicated on interior wall. No evidence of release.	SB-F9-16-01 through SB-F9-16-05	SB-F9-16-04 SB-F9-16-05	This AOC is located on the foundation of F9-16, and was sampled as part of F9-16																	SVOCs, E&E	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-2109C	1	DIGL-RIP Block Conditioning Bldg	Sheet metal construction over concrete pad foundation-recent construction; large oven inside-listed as DIGL-RIP flammable; Listed for following: diethylene glycol, dinitrate NC, ethyl alcohol, acetone; stressed vegetation near W corner	SB-F9-2109C-01 through SB-F9-2109C-05	SB-F9-2109C-01 SB-F9-2109C-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	E&E, SVOCs		SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-2109D	1	Heater House	Wooden framed and sided heater house on concrete foundation; Steam pipe vents at W corner; Bottle storage area along SE side. No evidence of release.	SB-F9-2109D-01 through SB-F9-2109D-05	SB-F9-2109D-02 SB-F9-2109D-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1	Metals	SVOCs	Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B)
F9-2251/ 2254	1	Control House	Corrugated steel bldg-conduit leads to SW end of 2107; Concrete foundation. No evidence of release.	SB-F9-2251-01 through SB-F9-2251-04	SB-F9-2251-03 SB-F9-2251-01	Sampling location SB-F9-2251-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F9-2251-01		2	2											1	1		SVOCs	SVOCs (5-9B & 5-22B)
F9-2276	2	Control House	Steel walls on front and cylindrical structures on SE corners; corrugated sheet metal "bunkers" overlain by soil; No evidence of a release	SB-F9-2276-01 through SB-F9-2276-03	SB-F9-2276-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
F9-2279	1	Air Compressor/Dryer House	Sheet metal and fiberglass over wood; air compressor/dryer evident in fiberglass enclosed SW half of structure; No evidence of release	SB-F9-2279-01 through SB-F9-2279-04	SB-F9-2279-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
F9-3	10	Transformer	Gray colored transformer housing; minor area of dark-brown to red discolored soil at base of telephone pole. Transformer housing appears intact	SB-F9-3-01	SB-F9-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
F9-4	5	Alcohol Tanks	Tanks/tank cradles removed; No evidence of a release	SB-F9-4-01 through SB-F9-4-03	SB-F9-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1			
F9-5	3	Unknown	Bldg demolished; area clear of vegetation; ground stake present; wood, brick bldg debris present No evidence of release (area=100 sq ft)	SB-F9-5-01 through SB-F9-5-03	SB-F9-5-03	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-F09-5-03 using an Expray Test Kit		1	1		1	1	1							1	1		E&E, SVOCs	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-558A	4	Dehydrator	Bldg demolished-minimal evidence of former bldg; No evidence of release (area=500 sq ft)	SB-F9-558A-01 through SB-F9-558A-04	SB-F9-558A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
F9-563	4	Pre-Mix Store House	Bldg demolished-minimal evidence of former bldg; No evidence of release (area=100 sq ft)	SB-F9-563-01 through SB-F9-563-03	SB-F9-563-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-9E & 5-22D)
F9-611	4	Pump House	Bldg demolished-minimal evidence of former pump house; No evidence of release (area=100 sq ft)	SB-F9-611-01 through SB-F9-611-03	SB-F9-611-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1		SVOCs	SVOCs (5-9B & 5-22B)
F9-7	3	Unknown Concrete Pad	Recently constructed concrete pad with pressure valves, pressure indicator and 1" piping; possible former tank present; possibly not completed or barely used. No evidence of release.	SB-F9-7-01 through SB-F9-7-04	SB-F9-7-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
F9-8	7	Unknown Trailer Loading Pad	Trailer loading/unloading area; recently poured concrete foundation with PVC draining pipe on NW side; No evidence of release	SB-F9-8-01 through SB-F9-8-05	SB-F9-8-02 SB-F9-8-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	SVOCs	E&E	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-8188	3	Unknown Shed	Bldg demolished; area of gravel and no vegetation indicates location of former shed; vegetation returning No evidence of release (area=100 sq ft)	SB-F9-8188-01 through SB-F9-8188-03	SB-F9-8188-01	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-F09-8188-01 using an Expray Test Kit		1	1		1	1	1							1	1		E&E	E&E (5-9C & 5-22C)
F9-9	7	Unknown Containment Basin	Concrete containment basin-recently constructed; probably tank storage area; drainage pipe on N corner. No evidence of release.	SB-F9-9-01 through SB-F9-9-05	SB-F9-9-01 SB-F9-9-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	SVOCs	E&E	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-A10	4	Press House Scrap Shed	Bldg demolished; No evidence of release (area=100 sq ft)	SB-F9-A10-01 through SB-F9-A10-03	SB-F9-A10-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			

Table 2-9

A-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
F9-A3	4	New Premix Scrap Shed	Bldg demolished-minimal evidence of former shed; No evidence of release (area=100 sq ft)	SB-F9-A3-01 through SB-F9-A3-03	SB-F9-A3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
F9-A4	4	Dehydration Scrap Shed	Bldg demolished-minimal evidence of former shed; No evidence of release (area=100 sq ft)	SB-F9-A4-01 through SB-F9-A4-03	SB-F0-A4-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals, SVOCs		Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B)
F9-A5	1	Unknown Shed	Corrugated sheet metal over wooden frame construction, storage only; two 4' x 6' sheds; No evidence of release	SB-F9-A5-01 through SB-F9-A5-04	SB-F9-A5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-9E & 5-22D)
F9-A6	3	Block Press House Scrap Shed	Bldg demolished; area of brown colored grass; No evidence of release (area=100 sq ft)	SB-F9-A6-01 through SB-F9-A6-03	SB-F9-A6-01	Group B E&E materials were detected at SB-F9-A6-01 using an Expray Test Kit		1	1		1	1	1							1	1	E&E	SVOCs	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
F9-C1	1	Press House Scrap Shed	Wooden construction over wooden foundation-temporary storage only- storage of "6 blocks/ 6 tubs". No evidence of release.	SB-F9-C1-01 through SB-F9-C1-04	SB-F9-C1-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1		SVOCs	SVOCs (5-9B & 5-22B)
F9-PA3	7	Collection Pit	Culvert leads in from A1/A2 and out to A4; feed in from 2106; No evidence of release			This AOC has not yet been sampled																		
F9-PA4	7	Waste Water Pit	Two pipes enter from NW side, one from SW side; No evidence of release	TP-F9-PA4-01	TP-F9-PA4-01	Test Pit location was placed downgradient from the Pit.		1			1	1	1							1	1	E&E		E&E (5-9C & 5-22C)
F9-PA5	7	Waste Water Pit	4' x 4' concrete block box; collection from N and W; drainage to PA6; No evidence of release	TP-F9-PA5-01	TP-F9-PA5-01	Test Pit location was placed downgradient from the Pit.		1			1	1	1							1	1			
F9-PA6	7	Collection Pit	Concrete-encased steel-lined WW sump; multiple pipes enter N side; one drainage pipe exists on S side; screen present; No evidence of release	TP-F9-PA6-01	TP-F9-PA6-01	Test Pit location was placed downgradient from the Pit.		1			1	1	1							1	1		E&E	E&E (5-9C & 5-22C)
G7-1	4	Unknown Concrete Pads	Bldg demolished; former evidence removed; No evidence of a release.	SB-G7-1-01 through SB-G7-1-05	SB-G7-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals	SVOCs	Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B)
G7-2	3	Unknown	Bldg demolished; largely vegetated somewhat wooded area; debris present-wood, concrete, steel, 1" diameter pipe; area cut out of hill. No evidence of release.	SB-G7-2-01 through SB-G7-2-05	SB-G7-2-04 SB-G7-2-01	Sampling location SB-G7-2-04 was determined using XRF screening Results indicated a lead concentration of 638 ppm. A confirmation sample was collected at SB-G07-2-01		2	2		2	2	2							1	1			
G7-2115	1	Dry House	Wooden construction with sheet metal-lined walls and doors; Rail loading area on W side; stressed vegetation on W side-slag and green anti-static bldg material present; concrete foundation	SB-G7-2115-01 through SB-G7-2115-08	SB-G7-2115-04 SB-G7-2115-06 SB-G7-2115-07	Sampling location SB-G07-2115-06 was determined using professional judgement; Sampling locations SB-G07-2115-04/07 were determined using XRF screening; Results indicated a lead concentration of 803 ppm at SB-G07-2115-04; and a copper concentration of 619 ppm and an arsenic concentration of 321 ppm at SB-G07-2115-07		3	3		3	3	3							1	1	Metals, E&E, SVOCs		Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
G7-2149	1	Heater House	Wooden bldg on concrete foundation; area of slag possibly stressed vegetation on E side; electrical control box present; concrete footers inside bldg	SB-G7-2149-01 through SB-G7-2149-04	SB-G7-2149-01 SB-G7-2149-04	Sampling location SB-G07-2149-01 was determined using professional judgement; Sampling location SB-G07-2149-04 was determined using XRF screening; Results indicated an arsenic concentration of 329 ppm at SB-G07-2149-04		2	2											1	1	Metals	SVOCs	Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B)
G7-2164	1	Old Barrel Coating	Wooden structure over concrete block foundation; Rail and truck loading areas; No evidence of release	SB-G7-2164-01 through SB-G7-2164-07	SB-G7-2164-01 SB-G7-2164-05 SB-G7-2164-07	Sampling locations were determined using XRF screening Results indicated an arsenic concentration of 278 ppm at SB-G07-2164-01 and 282 ppm at SB-G07-2164-05. Other location sampled using professional judgement.		2	2		2	2	2							1	1	Metals, SVOCs	E&E	Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
G7-58	3	Smokeless Supply Store	Bldg demolished; old concrete and stone wall present on NW side scrap metal, brick, and rebar remains. No evidence of release.	SB-G7-58-01 through SB-G7-58-05	SB-G7-58-04 SB-G7-58-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-G07-58-01					2	2	2							1	1		E&E	E&E (5-9C & 5-22C)
G8-2110	1	Cut Powder Store	Wooden bldg constructed on concrete footers; rail loading area; on NE side; 1' x 1' duct work vent on NW side; No evidence of release.			This AOC has been referred to the Remedial Investigation due to the presence of E&E materials found to be present using an Expray Test Kit																E&E*		E&E (5-9C & 5-22C)
G8-2114	3	Dry house	Bldg demolished-gravel and vegetation covered area remains; concrete loading area present; stressed vegetation present off S corner with green anti-static material present	SB-G8-2114-01 through SB-G8-2114-06	SB-G8-2114-03 SB-G8-2114-06	Sampling locations were determined using XRF screening Results indicated an arsenic concentration of 164 ppm at SB-G08-2114-03 and a copper concentration of 9,950 ppm at SB-G08-2114-06		2	2		2	2	2							1	1	Metals, E&E, SVOCs		Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
G8-2148	4	Unknown	Bldg demolished-evidence of former bldg removed; No evidence of release (area=100 sq ft)	SB-G8-2148-01 through SB-G8-2148-03	SB-G8-2148-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
G8-2204	3	AP Pulverizer	Bldg demolished; rebar present indicates location of former berm. No evidence of release.	SB-G8-2204-01 through SB-G8-2204-05	SB-G8-2204-05 SB-G8-2204-03	Sampling location SB-G8-2204-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G8-2204-03		2	2		2	2	2							1	1			
G8-2209	1,7	Control House	Concrete block control house-controls for mixer/hot water transformer/mixer tilt drive. Concrete gutter on NE side leads to 8562 (Catch Tank House). No evidence of a release.	SB-G8-2209-01 through SB-G8-2209-05	SB-G8-2209-01 SB-G8-2209-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1	Metals		Metals (5-9E & 5-22D)
G8-2210	2	Halfway House	Corrugated metal cylinder overlain with soil; adjacent to 2249 loading area to E; alcohol and acetone feedlines enter front entrance from G8-3. No evidence of release	SB-G8-2210-01 through SB-G8-2210-03	SB-G8-2210-02 SB-G8-2210-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	E&E	SVOCs	SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
G8-2249	2,7	Unknown	Corrugated metal cylindrical bldg overlain by soil; concrete gutter leads to Catch Tank house (8562); lead floor. No evidence of release.	SB-G8-2249-01 through SB-G8-2249-03	SB-G8-2249-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals	E&E	Metals (5-9E & 5-22D), E&E (5-9C & 5-22C)
G8-2260	4	Unknown	Bldg demolished-evidence largely removed; No evidence of release (area=100 sq ft)	SB-G8-2260-01 through SB-G8-2260-03	SB-G8-2260-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
G8-3	1	Chemical Storage Shed	Alcohol and acid storage shed feedlines to 2210 and 2207; concrete foundation, wood, and corrugated fiberglass walls, wood roof. No evidence of release.	SB-G8-3-01 through SB-G8-3-04	SB-G8-3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1	VOCs		VOCs (5-9A & 5-22A)
G8-5	10	A-Line Substation	A-Line/Finishing Area substation. Switches listed for each area; minimal vegetation present within fence area.	SB-G8-5-01 through SB-G8-5-04	SB-G8-5-01 SB-G8-5-02	Sampling location SB-G8-5-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G8-5-02					2									1	1			

Table 2-9

A-Line Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
G8-8562	7	C-Line Sumps	Concrete sump with wooden shed over top; currently filled with water. No evidence of release.	TP-G8-8562-01	TP-G8-8562-01	Test Pit location was placed downgradient from sump		1			1	1	1							1	1			
G8-C3	4	C-Line Scrap Shed	Bldg demolished-minimal evidence of shed; No evidence of release (area=100 sq ft)	SB-G8-C3-01 through SB-G8-C3-03	SB-G8-C3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
G8-F7	4	Dry House 1 & 2 Scrap Shed	Bldg demolished-evidence largely removed; No evidence of release (area=100 sq ft)	SB-G8-F7-01 through SB-G8-F7-03	SB-G8-F7-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling					1	1	1							1	1			
G9-14	10	Transformer	Black housing with minor weathering and discoloration evident; No staining at base of pole. No evidence of release.	SB-G9-14-01	SB-G9-14-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
G9-2108	3	Repair Shop	Sheet metal construction over 1' x 1' concrete footer; steam pipe on NW/SE sides. No evidence of release.	SB-G9-2108-01 through SB-G9-2108-06	SB-G9-2108-02 SB-G9-2108-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1	Metals	SVOCs	Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B)
G9-2123	1	Chemical Weigh House	Wooden and corrugated sheet metal construction over concrete block foundation; loading door in front; 3" diameter duct vent on SW side; walkway adjacent to 9322; minor amount of stressed soil under duct vent. No evidence of release.	SB-G9-2123-01 through SB-G9-2123-06	SB-G9-2123-01 SB-G9-2123-05	Sampling location SB-G09-2123-05 was determined using professional judgement; Sampling location SB-G09-2123-01 was determined using XRF screening; Results indicated an arsenic concentration of 173 ppm at SB-G09-2123-01	2	2	2											1	1	Metals, SVOCs		Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B)
G9-3	5	Former Tanks	Tank/cradles removed-largely vegetated area; minimal evidence of former tank present; No evidence of release	SB-G9-3-01 through SB-G9-3-03	SB-G9-3-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1	SVOCs		SVOCs (5-9B & 5-22B)
G9-7	9	Unknown Pond	Pond filled in: largely vegetated with significant ponded water present. No evidence of release (area=18,000 sq ft).	SB-G9-7-01 through SB-G9-7-20	SB-G9-7-05 SB-G9-7-11	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	Metals	E&E, SVOCs	Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
G9-9322	1	Chemical Storage	Corrugated sheet metal and wooden construction on concrete footers; loading areas on NW/SE side; No evidence of release	SB-G9-9322-01 through SB-G9-9322-06	SB-G9-9322-02 SB-G9-9322-04	Sampling location SB-G09-9322-02 was determined using professional judgement; Sampling location SB-G09-9322-04 was determined using E&E screening; Group B E&E materials were detected at SB-G09-9322-04 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	2	2	2		1	1	1							1	1	Metals	E&E, SVOCs	Metals (5-9E & 5-22D), SVOCs (5-9B & 5-22B), E&E (5-9C & 5-22C)
G9-A11	4	Machine Scrap Shop Shed	Bldg removed, paved area indicates former location; No evidence of release (area=100 sq ft)	SB-G9-A11-01 through SB-G9-A11-03	SB-G9-A11-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1		SVOCs	SVOCs (5-9B & 5-22B)

Notes:
All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:

TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
AOC = Area of Concern
XRF = X-ray Fluorescence
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector
TOC and GRAIN SIZE collected at each AOC

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
Sq Ft = Square Foot
No. = Number

***** = AOC reserved for RI due to presence of contamination
****** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

AOC Type

1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

All screening samples were evaluated for VOCs, Metals, and E&E compounds.

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 2-10

Finishing Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
H7-2172A	1	Heater House	Wooden structure on concrete foundation; asbestos-covered vent on W side; steam drain on NW corner	SB-H7-2172A-01 through SB-H7-2172A-05	SB-H7-2172A-03 SB-H7-2172A-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		2	2											1	1			
H7-642B	3	Unknown	Bldg demolished; no evidence of its existence except some unleveled ground. No evidence of a release (area =100 sq ft).	SB-H7-642B-01 through SB-H7-642B-03	SB-H7-642B-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
H8-2171	1	PETN Lactose Dryer	Wood and ceramic structure; foundation larger than bldg. Floor drain with old foundation to NW corner and pipe into ground off of foundation to NW; loading door to E and two potential loading doors to the S; duct from heater house to the N; surrounded by a berm; No evidence of a release	SB-H8-2171-01 through SB-H8-2171-06	SB-H8-2171-01 SB-H8-2171-03 SB-H8-2171-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling		3	3		3	3	3							1	1			
H8-2291	1	PETN Lactose Dryer Heater House	Wooden bldg. on a concrete foundation; Drain in SW corner that has stained the ground brown; Duct from W corner to PETN lactose dryer; Lab and dryer bldgs. are within a berm	SB-H8-2291-01 through SB-H8-2291-04	SB-H8-2291-02 SB-H8-2291-04	Sampling location SB-H8-2291-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H8-2291-04.		2	2		2	2	2							1	1			
H8-558	4	Blender House	Bldg. Demolished-no evidence of existence	SB-H8-558-01 through SB-H8-558-05	SB-H8-558-03 SB-H8-558-04	Sampling location SB-H8-558-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H8-558-04.		2	2		2	2	2							1	1			
H8-564	4	Rest House	Bldg. Demolished and area regraded; No evidence of a release (area=100 sq ft)	SB-H8-564-01 through SB-H8-564-03	SB-H8-564-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling					1	1	1							1	1			
I10-1	3	Heater House	Three concrete footers with protruding rebar adjacent to I10-550; largely vegetated area. No evidence of a release (area=100 sq ft).	SB-I10-1-01 through SB-I10-1-03	SB-I10-1-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
I10-2	3	Unknown	Only two concrete footers remain. No evidence of a release (area=100 sq ft)	SB-I10-2-01 through SB-I10-2-03	SB-I10-2-02	Sampling location was determined using XRF screening; Results indicated a lead concentration of 666 ppm at SB-I10-2-02.		1	1		1	1	1							1	1	Metals		Metals (5-10E & 5-23C)
I10-2079	4	Titan Cast House	Largely vegetated area-evidence of bldg removed; No evidence of a release	SB-I10-2079-01 through SB-I10-2079-05	SB-I10-2079-02 SB-I10-2079-05	Sampling location SB-I10-2079-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I10-2079-05.		2	2		2	2	2							1	1		E&E	E&E (5-10C & 5-23B)
I10-2080	3	Lunch Shed	Vegetation present at former location of lunch shed. Minimal evidence of former foundation. No evidence of a release (area=200 sq ft)	SB-I10-2080-01 through SB-I10-2080-03	SB-I10-2080-01 SB-I10-2080-02	Sampling location SB-I10-2080-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I10-2080-02.		2	2											1	1		SVOCs	SVOCs (5-10B & 5-23A)
I10-2121	3	Dry House	Vegetation present; No evidence of a release (area=100 sq ft)	SB-I10-2121-01 through SB-I10-2121-03	SB-I10-2121-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling					1	1	1							1	1			
I10-2122	3	Dry House	Bldg demolished; only concrete foundation remains; minor amounts of sheet metal, wood, rebar; old steam pipe. Minor evidence of a release- green concrete covered at SE corner (area=100 sq ft).	SB-I10-2122-01 through SB-I10-2122-03	SB-I10-2122-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling					1	1	1							1	1			
I10-2155	4	Dry House	Only vegetation present; No evidence of a release	SB-I10-2155-01 through SB-I10-2155-03	SB-I10-2155-02 SB-I10-2155-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I10-2155-02. A confirmation sample was collected at SB-I10-2155-03. Analytical results did not detect elevated E&E concentrations.					2	2	2							1	1			
I10-2156	3	Dry House	Vegetated area; No evidence of a release (area=100 sq ft)	SB-I10-2156-01 through SB-I10-2156-03	SB-I10-2156-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling					1	1	1							1	1			
I10-3	9	Stressed Vegetation	Stressed vegetation-green bldg material which covered concrete foundation (area=100 sq ft)	SB-I10-3-01 through SB-I10-3-02	SB-I10-3-02	Sampling location was determined using XRF screening; Results indicated a copper concentration of 11,310 ppm at SB-I10-3-02.	1	1												1	1	Metals		Metals (5-10E & 5-23C)
I10-550	3	Unknown	Square concrete foundation with protruding rebar; overgrown with vegetation. No evidence of a release.	SB-I10-550-01 through SB-I10-550-04	SB-I10-550-02	Sampling location was determined using XRF screening; Results indicated a zinc concentration of 2,310 ppm at SB-I10-550-02.	1	1			1	1	1							1	1	Metals		Metals (5-10E & 5-23C)
I10-552	3	Unknown	Largely grass-covered with minor amounts of rubble present. No evidence of a release (area=800 sq ft).	SB-I10-552-01 through SB-I10-552-04	SB-I10-552-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1							1	1	Metals		Metals (5-10E & 5-23C)
I10-E50	4	Unknown	Only vegetation remains-evidence of bldg largely removed; No evidence of a release	SB-I10-E50-01 through SB-I10-E50-05	SB-I10-E50-05 SB-I10-E50-01	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I10-E50-05. A confirmation sample was collected at SB-I10-E50-01. Analytical results did not detect elevated E&E concentrations.	2	2			2	2	2							1	1	Metals		Metals (5-10E & 5-23C)
I7-12	10	Transformer	Telephone pole mounted; looks intact; No evidence of a release	SB-I7-12-01	SB-I7-12-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
I7-13	10	Electric Transformers	Two electric transformers on a telephone pole; transformers intact. No evidence of a release.	SB-I7-13-01 through SB-I7-13-02	SB-I7-13-01 SB-I7-13-02	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling				2										1	1			
I7-15	4	Blender House # 1	Bldg. Demolished-area bulldozed flat. Some broken foundation fragments. No evidence of a release.	SB-I7-15-01 through SB-I7-15-05	SB-I7-15-05 SB-I7-15-04	Sampling location SB-I7-15-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I7-15-04	2	2			2	2	2							1	1	SVOCs	E&E	SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
I7-2124	1,7	Blender House	Wooden structure with catch tank on E side and a loading dock on the NE side; loading dock associated with narrow gage rail. Steam drain on SE side with brown staining; cartway on W side that connects blender to Shaker House.	SB-I7-2124-01 through SB-I7-2124-06	SB-I7-2124-04 SB-I7-2124-05 SB-I7-2124-06	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling	3	3			3	3	3							1	1	Metals	E&E	Metals (5-10E & 5-23C), E&E (5-10C & 5-23B)
I7-2124A	1	Rest House	Wooden structure on concrete foundation; berm on the E and W. Loading area on NE corner. No evidence of a release.	SB-I7-2124A-01 through SB-I7-2124A-05	SB-I7-2124A-03 SB-I7-2124A-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling					2	2	2							1	1			
I7-2133A	3	Unknown	Bldg. Removed, five cement footers remain. Unknown use. No evidence of a release (area=300 sq ft).	SB-I7-2133A-01 through SB-I7-2133A-05	SB-I7-2133A-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I7-2133A-03	1	1			1	1	1							1	1	Metals, SVOCs, E&E		Metals (5-10E & 5-23C), SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
I7-2305/ 2280/8652	3	Unknown	Bldgs. Demolished-almost no evidence of existence; One depression that is probably a former bldg.	SB-I7-2305-01 through SB-I7-2305-03	SB-I7-2305-02	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I7-2305-02	1	1			1	1	1							1	1	SVOCs, E&E		SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)

Table 2-10

Finishing Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
I7-3	3	Hand Sieve	Bldg. Demolished-slight depression; No evidence of a release (area=100 sq ft)	SB-I7-3-01 through SB-I7-3-03	SB-I7-3-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1		SVOCs	SVOCs (5-10B & 5-23A)
I7-4	4	Unknown	Bldg. Demolished; No evidence of a release (area=100 sq ft)	SB-I7-4-01 through SB-I7-4-03	SB-I7-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
I7-5	1	Gas Shed	Wooden shed used to store flammable liquids-two doors on W side. No evidence of a release.	SB-I7-5-01 through SB-I7-5-04	SB-I7-5-03	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 1,100 ppm at SB-I7-5-03.	1		1											1	1	Metals		Metals (5-10E & 5-23C)
I7-566	4	Rest House	Bldg. Demolished; No evidence of a release (area=100 sq ft)	SB-I7-566-01 through SB-I7-566-03	SB-I7-566-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling					1	1	1							1	1		E&E	E&E (5-10C & 5-23B)
I7-566A	4	Unknown	Bldg. Demolished; No evidence of a release (area=100 sq ft)	SB-I7-566A-01 through SB-I7-566A-03	SB-I7-566A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals		Metals (5-10E & 5-23C)
I7-567	3	Rest House	Bldg demolished; only broken foundations remain and old scrap metal. No evidence of a release.	SB-I7-567-01 through SB-I7-567-05	SB-I7-567-01 SB-I7-567-02	Sampling location SB-I7-567-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I7-567-02.					2	2	2							1	1			
I7-8181	1	Finishing Area Repair Shop	Wooden structure on thick concrete foundation. Shed-like structure on the W side and cement walkway on S side Bldg. May have had a different use in the past.	SB-I7-8181-01 through SB-I7-8181-05	SB-I7-8181-01 SB-I7-8181-04	Sampling location SB-I7-8181-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I7-8181-04.	2	2	2											1	1		SVOCs	SVOCs (5-10B & 5-23A)
I7-B59	4	Sieve House	Bldg. Demolished; No evidence of a release (area=100 sq ft)	SB-I7-B59-01 through SB-I7-B59-03	SB-I7-B59-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	Metals	E&E, SVOCs	Metals (5-10E & 5-23C), SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
I8-2138/ 2139	3	Blender and Motor House	Bldgs. Demolished-only found one fragment of a foundation. No evidence of a release.	SB-I8-2138-01 through SB-I8-2138-03	SB-I8-2138-03	Sampling location SB-I8-2138-03 was determined using XRF screening; Results indicated an arsenic concentration of 785 ppm at SB-I8-2138-03		1	1		1	1	1							1	1	Metals	E&E, SVOCs	Metals (5-10E & 5-23C), SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
I8-2170	3	Unknown	Mostly vegetated-evidence of former bldg removed; No evidence of release	SB-I8-2170-01 through SB-I8-2170-05	SB-I8-2170-05 SB-I8-2170-04	Sampling location SB-I8-2170-05 was determined using professional judgement; Screening results did not warrant biased sampling SB-I8-2170-04.		2	2		2	2	2							1	1		E&E	E&E (5-10C & 5-23B)
I8-2299	3	Glaze House	Mostly vegetated; some concrete rubble present; No evidence of release	SB-I8-2299-01 through SB-I8-2299-05	SB-I8-2299-05 SB-I8-2299-03	Sampling location SB-I9-2299-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-2299-03.		2	2		2	2	2							1	1			
I8-2328	1	Shaker House	Wood and concrete structure fully encased within a berm; loading docks to NW and SE; narrow gauge rail loading area in SW. No evidence of a release.	SB-I8-2328-01 through SB-I8-2328-08	SB-I8-2328-02 SB-I8-2328-07	Sampling location SB-I8-2328-07 was determined using professional judgement; Group B E&E material were detected at sampling location SB-I8-2328-02 using an Expray Test Kit		2	2		2	2	2							1	1		E&E	E&E (5-10C & 5-23B)
I8-2328A	1	Shaker House Rotoclone	Small wood structure on cinder block foundation; steam and water ducts from I8-2328. No evidence of a release.	SB-I8-2328A-01 through SB-I8-2328A-04	SB-I8-2328A-02 SB-I8-2328A-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I8-2328A-02. A confirmation sample was collected at SB-I8-2328A-03.		2	2		2	2	2							1	1	E&E	SVOCs	SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
I8-2332	2	Unknown	Steel earth covered bldg. Associated with I8-2328; use unknown. No evidence of a release.	SB-I8-2332-01 through SB-I8-2332-03	SB-I8-2332-02 SB-I8-2332-01	Sampling location SB-I8-2332-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-2332-01.		2	2		2	2	2							1	1			
I8-2333	2	Control House	Cylindrical corrugated steel with concrete foundation overlain by soil bunker. No evidence of release.	SB-I8-2333-01 through SB-I8-2333-03	SB-I8-2333-02 SB-I8-2333-03	Sampling location SB-I8-2333-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-2333-03.		2	2											1	1	Metals		Metals (5-10E & 5-23C)
I8-2405	1	Ribbon Blender	Concrete walls and foundation; wooden walls and ceilings recent construction, somewhat unfinished; multiple loading areas slide on W side; shed and holding tank on E side; built over the following former bldgs: 594-B, 595-B, 596-B, 2329, and 2327. No evidence of release.	SB-I8-2405-01 through SB-I8-2405-07	SB-I8-2405-01 SB-I8-2405-05 SB-I8-2405-06	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling		3	3		3	3	3							1	1		E&E	E&E (5-10C & 5-23B)
I8-2405A	4	Ribbon Blender Rotoclone Room	Building associated with with 2405, Ribbon Blender Location determined from historic maps	SB-I8-2405A-01 through SB-I8-2405A-04	SB-I8-2405A-02 SB-I8-2405A-01	Sampling location SB-I8-2405A-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-2405A-01.		2	2		2	2	2							1	1			
I8-2409	1	Ribbon Blender Control Room	Control house-conduit enters corrugated steel cylindrical bldg. from S side. No evidence of release.	SB-I8-2409-01 through SB-I8-2409-04	SB-I8-2409-01 SB-I8-2409-04	Sampling location SB-I8-2409-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-2409-04.		2	2											1	1			
I8-525	4	Unknown	Mostly vegetated-evidence of former bldg removed; No evidence of release	SB-I8-525-01 through SB-I8-525-04	SB-I8-525-03 SB-I8-525-04	Sampling location SB-I8-525-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-525-04.		2	2		2	2	2							1	1			
I8-560	4	Blender	Bldg. demolished; sparse evidence available; Several pieces of wood and one piece of scrap metal	SB-I8-560-01 through SB-I8-560-05	SB-I8-560-03 SB-I8-560-01	Sampling location SB-I8-560-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-560-01.		2	2		2	2	2							1	1			
I8-588(E)	3	Rest House	Mostly vegetated-concrete footers present; possible former heater house on S end; stressed vegetation-mostly slag on SE corner of bldg	SB-I8-588E-01 through SB-I08-588E-06	SB-I8-588E-03 SB-I8-588E-06	Sampling location SB-I8-588E-03 was determined using XRF screening; Results indicated a lead concentration of 1,397 ppm at SB-I8-588E-03			2		2	2	2							1	1	Metals		Metals (5-10E & 5-23C)
I8-8236	1,6	Finishing Area Canteen	Brick bldg. concrete foundation. Septic tank ~ 15' N of bldg. Possible stressed vegetation, brown stained soils, at NW corner adjacent to a steam drain (one sludge sample taken from septic during IRM effort).	SB-I8-8236-01 through SB-I8-8236-05 TP-I8-8236-06	SB-I8-8236-01 SB-I8-8236-05 TP-I8-8236-06	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling. Test Pit location placed downgradient from septic.	1	3	2											2	2		SVOCs	SVOCs (5-10B & 5-23A)
I8-9334	4	Unknown	Small bldg. based on map, probably used with I8-2328 Bldg. Demolished. No evidence of a release.	SB-I8-9334-01 through SB-I8-9334-03	SB-I8-9334-01 SB-I8-9334-02	Sampling location SB-I8-9334-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-9334-02.		2	2		2	2	2							1	1		E&E, SVOCs	SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
I8-F2	4	Glaze Barrel Scrap Shed	Bldg demolished; No evidence of release (area=100 sq ft)	SB-I8-F2-01 through SB-I8-F2-03	SB-I8-F2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
I9-2	3	Heater House	Concrete pad where former heater house stood; Steam pipes from 2112 lead to pad; No evidence of a release	SB-I9-2-01 through SB-I9-2-03	SB-I9-2-01 SB-I9-2-02	Sampling location SB-I9-2-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-2-02.		2	2											1	1		SVOCs	SVOCs (5-10B & 5-23A)

Table 2-10

Finishing Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
I9-2311	1,5	Dry House	Large concrete foundation with rebar and rail ties; ceramic debris with possible lead paint on NE end of foundation; currently ethyl alcohol tank supported by rail ties on foundation surrounded by large soil berm. Potential release-lead flooring present.	SB-I9-2311-01 through SB-I9-2311-08	SB-I9-2311-01 SB-I9-2311-06	Sampling locations were determined using an Expray Test Kit; Group B E&E materials were detected at SB-I9-2311-01/06					2	2	2							1	1		E&E	E&E (5-10C & 5-23B)
I9-2329	1,7	Unknown	New bldg built in location of former dry house; multiple loading areas; catch tank; concrete and wood construction. No evidence of a release. Sump associated with the building.	SB-I9-2329-01 through SB-I9-2329-06 TP-I9-2329-07	SB-I9-2329-04 SB-I9-2329-05 SB-I9-2329-06 TP-I9-2329-07	Sampling locations SB-I9-2329-04/06 were determined using professional judgement; Sampling location SB-I9-2329-05 was determined using XRF screening. Results indicated a lead concentration of 1,311 ppm at SB-I9-2329-05. Test Pit location placed downgradient of the sump.		4	3		4	4	4							2	2			
I9-2329A	1	Unknown	Wooden construction over concrete foundation. Possible storage for 2112; possible electric control house; grinders indicated on conduit. No evidence of a release.	SB-I9-2329A-01 through SB-I9-2329A-04	SB-I9-2329A-01 SB-I9-2329A-04	Sampling location SB-I9-2329A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-2329A-04.		2	2		2	2	2							1	1			
I9-3	9	Debris Area	Miscellaneous debris which may have been decontaminated at 2311; pumps, section of PVC cable, electrical insulators, wire mesh screens, catch tanks, process equipment, mixing tanks, electrical induction motors, wooden cable spools (area=5,600 sq ft).	SB-I09-3-01 through SB-I09-3-13	SB-I9-3-01 SB-I9-3-03 SB-I9-3-05 SB-I9-3-07 SB-I9-3-09 SB-I9-3-11 SB-I9-3-13	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling		7	7											1	1			
I9-5	3	Rest House	Largely vegetation and disturbed soil; berm on E side; foundation and bldg demolished. No evidence of release.	SB-I9-5-01 through SB-I9-5-05	SB-I9-5-01 SB-I9-5-05	Sampling location SB-I9-5-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-5-05.					2	2	2							1	1			
I9-515	4	Spent Acid Recovery	Bldg demolished; pine grove planted in former location; No evidence of a release	SB-I9-515-01 through SB-I9-515-05	SB-I9-515-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1	1		1	1	1					1	1	1	1			
I9-516	4	Unknown	Mostly vegetation, minor amounts of rubble, sheet metal present. No evidence of a release.	SB-I9-516-01 through SB-I9-516-05	SB-I9-516-04 SB-I9-516-02	Sampling location SB-I9-516-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-516-02.		2	2		2	2	2							1	1			
I9-519	4	Unknown	Bldg demolished; minimal evidence of former bldg; No evidence of release	SB-I9-519-01 through SB-I9-519-05	SB-I9-519-03 SB-I9-519-04	Sampling locations SB-I9-519-03/04 were determined using XRF screening; Results indicated a lead concentration of 1,136 ppm at SB-I9-519-03 and 2,327 ppm at SB-I9-519-04		2	2		2	2	2							1	1	Metals		Metals (5-10E & 5-23C)
I9-520	4	Unknown	Mostly vegetation, minor amounts of rubble present, two concrete footers. No evidence of a release.	SB-I9-520-01 through SB-I9-520-05	SB-I9-520-03 SB-I9-520-05	Sampling location SB-I9-520-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-520-05.		2	2		2	2	2							1	1			
I9-523	4	Unknown	Vegetation and macadam over former location of bldg.; No evidence of a release	SB-I9-523-01 through SB-I9-523-05	SB-I9-523-03 SB-I9-523-05	Sampling location SB-I9-523-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-523-05.	2	2			2	2	2							1	1		E&E, SVOCs	SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
I9-524	4	Unknown	Mostly vegetation, minor amounts of rubble present; No evidence of a release	SB-I9-524-01 through SB-I9-524-05	SB-I9-524-01	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 688 ppm at SB-I9-524-01.	1	1			1	1	1							1	1	Metals, E&E	SVOCs	Metals (5-10E & 5-23C), SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
J10-587 (B)	3	Unknown	Concrete and brick present; No evidence of a release	SB-J10-587B-01 through SB-J10-587B-03	SB-J10-587B-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1							1	1	SVOCs		SVOCs (5-10B & 5-23A)
J6-2340	1	Can Pack House Rotoclone	Wooden structure used to house Rotoclone Particulate Filter. Duct on S side from J7-2133; Steam and possibly compressed air to the E. No evidence of a release.	SB-J6-2340-01 through SB-J6-2340-05	SB-J6-2340-02 SB-J6-2340-04	Sampling location SB-J6-2340-02 was determined using an Expray Test Kit; Group B E&E materials were detected at SB-J6-2340-02; Sample location SB-J6-2340-04 was determined using XRF screening. Results indicated a lead concentration of 416 ppm at SB-J6-2340-04. Analytical results did not detect elevated E&E or metal concentrations.	2	2			2	2	2							1	1	SVOCs		SVOCs (5-10B & 5-23A)
J7-1	9	Graphite Pond	Former pond that received waste from Blender/Packer House J7-2281 J7-2282; pine trees in former pond; no water in former pond. No evidence of negative impact to the pond (area=18,000 sq ft).			This AOC has been reserved for the Remedial Investigation due to the presence of E&E materials																E&E*		E&E (5-10C & 5-23B)
J7-2	3	Unknown	Complex of unknown foundations. Some pyramidal footers. Bldg. extends to rail line-heavily overgrown. No evidence of a release.	SB-J7-2-01 through SB-J7-2-05	SB-J7-2-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-J7-2-03	1	1	1		1	1	1							1	1	SVOCs, E&E		SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
J7-2133	1	Old Can Pack House	Wooden structure built on a possible rock foundation; narrow gauge rail line in S of bldg. three loading doors adjacent to rails; Bldg. is bermed. No evidence of a release.	SB-J7-2133-01 through SB-J7-2133-06	SB-J7-2133-01 SB-J7-2133-06	Sampling locations were determined by using XRF screening and an Expray Test Kit; Group B E&E materials were detected at sampling locations SB-J7-2133-01/06; Results indicated a lead concentration of 791 ppm at SB-J7-2133-01 and 460 ppm at SB-J7-2133-06	2	2			2	2	2							1	1	Metals, SVOCs, E&E		Metals (5-10E & 5-23C), SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
J7-2246	1	Bulk Pack Scrap Shed	Wood and steel structure that currently contains electric relays. No evidence of a release from this bldg.	SB-J7-2246-01 through SB-J7-2246-04	SB-J7-2246-01 SB-J7-2246-02	Sampling location SB-J7-2246-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J7-2246-02.	2	2												1	1		SVOCs	SVOCs (5-10B & 5-23A)
J7-2281	2	Blender/Packer	Wooden structure covered with mound of earth; loading dock on SE corner; discharge pipe on SW corner reportedly goes to graphite pond. No evidence of a release except the discharge pipe.	SB-J7-2281-01 through SB-J7-2281-06	SB-J7-2281-02 SB-J7-2281-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	2	2			2	2	2							1	1		E&E, SVOCs	SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
J7-2281B	1	Heater House for J7-2281	Wooden structure on a concrete foundation; multiple electric conduits and a vent pipe to J7-2281; stream drain in SW corner;potential stressed vegetation immediately W of the door.	SB-J7-2281B-01 through SB-J7-2281B-05	SB-J7-2281B-01 SB-J7-2281B-03 SB-J7-2281B-05	Sampling locations SB-J7-2281B-01/05 were determined using professional judgement; Screening results did not warrant biased sampling; Sampling location SB-J7-2281B-03 was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J7-2281B-03. Analytical results did not detect elevated E&E concentrations	3	2	1	1	1									1	1			
J7-2282	2	Blender/Packer	Earth covered with thick steel door; rain pipe on SW corner feeds to a 12" diameter corrugated pipe to a ditch for graphite pond. No evidence of a release except for the discharge pipe.	SB-J7-2282-01 through SB-J7-2282-06	SB-J7-2282-03 SB-J7-2282-06	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	2	2			2	2	2							1	1			
J7-2324	1	Heater House	Wood and steel structure housing a heater for bldg. J7-8133. Duct to J7-8133 on W side and a vent on the E side. No evidence of a release.	SB-J7-2324-01 through SB-J7-2324-06	SB-J7-2324-06	Sampling location was determined using XRF screening; Results indicated a lead concentration of 482 ppm at SB-J7-2324-06	1	1												1	1	Metals	SVOCs	Metals (5-10E & 5-23C), SVOCs (5-10B & 5-23A)
J7-241	3	Rest House 241	Bldg. demolished area covered with grass - two foundations in SW corner of area remain. No evidence of a release.	SB-J7-241-01 through SB-J7-241-05	SB-J7-241-05 SB-J7-241-04	Sampling location SB-J7-241-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J7-241-04.					2	2	2							1	1		E&E	E&E (5-10C & 5-23B)

Table 2-10

Finishing Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
J7-5	10	Transformer	1,000 kV to 35 kV substation; recent construction; new insulators; No evidence of a release	SB-J7-5-01	SB-J7-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
J7-8240	3	Store House	Bldg. demolished - only two concrete footers remain (area=800 sq ft)	SB-J7-8240-01 through SB-J7-8240-04	SB-J7-8240-02 SB-J7-8240-01	Sampling location SB-J7-8240-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J7-8240-01.		2	2											1	1			
J7-8281	4	Store House	Bldg. demolished with no evidence of former bldg; center of bldg. Estimated. No evidence of a release.	SB-J7-8281-01 through SB-J7-8281-03	SB-J7-8281-02 SB-J7-8281-01	Sampling location SB-J7-8281-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J7-8281-01.		2	2											1	1		SVOCs	SVOCs (5-10B & 5-23A)
J7-F1	4	Main Shaker Scrap Shed	Bldg. demolished with no evidence of its existence; center estimated. No evidence of a release.	SB-J7-F1-01 through SB-J7-F1-03	SB-J7-F1-01 SB-J7-F1-02	Sampling location SB-J7-F1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J7-F1-02.		2	2											1	1			
J8-1	1	Canister Shipping	Wooden construction on concrete footers. Rail and truck loading areas. No evidence of a release.	SB-J8-1-01 through SB-J8-1-05	SB-J8-1-01 SB-J8-1-02	Sampling location SB-J8-1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J8-1-02.					2	2	2							1	1			
J8-2	10	Transformers	Mounted to telephone pole; not discolored; No evidence of release	SB-J8-2-01 through SB-J8-2-02	SB-J8-2-01 SB-J8-2-02	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling				2										1	1			
J8-2339	4	Glaze House # 3 Rotoclone	Bldg demolished-little evidence of its existence; No evidence of release (area=100 sq ft)	SB-J8-2339-01 through SB-J8-2339-03	SB-J8-2339-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
J8-2354	1	Can Pack House (Sign on front reads"Canister House")	Wood and concrete construction; fairly new; many loading areas. No evidence of a release.	SB-J8-2354-01 through SB-J8-2354-09	SB-J8-2354-02 SB-J8-2354-05 SB-J8-2354-01	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	2	2		3	3	3								1	1	E&E		E&E (5-10C & 5-23B)
J8-2354A	4	Canister House Powder Store	Powder room associated with 2354, Canister House Location determined from historical maps	SB-J8-2354A-01 through SB-J8-2354A-04	SB-J8-2354A-04 SB-J8-2354A-03	Sampling location SB-J8-2354A-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J8-2354A-03.				2	2	2								1	1			
J8-8272	3	Store House	Bldg demolished- only evidence two larger than normal rail ties. Rail ties supported a canopy (area=100 sq ft).	SB-J8-8272-01 through SB-J8-8272-03	SB-J8-8272-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1	1	1								1	1			
J9-1	9	Debris Area	Vegetation in place of former debris area; minor amounts of brick. Scrap metal present (area=100 sq ft).	SB-J9-1-01 through SB-J9-1-02	SB-J9-1-02	Sampling location was determined using XRF screening; Results indicated a copper concentration of 1,300 ppm at SB-J9-1-02	1	1												1	1	Metals	SVOCs	Metals (5-10E & 5-23C), SVOCs (5-10B & 5-23A)
J9-2111	4,10	NC Dry House	Substation built at location of former dry house; brick scattered around. No evidence of a release.	SB-J9-2111-01 through SB-J9-2111-05	SB-J9-2111-05 SB-J9-2111-04	Sampling location SB-J9-2111-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J9-2111-04.				2	2	2								1	1		E&E	E&E (5-10C & 5-23B)
J9-2142	3	Heater House	Only foundation remains,concrete and rebar with rail ties cast-in-place, metal plates cast-in, metal pipe debris; lead paint coating on concrete footer; brick and burnt wood present. Stressed vegetation on N side.	SB-J9-2142-01 through SB-J9-2142-05	SB-J9-2142-04 SB-J9-2142-05	Sampling location SB-J9-2142-04 was determined using professional judgement; Screening results did not warrant biased sampling. Sampling location SB-J9-2142-05 was determined using XRF screening; Results indicated a copper concentration of 603 ppm at SB-J9-2142-05.	2	2												1	1	Metals	SVOCs	Metals (5-10E & 5-23C), SVOCs (5-10B & 5-23A)
J9-3	9	Debris Area	General bldg demolition materials and slag; brick, corrugated sheet metal and stone (area=100 sq ft)	SB-J9-3-01 through SB-J9-3-03	SB-J9-3-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1		SVOCs	SVOCs (5-10B & 5-23A)
J9-4	3	Unknown Name	Only concrete footers present, all other evidence removed (area=600 sq ft)	SB-J9-4-01 through SB-J9-4-04	SB-J9-4-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-J9-4-03	1	1		1	1	1								1	1	Metals	E&E, SVOCs	Metals (5-10E & 5-23C), SVOCs (5-10B & 5-23A), E&E (5-10C & 5-23B)
J9-5	10	Finishing Area Substation	1,000 kV to 35 kV substation; recent construction; new insulators; No evidence of a release	SB-J9-5-01	SB-J9-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			

Table 2-10

Finishing Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
K6-8273	3	Dynamite Store # 5	Bldg. demolished and left in pile-pile contains wood, metal, pipes and approximately 20 drums. Drums labeled as containing explosives (Trimethylolethane). Drums intermixed with debris-most have lids. No evidence of a release.	SB-K6-8273-01 through SB-K6-8273-04	SB-K6-8273-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-K6-8273-03					1	1	1							1	1			

Notes:
All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
AOC = Area of Concern
XRF = X-ray Fluorescence
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
Sq Ft = Square Foot
No. = Number

AOC Type
1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

TOC and GRAIN SIZE collected at each AOC

***** = AOC reserved for RI due to presence of contamination
****** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

All screening samples were evaluated for VOCs, Metals, and E&E compounds

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 2-11

G13-1	3	Office	Former office	SB-G13-1-01 through SB-G13-1-05	SB-G13-1-03 SB-G13-1-04	Sampling location was determined using XRF screening; Results indicated a lead concentration of 1,069 ppm at SB-G13-1-03. A confirmation sample was taken at SB-G13-1-04.		2	2											1	1	Metals		Metals (5-11E & 5-24C)
H12-1	9	Settling Pond	Currently covered with grass; No evidence of release (area=1,900 sq ft)	SB-H12-1-01 through SB-H12-1-07	SB-H12-1-02 SB-H12-1-06 SB-H12-1-07	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling		3	3		3						3			1	1	SVOCs, Metals		SVOCs (5-11B & 5-24A), Metals (5-11E & 5-24C)
H12-120	3	Lead Melting Pot	Bldg. Demolished-minor amounts of rubble present; No evidence of release	SB-H12-120-01 through SB-H12-120-03	SB-H12-120-03 SB-H12-120-02	Sampling location SB-H12-120-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-H12-120-02.			2											1	1			
H12-237	9	Former Burning Ground	Large areas of SV; minor amounts of gray/green discoloration. Slag aggregate present (area=25,000 sq ft).			This AOC has been referred to the Remedial Investigation due to the presence of E&E materials																E&E*		E&E (5-11C & 5-24B)
H13-1	3	Unknown Name	Bldg. demolished-wood construction; three posts evident in W corner; Stressed vegetation in W corner and N of rail line off of N corner of bldg.			This AOC has been referred to the Remedial Investigation due to the presence of E&E materials																E&E*		E&E (5-11C & 5-24B)
H13-2	10	Transformer	Three mounted to telephone poles. Recently installed. No evidence of release.	SB-H13-2-01 through SB-H13-2-03	SB-H13-2-01 SB-H13-2-02 SB-H13-2-03	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling				3										1	1			
H13-2014	4	Ammonia Rope House	Bldg. demolished-vegetation covers area; No evidence of release (area=100 sq ft)	SB-H13-2014-01 through SB-H13-2014-03	SB-H13-2014-01	Sampling location was determined using XRF screening and an Expray Test Kit; Results indicated a lead concentration of 2,014 ppm and a copper concentration of 886 ppm at SB-H13-2014-01. Group B E&E materials were detected at SB-H13-2014-01		1	1		1	1	1				1			1	1	SVOCs, Metals, E&E		SVOCs (5-11B & 5-24A), Metals (5-11E & 5-24C), E&E (5-11C & 5-24B)
H13-2031A	1	Unknown Shed	Unknown storage shed (area=100 sq ft)	SB-H13-2031A-01 through SB-H13-2031A-03	SB-H13-2031A-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	Metals		Metals (5-11E & 5-24C)
H13-3	10	Transformer	Three transformers mounted on telephone pole. Recently installed. No evidence of release.	SB-H13-3-01 through SB-H13-3-03	SB-H13-3-01 SB-H13-3-02 SB-H13-3-03	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling				3										1	1			
H13-6	1	Safety Trailer	Portable aluminum sided trailer mounted on concrete block. Office use only, no evidence of release.	SB-H13-6-01 through SB-H13-6-04	SB-H13-6-01 SB-H13-6-04	Sampling location SB-H13-6-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-H13-6-04.		2	2											1	1			
H13-7	9	Stressed Vegetation	Large area with minimal vegetation; White powdery material present in small amounts to S corner of area (area=6,200 sq ft)			This AOC has been referred to the Remedial Investigation due to the presence of E&E materials																E&E*		E&E (5-11C & 5-24B)
H13-8158	1	South Gate House	Wooden construction with aluminum siding, asphalt roof; Gate house only, no evidence of release	SB-H13-8158-01 through SB-H13-8158-04	SB-H13-8158-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	SVOCs		SVOCs (5-11B & 5-24A)
H13-8164	1,5,6	Training Building	Wooden/brick/aluminum siding building; No. 2 fuel oil storage at E corner, septic tank at W corner	SB-H13-8164-01 through SB-H13-8164-05	SB-H13-8164-02 SB-H13-8164-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling		2	2											1	1	SVOCs, Metals		SVOCs (5-11B & 5-24A), Metals (5-11E & 5-24C)
H13-8214	4	Oxidation House Parts Storage	Bldg. demolished-vegetation covers area; No evidence of release (area=100 sq ft)	SB-H13-8214-01 through SB-H13-8214-03	SB-H13-8214-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1								1			1	1		SVOCs	SVOCs (5-11B & 5-24A)
H13-8226	3,6	Change House	Bldg. demolished-vegetation covers area; Associated septic (sludge sample taken during Single Phase Remediation); No evidence of release	SB-H13-8226-01 through SB-H13-8226-05 TP-H13-8226-06	SB-H13-8226-02 SB-H13-8226-01 TP-H13-8226-06	Sampling location SB-H13-8226-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-H13-8226-01. Test Pit location downgradient from septic.	1	3	2											2	2	Metals	SVOCs	SVOCs (5-11B & 5-24A), Metals (5-11E & 5-24C)
I11-2326	3	Platinum Gauge House	Bldg. demolished-only concrete footers remain; No evidence of release	SB-I11-2326-01 through SB-I11-2326-05	SB-I11-2326-04 SB-I11-2326-01	Sampling location SB-I11-2326-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I11-2326-01.		2	2											1	1			
I11-3	7	Unknown Sump	Siemens induction motor pump. Two float switches and pressure indicator present on sump. No evidence of release.	TP-I11-3-01	SB-I11-3-01	Test Pit location was placed downgradient from the sump	1	1			1	1	1							1	1			
I11-9303	4	Ingredient Storage	Bldg. demolished-minimal evidence remains; No evidence of release	SB-I11-9303-01 through SB-I11-9303-05	SB-I11-9303-02	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I11-9303-02		1	1		1	1	1							1	1	SVOCs, Metals, E&E		SVOCs (5-11B & 5-24A), Metals (5-11E & 5-24C), E&E (5-11C & 5-24B)
I11-B5	1	Storage Shed	Corrugated metal shed on wooden foundation. Two waste laboratory glassware metal refuse containers on S side of shed. No evidence of release.	SB-I11-B5-01 through SB-I11-B5-04	SB-I11-B5-04	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 185 ppm at SB-I11-B5-04		1	1											1	1	Metals		Metals (5-11E & 5-24C)
I12-1	3	Unknown Concrete Pad	Square concrete pad with circular cast-in-place rebar. No evidence of release.	SB-I12-1-01 through SB-I12-1-04	SB-I12-1-04 SB-I12-1-02	Sampling location SB-I12-1-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-1-02.		2	2								2			1	1			
I12-10	3	Unknown Foundation	Concrete foundation-possibly formerly lead painted. Possible tank storage. No evidence of release.	SB-I12-10-01 through SB-I12-10-04	SB-I12-10-03 SB-I12-10-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 722 ppm and a zinc concentration of 4,760 ppm at SB-I12-10-03. A confirmation sample was taken at SB-I12-10-01. Analytical results did not detect elevated me		2	2								2			1	1	SVOCs		SVOCs (5-11B & 5-24A)
I12-11	9	Debris Area	Bldg. debris and decontaminated equipment from adjacent decontamination area (area=5,900 sq ft).	SB-I12-11-01 through SB-I12-11-14	SB-I12-11-06 SB-I12-11-08 SB-I12-11-13 SB-I12-11-11 SB-I12-11-09 SB-I12-11-02 SB-I12-11-04	Sampling locations SB-I12-11-06/08/13/11 were determined using professional judgement; Screening results did not warrant biased sampling. Confirmation samples were taken at SB-I12-11-02/04/09.		7	7											1	1		SVOCs	SVOCs (5-11B & 5-24A)
I12-12	5	Propane Tank	Propane tank mounted on concrete footers; currently empty. No evidence of release.	SB-I12-12-01 through SB-I12-12-04	SB-I12-12-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1			
I12-13	5	Propane Tank	Supported on two temporary metal supports-currently empty. No evidence of release.	SB-I12-13-01 through SB-I12-13-03	SB-I12-13-03	Sampling location was determined using an Expray Test Kit;Group C E&E materials were detected at SB-I12-13-03. Analytical results did not detect elevated E&E concentrations.	1	1	1								1			1	1			

Table 2-11

Ammonium Nitrate Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
I12-14	9	Stressed Vegetation	Area of reduced vegetation growth; minimal staining evident. Possibly due to acid storage (area=400 sq ft).	SB-I12-14-01 through SB-I12-14-03	SB-I12-14-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 948 ppm and a copper concentration of 642 ppm at SB-I12-14-01		1	1										1	1	1	Metals		Metals (5-11E & 5-24C)
I12-15	7	Unknown Concrete Vault	6' deep concrete vault currently filled in with soil/debris; NW side 6' square cutout-possible inlet for catch tank; No evidence of release	SB-I12-15-01 through SB-I12-15-04	SB-I12-15-01 SB-I12-15-04	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling		2	2								2			1	1	Metals		Metals (5-11E & 5-24C)
I12-2010	1	Evaporation Shed	Bldg. demolished-concrete footers remain; No evidence of release	SB-I12-2010-01 through SB-I12-2010-05	SB-I12-2010-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1								1			1	1	SVOCs		SVOCs (5-11B & 5-24A)
I12-2011	1,3,7	Crystalizer House	Bldg. demolished-concrete and steel foundation remains. Large oven mounted on foundation. Area currently converted for use as a decontamination facility. Floor drain in W corner flow directed to WWTP. No evidence of release.	SB-I12-2011-01 through SB-I12-2011-04	SB-I12-2011-01 SB-I12-2011-04	Sampling location SB-I12-2011-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-2011-04.		2	2								2			1	1			
I12-2012	3	Coating House Repair Shop	Bldg. demolished-concrete block foundation remains; No evidence of release (area=300 sq ft)	SB-I12-2012-01 through SB-I12-2012-03	SB-I12-2012-02 SB-I12-2012-03	Sampling location SB-I12-2012-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-2012-03.		2	2											1	1			
I12-2013	1,3	Crystalizer Repair Shop	Bldg. demolished-concrete pad remains. Currently decontamination oven mounted on concrete pad.	SB-I12-2013-01 through SB-I12-2013-04	SB-I12-2013-01	Sampling location was determined using XRF screening; Results indicated a coppe concentration of 1,610 ppm at SB-I12-2013-01		1	1											1	1	Metals		Metals (5-11E & 5-24C)
I12-2184	4	Compressor House	Bldg. demolished; Minimal evidence of former location; No evidence of release	SB-I12-2184-01 through SB-I12-2184-03	SB-I12-2184-01	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 296 ppm at SB-I12-2184-01		1	1											1	1	Metals		Metals (5-11E & 5-24C)
I12-2186	1,5	Oxidation House	Steel and concrete masonry unit with plaster covering. Laboratory room storage, loading area, and electrical control room. No. 2 fuel oil ASTs with concrete containment.	SB-I12-2186-01 through SB-I12-2186-15	SB-I12-2186-03 SB-I12-2186-06 SB-I12-2186-13	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling		3	3								3			1	1	Metals	SVOCs	SVOCs (5-11B & 5-24A), Metals (5-11E & 5-24C)
I12-2287	3	Falling Film Evaporator	Bldg. demolished-center of building between two foundations-one with brick wall. No evidence of release (area=300 sq ft).	SB-I12-2287-01 through SB-I12-2287-04	SB-I12-2287-01 SB-I12-2287-04	Sampling location SB-I12-2287-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-2287-04.		2	2											1	1	Metals		Metals (5-11E & 5-24C)
I12-2341	3	Unknown Name	Bldg. demolished-concrete rubble present; No evidence of release	SB-I12-2341-01 through SB-I12-2341-03	SB-I12-2341-03	Sampling location was determined using XRF screening; Results indicated a lead concentration of 25,130 ppm at SB-I12-2341-03		1	1								1			1	1	Metals	SVOCs	SVOCs (5-11B & 5-24A), Metals (5-11E & 5-24C)
I12-6	3	Unknown Concrete Pad	Possible former Boiler House pad. Recently constructed pad. No evidence of release.	SB-I12-6-01 through SB-I12-6-04	SB-I12-6-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1								1			1	1	Metals	SVOCs	SVOCs (5-11B & 5-24A), Metals (5-11E & 5-24C)
I12-7	5	Equalization Tank	Steel tank, catch basin on NW side with two flanking valve boxes. Pumps on SW side. No evidence of release.	SB-I12-7-01 through SB-I12-7-04 TP-I12-7-05	SB-I12-7-02 SB-I12-7-04 SB-I12-7-05	Sampling location SB-I12-7-02 was determined using professional judgement; Sampling location SB-I12-7-04 was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I12-7-04. Test Pit location was placed downgradient of the sump.		2	1		2	2	2				1			2	2	Metals		Metals (5-11E & 5-24C)
I12-8	10	Transformer	Pole mounted. Housing appears intact. No evidence of release.	SB-I12-8-01	SB-I12-8-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
I12-8271	1	Control Room	Control House for EQ WWTP; Concrete masonry block construction; Houses single blower/silencer; Stressed vegetation at SE corner	SB-I12-8271-01 through SB-I12-8271-04	SB-I12-8271-02 SB-I12-8271-01	Sampling location SB-I12-8271-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-8271-01.		2	2											1	1			
I12-8581	1	Decontamination Facility Control Room	Wooden shed-houses oven controls and pressure washer; Small debris area (building debris) at S corner; No evidence of release	SB-I12-8581-01 through SB-I12-8581-04	SB-I12-8581-04 SB-I12-8581-01	Sampling location SB-I12-8581-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-8581-01.	2	2	2		2	2	2				2			1	1			
I12-9	10	Transformer	Not mounted; on ground adjacent to telephone pole. Housing intact. No evidence of release.	SB-I12-9-01	SB-I12-9-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			

Table 2-11

Ammonium Nitrate Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
I12-9110	5	Nitric Acid Storage Tanks	Bldg. Demolished-minimal evidence of former tanks, tanks removed. No evidence of release.	SB-I12-9110-01 through SB-I12-9110-06	SB-I12-9110-03 SB-I12-9110-04	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling		2	2										2	1	1	Metals		Metals (5-11E & 5-24C)
I12-9111	5	Wastewater Treatment Tank	Treatment tank, associated three blowers, wastewater disinfector overflow structure and return piping. Oily area between blowers and WWTP tank.	SB-I12-9111-01 through SB-I12-9111-07	SB-I12-9111-04 SB-I12-9111-01	Sampling location was determined using XRF screening; Results indicated a zinc concentration of 5,090 ppm at SB-I12-9111-04. A confirmation sample was taken at SB-I12-9111-01. Analytical results did not detect elevated metal concentrations.	2	2	2											1	1	SVOCs		SVOCs (5-11B & 5-24A)
I12-9112	5	Nitric Acid Storage Tanks	Bldg. demolished-cradle removed footers remain; No evidence of release	SB-I12-9112-01 through SB-I12-9112-06	SB-I12-9112-04 SB-I12-9112-03	Sampling location SB-I12-9112-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-I12-9112-03.		2	2											1	1			
I12-9120	4	Unknown	Bldg. demolished; Minimal evidence of former location; No evidence of release	SB-I12-9120-01 through SB-I12-9120-03	SB-I12-9120-02 SB-I12-9120-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was taken at SB-I12-9120-03.		2	2															

Notes:
All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
AOC = Area of Concern
XRF = X-ray Fluorescence
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector
TOC and GRAIN SIZE collected at each AOC

All screening samples were evaluated for VOCs, Metals, and E&E compounds

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
Sq Ft = Square Foot
No. = Number

* = AOC reserved for RI due to presence of contamination
** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

AOC Type
1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

Table 2-12

Storage Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
I11-8278	3	Charge House	Concrete footers only evidence of former building; Area covered with vegetation; No evidence of release (area=100 sq ft)	SB-I11-8278-01 through SB-I11-8278-03	SB-I11-8278-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1	SVOCs		SVOCs (5-12B & 5-25B)
I11-9301	3	Box Store House	Minimal evidence of former building, now a vegetated area; Some rebar protruding from the ground N end of former building	SB-I11-9301-01 through SB-I11-9301-05	SB-I11-9301-05 SB-I11-9301-02	Sampling location SB-I11-9301-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I11-9301-02.		2	2											1	1	Metals, SVOCs		Metals (5-12E & 5-25D), SVOCs (5-12B & 5-25B)
J10-2	9	Debris Area	Most metal debris removed along this former railroad line. Minor amounts of aluminum and sheet metal, rail ties and track. No evidence of release (area=3,700 sq ft).	SB-J10-2-01 through SB-J10-2-11	SB-J10-2-03 SB-J10-2-04 SB-J10-2-08 SB-J10-2-11	Sampling locations SB-J10-2-03/08/11 were determined using an Expray Test Kit; Group B E&E materials were detected at SB-J10-2-03/08/11; Sampling locations SB-J10-2-04/11 were determined using XRF screening. Results indicated an arsenic concentration of		4	4		4	4	4							1	1	Metals, SVOCs		Metals (5-12E & 5-25D), SVOCs (5-12B & 5-25B)
J10-2033	3	Box Paint House	All that remains of former building is vegetated area and one footer; Adjacent to rail line. No evidence of release.	SB-J10-2033-01 through SB-J10-2033-05	SB-J10-2033-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 770 ppm at SB-J10-2033-01		1	1											1	1	Metals	SVOCs	Metals (5-12E & 5-25D), SVOCs (5-12B & 5-25B)
J10-2166	1,7	D-2 Wax House	CMU foundation with wooden siding. Catch tank on S side.			This AOC has been referred to the Remedial Investigation due to the presence of E&E materials																E&E*		E&E (5-12C & 5-25C)
J10-3	10	Electric Transformer	Corroded bottom, possible oil release	SB-J10-3-01	SB-J10-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
J10-9122	5	D-2 Wax Tank	Utility hoist motor on SW side; Pump and temp gauge on NE side; Wax coating on surrounding machinery	SB-J10-9122-01 through SB-J10-9122-03	SB-J10-9122-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1	VOCs		VOCs (5-12A & 5-25A)
J10-9334	1	D-2 Store House	Wooden construction built on concrete footers; No evidence of a release	SB-J10-9334-01 through SB-J10-9334-06	SB-J10-9334-01	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-J10-9334-01		1	1		1	1	1							1	1	SVOCs, E&E		SVOCs (5-12B & 5-25B), E&E (5-12C & 5-25C)
J8-9220	1	Shipping House #1	Concrete foundation with wooden construction and corrugated sheet metal, 3 loading areas. Soil berm on N. side of building. No evidence of a release	SB-J8-9220-01 through SB-J8-9220-07	SB-J8-9220-02 SB-J8-9220-05	Sampling location SB-J8-9220-05 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-J8-9220-02					2	2	2							1	1	E&E		E&E (5-12C & 5-25C)
J9-2	9	Stressed Vegetation	Soil with gray flakes of soft paper-like substance (area=50 sq ft)	SB-J9-2-01 through SB-J9-2-03	SB-J9-2-02	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-J9-2-02. Analytical results did not detect elevated E&E concentrations.		1	1		1	1	1						1	1	1			
J9-6	4	Smokeless Unloading	Minor amounts of concrete block, wood and steel siding; Location based on historical maps; No evidence of a release	SB-J9-6-01 through SB-J9-6-03	SB-J9-6-02 SB-J9-6-01	Sampling location SB-J9-6-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J9-6-01.					2	2	2							1	1			
K7-2125	1	Rest House #2	Steel and wood structure; Three loading doors on E side, loading dock on S side, possible; narrow gauge railroad on E side; No evidence of a release	SB-K7-2125-01 through SB-K7-2125-05	SB-K7-2125-01 SB-K7-2125-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1		E&E	E&E (5-12C & 5-25C)
K7-2126	1	Rest House #3	Steel and wood structure; Two loading doors on E side, loading dock on SE corner; A canopy covers the loading dock; No evidence of a release	SB-K7-2126-01 through SB-K7-2126-05	SB-K7-2126-03 SB-K7-2126-05	Sampling location SB-K7-2126-05 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-K7-2126-03					2	2	2							1	1	E&E		E&E (5-12C & 5-25C)
K7-2127	1	Rest House #6	Steel and wood structure; Two loading doors on E side, loading dock on E corner, possibly for narrow gauge railroad; No evidence of a release	SB-K7-2127-01 through SB-K7-2127-05	SB-K7-2127-03 SB-K7-2127-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1			
K7-2132	1	Rest House #4	Wood and steel structure. Three loading doors on the W side and a loading dock on the S corner. A canopy covers the loading dock, a potential narrow gauge rail loading area. No evidence of a release.	SB-K7-2132-01 through SB-K7-2132-05	SB-K7-2132-03 SB-K7-2132-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1	E&E		E&E (5-12C & 5-25C)
K7-3	3	Unknown Foundation	Foundation has been removed, only evidence is an old walkway; No evidence of a release (area=100 sq ft)	SB-K7-3-01 through SB-K7-3-03	SB-K7-3-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
K7-F5	4	Rest House #3 Scrap Shed	Scrap shed has been totally removed; All that remains is a flat area (area=100 sq ft)	SB-K7-F5-01 through SB-K7-F5-03	SB-K7-F5-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
K8-1	3	Unknown Foundation	Old foundation consisting of cement footers; Probably used for storage; No evidence of release	SB-K8-1-01 through SB-K8-1-05	SB-K0-1-01 SB-K8-1-05	Sampling location SB-K8-1-05 was determined using professional judgement; Sampling location SB-K8-1-01 was determined using XRF screening. Results indicated a lead concentration of 532 ppm and an arsenic concentration of 247 ppm at SB-K8-1-01		2	2		2	2	2							1	1	Metals	E&E, SVOCs	Metals (5-12E & 5-25D), E&E (5-12C & 5-25C), SVOCs (5-12B & 5-25B)
K8-393	4	Blender 393 Packhouse 565	Building has been completely removed; No evidence of a release	SB-K8-393-01 through SB-K8-393-05	SB-K8-393-05 SB-K8-393-01	Sampling location SB-K8-393-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K8-393-01.		2	2		2	2	2							1	1		E&E, SVOCs	SVOCs (5-12B & 5-25B), E&E (5-12C & 5-25C)
K8-9207	3	Shipping House #2	All that remains is concrete pad and railroad ties leading up to and away from building. A chunk of TNT found in center of concrete pad. No evidence of a release.	SB-K8-9207-01 through SB-K8-9207-04	SB-K8-9207-02 SB-K8-9207-04	Sampling location SB-K8-9207-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K8-9207-04.	1				2	2	2							1	1	E&E	SVOCs	SVOCs (5-12B & 5-25B), E&E (5-12C & 5-25C)
K8-9212	1	New Premix Storehouse	Wooden building with corrugated sheet metal construction; Stressed soil on E and W side of building, dark stained soil with black pellets, possibly coal	SB-K8-9212-01 through SB-K8-9212-07	SB-K8-9212-02 SB-K8-9212-07	Sampling location SB-K8-9212-07 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-K8-9212-02. Analytical results did not detect elevated E&E concentrations.		2	2		2	2	2							1	1	Metals		Metals (5-12E & 5-25D)
K8-9212A	1	New Premix Storehouse Shed	Shed adjacent to K08-9212 with concrete foundation with wooden construction	SB-K8-9212A-01 through SB-K8-9212A-04	SB-K8-9212A-01 SB-K8-9212A-04	Sampling location SB-K8-9212A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K8-9212A-04.		2	2											1	1			
K9-3	9	Discarded Drum	Drum has been removed with flag placed in former location; Area is currently covered with vegetation	SB-K9-3-01 through SB-K9-3-02	SB-K9-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
K9-9203	1	Dynamite Magazine #4	Brick foundation, corrugated sheet metal, wooden construction Loading dock to SW side of building. No evidence of release.	SB-K9-9203-01 through SB-K9-9203-07	SB-K9-9203-01 SB-K9-9203-07	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1		E&E	E&E (5-12C & 5-25C)
K9-9204	1	Shipping House #3	Brick foundation, corrugated sheet metal, wooden construction. Multiple loading areas with berm on N side. No evidence of release.	SB-K9-9204-01 through SB-K9-9204-08	SB-K9-9204-01 SB-K9-9204-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1			

Table 2-12

Storage Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
L6-2128	1	Rest House #7	Steel and wood structure. Two loading doors on E side, loading dock on E corner, possibly for narrow gauge railroad. No evidence of a release.	SB-L6-2128-01 through SB-L6-2128-05	SB-L6-2128-03 SB-L6-2128-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1		E&E	E&E (5-12C & 5-25C)
L6-2129	1	Rest House #9	Steel sided structure with loading areas on the W and possibly E sides. No evidence of released.	SB-L6-2129-01 through SB-L6-2129-07	SB-L6-2129-03 SB-L6-2129-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1		E&E	E&E (5-12C & 5-25C)
L7-1	9	Debris	Most debris removed, all that remains is a piece of rebar, two chunks of steel siding and a narrow gauge rail section. No evidence of a release.	SB-L7-1-01 through SB-L7-1-03	SB-L7-1-03 SB-L7-1-01	Sampling location SB-L7-1-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L7-1-01.		2	2											1	1			
L7-2	3	Unknown Foundation	Foundation has been removed, only evidence is overturned soil; No evidence of a release (area=100 sq ft)	SB-L7-2-01 through SB-L7-2-03	SB-L7-2-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1		1	1	1							1	1			
L7-2130	1	Rest House #8	Steel sided building. Two narrow gauge rail loading areas, one truck loading area, one hand loading area. No evidence of a release.	SB-L7-2130-01 through SB-L7-2130-08	SB-L7-2130-01 SB-L7-2130-06	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1	E&E		E&E (5-12C & 5-25C)
L7-2131	1	Rest House #5	Wood and steel structure. Three loading doors and a loading dock on the E side. A canopy covers the loading dock, a potential narrow gauge rail loading area. No evidence of a release.	SB-L7-2131-01 through SB-L7-2131-05	SB-L7-2131-04 SB-L7-2131-05	Sampling location SB-L7-2131-05 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-L7-2131-04					2	2	2							1	1	E&E		E&E (5-12C & 5-25C)
L7-4	9	Discarded Drums	Drums and metal debris has been removed; No evidence of a release	SB-L7-4-01 through SB-L7-4-03	SB-L7-4-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
L7-5	10	Electric Transformer	Transformer corroded but looks intact; No evidence of a release	SB-L7-5-01	SB-L7-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
L7-6	9	Discarded Drum	Drum has been removed with no evidence of location. Location will be estimated.	SB-L7-6-01 through SB-L7-6-03	SB-L7-6-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
L7-8115	3	Magazine Office	Building completely removed. All that remains is a berm indicating its presence. No evidence of a release (area=400 sq ft).	SB-L7-8115-01 through SB-L7-8115-04	SB-L7-8115-02 SB-L7-8115-04	Sampling location SB-L7-8115-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L7-8115-04.		2	2											1	1			
L7-9206	1	Cap Magazine	Steel structure on concrete pad, one door on E side; No evidence of a release (area=200 sq ft)	SB-L7-9206-01 through SB-L7-9206-04	SB-L7-9206-01 SB-L7-9206-02	Sampling location SB-L7-9206-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L7-9206-02.					2	2	2							1	1			
L7-9315	4	Fuse Storage	Building completely removed; No evidence of a release (area=200 sq ft)	SB-L7-9315-01 through SB-L7-9315-03	SB-L7-9315-01 SB-L7-9315-02	Sampling location SB-L7-9315-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L7-9315-02.					2	2	2							1	1			
L8-8215	3	Unknown	Vegetation covers former site with sand areas; Probable former scrap shed; No evidence of a release (area=100 sq ft)	SB-L8-8215-01 through SB-L8-8215-03	SB-L8-8215-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1							1	1			
L8-8235	4	Car Barrel Shed	Area presently covered with vegetation; No evidence of a release	SB-L8-8235-01 through SB-L8-8235-03	SB-L8-8235-01 SB-L8-8235-02	Sampling location SB-L8-8235-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L8-8235-02.	2	2												1	1			
L8-9202	1	No. 5 Shipping	Brick foundation wood wrapped in corrugated sheet metal; Berm on SE side with rail loading area; Loading dock on NW corner; No evidence of a release	SB-L8-9202-01 through SB-L8-9202-07	SB-L8-9202-01 SB-L8-9202-07	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1			
M6-1	9	Debris Area	Debris area and flyash consisting of bottles, pipes, a drum and general rubbish along a duck pond (area=14,000 sq ft)	SB-M6-1-01 through SB-M6-1-20	SB-M6-1-01 SB-M6-1-06 SB-M6-1-07 SB-M6-1-11 SB-M6-1-13 SB-M6-1-14 SB-M6-1-15 SB-M6-1-18	Sampling locations SB-M6-1-11/13/14/15/18 were determined using professional judgement; Sampling location SB-M6-1-06 was determined using XRF screening. Results indicated an arsenic concentration of 229 ppm at SB-M6-1-06; Group B E&E materials were det			1		8	8	8							1	1	Metals		Metals (5-12E & 5-25D)
M7-1	3	Possible Dynamite Magazine	Building has been removed, only remains are an elevated area of soil and the remains of a loading dock. No evidence of a release.	SB-M7-1-01 through SB-M7-1-05	SB-M7-1-01 SB-M7-1-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1		E&E	E&E (5-12C & 5-25C)
M7-2	9	Debris Area	Debris area consisting of metal cans, pipes, fittings and sidings, Some concrete covered in the green fibrous material from N7-5 (area=30,000 sq ft)	SB-M7-2-01 through SB-M7-2-20	SB-M7-2-02 SB-M7-2-04 SB-M7-2-05 SB-M7-2-11 SB-M7-2-13 SB-M7-2-15 SB-M7-2-18 SB-M7-2-20	Sampling locations SB-M7-2-02/04/11/13/18 were determined using professional judgement; Sampling locations SB-M7-2-05/15/20 were determined using XRF screening. Results indicated a copper concentration of 9,200 ppm and a lead concentration of 1,117 ppm a	8	8												1	1	Metals, SVOCs		Metals (5-12E & 5-25D), SVOCs (5-12B & 5-25B)
M7-9205	1	Dynamite Magazine #1	Old wooden magazine surrounded on three sides by a wooden and earthen berm, with loading areas in the NW and SE corners, the SE loading dock is covered by a roof. No evidence of a release	SB-M7-9205-01 through SB-M7-9205-06	SB-M7-9205-01 SB-M7-9205-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1			
M8-9201	1	Dynamite Magazine #2	Old structure that had a barricade many years ago, the building has three doors and five loading docks, a narrow gauge rail serviced this building. No evidence of release	SB-M8-9201-01 through SB-M8-9201-10	SB-M8-9201-01 SB-M8-9201-10	Sampling location SB-M8-9201-01 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-M8-9201-10					2	2	2							1	1			
N5-3	3	Former Store House	Pit in the ground with bermed sides, all remnants of former structure have been removed. No evidence of release.	SB-N5-3-01 through SB-N5-3-05	SB-N5-3-03 SB-N5-3-01	Sampling location SB-N5-3-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N5-3-01.	2	2												1	1			
N5-533	3	Former Store House	Remains of former store house, only 21 cement footers and some old rusted metal siding remain. Building was thermally decontaminated. No evidence of a release.	SB-N5-533-01 through SB-N5-533-05	SB-N5-533-05 SB-N5-533-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 538 ppm at SB-N5-533-05. A confirmation sample was collected at SB-N5-533-01. Analytical results did not detect elevated metal concentrations.	2	2												1	1			

Table 2-12

Storage Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
N5-581	3	Former Store House	Old structure protected by an earthen berm, building has been removed and all that remains is the berm and its wooden support. No evidence of release.	SB-N5-581-01 through SB-N5-581-05	SB-N5-581-01 SB-N5-581-05	Sampling location SB-N5-581-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N5-581-05.		2	2											1	1			
N5-582	3	Former Store House	Old wooden structure that has been completely removed, only poorly weathered berm remains. No evidence of release.	SB-N5-582-01 through SB-N5-582-05	SB-N5-582-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	SVOCs		SVOCs (5-12B & 5-25B)
N6-580	4	Rest House #580	This former rest house is buried beneath the old landfill with no evidence of its location, location will be estimated			This remnant building is located within the landfill, therefore it will not sampled.																		
N6-640	3	Blending House	Formerly large structure, all that remains is the central foundation, it is covered with debris with trees growing in it, it is reported the structure was scrapped. No evidence of release.	SB-N6-640-01 through SB-N6-640-05	SB-N6-640-03	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 254 ppm at SB-N6-640-03		1	1		1	1	1							1	1	Metals, SVOCs		Metals (5-12E & 5-25D), SVOCs (5-12B & 5-25B)
N6-9208	1	Shipping House #9	Old wooden structure with steel siding and roofing, large wooden. Berm filled with earth surrounding the structure, loading docks on the N and S sides. No evidence of release.	SB-N6-9208-01 through SB-N6-9208-06	SB-N6-9208-03 SB-N6-9208-04	Sampling locations were determined using an Expray Test Kit; Group B E&E materials were detected at SB-N6-9208-03/04. Analytical results did not detect elevated E&E concentrations.					2	2	2							1	1			
N7-2	9	Debris Area	Debris area consisting of drums, wood, cement and scrap metal. Pooled water that may be seasonal, buried drums (area=11,000 sq ft).	SB-N7-2-01 through SB-N7-2-19	SB-N7-2-06 SB-N7-2-07 SB-N7-2-10 SB-N7-2-13 SB-N7-2-14 SB-N7-2-17	Sampling locations SB-N7-2-06/07/10/13/14 were determined using professional judgement; Sampling location SB-N7-2-17 was determined using XRF screening. Results indicated a lead concentration of 1236 ppm at SB-N7-2-17		6	6											1	1	Metals, SVOCs		Metals (5-12E & 5-25D), SVOCs (5-12B & 5-25B)
N7-394	4	Blender #2 Building 394	No debris remains of building, adjacent debris from former blender. Location based on historic maps. No evidence of release.	SB-N7-394-01 through SB-N7-394-03	SB-N7-394-01 SB-N7-394-03	Sampling location SB-N7-394-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N7-394-03.		2	2			2	2	2						1	1			
N7-4	10	Electric Transformer	Electric transformer on telephone pole, looks intact. No evidence of release.	SB-N7-4-01	SB-N7-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
N7-5	9	Stressed Vegetation	Area of stressed vegetation, possibly caused by fibrous, green flat pieces of material (area=100 sq ft).	SB-N7-5-01 through SB-N7-5-03	SB-N7-5-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1										1	1	1			
N7-571	4	Unknown	Building is destroyed with only some wood remaining, building is located on the edge of the pond. No evidence of release	SB-N7-571-01 through SB-N7-571-03	SB-N7-571-03 SB-N7-571-02	Sampling location SB-N7-571-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N7-571-02.		2	2		2	2	2							1	1			
N7-572	4	Unknown	Building has been totally destroyed, the only remnants being a few bricks and a piece of copper. No evidence of a release (area=100 sq ft).	SB-N7-572-01 through SB-N7-572-03	SB-N7-572-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1							1	1		E&E	E&E (5-12C & 5-25C)
N7-573	4	Unknown	Building totally removed, approximate location based on historic maps. No evidence of release.	SB-N7-573-01 through SB-N7-573-03	SB-N7-573-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1							1	1	Metals	E&E, SVOCs	Metals (5-12E & 5-25D), E&E (5-12C & 5-25C), SVOCs (5-12B & 5-25B)
N7-574	4	Unknown	Former building has been removed, all that remains is a built up level area extending into a marshy area, some drums and scrap are nearby (area=800 sq ft).	SB-N7-574-01 through SB-N7-574-04	SB-N7-574-02 SB-N7-574-03	Sampling location SB-N7-574-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N7-574-03.	2	2			2	2	2							1	1			
N7-9222	1	Shipping House #8	Cement foundation wood with steel siding, there is a berm to the S. There is a potential loading in the E and two loading docks, the N loading dock is for rail, the W loading dock for trucks. No evidence of release.	SB-N7-9222-01 through SB-N7-9222-07	SB-N7-9222-06 SB-N7-9222-01	Sampling location SB-N7-9222-06 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N7-9222-01.					2	2	2							1	1		E&E	E&E (5-12C & 5-25C)
N8-389	3	Dry House	Building has been completely removed, all that remains is 12 concrete footers and some scrap metal. No evidence of release.	SB-N8-389-01 through SB-N8-389-05	SB-N8-389-05 SB-N8-389-04	Sampling location SB-N8-389-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N8-389-04.					2	2	2							1	1			
O5-2	3	Former Store House	Building removed, all that remains is an earthen berm; No evidence of release (area=800 sq ft)	SB-O5-2-01 through SB-O5-2-04	SB-O5-2-01 SB-O5-2-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	2	2												1	1			
O5-5	3	Former Store House	Man-made level section of ground cut out of a slope creating a bermed area, one piece of scrap metal remains. No evidence of release (area=300 sq ft).	SB-O5-5-01 through SB-O5-5-03	SB-O5-5-03 SB-O5-5-02	Sampling location SB-O5-5-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O5-5-02.	2	2												1	1			
O5-534	3	Former Store House	Similar to N5-533, 18 footers and some steel siding remain; Building was thermally decontaminated; No evidence of a release	SB-O5-534-01 through SB-O5-534-05	SB-O5-534-04 SB-O5-534-02	Sampling location was determined using XRF screening; Results indicated a lead concentration of 430 ppm at SB-O5-534-04 A confirmation sample was collected at SB-O5-534-02. Analytical results did not detect elevated metal concentrations.	2	2												1	1			
O5-537	3	Dry House #56	21 cement footers remain, building has been removed except for some pieces of steel siding, building surrounded on three sides by earthen berm supported with wood and steel. No evidence of release.	SB-O5-537-01 through SB-O5-537-05	SB-O5-537-05 SB-O5-537-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling					2	2	2							1	1			
O5-578	3	Rest House #12	Old bermed area, berm contains wood and steel reinforcing and has been partially destroyed. Building was thermally decontaminated and has been completely removed. No evidence of release (area=400 sq ft).	SB-O5-578-01 through SB-O5-578-04	SB-O5-578-04 SB-O5-578-02	Sampling location SB-O5-578-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O5-578-02.					2	2	2							1	1			
O5-579	3	Rest House #13	Building completely removed, only foundation remains. No evidence of release.	SB-O5-579-01 through SB-O5-579-05	SB-O5-579-04 SB-O5-579-01	Sampling location SB-O5-579-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O5-579-01.					2	2	2							1	1	E&E		E&E (5-12C & 5-25C)
O5-580.5	3	Store House	Former store house nearly completely removed, N side wooden berm remains, narrow gauge rail line runs through center of building. No evidence of release.	SB-O5-580.5-01 through SB-O5-580.5-05	SB-O5-580.5-02 SB-O5-580.5-05	Sampling location SB-O5-580.5-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O5-580.5-05.	2	2												1	1			
O5-580.75	3	Rest House	Small bermed area, berm has wood and steel reinforcing bars, structure appears to have been thermally decontaminated. No evidence of release (area=500 sq ft).	SB-O5-580.75-01 through SB-O5-580.75-05	SB-O5-580.75-05 SB-O5-580.75-04	Sampling location SB-O05-580.75-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O05-580.75-04.					2	2	2							1	1			
O5-6	3	Unknown	Associated with dry house #56 (05-534). Use unknown (area=800 sq ft).	SB-O5-6-01 through SB-O5-6-04	SB-O5-6-02 SB-O5-6-03	Sampling location SB-O5-6-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O5-6-03.	2	2			2	2	2							1	1			

Table 2-12

Storage Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
O6-1	3	Former Store House	Building nearly completely removed when a road was put in place, only remains is a single concrete footer, there is some plastic on the ground nearby. No evidence of release (area=100 sq ft).	SB-O6-1-01 through SB-O6-1-03	SB-O6-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
O6-3	10	Electric Transformer	Electric transformer on telephone pole, base looks to be corroding. There may have been a release.	SB-O6-3-01	SB-O6-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling				1										1	1			
O6-577	3	Rest House #11	All that remains is a hole in the ground, the bottom of the foundation is filled with water. No evidence of release (area=700 sq ft).	SB-O6-577-01 through SB-O6-577-04	SB-O6-577-03 SB-O6-577-01	Sampling location SB-O6-577-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O6-577-01.					2	2	2							1	1			
O6-649	4	Blender #649	No remnants of former building; Former location estimated	SB-O6-649-01 through SB-O6-649-03	SB-O6-649-02 SB-O6-649-03	Sampling location SB-O6-649-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O6-649-03.		2	2		2	2	2							1	1			
O6-650	4	Blender #650	Building has been completely dismantled, there are no remains, Center of building estimated using historical maps	SB-O6-650-01 through SB-O6-650-03	SB-O6-650-03 SB-O6-650-01	Sampling location SB-O6-650-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O6-650-01.		2	2		2	2	2							1	1			
O6-9223	1	Shipping House #10	Concrete foundation with a wooden structure sided in steel. Two loading docks on the N and S side. No evidence of a release. Loading dock is covered with a roof structure	SB-O6-9223-01 through SB-O6-9223-07	SB-O6-9223-06 SB-O6-9223-07	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling					2	2	2							1	1		E&E	E&E (5-12C & 5-25C)
O6-9224	1	Shipping House #12	Concrete foundation with a wooden structure sided in steel. Two loading docks on the E and W side. No evidence of a release.	SB-O6-9224-01 through SB-O6-9224-07	SB-O6-9224-03 SB-O6-9224-06	Sampling location SB-O6-9224-06 was determined using professional judgement; Group B E&E materials were detected at sampling location SB-O6-9224-03					2	2	2							1	1		E&E	E&E (5-12C & 5-25C)
O7-1	3	Water Dry House	Building has been removed except for 14 cement column footers, some toppled. No evidence of a release.	SB-O7-1-01 through SB-O7-1-05	SB-O7-1-03 SB-O7-1-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 4200 ppm at SB-O7-1-03. A confirmation sample was collected at SB-O7-1-01					2	2	2							1	1		Metals	Metals (5-12E & 5-25D)
O7-2	3	Unknown	Small cement foundation	SB-O7-2-01 through SB-O7-2-04	SB-O7-2-02 SB-O7-2-01	Sampling location SB-O7-2-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-2-01.		2	2		2	2	2							1	1			
O7-391	4	Dry House 391	All remnants of building have been removed. Location based on historic maps. No evidence of release.	SB-O7-391-01 through SB-O7-391-03	SB-O7-391-03 SB-O7-391-02	Sampling location SB-O7-391-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-391-02.					2	2	2							1	1			
O7-395	4	Blender House #3	Building completely dismantled, location based on historic maps and pack house footer. No evidence of release.	SB-O7-395-01 through SB-O7-395-03	SB-O7-395-02 SB-O7-395-03	Sampling location SB-O7-395-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-395-03.		2	2		2	2	2							1	1			
O7-396	4	Blender 396	No evidence of building remain, location based on historic maps. No evidence of release.	SB-O7-396-01 through SB-O7-396-03	SB-O7-396-02 SB-O7-396-03	Sampling location SB-O7-396-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-396-03.	2	2			2	2	2							1	1	Metals		Metals (5-12E & 5-25D)
O7-576	3	Unknown	All that remains is a part of the broken foundation; No evidence of a release (area=100 sq ft)	SB-O7-576-01 through SB-O7-576-03	SB-O7-576-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1			1	1	1							1	1			
O7-615E	3	Former Store House	Similar to 07-9319, only broken brick footers remain with considerable debris. Former building is buried under the debris.	SB-O7-615E-01 through SB-O7-615E-04	SB-O7-615E-01 SB-O7-615E-04	Sampling location SB-O7-615E-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-615E-04.	2	2												1	1			
O7-9319	3	Former Store House	Building was dismantled and all that remains are brick and cement footers with scattered debris including metal reinforcers and pipes. No evidence of a release.	SB-O7-9319-01 through SB-O7-9319-04	SB-O7-9319-01	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-O7-9319-01	1	1			1	1	1							1	1	Metals	E&E	Metals (5-12E & 5-25D), E&E (5-12C & 5-25C)
O8-3	9	Debris Area	Debris pushed down the slope from B-Line. Consists of foundations, process equipment and scrap metal. Slightly stressed or steep slope prevents vegetation (area=15,000 sq ft).	SB-O8-3-01 through SB-O8-3-20	SB-O8-3-04 SB-O8-3-06 SB-O8-3-09 SB-O8-3-12 SB-O8-3-13 SB-O8-3-15 SB-O8-3-18 SB-O8-3-20	Sampling locations SB-O8-3-04/06/09/12/13/15/18/20 were determined using professional judgement; Screening results did not warrant biased sampling	8	8												1	1	Metals, SVOCs		Metals (5-12E & 5-25D), SVOCs (5-12B & 5-25B)
O8-392	4	Water Dry House	Building has been removed, location estimated from historical maps. No evidence of a release.	SB-O8-392-01 through SB-O8-392-03	SB-O8-392-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling					1	1	1							1	1	E&E		E&E (5-12C & 5-25C)
O8-732	3,7	Blending Tower 732	Inner cement circle surrounded by nine support footers. Pit is filled with water, structure completely removed. No evidence of a release.	SB-O8-732-01 through SB-O8-732-05	SB-O8-732-01 SB-O8-732-04	Sampling location was determined using XRF screening; Results indicated a lead concentration of 664 ppm at SB-O8-732-01. A confirmation sample was collected at SB-08-732-04.	2	2			2	2	2							1	1	Metals		Metals (5-12E & 5-25D)
P5-2	9	Unknown	Associated with dry house #55 (P5-536), use unknown, all that remains is an earthen pit. No evidence of release. Both P5-2 and P5-3 are up slope from their respective dry house.	SB-P5-2-01 through SB-P5-2-04	SB-P5-2-01 SB-P5-2-03	Sampling location SB-P5-2-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-P5-2-03.	2	2			2	2	2							1	1			
P5-3	9	Unknown	Associated with dry house #54 (P5-535), use unknown, all that remains is a depression in the ground. No evidence of release (area=800 sq ft).	SB-P5-3-01 through SB-P5-3-04	SB-P5-3-02 SB-P5-3-01	Sampling location SB-P5-3-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-P5-3-01.	2	2			2	2	2							1	1			
P5-535	3	Dry House #54	Very similar to 05-537 and 05-536. No evidence of release.	SB-P5-535-01 through SB-P5-535-05	SB-P5-535-04	Sampling location was determined using XRF screening; Results indicated a lead concentration of 666 ppm at SB-P5-535-04				1	1	1	1							1	1	Metals	E&E	Metals (5-12E & 5-25D), E&E (5-12C & 5-25C)
P5-536	3	Dry House #55	Same as 05-537 except berm is more intact, there is a 0.5 inch pipe going into ground at NE corner.	SB-P5-536-01 through SB-P5-536-06	SB-P5-536-01	Sampling location was determined using XRF screening; Results indicated a lead concentration of 602 ppm at SB-P5-536-01. Analytical results did not detect elevated metal concentrations.					1	1	1							1	1			
P6-541	3	Dry House #60	Building has been completely removed, all that remains is 21 concrete footers, small amount of steel siding S of former structure. No evidence of release.	SB-P6-541-01 through SB-P6-541-05	SB-P6-541-05 SB-P6-541-01	Sampling location SB-P6-541-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-P6-541-01.	1	1			2	2	2							1	1	Metals		Metals (5-12E & 5-25D)
P6-651	3	Blender 651	Only concrete footer remains. No evidence of release.	SB-P6-651-01 through SB-P6-651-05	SB-P6-651-02 SB-P6-651-04	Sampling location SB-P6-651-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-P6-651-04.	2	2			2	2	2							1	1	Metals		Metals (5-12E & 5-25D)

Table 2-12

Storage Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
P6-9225	1	Shipping House	Cement pad with wooden structure, covered with steel siding. Loading dock on SW side-partially collapsed, no utilities. No evidence of release.	SB-P6-9225-01 through SB-P6-9225-05	SB-P6-9225-03 SB-P6-9225-05	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling		2	2		1	1	1							1	1		SVOCs	SVOCs (5-12B & 5-25B)
P7-4	3	Unknown	Foundation debris piled up, most likely a former store house, there is an area of S.V. where this building once stood. The S.V. area looks to be covered with flyash.	SB-P7-4-01 through SB-P7-4-03	SB-P7-4-01	Sampling location was determined using XRF screening; Results indicated an arsenic concentration of 183 ppm at SB-P7-4-01		1	1		1	1	1							1	1	Metals, SVOCs		Metals (5-12E & 5-25D), SVOCs (5-12B & 5-25B)
P7-575	3,7	Blending Tower 575	Circular structure with inner foundation, may be tank like. Immediately N of inner circle is a sump like pit. Building completely removed. Two pipes entering the ground W of the sump. No evidence of a release.	SB-P7-575-01 through SB-P7-575-07 TP-P7-575-08	SB-P7-575-01 SB-P7-575-04 TP-P7-575-08	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling. Test Pit location placed downgradient from the sump.		3	2		3	3	3							2	2			
P7-9209	1	Shipping House #11	Wooden structure sided and roofed with steel, two narrow gauge rail loading docks on the S side and a truck loading dock on the E side. There is no evidence of a release.	SB-P7-9209-01 through SB-P7-9209-07	SB-P7-9209-03 SB-P7-9209-06	Sampling location SB-P7-9209-06 was determined using professional judgement; Sampling location SB-P7-9209-03 was determined using XRF screening. Results indicated a mercury concentration of 333 ppm at SB-P7-9209-03			1		2	2	2							1	1	Metals	E&E	Metals (5-12E & 5-25D), E&E (5-12C & 5-25C)
Q4-2	9	Stressed Vegetation	White material in this S.V. Area (area=25 sq ft)	SB-Q4-2-01 through SB-Q4-2-03	SB-Q4-2-03	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling		1	1										1	1	1			
Q6-1	1	Burn Pad #1	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.		SB-Q6-1-01	This AOC to be closed by Alliant Tech Systems.																		
Q6-2	1	Burn Pad #2	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.																		
Q6-3	1	Burn Pad #3	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.																		
Q6-4	1	Burn Pad #4	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.																		
Q6-5	1	Burn Pad #5	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.																		
Q6-583	5	Kerosene Storage	Two 220 gal kerosene tanks placed on a cement pad in a cement basin and a small galvanized steel shed. No evidence of release.	SB-Q6-583-01 through SB-Q6-583-04	SB-Q6-583-01 SB-Q6-583-02	Sampling location SB-Q6-583-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-Q6-583-02.	2													1	1			
Q6-584	4	Unknown	Small building associated with P6-9225 that has been removed, No evidence of a structure, former location estimated	SB-Q6-584-01 through SB-Q6-584-03	SB-Q6-584-02 SB-Q6-584-01	Sampling location SB-Q6-584-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-Q6-584-01.		2	2		2	2	2							1	1			
Q6-6	1	Burn Pad #6	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.																		
Q6-7	1	Burn Pad #7	Small cement basin/pit used to thermally decontaminate E&E contaminated materials, removable roof structure to prevent rainwater from pit. No evidence of release.			This AOC to be closed by Alliant Tech Systems.																		
Q6-8	3	House Storage	Old cement pad with loading dock, old use unknown, currently small steel shed that holds fire hose for burn area. No evidence of release	SB-Q6-8-01 through SB-Q6-8-05	SB-Q6-8-03 SB-Q6-8-05	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-Q6-8-03. A confirmation sample was collected at SB-Q6-8-05.		2	2		2	2	2							1	1		E&E	E&E (5-12C & 5-25C)
Q6-9311	4	Unknown	Building has been removed, location estimated from historical maps. No evidence of a release.	SB-Q6-9311-01 through SB-Q6-9311-03	SB-Q6-9311-03 SB-Q6-9311-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-Q6-9311-01.		2	2		2	2	2							1	1			
R5-1	9	Former Container Debris	Holding area for containers, all removed except one 5 gal steel container. No evidence of release.	SB-R5-1-01 through SB-R5-1-03	SB-R5-1-01 SB-R5-1-03	Sampling location SB-R5-1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-R5-1-03.		2	2											1	1		SVOCs	SVOCs (5-12B & 5-25B)
R5-2	9	Spill Area	There are three separate areas of SV, Area A contains some white material, Area B has no identifiable material, Area C has small metal wires and old rope; possible dumping area.	SB-R5-2-01 through SB-R5-2-06	SB-R5-2-01 SB-R5-2-03 SB-R5-2-05	Sampling locations SB-R5-2-01/05 were determined using professional judgement; Sampling location SB-R5-2-03 was determined using XRF screening. Results indicated a zinc concentration of 2,430 ppm at SB-R5-2-03		3	3											1	1	Metals		Metals (5-12E & 5-25D)
R6-1	1	New Burning Ground Command Post	Building used to watch and manage the burn area. No hazardous materials present. No evidence of a release.	SB-R6-1-01 through SB-R6-1-04	SB-R6-1-01 SB-R6-1-02	Sampling location SB-R6-1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-R6-1-02.		2	2											1	1			
R6-11	4	Unknown	Building has been removed, location estimated from historical maps. No evidence of a release.	SB-R6-11-01 through SB-R6-11-03	SB-R6-11-02 SB-R6-11-03	Sampling location SB-R6-11-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-R6-11-03.		2	2		1	1	1							1	1			

Table 2-12

Storage Area Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
S6-1	4	Unknown	Building has been removed, location estimated from historical maps. No evidence of a release.	SB-S6-1-01 through SB-S6-1-05	SB-S6-1-05 SB-S6-1-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		1	1	1							1	1			
S7-1	3	Railroad Canteen	Currently only concrete piers present on S side; fired clay tiles present-used in construction. No evidence of release (area=300 sq ft).	SB-S7-1-01 through SB-S7-1-04	SB-S7-1-01 SB-S7-1-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling		2	2		2	2	2							1	1	SVOCs		SVOCs (5-12B & 5-25B)

Notes:

All area measurements have been rounded to the nearest 100 feet.
All field screening samples were evaluated for VOCs utilizing a PID/FID, metals utilizing a XRF, and E&E compounds utilizing an Expray Test Kit.

Abbreviations:

TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
DIGL-RIP = Stick Propellant
E&E = Energetic and Explosive
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
AOC = Area of Concern
XRF = X-ray Fluorescence
PPM = Parts Per Million
PID = Photoionization Detector
FID = Flame-Ionization Detector
TOC and GRAIN SIZE collected at each AOC
All screening samples were evaluated for VOCs, Metals, and E&E compounds

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon
? = Unknown
~ = Approximately
" = Inch
` = Foot
Sq Ft = Square Foot
No. = Number

* = AOC reserved for RI due to presence of contamination
** = Analytical group incorrectly identified in Draft as an unrestricted use exceedance

AOC Type

1 - Existing Building (at time of sampling)
2 - Soil Coverd Building
3 - Remnant Building (location evident)
4 - Remnant Building (location determined from historic maps
5 - Above Ground Storage Tanks/Tank Saddles
6 - Septic Tank/Leach Field
7 - Spill Containment Structure/Culvert/Wastewater Pit
8 - Above Grade Process Pipeline/Process Gutter
9 - Remnant Activity Area
10 -Transformer/Electrical Substation

Note: AOCs with more than 1 AOC Type present were sampled as one unit and are designated Complex AOCs.

Table 2-13

Miscellaneous and Off-Site Areas Sampling Plan
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	AOC Type	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Description	PP VOC	PP SVOC	PP Metals	PP PCB	E&E (8330)	NG	NC	NQ	PETN	Phenol	AN/Nitrate	Diazo	pH	Grain Size	TOC	Unrestricted Use Exceedances Identified in Draft	Additional Unrestricted Use Exceedances Identified in Review	Total Unrestricted Use Exceedances and Table References
D16-1	1	Administration Building	Wooden/siding construction over concrete block foundation. Ceramic steam catch pipe on SE corner. No evidence of release.	SB-D16-1-01 through SB-D16-1-05	SB-D16-1-01 through SB-D16-1-02	Sampling location SB-D16-1-02 was determined using professional judgement Sampling location SB-D16-1-01 was determined using VOC screening Results indicated a PID reading of 25 ppm and an FID reading of 40 ppm Analytical results did not detect elevated VOC concentrations	1	2	2											1	1			
D16-2	3	Club House	Bldg demolished-largely vegetated area; concrete debris present NW/SE corners of bldg possibly evident. No evidence of release.	SB-D16-2-01 through SB-D16-2-05	SB-D16-2-01 through SB-D16-2-04	Sampling location SB-D16-2-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D16-2-04		2	2											1	1	SVOCs		SVOCs (5-13B & 5-26A)
D16-3	4	Barracks	Bldgs demolished; No evidence of release	SB-D16-3-01 through SB-D16-3-05	SB-D16-3-05 through SB-D16-3-04	Sampling location SB-D16-3-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D16-3-04		2	2											1	1			
E15-8560	1,7	Sprayfield/Chlorine House # 1	Large sprayfield with PVC pipe present; concrete catch box on E side; chlorinator house on W side with concrete gutter to adjacent stream; sandy sprayfield, reduced vegetation present (area= 22,000 sq ft).	SB-E15-8560-01 through SB-E15-8560-27	SB-E15-8560-01 through SB-E15-8560-27	Each sampling location was screened for metals and E&E materials, none were found	27	27												1	1			
E16-8561	3,7	Former Sewage Treatment Plant	Wooden (pump) house adjacent to large concrete septic tank; wooden box-gutter leads across stream to a small shed. No evidence of release.	SB-E16-8561-01 through SB-E16-8561-04 TP-E16-8561-05	SB-E16-8561-02 SB-E16-8561-03 through SB-E16-8561-04 TP-E16-8561-05	Sampling locations were determined using professional judgement Location SB-E16-8561-02 was analyzed for VOCs, SB-E16-8561-03 for SVOCs and metals. Test Pit location was placed downgradient from the septic tank.	5	4	1											2	2	Metals	SVOCs	Metals (5-13E & 5-26B), SVOCs (5-13B & 5-26A)
G14-1	1,7	Guard House Office	Concrete pad with small concrete catch box at S corner (possibly only surface water drainage); old ceramic tile floor covers foundation. No evidence of release.	SB-G14-1-01 through SB-G14-1-04	SB-G14-1-02 SB-G14-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		2	2											1	1	SVOCs		SVOCs (5-13B & 5-26A)
G14-2	4	Barracks	Bldg demolished-vegetated area remains; no foundation of bldg debris evident. No evidence of release.	SB-G14-2-01 through SB-G14-2-05	SB-G14-2-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1	SVOCs		SVOCs (5-13B & 5-26A)
H14-2	9	Debris Area	No evidence of former debris area; glassware removed; No evidence of release (area=100 sq ft)	SB-H14-2-01 through SB-H14-2-03	SB-H14-2-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		1	1											1	1			
H14-3	9	Rock Quarry	Inactive rock quarry; unknown items may have been buried here. No evidence of release (area=65,000 sq ft).	SB-H14-3-01 through SB-H14-3-20	SB-H14-3-03 SB-H14-3-19	Sampling location SB-H14-3-19 was determined using professional judgement Sampling location SB-H14-3-03 was determined using XRF screening Results indicated a lead concentration of 1,455 ppm at SB-H14-3-03		2	2											1	1	Metals		Metals (5-13E & 5-26B)
J14-2	3	Unknown Foundation	Minimal evidence of foundation; significant amount of stone present (probably granitic). No evidence of release.	SB-J14-2-01 through SB-J14-2-03	SB-J14-2-03 SB-J14-2-02	Sampling location SB-J14-2-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J14-2-02	2	2												1	1			
M11-1	4	Unknown Former Foundation	Building demolished, location determined from historic maps. No evidence of a release.	SB-M11-1-01 through SB-M11-1-03	SB-M11-1-02 SB-M11-1-01	Sampling location M11-1-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M11-1-01	2	2												1	1			
M11-8606	5	Water Storage	Concrete foundation with steel water tank; No evidence of a release	SB-M11-8606-01 through SB-M11-8606-04	SB-M11-8606-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 525 ppm and a zinc concentration of 14,220 ppm at SB-M11-8606-03	1	1												1	1	Metals, SVOCs		Metals (5-13E & 5-26B), SVOCs (5-13B & 5-26A)
N13-1	3	Unknown	Building demolished, large concrete pad with footers remain. Large concrete debris area to the S extending into a thick forest. No evidence of release.	SB-N13-1-01 through SB-N13-1-04	SB-N13-1-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1	Metals		Metals (5-13E & 5-26B)
N13-4	3	Unknown	Large concrete foundation with brick wall on NE side. Two large footers in the center. Building function unknown. No evidence of release.	SB-N13-4-01 through SB-N13-4-04	SB-N13-4-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	1	1												1	1	Metals		Metals (5-13E & 5-26B)
N13-5	10	Electric Transformer	Mounted to telephone pole with minimal discoloration on housing. No evidence of release.	SB-N13-5-01	SB-N13-5-01	Sample was collected at base of pole				1										1	1			
O13-1	9	Trap/Pistol Range	Trap/pistol range with an area of stressed vegetation within an area of shotgun impact. Concrete pad with trap house and three metal storage trailers (area=10,000 sq ft).	SB-O13-1-01 through SB-O13-1-18	SB-O13-1-01 through SB-O13-1-17	Sampling location was determined using professional judgement Screening results did not warrant biased sampling		2												1	1	Metals		Metals (5-13E & 5-26B)
O13-2	9	Trap/Pistol Range Perimeter	Perimeter of ranges to incorporate areas of suspected contamination. Potential release, lead evident along rear (area=110,000 sq ft)	SB-O13-2-01 through SB-O13-2-20	SB-O13-2-17 SB-O13-2-18	Sampling locations were determined using XRF screening Results indicated a lead concentration of 525 ppm at SB-O13-2-18 and 6,790 ppm at SB-O13-2-17		2												1	1	Metals		Metals (5-13E & 5-26B)
O13-4	3	Unknown	Large concrete foundation with 6" steel pipe extending up from foundation for 6', and a 2' x 2' steel plate bolted to pad. No evidence of release.	SB-O13-4-01 through SB-O13-4-04	SB-O13-4-02 SB-O13-4-01	Sampling location SB-O13-4-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O13-4-01	2	2												1	1			
O13-7	7	Unknown Pit	Posted as confined space entry pit. Concrete block structure with asphalt roof. No evidence of release. Sump associated with the building.	SB-O13-7-01 through SB-O13-7-04 TP-013-7-05	SB-O13-7-03 SB-O13-7-01 TP-O13-7-05	Sampling location SB-O13-7-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O13-7-01. Test Pit location placed downgradient from the sump.	3	2			1	1	1							2	2			
O13-8	10	Transformers	Three fairly new gray transformers; No evidence of release	SB-O13-8-01 through SB-O13-8-03	SB-O13-8-01 SB-O13-8-02 SB-O13-8-03	Samples were collected directly under transformers				3										1	1			
O13-8577	1,5	Chlorinator House/ Generator	Concrete block building with eyewash station in front. Adjacent concrete pad with emergency generator, transformer and No. 2 fuel oil tank. No evidence of release.	SB-O13-8577-01 through SB-O13-8577-04	SB-O13-8577-02 SB-O13-8577-03	Sampling location SB-O13-8577-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O13-8577-03	2	2											1	1	1			
O13-8604	1	Well No. 2	Small brick well house; No evidence of release	SB-O13-8604-01 through SB-O13-8604-04	SB-O13-8604-01 SB-O13-8604-03	Sampling location SB-O13-8604-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O13-8604-03	2	2												1	1			
O14-1	3	Unknown	Building demolished, steel mesh, concrete rubble, steel pipe, wood, rubber, and general building debris present. No evidence of release.	SB-O14-1-01 through SB-O14-1-03	SB-O14-1-01 SB-O14-1-03	Sampling location SB-O14-1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O14-1-03	2	2												1	1

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

Background samples were collected as part of the Undeveloped Area Preliminary Assessment/Site Investigation (PA/SI) which was further utilized during the Soils – SI to identify background conditions at the Facility that exceed the New Jersey Soil Clean-Up Criteria (NJSCC). The PA/SI was submitted to NJDEP in December 2000.

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

Background samples were collected as part of the Undeveloped Area Preliminary Assessment/Site Investigation (PA/SI) which was further utilized during the Soils – SI to identify background conditions at the Facility that exceed the New Jersey Soil Clean-Up Criteria (NJSCC). The PA/SI was submitted to NJDEP in December 2000.

NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

Background samples were collected as part of the Undeveloped Area Preliminary Assessment/Site Investigation (PA/SI) which was further utilized during the Soils – SI to identify background conditions at the Facility that exceed the New Jersey Soil Clean-Up Criteria (NJSCC). The PA/SI was submitted to NJDEP in December 2000.

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

Background samples were collected as part of the Undeveloped Area Preliminary Assessment/Site Investigation (PA/SI) which was further utilized during the Soils – SI to identify background conditions at the Facility that exceed the New Jersey Soil Clean-Up Criteria (NJSCC). The PA/SI was submitted to NJDEP in December 2000.

B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

Background samples were collected as part of the Undeveloped Area Preliminary Assessment/Site Investigation (PA/SI) which was further utilized during the Soils – SI to identify background conditions at the Facility that exceed the New Jersey Soil Clean-Up Criteria (NJSCC). The PA/SI was submitted to NJDEP in December 2000.

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
P = Indicates that there is greater that 25% difference for detected Pesticides/Aroclor results between the two GC columns

NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

IGWSCC = Impact to Groundwater Soil Cleanup Criteria
RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface
IGWSCC standard applied to 2,4/2,6-Dinitrotoluene is the IGWSCC standard for 2,4-Dinitrotoluene

RDCSCC = Residential Direct Contact Soil Cleanup Criteria
NRDCSCC = Non-Residential Direct Contact Soil Cleanup Criteria
Bold = Indicates Concentration Exceeds NJ Soil Cleanup Criteria (NJSCC)
U = Indicates that the compound was analyzed for but not detected, number indicates the detection limit
J = Value is less than the reporting limit, but greater than zero
N = Flashpoint not observed, heated to specific limit
B = Indicates that the compound was found in the associated blank.
* = Value obtained from a 1:5 dilution
+ = Value obtained from a 1:10 dilution
D = Indicates compound was found in analysis as a secondary dilution factor
R = Rejected based on data validation
E = Indicates that the concentration exceeded the calibration range of the instrument
NR = Not Reported
NS = No Standard
ft. = Feet below ground surface

Table 5-27

TNT Area NFA Justification
Phase I - Site Investigation
Kenvil Works, Kenvil, NJ

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
A10-2	Toluene Pipeline	Pipe which runs from the toluene storage tank to mononitrator C10-503; 3 inches in diameter			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
A10-3	A10-3 Second Toluene Storage Tank	Remnant of toluene storage tank and berm area vegetated; no stressed vegetation	SB-A10-3-01 through SB-A10-3-03	SB-A10-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
A10-516	Former Toluene Storage Tank	Bermed area with four foundations used to support the former toluene storage tanks; three lines from tank, one in N and two in S no stressed vegetation (area 200 sq. ft.)	SB-A10-516-01 through SB-A10-516-06	SB-A10-516-05 SB-A10-516-06	Sampling location SB-A10-516-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-A10-516-06	No New Jersey Soil Cleanup Criteria Exceedances
A11-3	Absorption Tower #2	Rectangular structure with ten terra cotta coated cement pillars and catch tank on SE side; TNT adjacent to building	SB-A11-3-01 through SB-A11-3-05	SB-A11-3-03 SB-A11-3-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
A12-3	Heater House	Heater house collapsing foundation (area 600 sq. ft.)	SB-A12-3-01 through SB-A12-3-04	SB-A12-3-03	Sampling location was determined using VOC screening The 6" to 12" depth interval had a PID reading of 14 ppm and an FID reading of 19 ppm Analytical results did not detect elevated VOC concentrations	No New Jersey Soil Cleanup Criteria Exceedances
A12-4	Catch Tank	Catch tank associated with tank cradles of A12-5; pipe entering from N from tank cradles	SB-A12-4-01 through SB-A12-4-03	SB-A12-4-01 SB-A12-4-02	Sampling location SB-A12-4-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-A12-4-02.	No New Jersey Soil Cleanup Criteria Exceedances
A12-5	Former Tank Cradle	Contains four concrete tank cradles about 8 ft. wide and 32 ft. long; housed in bermed area; No evidence of release	SB-A12-5-01 through SB-A12-5-06	SB-A12-5-03 SB-A12-5-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
A12-6	Glass Debris Area	Area is covered with broken laboratory glassware (area=200 sq. ft.)	SB-A12-6-01 through SB-A12-6-03	SB-A12-6-01 SB-A12-6-02	Sampling location SB-A12-6-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-A12-6-02.	No New Jersey Soil Cleanup Criteria Exceedances
A13-753	Filter House #3	Bldg. and associated berm almost totally removed; substantial vegetation; pieces of metal machinery in center of former bldg. Small pile of metal reinforcing bars E of A13-753 (area 500 sq. ft.)	SB-A13-753-01 through SB-A13-753-04	SB-A13-753-01	Sampling location was determined using VOC screening The 6" to 12" depth interval had a PID reading of 17 ppm and an FID reading of 22 ppm Analytical results did not detect elevated VOC concentrations	No New Jersey Soil Cleanup Criteria Exceedances
B10-3	Scrap Brine Coils	Two brine coils and associated debris; no visible impact (area 100 sq. ft.)	SB-B10-3-01 through SB-B10-3-03	SB-B10-3-03 SB-B10-3-01	Sampling location SB-B10-3-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B10-3-01	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-27

TNT Area NFA Justification
Phase I - Site Investigation
Kenvil Works, Kenvil, NJ

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
B10-4	Scrap Brine Coils	Remnant equipment; brine coils (area 100 sq. ft.)	SB-B10-4-01 through SB-B10-4-03	SB-B10-4-01 SB-B10-4-02	Sampling location SB-B10-4-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B10-4-02	No New Jersey Soil Cleanup Criteria Exceedances
B11-2	Standpipe	Stand pipe approximately 50 ft. N of B11-523 6 inches in diameter; several 2-8 inch pipes on ground	SB-B11-2-01 through SB-B11-2-03	SB-B11-2-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
C10-438	Mixed Acid Storage #2	Three 10x1.5 foot cement foundations; 12 inch diameter terra cotta pipe entering ground W of central footer; old process pipe associated with this bldg.	SB-C10-438-01 through SB-C10-438-06	SB-C10-438-05 SB-C10-438-01	Sampling location SB-C10-438-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C10-438-01	No New Jersey Soil Cleanup Criteria Exceedances

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-28

Dynamite Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, Kenvil, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
B12-422	Dynamite Mix Houses #5 & #6	Two pipes enter ground in N central area Building is demolished and largely overgrown, footers remain No evidence of a release	SB-B12-422-01 through SB-B12-422-07	SB-B12-422-06 SB-B12-422-04	Sampling location SB-B12-422-06 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B12-422-04	No New Jersey Soil Cleanup Criteria Exceedances
B13-7	Motor House for Gel Mix House #2	Very old dismantled foundation. Two steel pipes enter ground. 10'x10' area of stressed vegetation in center of building	SB-B13-7-01 through SB-B13-7-07	SB-B13-7-01 SB-B13-7-06	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
B14-128	Quinan Pack House	Very old stone foundation; No evidence of a release	SB-B14-128-01 through SB-B14-128-05	SB-B14-128-01 SB-B14-128-02	Sampling location SB-B14-128-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B14-128-02	No New Jersey Soil Cleanup Criteria Exceedances
B14-3	Shell Store	Very little evidence of former building exists. No evidence of a release	SB-B14-3-01 through SB-B14-3-05	SB-B14-3-05 SB-B14-3-02	Sampling location SB-B14-3-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B14-3-02	No New Jersey Soil Cleanup Criteria Exceedances
C12-1	Earthen Pits	Two pits dug out of the ground, use unknown; Partially filled with water, no evidence of a release	SB-C12-1-01 through SB-C12-1-06	SB-C12-1-03 SB-C12-1-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
C12-8229	Change House	Brick building still standing; There is an associated septic tank W of the N corner	SB-C12-8229-01 through SB-C12-8229-04 TP-C12-8229-05	SB-C12-8229-03 SB-C12-8229-01 TP-C12-8229-05	Sampling location SB-C12-8229-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C12-8229-01. Test Pit location was placed downgradient from septic.	No New Jersey Soil Cleanup Criteria Exceedances
C13-133	Triton Store	Only one chunk of concrete and a piece of metal remain; No evidence of a release	SB-C13-133-01 through SB-C13-133-05	SB-C13-133-05 SB-C13-133-03	Sampling location SB-C13-133-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C13-133-03	No New Jersey Soil Cleanup Criteria Exceedances
C13-2	Spray Field A	Large grass covered area;j PVC piping underground - unknown location; No evidence of a release (area=74,000 sq ft)	SB-C13-2-01 through SB-C13-2-20	SB-C13-2-01 through SB-C13-2-20	Three sample locations (SB-C13-2-01/03/09) were determined using professional judgement; Group B E&E materials were detected at SB-C13-2-10 and SB-C13-2-14 using an Expray Test Kit. Confirmation samples were collected at the remaining sample locations (SB-C13-2-02/04/05/06/07/08/11/12/13/15/16/17/18/19/20). Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-28

Dynamite Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, Kenvil, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
C13-263C	Blower House for Gel Mix House #1	Structure dismantled; Three old blower units remain; No evidence of a release (area=100 sq ft)	SB-C13-263C-01 through SB-C13-263C-03	SB-C13-263C-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 682 ppm at SB-C13-263C-01 Analytical results did not detect elevated lead concentrations	No New Jersey Soil Cleanup Criteria Exceedances
C13-3	Unknown	Small bermed area, all that remains is minor amounts of metal debris (area=100 sq ft)	SB-C13-3-01 through SB-C13-3-03	SB-C13-3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
C13-742	Gel Pack House	Building demolished; Concrete footers remain; Swale on east side of former building; No evidence of a release	SB-C13-742-01 through SB-C13-742-05	SB-C13-742-01 SB-C13-742-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
C14-121	Superfluous Machinery Store	Very old 30'x 20' stone foundation; No evidence of a release (area=400 sq ft)	SB-C14-121-01 through SB-C14-121-04	SB-C14-121-03 SB-C14-121-04	Sampling location SB-C14-121-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C14-121-04	No New Jersey Soil Cleanup Criteria Exceedances
C14-125	Pattern Store	Foundation destroyed; Only two piles of brick remain; No evidence of a release (area=400 sq ft)	SB-C14-125-01 through SB-C14-125-04	SB-C14-125-01 SB-C14-125-04	Sampling location SB-C14-125-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C14-125-04	No New Jersey Soil Cleanup Criteria Exceedances
C14-2	Debris Area	24 metal screens; No evidence of a release (area=100 sq ft)	SB-C14-2-01 through SB-C14-2-03	SB-C14-2-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
D11-7	Unknown	Building demolished; Six very old cement footers remain; Some metal debris and two old drum hulks present; No evidence of a release (area=200 sq ft)	SB-D11-7-01 through SB-D11-7-03	SB-D11-7-01 SB-D11-7-02	Sampling location SB-D11-7-01 was determined using XRF screening Results indicated a lead concentration of 2,498 ppm. A confirmation sample was collected at SB-D11-7-02 Analytical results did not detect elevated lead concentrations	No New Jersey Soil Cleanup Criteria Exceedances
D12-1	Blower House for D11-282A	This building was destroyed; It measured approximately 15' x 15'; Remains of old equipment are rusted hulks; No evidence of a release (area=200 sq ft)	SB-D12-1-01 through SB-D12-1-03	SB-D12-1-02 SB-D12-1-01	Sampling location SB-D12-1-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D12-1-01	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-28

Dynamite Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, Kenvil, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
D12-2073	Unknown	Small 15' x 10' demolished building; Wood and metal debris present; No evidence of a release (area=200 sq ft)	SB-D12-2073-01 through SB-D12-2073-03	SB-D12-2073-03 SB-D12-2073-01	Sampling location SB-D12-2073-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D12-2073-01	No New Jersey Soil Cleanup Criteria Exceedances
D12-208D	Unknown	Demolished structure approximately 10' x 20'; All remnants of building removed; Area filled with water No evidence of a release (area=200 sq ft)	SB-D12-208D-01 through SB-D12-208D-03	SB-D12-208D-03 SB-D12-208D-01	Sampling location SB-D12-208D-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D12-208D-01	No New Jersey Soil Cleanup Criteria Exceedances
D12-3	Unknown	Combination of D12-208 and D12-130E; These were small structures dismantled and combined together The area contains metal and concrete debris; Two 2" diameter pipes enter ground on east side; No evidence of a release	SB-D12-3-01 through SB-D12-3-05	SB-D12-3-04 SB-D12-3-02	Sampling location SB-D12-3-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D12-3-02	No New Jersey Soil Cleanup Criteria Exceedances
D13-2	Electric Pole Transformer	Transformer removed; No evidence of a release	SB-D13-2-01	SB-D13-2-01	Sample taken directly below former transformer	No New Jersey Soil Cleanup Criteria Exceedances
E10-2	Unknown	Former structure destroyed; Eight cement footers remain; Former structure approximately 15' x 30'; No evidence of a release (area=600 sq ft)	SB-E10-2-01 through SB-E10-2-04	SB-E10-2-03 SB-E10-2-04	Sampling location SB-E10-2-03 was determined using E&E screening Group B E&E materials were detected using an Expray Test Kit. A confirmation sample was collected at SB-E10-2-04 Analytical results did not detect elevated E&E concentrations	No New Jersey Soil Cleanup Criteria Exceedances
E10-3	Unknown	Small stone cylindrical footer approximately 7' in diameter; No evidence of a release (area=100 sq ft)	SB-E10-3-01 through SB-E10-3-03	SB-E10-3-02	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-E10-3-02 using an Expray Test Kit Analytical results did not detect elevated E&E concentrations	No New Jersey Soil Cleanup Criteria Exceedances
E11-1	Auxiliary Heater House	Small wooden structure 5' x 3'; Used to support E1-2064; No evidence of a release	SB-E11-1-01 through SB-E11-1-04	SB-E11-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E11-11	Unknown	Remnants of an old foundation with brick footers; No evidence of a release (area=100 sq ft)	SB-E11-11-01 through SB-E11-11-03	SB-E11-11-02	Sampling location SB-E11-11-02 was determined using professional judgement; Screening results did not warrant biased sampling.	No New Jersey Soil Cleanup Criteria Exceedances
E11-2	Unknown	Small 12' x 12' rectangular cement and brick foundation; No evidence of a release (area=400 sq ft)	SB-E11-2-01 through SB-E11-2-04	SB-E11-2-03 SB-E11-2-02	Sampling location was determined using E&E screening Group B E&E materials were detected at SB-E11-2-03 using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-28

Dynamite Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, Kenvil, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
E11-207B	Repair Shop	Old overgrown foundation; No evidence of release (area=900 sq ft)	SB-E11-207B-01 through SB-E11-207B-04	SB-E11-207B-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E11-2083	Air Conditioning House	Old 12'x10' wooden structure; Contains old air conditioner/heater; Slight stressed vegetation under awnings (area=200 sq ft)	SB-E11-2083-01 through SB-E11-2083-04	SB-E11-2083-03 SB-E11-2083-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E11-4	Dynamite Box Pack House	Building and associated structures almost totally removed; Area very vegetated	SB-E11-4-01 through SB-E11-4-03	SB-E11-4-02 SB-E11-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-E11-4-01	No New Jersey Soil Cleanup Criteria Exceedances
E11-5	Stressed Vegetation	Center of stressed vegetation (area=20 sq ft)	SB-E11-5-01 through SB-E11-5-03	SB-E11-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E11-8	Electric Transformer	Base of telephone pole	SB-E11-8-01	SB-E11-8-01	Sample taken at base of telephone pole	No New Jersey Soil Cleanup Criteria Exceedances
E11-8228	Change House	Brick structure 30' x 30'; Septic tank located 20' W of building (1 sludge sample taken during Single Phase Remediation)'; Several small steam blow-out lines present on east side of bldg; No evidence of a release	SB-E11-8228-01 through SB-E11-8228-05 TP-E11-8228-06	SB-E11-8228-02 SB-E11-8228-05 TP-E11-8228-06	Sampling location SB-E11-8228-02 was determined using XRF screening; Results indicated a lead concentration of 478 ppm. A confirmation sample was collected at SB-E11-8228-05. Test Pit location was placed downgradient from the septic. Analytical results did not detect elevated Metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E12-130E	Air Conditioning House	Old wooden structure 12' x 15'; Contains HVAC Equipment; Several vent pipes from HVAC equipment extend through bldg wall; No evidence of a release (area=300 sq ft)	SB-E12-130E-01 through SB-E12-130E-04	SB-E12-130E-02 SB-E12-130E-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E12-2081	Air Conditioning House	Old possible fiberglass sided structure 24' x 24'; Houses HVAC equipment; Two floor drains, A pipe, possibly steam blow-out line, exits building on north side; No evidence of a release	SB-E12-2081-01 through SB-E12-2081-05	SB-E12-2081-04 SB-E12-2081-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E12-298B	Machine Parts House	Partially demolished brick structure measuring 15' x 8'; No evidence for a release (area=200 sq ft)	SB-E12-298B-01 through SB-E12-298B-03	SB-E12-298B-03 SB-E12-298B-02	Sampling location SB-E12-298B-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E12-298B-02	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-28

Dynamite Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, Kenvil, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
E12-6	Temp Carpenter Shop	Only old scrap remains of this 10' x 10' area; Pipe enters ground, unknown if intact	SB-E12-6-01 through SB-E12-6-04	SB-E12-6-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E12-9317	Powder Line Office	Very old 20' x 20' demolished stone foundation; Some debris scattered around former structure; No evidence of a release (area=300 sq ft)	SB-E12-9317-01 through SB-E12-9317-04	SB-E12-9317-04 SB-E12-9317-01	Sampling location SB-E12-9317-04 was determined using XRF screening; Results indicated a lead concentration of 406 ppm. A confirmation sample was collected at SB-E12-9317-01. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E13-1	Electric Pole Transformer	No evidence of a release	SB-E13-1-01	SB-E13-1-01	Sample taken at base of pole	No New Jersey Soil Cleanup Criteria Exceedances
E13-2040	Waxing Shed	Very old wooden structure; Rail loading area on south side; Possible stand pipe near NE corner Small shed with old machinery adjacent on north side; No evidence of a release	SB-E13-2040-01 through SB-E13-2040-07	SB-E13-2040-04 SB-E13-2040-07	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E13-2074A	Catch Tank House	Old brick structure; Currently contains a blower piped to E13-2074; No evidence of former catch tank, may have sat on concrete	SB-E13-2074A-01 through SB-E13-2074A-05	SB-E13-2074A-01 SB-E13-2074A-05	Sampling location SB-E13-2074A-01 was determined using E&E screening; Group B E&E materials were detected at using an Expray Test Kit. A confirmation sample was collected at SB-E13-2074A-05	No New Jersey Soil Cleanup Criteria Exceedances
E13-2078	Heater House	Small 15' x 10' cinder block structure; Old heater and steam line inside building; No evidence of a release	SB-E13-2078-01 through SB-E13-2078-04	SB-E13-2078-03 SB-E13-2078-04	Sampling location SB-E13-2078-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E13-2078-04	No New Jersey Soil Cleanup Criteria Exceedances
E13-3	Trash Shed	Small 10' x 6' wooden structure; Potential stressed vegetation west and south of structure	SB-E13-3-01 through SB-E13-3-05	SB-E13-3-03 SB-E13-3-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling. A confirmation sample was collected at E13-3-05.	No New Jersey Soil Cleanup Criteria Exceedances
E13-5	Debris from Bldg's 8209/2039	General debris covers approximately 15' diameter area; No evidence of a release	SB-E13-5-01 through SB-E13-5-03	SB-E13-5-02 SB-E13-5-03	Sampling location SB-E13-5-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E13-5-03	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-28

Dynamite Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, Kenvil, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
E14-668	Box Pack House	Remains of a concrete foundation; Debris covers concrete foundation; Slight stressed vegetation along eastern side of foundation	SB-E14-668-01 through SB-E14-668-05	SB-E14-668-03 SB-E14-668-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F11-79C	Unknown	All that remains is a 1' x 2' footer, all else has been removed; No evidence of a release (area=100 sq ft)	SB-F11-79C-01 through SB-F11-79C-03	SB-F11-79C-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F12-191	Laundry and Change House	No evidence of former structures; No evidence of a release	SB-F12-191-01 through SB-F12-191-03	SB-F12-191-02 SB-F12-191-01	Sampling location SB-F12-191-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F12-191-01	No New Jersey Soil Cleanup Criteria Exceedances
F12-3	Sump	Seven foot diameter cement sump; Surface mounted pump; Pipe exits sump and enters ground to south; No evidence of a release	TP-F12-3-01	TP-F12-3-01	Test Pit was placed downgradient of the sump.	No New Jersey Soil Cleanup Criteria Exceedances
F12-6	Unknown	This is a very old brick structure; here is a loading door to the north; A drain pipe exits at the southwest corner; No evidence of a release	SB-F12-6-01 through SB-F12-6-20	SB-F12-6-06 SB-F12-6-12	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F12-R1	Radford Packhouse Scrap Shed	Completely removed no evidence of location; Estimated location covered in asphalt; No evidence of a release	SB-F12-R1-01 through SB-F12-R1-03	SB-F12-R1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F13-1	Former Pond	Old pond that has been filled in; One drum and several bottles evident in SE area; Area is grass covered (area=23,000 sq ft)	SB-F13-1-01 through SB-F13-1-20	SB-F13-1-15 SB-F13-1-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 1,024 ppm at SB-F13-1-15 Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
F13-2077	Unknown	Completely removed no evidence of location; Estimated location covered in asphalt; No evidence of a release	SB-F13-2077-01 through SB-F13-2077-03	SB-F13-2077-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F13-236B	Unknown	Very old 10' x 15' cement foundation; Nearly completely removed; No evidence of a release (area=200 sq ft)	SB-F13-236B-01 through SB-F13-236B-03	SB-F13-236B-03 SB-F13-236B-01	Sampling location SB-F12-236B-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F12-236B-01	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-28

Dynamite Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, Kenvil, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
F13-8209	Unknown	Completely removed no evidence of location; Estimated location; No evidence of a release	SB-F13-8209-01 through SB-F13-8209-03	SB-F13-8209-03 SB-F13-8209-02	Sampling location SB-F13-8209-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F13-8209-02	No New Jersey Soil Cleanup Criteria Exceedances
F13-8230	Change House	Building demolished approximately 20' x 20; Only bricks and cinder block remain; Septic Tank associated with the building. No evidence of a release	SB-F13-8230-01 through SB-F13-8230-04 TP-F13-8230-05	SB-F13-8230-02 SB-F13-8230-03 TP-F13-8230-05	Sampling location SB-F13-8230-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F13-8230-03. Test Pit location was placed downgradient from the septic tank.	No New Jersey Soil Cleanup Criteria Exceedances

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-29

Nitroglycerin Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
B11-3	Electric Transformer	Pole mounted; transformer intact; No evidence of release	SB-B11-3-01	SB-B11-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
B11-4	Tank Saddle	Three concrete tank cradles: No evidence of a release	SB-B11-4-01 through SB-B11-4-03	SB-B11-4-01 SB-B11-4-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
B11-5	NG Gutter	Old NG gutter; wooden structure removed only stanchions remain used when B11-2044 was used as the NG neutralizing and storage house # 4. No evidence of release (length = 750 feet)	SB-B11-5-01 through SB-B11-5-08		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
B11-9	Heater House	Overgrown foundation; several cement foundations visible and a steam line with asbestos like insulation; No evidence for release	SB-B11-9-01 through SB-B11-9-04	SB-B11-9-02 SB-B11-9-03	Sampling location SB-B11-9-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-B11-9-03	No New Jersey Soil Cleanup Criteria Exceedances
C10-1	Electric Transformer	Base of pole intact; No evidence of release	SB-C10-1-01	SB-C10-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
C10-241A	Shot Bldg	Cratered area from when former structure shot; broken debris from what looks like an explosion extending E from cratered area. No evidence of release	SB-C10-241A-01 through SB-C10-241A-05	SB-C10-241A-03 SB-C10-241A-05	Sampling location SB-C10-241A-03 was determined using XRF screening; Results indicated a lead concentration of 2,493 ppm. A confirmation sample was collected at SB-C10-241A-05. Analytical results did not detect elevated lead concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
C10-241C	Former Nitrator	Wooden based bldg; only wooden floor remains in L-shape. No evidence of release	SB-C10-241C-01 through SB-C10-241C-04	SB-C10-241C-04 SB-C10-241C-03	Sampling location SB-C10-241C-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C10-241C-03	No New Jersey Soil Cleanup Criteria Exceedances
C11-22	Air Receiver Tank	4' x 10' air tank resting on two cradles; held air from NG process in bldg. C11-2233. No evidence of release	SB-C11-22-01 through SB-C11-22-03	SB-C11-22-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
C11-2233C	Storage Shed	Small wooden structure appears to be used for storage; steam and electricity. No evidence of release	SB-C11-2233C-01 through SB-C11-2233C-04	SB-C11-2233C-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
C11-23	Stressed Vegetation	Small area of stressed vegetation W of C11-21;may be associated with C11-21 (area=100 sq ft)	SB-C11-23-01 through SB-C11-23-03	SB-C11-23-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
C11-24	Shed	Small shed used to store solar salt for water treatment; No evidence of release	SB-C11-24-01 through SB-C11-24-04	SB-C11-24-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
C11-25	Discharge Pipe	Terminated from steam sump at C11-21; shallow pit (2' x 2') received runoff from steam sump at C11-21; abundant algae and a white precipitate	SB-C11-25-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of pipe No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-29

Nitroglycerin Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
C11-28	NG Gutter	Wooden structure supporting the NG gutter; begins at nitrator house and terminates at C11-2233 (length = 700 feet)	SB-C11-28-01 through SB-C11-28-07		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
C11-28A	NG Gutter	Short NG gutter from No. 2 nitrator to C11-28; gutter intact; No evidence of release (length = 50 feet)	SB-C11-28A-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
C11-29	NG Waste Gutter	Small wooden trough that contains a fiberglass pipe; carried waste waters from the catch tank house to final catch tank pipe looks intact; may follow an old ditch; an 8' section is made of lead. No evidence of release (length = 200 feet)	SB-C11-29-01 through SB-C11-29-02		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
C11-4A	Stressed Vegetation	Contains flyash and bottles; vegetation sparse or non-existent (area=300 sq ft)	SB-C11-4A-01 through SB-C11-4A-03	SB-C11-4A-01 SB-C11-4A-02	Sampling location SB-C11-4A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C11-4A-02	No New Jersey Soil Cleanup Criteria Exceedances
C11-4B	Stressed Vegetation	Similar to stressed vegetation area A; contains flyash and bottles vegetation sparse or non-existent (area=100 sq ft)	SB-C11-4B-01 through SB-C11-4B-03	SB-C11-4B-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
C11-N3	Neutralizer # 3 Scrap Shed	Small aluminum sided shed used to store scrap temporarily; currently empty. No evidence of release	SB-C11-N3-01 through SB-C11-N3-04	SB-C11-N3-03 SB-C11-N3-02	Sampling location SB-C11-N3-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-C11-N3-02	No New Jersey Soil Cleanup Criteria Exceedances
D10-11	Air Receiver	Large air tank on two cement cradles over soil; drain on W side and air fill on E side; tank intact. No evidence of release	SB-D10-11-01 through SB-D10-11-03	SB-D10-11-01 SB-D10-11-03	Sampling location SB-D10-11-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-11-03	No New Jersey Soil Cleanup Criteria Exceedances
D10-13	Septic Tank	A buried septic tank used for the No.1 and No.2 Nitrator House	TP-D10-13-01	TP-D10-13-01	Test Pit location was placed downgradient from the septic tank	No New Jersey Soil Cleanup Criteria Exceedances
D10-15	Air Receiver Tank	Steel air tank associated with D10-2227 nitrator bldg; probably auxiliary to the larger air tank; tank hooked up to air and steam	SB-D10-15-01 through SB-D10-15-03	SB-D10-15-03	Sampling location was determined using XRF screening Results indicated a lead concentration of 522 ppm and a copper concentration of 738 ppm at SB-D10-15-03 Analytical results did not detect elevated metal concentrations	No New Jersey Soil Cleanup Criteria Exceedances
D10-16	Unknown		SB-D10-16-01 through SB-D10-16-04	SB-D10-16-03 SB-D10-16-02	Sampling location SB-D10-16-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-16-02	No New Jersey Soil Cleanup Criteria Exceedances
D10-18	NG Gutter	Old NG gutter to Bldg. 2220; gutter has been dismantled all that remains is old Stanchion footers; most likely dismantled after bldg. Shot. No evidence of release (length = 250 feet)	SB-D10-18-01 through SB-D10-18-03		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-29

Nitroglycerin Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
D10-21	Acid Line	2" SS acid line that runs from the acid scrubber to D10-12 and nitrator D10-2227 to the spent acid; line in good condition. No evidence of release			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
D10-22	NG Gutter	Originates at No 2 nitrator house and progresses NE; joins D10-23 and enters the catch tank at D10-223; No evidence of release (length = 200 feet)	SB-D10-22-01 through SB-D10-22-02		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
D10-2227E	Air Scrubber House	Concrete foundation;contains air scrubbing equipment from D10-2227 nitrating house; electric, steam, and air scrubbing lines. No evidence of release	SB-D10-2227E-01 through SB-D10-2227E-04	SB-D10-2227E-01 SB-D10-2227E-02	Sampling location SB-D10-2227E-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2227E-02	No New Jersey Soil Cleanup Criteria Exceedances
D10-2228	Drowning House	Housed a large lead basin that received waste possibly from nitrator bldg; pipeline leaves bldg and goes to NG catch tank. No evidence of release	SB-D10-2228-01 through SB-D10-2228-06	SB-D10-2228-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 537 ppm at SB-D10-2228-01	No New Jersey Soil Cleanup Criteria Exceedances
D10-2233	Neutralizer # 2	Bldg shot and left a water filled crater; associated bldgs D10-2233, D10-2048 and the catch tank were also leveled in blast; they were much closer to main structure than drawn by Roux; area covered with debris; air receiver tank thrown 200' E of former structure area vegetated with old domestic bottles at base of crater	SB-D10-2233-01 through SB-D10-2233-05	SB-D10-2233-04 SB-D10-2233-02	Sampling location SB-D10-2233-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2233-02	No New Jersey Soil Cleanup Criteria Exceedances
D10-2233A	Neutralizer # 2 Support Building	Building completely removed. Debris from Neutralizer #2 has been removed. Area is currently graded.	SB-D10-2233A-01 through SB-D10-2233A-03	SB-D10-2233A-01 SB-D10-2233A-02	Sampling location SB-D10-2233A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2233A-02	No New Jersey Soil Cleanup Criteria Exceedances
D10-2233B	Neutralizer # 2 Support Building	Building completely removed. Debris from Neutralizer #2 has been removed. Area is currently graded.	SB-D10-2233B-01 through SB-D10-2233B-03	SB-D10-2233B-03 SB-D10-2233B-02	Sampling location SB-D10-2233B-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2233B-02	No New Jersey Soil Cleanup Criteria Exceedances
D10-2233C	Neutralizer # 2 Support Building	Building completely removed. Debris from Neutralizer #2 has been removed. Area is currently graded.	SB-D10-2233C-01 through SB-D10-2233C-03	SB-D10-2233C-01 SB-D10-2233C-02	Sampling location SB-D10-2233C-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2233C-02	No New Jersey Soil Cleanup Criteria Exceedances
D10-2233D	Neutralizer # 2 Support Building	Building completely removed. Debris from Neutralizer #2 has been removed. Area is currently graded.	SB-D10-2233D-01 through SB-D10-2233D-03	SB-D10-2233D-03 SB-D10-2233D-02	Sampling location SB-D10-2233D-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-2233D-02	No New Jersey Soil Cleanup Criteria Exceedances
D10-2233E	Neutralizer # 2 Support Building	Building completely removed. Debris from Neutralizer #2 has been removed. Area is currently graded.	SB-D10-2233E-01 through SB-D10-2233E-03	SB-D10-2233E-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-29

Nitroglycerin Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
D10-23	NG Gutter	Short NG gutter that runs from No. 1 nitrator to catch tank house (D10-2231); joins D10-22 and continues to catch tank house. No evidence of release (length = 150 feet)	SB-D10-23-01 through SB-D10-23-02		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
D10-24	NG Line	NG pipe that originates at No. 1 nitrator goes to Drowning House (2228). No evidence of release. (length = 100 feet)	SB-D10-24-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of pipeline No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
D10-24A	NG Gutter	Old NG gutter used to follow same path as D10-24 but looks like it detours around the browning house D10-2228; waste line from 2228 joins gutter on S side of bldg. No evidence of release (length = 100 feet)	SB-D10-24A-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
D10-25	Spent Acid Pipe	Small 2-inch SS line runs from spent acid house (D10-2230) to catch tank house (D10-2231); line looks intact. No evidence of release	SB-D10-25-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of pipe No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
D10-26	Spent Acid Waste Line	Pipe from spent acid bldg (D10-2230) intersects waste line from catch tank house (D10-2231). No evidence of release	SB-D10-26-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of waste line No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
D10-27	Catch Tank Waste Line	3" fiberglass line that exits D10-2231-the catch tank house; joined by a waste line from spent acid house (D10-2230) then goes S; goes underground, across road, and then cannot be followed. No evidence of release	SB-D10-27-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of waste line No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
D10-3	Electric Transformer	Transformer has been removed. No evidence of release	SB-D10-3-01	SB-D10-3-01	Sample taken immediately adjacent to former pole Screening results indicated an arsenic concentration of 192 ppm Metals analysis still needs to be collected	No New Jersey Soil Cleanup Criteria Exceedances
D10-8	Unknown	Two small rock footers possibly used to support a tank; area vegetated. No evidence of release	SB-D10-8-01 through SB-D10-8-03	SB-D10-8-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
D10-9119	Mixed Acid Store	Bldg removed; only four concrete footers remain; footers currently being used to support pipes; No evidence of release (area=400 sq ft)	SB-D10-9119-01 through SB-D10-9119-04	SB-D10-9119-01 SB-D10-9119-02	Sampling location SB-D10-9119-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D10-9119-02	No New Jersey Soil Cleanup Criteria Exceedances
D10-N4	Spent Acid Area Scrap Shed	Siding material all that remains of the former scrap shed; No evidence of release (area=100 sq ft)	SB-D10-N4-01 through SB-D10-N4-03	SB-D10-N4-01	Sampling location was determined from the presence of E&E compounds at SB-D10-N4-02 Group B E&E compounds were detected at SB-D10-N4-02 using an Expray Test Kit Analytical results did not detect elevated E&E concentrations	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-29

Nitroglycerin Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
D11-112	Box Sto.	Several concrete footers; former site overgrown; No evidence of release	SB-D11-112-01 through SB-D11-112-05	SB-D11-112-05 SB-D11-112-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-D11-112-01	No New Jersey Soil Cleanup Criteria Exceedances
D11-20	NG Slum House	Small depression where bldg should be. No evidence of release (area=100 sq ft)	SB-D11-20-01 through SB-D11-20-03	SB-D11-20-01	Sampling location was determined using XRF screening Results indicated a lead concentration of 580 ppm at SB-D11-20-01	No New Jersey Soil Cleanup Criteria Exceedances
D11-21	Waste NG Line	Two 4" diameter NG waste lines contained in a metal trough; line abruptly ends S of Bldg. 2220; lines may have been dismantled after Bldg. 2220 shot; No evidence of release. (length = 150 feet)	SB-D11-21-01 through SB-D11-21-02		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
D11-8572A	NG Final Catch Tank	Small aluminum sided structure housed final NG catch tank; two process lines enter structure from NE and NW corner for the catch tank. No evidence of release	SB-D11-8572A-01 through SB-D11-8572A-02		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of process lines No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
D11-8572B	Pump House	Pump house for the NG catch tank; consisted of an 8' x 15' aluminum sided shed that housed two pumps; shed connected to a 15' diameter water tank to push the NG waste water to the wastewater tank; No evidence of release	SB-D11-8572B-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of pipes No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
D9-2	Pumphouse for Glycerin	Cement floored wooden structure; fairly new; housed pumps that pumped glycerin from the storage tanks to soda house (2229). No evidence for release	SB-D9-2-01 through SB-D9-2-04	SB-D9-2-04 SB-D9-2-01	Sampling location SB-D9-2-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D9-2-01	No New Jersey Soil Cleanup Criteria Exceedances
D9-2229	Soda Prep House	Concrete and steel structure; loading dock on W side; two large 10' diameter soda and water solution tanks on E side; pipe lines enter and exit at NE and SW sides	SB-D9-2229-01 through SB-D9-2229-10	SB-D9-2229-01 SB-D9-2229-05	Sampling location SB-D9-2229-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D9-2229-05	No New Jersey Soil Cleanup Criteria Exceedances
D9-3	Dust Collector	Dust collecting machine for soda house; electrical and collects dust from soda house by way of an air duct. No evidence of release	SB-D9-3-01 through SB-D9-3-04	SB-D9-3-02 SB-D9-3-01	Sampling location SB-D9-3-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D9-3-01	No New Jersey Soil Cleanup Criteria Exceedances
D9-5	Unknown	Very old remnant of bldg that appears as flat, elevated area;some remnants of a concrete foundation; two reinforcing bars present. No evidence of release (area=800 sq ft)	SB-D9-5-01 through SB-D9-5-05	SB-D9-5-05 SB-D9-5-02	Sampling location SB-D9-5-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D9-5-02	No New Jersey Soil Cleanup Criteria Exceedances
D9-8284	Solvent Storage	Former structure removed; next to no evidence of its existence; trash shed on former location. No evidence of release	SB-D9-8284-01 through SB-D9-8284-05	SB-D9-8284-05 SB-D9-8284-03	Sampling location SB-D09-8284-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-D09-8284-03	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-29

Nitroglycerin Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample Ids	Analytical Sample Ids	Sample Selection Justification	Unrestricted Use Exceedances
D9-N1	Nitrator Scrap Shed	Scrap shed has been removed; area is flat and adjacent to a berm. No evidence of release (area=100 sq ft)	SB-D9-N1-01 through SB-D9-N1-03	SB-D9-N1-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E10-2031B	Change House	Brick structure used as a change house; looks like it has been converted to an office with parts around; septic tank ~ 20' SW of bldg (1 sludge sample taken during Single Phase Remediation effort). No evidence of release	SB-E10-2031B-01 through SB-E10-2031B-04 TP-E10-2031B-05	SB-E10-2031B-04 SB-E10-2031B-01 TP-E10-2031B-05	Sampling location SB-E10-2031B-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E10-2031B-01. Test Pit location was placed downgradient of the septic tank.	No New Jersey Soil Cleanup Criteria Exceedances
E10-2031C	Shed	Cement pad with a broken metal shed; shed contains fire extinguishers and general maintenance equipment; No evidence of release	SB-E10-2031C-01 through SB-E10-2031C-04	SB-E10-2031C-01 SB-E10-2031C-03	Sampling location SB-E10-2031C-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E10-2031C-03	No New Jersey Soil Cleanup Criteria Exceedances
E10-2314	Acetone Weigh House	Bldg demolished; three 1.5' x 1.5' footers remain; area vegetated. No evidence of release.	SB-E10-2314-01 through SB-E10-2314-03	SB-E10-2314-02 SB-E10-2314-01	Sampling location SB-E10-2314-02 was determined using XRF screening; Results indicated a zinc concentration of 2,143 ppm. A confirmation sample was collected at SB-E10-2314-01. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E10-9	NG Gutter	Old NG gutter from Bldg. 2220 to the emulsifier house (E10-2169); cannot determine how it ran into Bldg. 2220 since it shot with little remaining. No evidence of release (length = 550 feet)	SB-E10-9-01 through SB-E10-9-06		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of gutter No positive detections were found using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
Bldg = Building
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-30

Development Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
G6-1	Magazine	Building demolished, minimal evidence of remains; Portions of stone foundation remain; No evidence of release	SB-G6-1-01 through SB-G6-1-03	SB-G6-1-03 SB-G6-1-02	Sampling location SB-G6-1-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G6-1-02	No New Jersey Soil Cleanup Criteria Exceedances
G6-4	Unknown Storage Tank	Above ground storage tank mounted on concrete cradles. Pressure gauge mounted on S end. No evidence of release.	SB-G6-4-01 through SB-G6-4-03	SB-G6-4-01	Sampling location SB-G6-4-01 was determined using XRF screening; Results indicated a lead concentration of 535 ppm at SB-G6-4-01. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
G6-8261	Solvent Shed	Wood and corrugated sheet metal construction; One door in front for loading/unloading; No evidence of release	SB-G6-8261-01 through SB-G6-8261-05	SB-G6-8261-03 SB-G6-8261-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
G6-906	Auto Shed	Area is currently paved over, location determined from maps. No evidence of release	TP-G6-906-01 through TP-G6-906-03	TP-G6-906-01 TP-G6-906-02	Test Pits dug through asphalt in sampling locations using professional judgement.	No New Jersey Soil Cleanup Criteria Exceedances
G6-9219	Sample Magazine	Only some bricks and metal debris remain of this former structure. Building appears to have been dismantled long ago. No evidence of release.	SB-G6-9219-01 through SB-G6-9219-05	SB-G6-9219-05 SB-G6-9219-04	Sampling location SB-G6-9219-05 was determined using professional judgement; Screening results did not warrant biased sampling.A confirmation sample was collected at SB-G6-9219-04	No New Jersey Soil Cleanup Criteria Exceedances
G7-8140	Break Room	Wooden and corrugated sheet metal construction over concrete foundation. Break room sinks and tables present. Possible septic tank on E side. No evidence of release.	SB-G7-8140-01 through SB-G7-8140-04	SB-G7-8140-02 TP-G7-8140-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling Test Pit location placed downgradient from septic	No New Jersey Soil Cleanup Criteria Exceedances
G7-E49	Extra Magazine	Small wooden storage magazine with a smaller shed Electrical connection to smaller shed, 2" steam line to magazine "8249A" spray painted on the front. No evidence of release	SB-G7-E49-01 through SB-G7-E49-05	SB-G7-E49-02 SB-G7-E49-05	Sampling location SB-G7-E49-02 was determined using XRF screening; Results indicated an arsenic concentration of 233 ppm. A confirmation sample was collected at SB-G7-E49-05. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
G8-8177A	Storage Shed	Small wooden and corrugated sheet metal storage shed; Adjacent single phase transformer and electrical controls; No evidence of release	SB-G8-8177A-01 through SB-G8-8177A-03	SB-G8-8177A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
G8-8178	Blending House	Corrugated cylindrical metal room covered in soil; Small barrel house-sheet metal front; No evidence of release	SB-G8-8178-01 through SB-G8-8178-02	SB-G8-8178-01 SB-G8-8178-02	Sampling location SB-G08-8178-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G08-8178-02	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-31

Development Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H5-1	Septic Tank	Large septic tank covered by a S.S. lid (one sludge sample taken during Single Phase Remediation effort)	TP-H5-1-01	TP-H5-1-01	Test Pit location was placed downgradient from the septic.	No New Jersey Soil Cleanup Criteria Exceedances
H5-2	Electric Transformer	Transformer mounted on pole adjacent to two decon ovens.	SB-H5-2-01	SB-H5-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H5-3	Septic Tank	Possible photo reagents present; No evidence of release	TP-H5-3-01	TP-H5-3-01	Test Pit location placed downgradient from septic	No New Jersey Soil Cleanup Criteria Exceedances
H5-8180	Gate House	Remnant Building, location determined from historical maps			Test Pits were dug at this AOC. Underground pipelines were found at this location. Sampling was suspended.	No New Jersey Soil Cleanup Criteria Exceedances
H5-8254	Photo Laboratory	Extension off NW corner of Bldg. 8126; Concrete masonry unit construction with plaster floor and wooden walls on S third of building; Marked as lead print with vertical asbestos shingles; No evidence of release	SB-H5-8254-01 through SB-H5-8254-04	SB-H5-8254-04 SB-H5-8254-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-H05-8254-01	No New Jersey Soil Cleanup Criteria Exceedances
H6-1	Store House	All that remains is six concrete footers; No evidence of release	SB-H6-1-01 through SB-H6-1-05	SB-H6-1-02 SB-H6-1-03	Sampling location SB-H06-1-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H06-1-03	No New Jersey Soil Cleanup Criteria Exceedances
H6-10	Septic Tank	Large septic tank, large pit was excavated and timbers placed over and covered with earth	TP-H6-10-A	TP-H6-10-A	Test Pit location placed downgradient from septic	No New Jersey Soil Cleanup Criteria Exceedances
H6-11	Septic Tank	Septic tank with SS lid along path near substation (one sludge sample taken during Single Phase Remediation effort)	TP-H6-11-A	TP-H6-11-A	Test Pit location placed downgradient from septic	No New Jersey Soil Cleanup Criteria Exceedances
H6-12	Electric Transformer	Small electric transformer on top of telephone pole; Transformer looks corroded but intact; No evidence of release	SB-H6-12-01	SB-H6-12-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H6-4	Electric Transformer	Small electric transformer on telephone pole; Transformer looks corroded but intact; No evidence of release	SB-H6-4-01	SB-H6-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H6-7	Electric Transformer	Electric transformer mounted to telephone pole; Gray in color, with minor rust on housing; No evidence of release	SB-H6-7-01	SB-H6-7-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-31

Development Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H6-8152A H6-8152B	Main Office Septic Tanks	Two vent pipes present only; Area covered with vegetation; (one sludge sample taken from each during Single Phase Remediation effort); No evidence of release	TP-H6-8152A/8152B	TP-H6-8152A/8152B	One Test Pit taken for both septics using professional judgement for location	No New Jersey Soil Cleanup Criteria Exceedances
H6-8247	Experimental Laboratory Store House	Brick structure on a concrete foundation; A lead pipe exits the building to septic tank; Two doors on the W side; No evidence of release	SB-H6-8247-01 through SB-H6-8247-05	SB-H6-8247-02 SB-H6-8247-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H6-8251	Smokeless Magazine	Very old stone structure that has collapsed on itself; No evidence of release	SB-H6-8251-01 through SB-H6-8251-04	SB-H6-8251-03 SB-H6-8251-02	Sampling location SB-H6-8251-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H6-8251-02.	No New Jersey Soil Cleanup Criteria Exceedances
H6-8275	Nitrocellulose Storage	Wooden structure used to house NC; No evidence of release	SB-H6-8275-01 through SB-H6-8275-04	SB-H6-8275-02 SB-H6-8275-04	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-H6-8275-02. A confirmation sample was collected at SB-H6-8275-04. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
H6-862	Test House	Cement structure with door on the W side; Steam enters from N, steam drain to S; No evidence of release	SB-H6-862-01 through SB-H6-862-05	SB-H6-862-04 SB-H6-862-01	Sampling location SB-H6-862-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H6-862-01.	No New Jersey Soil Cleanup Criteria Exceedances
H6-9	Electric Transformer	New electric transformer mounted to telephone pole; Gray colored housing with no discoloration; No evidence of release	SB-H6-9-01	SB-H06-9-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H6-918	Building 918	Area currently covered with gravel/soil/vegetation; Electrical connections/pole at SW corner; Area adjacent to H6-8152A; No evidence of release	SB-H6-918-01 through SB-H6-918-05	SB-H6-918-01 SB-H6-918-03	Sampling location SB-H6-918-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H6-918-03.	No New Jersey Soil Cleanup Criteria Exceedances
H6-941(C)	Cap Test Area	Former building has been completely removed; All that remains is an elevated grass area; No evidence of release	SB-H6-941C-01 through SB-H6-941C-05	SB-H6-941C-02 SB-H6-941C-03	Sampling location SB-H6-941C-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H6-941C-03.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-31

Development Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H7-1	General Laboratory Discharge Area	Concrete containment basin listed as "water and contents partially unknown"; 2" steel vent (?) pipe present; No evidence of release	TP-H7-1-01	TP-H7-1-01	Test Pit location placed downgradient from the sump	No New Jersey Soil Cleanup Criteria Exceedances
H7-10	Electric Transformer	Black with some dark gray discoloration; No evidence of release	SB-H7-10-01	SB-H7-10-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H7-12	Unknown Tank	Steel lid cast in concrete covers water filled tank; Steel or metal sidewalls; Clear water inside-expected septic tank	TP-H7-12-01	TP-H7-12-01	Test Pit location was placed downgradient from the septic	No New Jersey Soil Cleanup Criteria Exceedances
H7-2	Electric Transformer	Intact transformer on telephone pole; No evidence of release	SB-H7-2-01	SB-H7-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H7-4	Unknown	Unknown bldg.	SB-H7-4-01 through SB-H7-4-04	SB-H7-4-04 SB-H7-4-02	Sampling location SB-H7-4-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-4-02.	No New Jersey Soil Cleanup Criteria Exceedances
H7-5	Unknown Trailer	Wooden construction sided trailer-recent installation; No evidence of release	SB-H7-5-01 through SB-H7-5-04	SB-H7-5-01 SB-H7-5-02	Sampling location SB-H7-4-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-4-02.	No New Jersey Soil Cleanup Criteria Exceedances
H7-6	Unknown	Building demolished, area currently covered by vegetation; Location determined from historical maps; No evidence of release	SB-H7-6-01 through SB-H7-6-03	SB-H7-6-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H7-8124	SW Sampler Concrete Pad	Concrete pad constructed for mounting surface water sampler. No evidence of release	SB-H7-8124-01 through SB-H7-8124-04	SB-H7-8124-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H7-8134	Glaze House Scrap Shed	Temporary storage shed built of wooden and corrugated metal. No evidence of release	SB-H7-8134-01 through SB-H7-8134-04	SB-H7-8134-02 SB-H7-8134-04	Sampling location SB-H7-8134-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-8134-04.	No New Jersey Soil Cleanup Criteria Exceedances
H7-8146	Store House	Wood structure on concrete footers; Duct and electric on W side to H7-8145; No evidence of release	SB-H7-8146-01 through SB-H7-8146-04	SB-H7-8146-03 SB-H7-8146-04	Sampling location SB-H7-8146-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-8146-04.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-31

Development Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H7-8176	Mix House	Building covered in earth with an earthen berm to the N; Electric and steam supplied to building; No evidence of release	SB-H7-8176-01 through SB-H7-8176-04	SB-H7-8176-01 SB-H7-8176-02	Sampling location SB-H7-8176-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-8176-02.	No New Jersey Soil Cleanup Criteria Exceedances
H7-8248	Chemical Storage	Wooden construction on wooden railroad tie foundation; Tar-like seep to rear	SB-H7-8248-01 through SB-H7-8248-04	SB-H7-8248-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H7-8282	Motor House	Wooden structure on concrete slaboratory that houses an electric motor. Motor has leaked oil and is reaching the ground via E door	SB-H7-8282-01 through SB-H7-8282-04	SB-H7-8282-03 SB-H7-8282-02	Sampling location SB-H7-8282-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H7-8282-02.	No New Jersey Soil Cleanup Criteria Exceedances
H8-8177	Glazing House	Corrugated cylindrical metal room covered in soil; Small barrel house-sheet metal front; No evidence of release	SB-H8-8177-01 through SB-H8-8177-02	SB-H8-8177-01 SB-H8-8177-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H8-8179	Glaze/Blend House	Corrugated cylindrical metal room covered in soil-sheet metal front Small glazing house with electrical controls for "barrel". No evidence of release	SB-H8-8179-01 through SB-H8-8179-02	SB-H8-8179-01 SB-H8-8179-02	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I5-1	Nitrogen Laboratory Substation	Three 1.5' cylindrical transformers mounted on steel I-beams between two poles. No evidence of release	SB-I5-1-01 through SB-I5-1-03	SB-I5-1-01 SB-I5-1-02 SB-I5-1-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I5-7	Truck Spill	Area currently covered with vegetation; Minimal evidence of previous truck spill; No evidence of release (area = 2,600 sq ft)	SB-I5-7-01 through SB-I5-7-09	SB-I5-7-05 SB-I5-7-01	Sampling location SB-I5-7-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I5-7-01.	No New Jersey Soil Cleanup Criteria Exceedances
I5-8168	Instrument House	Concrete rubble, reinforcing bar, sheet metal, and 1" pipe remain where this building previously stood. No evidence of release	SB-I5-8168-01 through SB-I5-8168-05	SB-I5-8168-02 SB-I5-8168-01	Sampling location SB-I5-8168-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I5-8168-01.	No New Jersey Soil Cleanup Criteria Exceedances
I5-8169	Drop Test House	Building demolished, only concrete and reinforced pipe remain. No evidence of release (area=100 sq ft)	SB-I5-8169-01 through SB-I5-8169-04	SB-I5-8169-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I6-3	Unknown	Very old wooden structure, probably used for storage; No evidence of release	SB-I6-3-01 through SB-I6-3-04	SB-I6-3-04 SB-I6-3-03	Sampling location SB-I6-3-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-3-03.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-31

Development Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I6-8	Solvent Storage Shed	Wood and steel structure used to store solvents 20 gal neutrualization tank and two old acid carboys remain. No evidence of release	SB-I6-8-01 through SB-I6-8-04	SB-I6-8-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I6-8171C	Finished Product Bay	Wood and steel building located within the berm of I6-8171. No evidence of release	SB-I6-8171C-01 through SB-I6-8171C-03	SB-I6-8171C-01 SB-I6-8171C-03	Sampling location SB-I6-8171C-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-8171C-04.	No New Jersey Soil Cleanup Criteria Exceedances
I6-8174	NG Storage Shed	Concrete building surrounded by an earthen berm; No evidence of release	SB-I6-8174-01 through SB-I6-8174-04	SB-I6-8174-02 SB-I6-8174-04	Sampling location SB-I6-8174-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-8174-04.	No New Jersey Soil Cleanup Criteria Exceedances
I6-8175	Sieve Storage House	Small wooden structure used to house sieves; No evidence of release	SB-I6-8175-01 through SB-I6-8175-04	SB-I6-8175-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I6-8181	Unknown	Building has been removed, all that remains is a slightly disturbed area. Location based on historical maps and topography. No evidence of release	SB-I6-8181-01 through SB-I6-8181-03	SB-I6-8181-01 SB-I6-8181-02	Sampling location SB-I6-8181-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-8181-02.	No New Jersey Soil Cleanup Criteria Exceedances
I6-8263	Experimental Smokeless Store	Steel shed-like structure that contains glassware; No evidence of release	SB-I6-8263-01 through SB-I6-8263-04	SB-I6-8263-01 SB-I6-8263-02	Sampling location SB-I6-8263-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I6-8263-02.	No New Jersey Soil Cleanup Criteria Exceedances
I6-E4	High Energy Laboratory Scrap Shed	Small steel and wood shed with a waste barrel and old powder can inside. No evidence of release.	SB-I6-E4-01 through SB-I6-E4-04	SB-I6-E4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J5-4	Former Dynamite Test Area	Location estimated from historical maps	SB-J5-4-01 through SB-J5-4-03	SB-J5-4-02 SB-J5-4-01	Sampling location SB-J5-4-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J5-4-01.	No New Jersey Soil Cleanup Criteria Exceedances
J6-1	Earthen Pit	Earthen pit dug out of the hill that may have been associated with J6-8133, but the use is unknown. No evidence of release	SB-J6-1-01 through SB-J6-1-04	SB-J6-1-04 SB-J6-1-01	Sampling location SB-J6-1-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J6-1-01.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-31

Development Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J6-4	Electric Transformer	Old transformer on pole, it is rusted and may have released. However, there is no evidence of release.	SB-J6-4-01	SB-J6-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J6-5	Electric Transformer	Small intact transformer on pole; No evidence of release	SB-J6-5-01	SB-J6-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J6-6	Unknown	Very old stone foundation, all remnants of structure have been removed Old metal pipe and reinforcing bar remain, 20' S of building lies a white crystalline material (area=500 sq ft). No evidence of release within the footprint of the building	SB-J6-6-01 through SB-J6-6-05	SB-J6-6-01 SB-J6-6-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J6-8	Electric Transformer	Old transformer on pole, it is leaking oil; There is a discolored area at the base of the pole	SB-J6-8-01	SB-J6-8-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J6-9200	Conditioning Bay	Small aluminum and wooden structure, the rear of the building appears to have caught fire with burnt wood and molten aluminum near an air handler. No evidence of release.	SB-J6-9200-01 through SB-J6-9200-04	SB-J6-9200-02 SB-J6-9200-01	Sampling location SB-J6-9200-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J6-9200-01.	No New Jersey Soil Cleanup Criteria Exceedances
K5-4	Earthen Pit	Earthen pit associated with K5-9213, use unknown; May be where material was excavated for the berm; No evidence of release	SB-K5-4-01 through SB-K5-4-04	SB-K5-4-01 SB-K5-4-02	Sampling location SB-K5-9213-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K5-4-02.	No New Jersey Soil Cleanup Criteria Exceedances
K5-9213	Experimental Dynamite Magazine	Old wood and steel sided structure with a lead floor and protected by a berm Building was service by rail line with loading area. No evidence of release	SB-K5-9213-01 through SB-K5-9213-05	SB-K5-9213-03 SB-K5-9213-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
K6-2	Earthen Pit	Earthen pit cut out of the side of the hill; Some old railroad and berm material in NW corner; No evidence of release (area=900 sq ft)	SB-K6-2-01 through SB-K6-2-04	SB-K6-2-03 SB-K6-2-02	Sampling location SB-K6-2-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K6-2-02.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-31

Development Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
K6-529	Dry House	Square rather than rectangular dry houses as before; Only concrete footers remain; No evidence of release	SB-K6-529-01 through SB-K6-529-05	SB-K6-529-02 SB-K6-529-01	Sampling location SB-K6-529-02 was determined using XRF screening; Results indicated a lead concentration of 449 ppm at SB-K6-529-02. A confirmation sample was collected at SB-K6-529-01. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
L5-11	Electric Transformer	Intact electric transformer on telephone pole; No evidence of release	SB-L5-11-01	SB-L5-11-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
L6-3	Heater House	Only small depression in the ground remains of the building that formerly housed the heater to dry house 370. No evidence of release (area=200 sq ft)	SB-L6-3-01 through SB-L6-3-03	SB-L6-3-02 SB-L6-3-01	Sampling location SB-L6-3-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L6-3-01.	No New Jersey Soil Cleanup Criteria Exceedances
L6-4	Heater House	Only small depression in the ground remains of the buildings that formerly housed the heaters to dry houses. No evidence of release (area=900 sq ft)	SB-L6-4-01 through SB-L6-4-04	SB-L6-4-02 SB-L6-4-03	Sampling location SB-L6-4-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L6-4-03.	No New Jersey Soil Cleanup Criteria Exceedances
L6-5	Earthen Pit	Small shallow earthen pit that may have been used as a heater house or for berm material. No evidence of release (area=500 sq ft)	SB-L6-5-01 through SB-L6-5-02	SB-L6-5-01 SB-L6-5-02	Sampling location SB-L6-5-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L6-5-02.	No New Jersey Soil Cleanup Criteria Exceedances
M4-2	Electric Transformer	Small electric transformer on telephone poles; Transformer looks corroded but intact; Potential S.V. at the base of the pole	SB-M4-2-01	SB-M4-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
M5-10	Septic Tank	Underground septic tank; Evidence of existence is a vent pipe and a clean out pipe (one sludge sample taken during Single Phase Remediation effort)	TP-M5-10-01	TP-M5-10-01	Test Pit location placed downgradient from septic	No New Jersey Soil Cleanup Criteria Exceedances
M5-11	Small Storage Shed	Small steel structure used to store E & E for testing; No evidence of a release	SB-M5-11-01 through SB-M5-11-04	SB-M5-11-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
M5-12	Former Shed	Probably used for shooting pond operations; All that remains is an old partially destroyed wooden floor No evidence of release (area=100 sq ft)	SB-M5-12-01 through SB-M5-12-03	SB-M5-12-03	Sampling location SB-M5-12-03 was determined using XRF screening; Results indicated a lead concentration of 449 ppm at SB-M5-12-03. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-31

Development Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
M5-13	Storage Shed	Armored storage for E & E materials for testing; Berm to N protecting the shooting pond buildings; No evidence of release	SB-M5-13-01 through SB-M5-13-04	SB-M5-13-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
M5-14	Storage Shed	Small wooden structure used to house blasting caps; Several hundred caps stored in plastic bags; No evidence of release	SB-M5-14-01 through SB-M5-14-04	SB-M5-14-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
M5-15	Storage Shed	Locked, small steel shed used to house materials for the shooting pond. No evidence of release	SB-M5-15-01 through SB-M5-15-04	SB-M5-15-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
M5-8166	Shooting Pond House	Earthen covered building used to test explosives at shooting pond; Building has three main rooms No evidence of a release	SB-M5-8166-01 through SB-M5-8166-07	SB-M5-8166-01 SB-M5-8166-03	Sampling location SB-M5-8166-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M5-8166-03.	No New Jersey Soil Cleanup Criteria Exceedances
M5-8166A-B-C	Storage Shed	Long, thin aluminum shed used to store pipes, test plates, and alcohol. No evidence of release.	SB-M5-8166A-B-C-01 through SB-M5-8166A-B-C-03	SB-M5-8166A-B-C-03 SB-M5-8166A-B-C-01	Sampling location SB-M5-8166A-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M5-8166A-01.	No New Jersey Soil Cleanup Criteria Exceedances
M5-8166D	Pump House	Small aluminum and wood structure that contains electric motor and water pump that once pumped water from shooting pond in emergencies; No evidence of release	SB-M5-8166D-01 through SB-M5-8166D-04	SB-M5-8166D-04	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
N5-8	Plastic Debris Piles 1,2,3	Each pile consists of scrap plastic from detonations at shooting pond There may be residual explosives associated with debris (area=700 sq ft)	SB-N5-8-01 through SB-N5-8-06	SB-N5-8-01 SB-N5-8-03 SB-N5-8-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-32

Diazo Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H8-2181	Diazo Plant	Bldg demolished-only concrete rubble remains; circular brick structure present (4' outside diameter) to NW corner; No evidence of release	SB-H8-2181-01 through SB-H8-2181-05	SB-H8-2181-01 SB-H8-2181-05	Sampling location SB-H08-2181-01 was determined using professional judgement Screening results did not warrant biased sampling; A confirmation sample was taken at SB-H08-2181-05	No New Jersey Soil Cleanup Criteria Exceedances
H8-69F	Ingredients Store	Bldg demolished-evidence of former bldg largely removed; No evidence of release	SB-H8-69F-01 through SB-H8-69F-03	SB-H8-69F-01 SB-H8-69F-02	Sampling location SB-H8-69F-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was taken at SB-H8-69F-02.	No New Jersey Soil Cleanup Criteria Exceedances
H8-9121	Nitric Acid Storage	Bldg demolished; concrete rubble remains as indication of former tank location; No evidence of release	SB-H8-9121-01 through SB-H8-9121-04	SB-H8-9121-02 SB-H8-9121-03 SB-H8-9121-04	Sampling location was determined using XRF screening; Results indicated a lead concentration of 404 ppm at SB-H8-9121-02. A confirmation sample was taken at SB-H8-9121-04. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances

Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-33

Maintenance Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
F10-19	Concrete Sumps	Three concrete sumps: one with float switch and pump, one with float switch only, one similar to PA6 wastewater pit. Oily sheen in rectangular sump	TP-F10-19-01	TP-F10-19-01	Test Pit location was taken downgradient from the sumps	No New Jersey Soil Cleanup Criteria Exceedances
F10-37B	Unknown	Bldg demolished-evidence largely removed; bldg debris present, brick, concrete; no foundation evident. No evidence of release.	SB-F10-37B-01 through SB-F10-37B-03	SB-F10-37B-02 SB-F10-37B-03	Sampling location SB-F10-37B-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F10-37B-03	No New Jersey Soil Cleanup Criteria Exceedances
F11-2292	Scrap Shed	Shed demolished, minimal evidence of remains; Location determined from historical maps; No evidence of release	SB-F11-2292-01 through SB-F11-2292-03	SB-F11-2292-03 SB-F11-2292-02	Sampling location SB-F11-2292-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F11-2292-02	No New Jersey Soil Cleanup Criteria Exceedances
F11-456	Hospital	Building demolished, minor amounts of concrete rubble present. Location determined from rubble and maps. No evidence of release	SB-F11-456-01 through SB-F11-456-05	SB-F11-456-02 SB-F11-456-01	Sampling location SB-F11-456-02 was determined using XRF screening; Results indicated a lead concentration of 582 ppm. A confirmation sample was collected at SB-F11-456-01. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
F12-4	Wagon Shed	Building demolished, area currently covered by vegetation; Location determined from maps; No evidence of release	SB-F12-4-01 through SB-F12-4-03	SB-F12-4-03 SB-F12-4-01	Sampling location SB-F12-4-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F12-4-01	No New Jersey Soil Cleanup Criteria Exceedances
F12-F6	Cotton Breaker Scrap Shed	Building demolished, area currently covered by vegetation; Location determined from maps; No evidence of release	SB-F12-F6-01 through SB-F12-F6-03	SB-F12-F6-02 SB-F12-F6-01	Sampling location SB-F12-F6-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F12-F6-01	No New Jersey Soil Cleanup Criteria Exceedances
G10-108B	Resin Store	Building demolished, old concrete foundation with attached rebar and 4" and 8" pipes entering the ground remain. No evidence of release.	SB-G10-108B-01 through SB-G10-108B-05	SB-G10-108B-04 SB-G10-108B-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
G10-13	Unknown	Wooden shed on concrete foundation with controls for Bldg. 9106. No evidence of release	SB-G10-13-01 through SB-G10-13-03	SB-G10-13-01 SB-G10-13-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-G10-13-02	No New Jersey Soil Cleanup Criteria Exceedances
G10-459	Boiler House	Building demolished, only concrete pad remains; Piles of burnt shotgun shells evident; No evidence of release	SB-G10-459-01 through SB-G10-459-05	SB-G10-459-05 SB-G10-459-04	Sampling location SB-G10-459-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G10-459-04	No New Jersey Soil Cleanup Criteria Exceedances
G10-8216	Paint Storage Release	Area currently covered by dark black slag material	SB-G10-8216-01 through SB-G10-8216-03	SB-G10-8216-01 SB-G10-8216-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-G10-8216-02	No New Jersey Soil Cleanup Criteria Exceedances
G10-AAP1	Alcohol/Acetone Pipeline	Feed to B-Line area mixer (2188) from the maintenance area storage tanks. No evidence of release			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
G10-BRP1	Brine Pipeline	6" pipeline which leads from ammonia cooler tank (adjacent toPowerhouse) to 8691-NG area brine tank; possibly associated mixed acid or acid pipe which is not marked from 9106 to this AOC			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-33

Maintenance Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
G10-MAP1	Mixed Acid Pipelines	4"acid feed line to NG (2230) Hill from nitric/sulfuric acid storage tanks. No evidence of release			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
G10-MAP2	Mixed Acid Pipeline	Feed to Bldg. 9106 from H11-4. No evidence of release.			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
G10-OP1	Oil Pipeline	Oil pipeline from Bldg. G10-8681 to Bldg. G10-8501: soil stained dark black at flag # 3			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
G11-253	Sample Smokeless Powder Mag. #2	Remnant Building, location determined from historical maps	SB-G11-253-01 through SB-G11-253-03	SB-G11-253-03 SB-G11-253-01	Sampling location SB-G11-253-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G11-253-01	No New Jersey Soil Cleanup Criteria Exceedances
G11-4	Electric Transformer	Black housing with minor amounts of discoloration present. No evidence of release.	SB-G11-4-01	SB-G11-4-01	Sample collected at base of former pole	No New Jersey Soil Cleanup Criteria Exceedances
G12-12	Granary	Remnant Building, location determined from historical maps	SB-G12-12-01 through SB-G12-12-03	SB-G12-12-01 SB-G12-12-03	Sampling location SB-G12-12-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G12-12-03	No New Jersey Soil Cleanup Criteria Exceedances
G12-6	Unknown Concrete Pad	Small concrete pad with wooden box mounted on top; No evidence of release	SB-G12-6-01 through SB-G12-6-04	SB-G12-6-04 SB-G12-6-03	Sampling location SB-G12-6-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G12-6-03	No New Jersey Soil Cleanup Criteria Exceedances
G12-7	Electric Transformer	Black housing with minor amounts of discoloration present. No evidence of release	SB-G12-7-01	SB-G12-7-01	Sample collected at base of pole, transformer has been removed XRF results indicated an arsenic concentration of 175 ppm An additional metals sample needs to be taken at this AOC Analytical results did not detect elevted metal concentrations	No New Jersey Soil Cleanup Criteria Exceedances
G12-8203	Equipment Shed	Wooden and corrugated sheet metal construction over concrete foundation with garage doors facing street, and loading doors on N and E corners. Currently used for tractor storage. No evidence of release.	SB-G12-8203-01 through SB-G12-8203-06	SB-G12-8203-01 SB-G12-8203-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
G8-A12	Scrap Shed	Bldg demolished; minimal evidence of former shed; wood chips present at former foundation location. No evidence of release	SB-G8-A12-01 through SB-G8-A12-05	SB-G8-A12-05 SB-G8-A12-01	Sampling location SB-G8-A12-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G8-A12-02	No New Jersey Soil Cleanup Criteria Exceedances
G9-1	Diesel Fuel Storage Tank	Demolished-tank and former cradle removed; largely vegetated; No evidence of release	SB-G9-1-01 through SB-G9-1-03	SB-G9-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
G9-8105	Machine Shop	Brick shop built on concrete foundation; concrete gutter along SE side. No evidence of release.	SB-G9-8105-01 through SB-G9-8105-07	SB-G9-8105-05	Sampling location was determined using XRF screening Results indicated a lead concentration of 488 ppm at SB-G09-8105-05 Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
G9-8205	Electrical Shop	Only concrete footer remains along SE and portion of SW side; bldg demolished; sign for former bldg present.No evidence of release.	SB-G9-8205-01 through SB-G9-8205-05	SB-G9-8205-05 SB-G9-8205-02	Sampling location SB-G9-8205-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G9-8205-02	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-33

Maintenance Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H10-1	Storage Tank	Concrete block containment structure, storage tank removed. No evidence of release.		SB-H10-1-02	This AOC is located on H10-10, a concrete pad. It has been combined with H10-10	No New Jersey Soil Cleanup Criteria Exceedances
H10-2260	Screen Burner	Sheet metal construction with minor rust and black staining along bottom of sheet metal walls. Small heater unit on SW corner. No evidence of release.			This AOC is located on H10-10, a concrete pad. It has been combined with H10-10	No New Jersey Soil Cleanup Criteria Exceedances
H10-9101	Nitric Acid Storage Tanks	Building demolished, only concrete footer outline locations remain. No evidence of release.	SB-H10-9101-01 through SB-H10-9101-05	SB-H10-9101-03 SB-H10-9101-02	Sampling location SB-H10-9101-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H10-9101-02	No New Jersey Soil Cleanup Criteria Exceedances
H10-9102	Tank	Tank removed, minor evidence of former concrete foundation. Area largely vegetated. No evidence of release.	SB-H10-9102-01 through SB-H10-9102-03	SB-H10-9102-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H10-MAP3	Mixed Acid Pipeline	Acid pipeline which connects H10-9103 and G10-9100; nitric acid line ended at N corner of 9103 but may continue on; not evident. No evidence of release.			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
H11-10	Tanks	Tanks demolished, rubble and building debris evident; Location determined from maps; No evidence of release	SB-H11-10-01 through SB-H11-10-03	SB-H11-10-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H11-12	Electric Transformer	Black housing with minor amounts of discoloration present. No evidence of release.	SB-H11-12-01	SB-H11-12-01	Sample taken at site of former transformer	No New Jersey Soil Cleanup Criteria Exceedances
H11-2	Unknown	Building demolished, concrete pad remains; Largely vegetated area, however extent of building evident No evidence of release	SB-H11-2-01 through SB-H11-2-04	SB-H11-2-02 SB-H11-2-03	Sampling location SB-H11-2-02 was determined using XRF screening Results indicated a lead concentration of 1,010 ppm. A confirmation sample was collected at SB-H11-2-03. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
H11-2295	Cotton House/ Paint House	Building demolished, area currently covered with vegetation. Location determined from maps. No evidence of release.	SB-H11-2295-01 through SB-H11-2295-03	SB-H11-2295-02 SB-H11-2295-01	Sampling location SB-H11-2295-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-2295-01	No New Jersey Soil Cleanup Criteria Exceedances
H11-510	Temp. Soda Storage	Remnant Building, location determined from historical maps	SB-H11-510-01 through SB-H11-510-03	SB-H11-510-03 SB-H11-510-01	Sampling location SB-H11-510-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-510-01	No New Jersey Soil Cleanup Criteria Exceedances
H11-696	Unknown	Building demolished, concrete pad remains. Largely vegetated area, brick building debris and slag from rail line present. No evidence of release.	SB-H11-696-01 through SB-H11-696-03	SB-H11-696-01 SB-H11-696-02	Group B E&E materials were detected at SB-H11-696-01 using an Expray Test Kit A confirmation sample was collected at SB-H11-696-02 Analytical results did not detect elevated E&E concentrations	No New Jersey Soil Cleanup Criteria Exceedances
H11-697	Unknown	Building demolished, concrete pad remains. Largely vegetated area, brick building debris and slag from rail line present. No evidence of release.	SB-H11-697-01 through SB-H11-697-04	SB-H11-697-01 SB-H11-697-02	Sampling location SB-H11-697-01 was determined using XRF screening; Results indicated an arsenic concentration of 256 ppm. A confirmation sample was collected at SB-H11-697-02. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-33

Maintenance Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H11-762	Unknown	Building demolished, only concrete pad remains; No evidence of release	SB-H11-762-01 through SB-H11-762-03	SB-H11-762-03 SB-H11-762-02	Sampling location SB-H11-762-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-762-02	No New Jersey Soil Cleanup Criteria Exceedances
H11-9307	Ingredient Store	Building demolished, area currently covered with vegetation. Location determined from maps. No evidence of release.	SB-H11-9307-01 through SB-H11-9307-03	SB-H11-9307-02 SB-H11-9307-01	Sampling location SB-H11-9307-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H11-9307-01	No New Jersey Soil Cleanup Criteria Exceedances
H12-3	Baled Bag Store #9	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H12-3-01 through SB-H12-3-03	SB-H12-3-01 SB-H12-3-02	Sampling location SB-H12-3-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H12-3-02	No New Jersey Soil Cleanup Criteria Exceedances
H12-4	Baled Bag Store #10	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H12-4-01 through SB-H12-4-03	SB-H12-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H12-5	Pulp and Sawdust Store #4	Building demolished, area largely covered with vegetation; Location determined from maps; No evidence of release	SB-H12-5-01 through SB-H12-5-03	SB-H12-5-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H12-689	Nut Shell Grinder	Building demolished, structure and foundation not evident; Location determined from maps; No evidence of release	SB-H12-689-01 through SB-H12-689-03	SB-H12-689-03 SB-H12-689-01	Sampling location SB-H12-689-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H12-689-01	No New Jersey Soil Cleanup Criteria Exceedances
H12-8607	Water Treatment Building	Concrete block pad with three pipes entering the ground; No evidence of release	SB-H12-8607-01 through SB-H12-8607-04	SB-H12-8607-04 SB-H12-8607-01	Sampling location SB-H12-8607-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H12-8607-01	No New Jersey Soil Cleanup Criteria Exceedances
H13-5	Electric Transformer	Gray colored with minor rust staining; No evidence of release	SB-H13-5-01	SB-H13-5-01	Sample collected at base of pole	No New Jersey Soil Cleanup Criteria Exceedances
H13-8158A	Unknown Pit	Posted as a confined space, possibly a wastewater pit; Concrete block sump with asphalt and shingle roof; No evidence of release	TP-H13-8158A-01	TP-H13-8158A-01	Test Pit location placed downgradient of the sump.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-33

Maintenance Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H9-1	Former Tank Field	Currently a pine forest, some evidence of what appears to be concrete associated with four cradles. No evidence of release.	SB-H9-1-01 through SB-H9-1-08	SB-H9-1-03 SB-H9-1-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H9-3	Unknown	Building demolished, some concrete block present. S edge of building has line of stressed vegetation (area=700 sq ft)	SB-H9-3-01 through SB-H9-3-04	SB-H9-3-01 SB-H9-3-03	Sampling location SB-H9-3-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H9-3-03	No New Jersey Soil Cleanup Criteria Exceedances

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-34

B-Line Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I11-6	Septic Tank	Unassociated septic tank, previously unidentified; one sludge sample taken during FEC effort	TP-I11-6-01	TP-I11-6-01	A Test Pit was dug downgradient from the septic tank.	No New Jersey Soil Cleanup Criteria Exceedances
J10-6	Smokeless Powder Storage	Building demolished, largely vegetated area; Mound and stone foundation indicates storehouse; No evidence of a release	SB-J10-6-01 through SB-J10-6-05	SB-J10-6-01 SB-J10-6-05	Sampling locatione were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J10-609	Office Change House	Remnant Building, location determined from historical r	SB-J10-609-01 through SB-J10-609-03	SB-J10-609-02 SB-J10-609-01	Sampling location SB-J10-609-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J10-609-01.	No New Jersey Soil Cleanup Criteria Exceedances
J11-11	Septic Tank	Minimal evidence, 6" vent pipe protruding from ground; Location determined from historical maps; No evidence of a release	TP-J11-11-01	TP-J11-11-01	Test Pit location downgradient from septic tank.	No New Jersey Soil Cleanup Criteria Exceedances
J11-14	Final Mix #3	Building demolished, currently a vegetated area; Location determined from historical maps; No evidence of a release	SB-J11-14-01 through SB-J11-14-03	SB-J11-14-03 SB-J11-14-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-14-03. A confirmation sample was collected at SB-J11-14-01	No New Jersey Soil Cleanup Criteria Exceedances
J11-602A	Scrap Smokeless Powder	Building demolished, area has been covered with aggregate(area<100 sq ft); Location determined from historical maps; No evidence of a release	SB-J11-602A-01 through SB-J11-602A-03	SB-J11-602A-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-602A-01 Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
J11-7	Former Tanks	Demolished, tank cradles removed; Gravel, slag-like material covers area; Location determined from historical maps; No evidence of a release	SB-J11-7-01 through SB-J11-7-03	SB-J11-7-01	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-7-01 Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
J11-8265A	Store House Tank	Tank cradles and tank removed, footers demolished; Largely vegetated area, location determined from maps; No evidence of a release	SB-J11-8265A-01 through SB-J11-8265A-03	SB-J11-8265A-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-8265A-03 Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
J11-B20	Building B-20	Building demolished, one concrete footer remaining with rubble. No evidence of a release (area=100 sq ft).	SB-J11-B20-01 through SB-J11-B20-03	SB-J11-B20-02	Sampling location was determined using XRF screening; Results indicated a copper concentration of 697 ppm at SB-J11-B20-02. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances

Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J11-B83	Unknown Storage Shed	Corrugated metal shed on concrete foundation; Electrical wire connections to NE corner; No evidence of a release	SB-J11-B83-01 through SB-J11-B83-04	SB-J11-B83-01 SB-J11-B83-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J11-B83-01. A confirmation sample was collected at SB-J11-B83-03. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
J12-2	Unknown	Large concrete footers with concrete basin reinforced with steel I-Beams, possible powder grinder. No evidence of release, however slag present.	SB-J12-2-01 through SB-J12-2-05	SB-J12-2-03 SB-J12-2-02	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J12-2-03. A confirmation sample was collected at SB-J12-2-02. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
K10-6	Tank Cradles	Small concrete and rebar tank cradles; Adjacent to stressed vegetation (K10-5)	SB-K10-6-01 through SB-K10-6-04	SB-K10-6-02 SB-K10-6-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
K10-602B	Smokeless Powder Storage	Building demolished, mound of soil surrounded by old stone foundation. Adjacent to rail line. No evidence of a release (area=800 sq ft).	SB-K10-602B-01 through SB-K10-602B-04	SB-K10-602B-03 SB-K10-602B-02	Sampling location SB-K10-602B-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K10-602B-02.	No New Jersey Soil Cleanup Criteria Exceedances
K10-79A	Record Storage	Grass and vegetation covered area; Location determined from historical maps; No evidence of a release	SB-K10-79A-01 through SB-K10-79A-03	SB-K10-79A-01 SB-K10-79A-03	Sampling location SB-K10-79A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K10-79A-03.	No New Jersey Soil Cleanup Criteria Exceedances
K11-2225A	Coating House Discharge	Same construction as valve box except ceramic pipe enters on NE and SE side. Sump associated with the building. No evidence of a release.	TP-K11-2225A-01	TP-K11-2225A-01	Test Pit location placed downgradient from the sump.	No New Jersey Soil Cleanup Criteria Exceedances
K11-2225C	Paraplex Feed Line	Feed line for barrel coating house from paraplex tank; No evidence of a release			Line removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
K11-2302A	Cut and Rest House Discharge/Ditch	Drainage/Discharge from Bldg. 2302A; Culvert filled in to allow roadway passage; No evidence of a release (area=3,400 sq ft)			This AOC has been referred to the Surface Water/Sediment Investigation	No New Jersey Soil Cleanup Criteria Exceedances
K11-5	Electrical Transformer	Transformer mounted to telephone pole; No evidence of corrosion or release	SB-K11-5-01	SB-K11-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-34

B-Line Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
K11-607	Cutting House #4	Remnant Building, location determined from historical r	SB-K11-607-01 through SB-K11-607-03	SB-K11-607-02 SB-K11-607-01	Sampling location SB-K11-607-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-607-01.	No New Jersey Soil Cleanup Criteria Exceedances
K11-B2	Press and Cut House Scrap Shed	Building demolished, minimal evidence of buildings present; Location determined from historical maps. No evidence of a release.	SB-K11-B2-01 through SB-K11-B2-03	SB-K11-B2-01 SB-K11-B2-03	Sampling location SB-K11-B2-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K11-B2-03.	No New Jersey Soil Cleanup Criteria Exceedances
K11-B3	Barrel Coat Scrap Shed	Building demolished, moss-covered foundation remains; No evidence of a release	SB-K11-B3-01 through SB-K11-B3-03	SB-K11-B3-02 SB-K11-B3-01	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-K11-B3-02. A confirmation sample was collected at SB-K11-B3-01. Analytical result did not detect elevated E&E concentrations	No New Jersey Soil Cleanup Criteria Exceedances
K9-1	Unknown	Small storage shed of wooden construction; No evidence of a release	SB-K9-1-01 through SB-K9-1-04	SB-K9-1-02 SB-K9-1-01	Sampling location SB-K9-1-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K9-1-01.	No New Jersey Soil Cleanup Criteria Exceedances
K9-4	Earth Mound Barricade	Remnant Building, location determined from historical r	SB-K9-4-01 through SB-K9-4-03	SB-K9-4-02 SB-K9-4-01	Sampling location SB-K9-4-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-K9-4-01.	No New Jersey Soil Cleanup Criteria Exceedances
L10-1	Unknown	Building demolished, only foundation remains; Probably associated with L09-8210; No evidence of a release (area=100 sq ft). Septic associated with the building.	SB-L10-1-01 through SB-L10-1-03 TP-L10-1A-01	SB-L10-1-02 TP-L10-1A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
L10-4	Unknown	Two foundations associated with L10-2191. No evidence of former buildings. No evidence of a release.	SB-L10-4-01 through SB-L10-4-05	SB-L10-4-05 SB-L10-4-02	Sampling location SB-L10-4-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L10-4-02.	No New Jersey Soil Cleanup Criteria Exceedances
L10-8521	B-Line Substation	Three large transformers with associated insulators; No evidence of a release	SB-L10-8521-01 through SB-L10-8521-03	SB-L10-8521-01 SB-L10-8521-02 SB-L10-8521-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
L9-3	Electrical Transformer	Transformer mounted to telephone pole; Black in color with some gray-green discoloration; No evidence of corrosion or release	SB-L9-3-01	SB-L9-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-34

B-Line Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
L9-79B	Record Storage	Grass and vegetation covered area; Location determined from historical maps; No evidence of a release	SB-L9-79B-01 through SB-L9-79B-03	SB-L9-79B-01 SB-L9-79B-03	Sampling SB-L9-79B-01 location was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-L9-79B-03.	No New Jersey Soil Cleanup Criteria Exceedances
M10-2	Electrical Transformer	Transformer at base of pole; Corroded but intact, possible S.V. at base of pole	SB-M10-2-01	SB-M10-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
M10-4	Stressed Vegetation	Stressed vegetation near location of former toilet; Some foundation debris and brick present; Gray-green color (area=100 sq ft)	SB-M10-4-01 through SB-M10-4-03	SB-M10-4-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
M10-8	Electrical Transformer	Older with black colored housing, some discoloration to gray. No stressed soil below, no evidence of release.	SB-M10-8-01	SB-M10-8-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
M10-B14	Toilet	Building demolished, currently overgrown with vegetation; Location determined from historical maps; Adjacent stressed vegetation	SB-M10-B14-01 through SB-M10-B14-03	SB-M10-B14-01 SB-M10-B14-02	Sampling location SB-M10-B14-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M10-B14-02.	No New Jersey Soil Cleanup Criteria Exceedances
M8-3	Concrete Pad	Cement pad associated with adjacent cabinet dryer. There is some melted aluminum on the pad and an old steam trap. No evidence of a release.	SB-M8-3-01 through SB-M8-3-05	SB-M8-3-01 SB-M8-3-02	Sampling location SB-M8-3-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M8-3-02.	No New Jersey Soil Cleanup Criteria Exceedances
M9-2292	Waste Powder Shed	Building has been completely removed; Location based on historical map and topography; No evidence of a release	SB-M9-2292-01 through SB-M9-2292-03	SB-M9-2292-01 SB-M9-2292-02	Sampling location SB-M9-2292-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-M9-2292-02.	No New Jersey Soil Cleanup Criteria Exceedances
M9-5	Unknown	Concrete footer with cast-in-place metal square in center; No evidence of a release (area=100 sq ft)	SB-M9-5-01 through SB-M9-5-03	SB-M9-5-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
M9-8151	Unknown		SB-M9-8151-01 through SB-M9-8151-03	SB-M9-8151-02 SB-M9-8151-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling A confirmation sample was collected at SB-M09-8151-03.	No New Jersey Soil Cleanup Criteria Exceedances
N9-1	Electrical Transformer	Transformer at base of pole. Intact but possible S.V. at base of pole.	SB-N9-1-01	SB-N9-1-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-34

B-Line Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
N9-3	Former Rocket House	Building has been removed. All that remains is six standing cement footers and two toppled footers. No evidence of release (area=300 sq ft).	SB-N9-3-01 through SB-N9-3-05	SB-N9-3-05 SB-N9-3-04	Sampling location SB-N9-3-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N9-3-04.	No New Jersey Soil Cleanup Criteria Exceedances
N9-B4	Glaze/Screen Scrap Shed	All that remains is a cement foundation; Building once received steam from main steam line; No evidence of a release (area=500 sq ft)	SB-N9-B4-01 through SB-N9-B4-04	SB-N9-B4-04 SB-N9-B4-01	Sampling location SB-N9-B4-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N9-B4-01.	No New Jersey Soil Cleanup Criteria Exceedances
N9-B4-11	Unknown	All that remains is a partial concrete foundation and a slight berm. No evidence of a release.	SB-N9-B4-11-01 through SB-N9-B4-11-05	SB-N9-B4-11-05 SB-N9-B4-11-03	Sampling location was determined using an Expray Test Kit. Group B E&E materials were detected at SB-N9-B4-11-05. A confirmation sample was collected at SB-N9-B4-11-03. Analytical results did not detect E&E concentrations	No New Jersey Soil Cleanup Criteria Exceedances
N9-B41-10	Unknown	Small building adjacent to N09-2195. All that remains is a partial cement foundation and steel siding. No evidence of a release (area=200 sq ft).	SB-N9-B41-10-01 through SB-N9-B41-10-03	SB-N9-B41-10-03 SB-N9-B41-10-01	Sampling location SB-N9-B41-10-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-N9-B41-10-01.	No New Jersey Soil Cleanup Criteria Exceedances
O7-2271/2272	X-Ray/Rest House	Buildings within one earthen covered structure; Entrances on opposite sides; No evidence of a release	SB-O7-2271-01 through SB-O7-2271-04	SB-O7-2271-04 SB-O7-2271-02	Sampling location SB-O7-2271-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O7-2271-02.	No New Jersey Soil Cleanup Criteria Exceedances
O8-2247	Cast Area Pack House	Concrete foundation sided with rusted steel which has discolored adjacent soil. Asbestos steam line enters building on E side. Loading dock in SW corner, loading door in NE.	SB-O8-2247-01 through SB-O8-2247-06	SB-O8-2247-04 SB-O8-2247-05	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
O8-2252	A.C. House	Cement slab used to house an air conditioner, duct evidence; No evidence of release	SB-O8-2252-01 through SB-O8-2252-04	SB-O8-2252-02 SB-O8-2252-01	Sampling location SB-O8-2252-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O8-2252-01.	No New Jersey Soil Cleanup Criteria Exceedances
O8-2268	Container Storage	Building has been completely removed, several footers remain. No evidence of release.	SB-O8-2268-01 through SB-O8-2268-05	SB-O8-2268-05 SB-O8-2268-01	Sampling location SB-O8-2268-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-08-2268-01.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-34

B-Line Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
O8-4	Unknown Foundation	Small cement pad with an unknown use; No evidence of a release (area=300 sq ft)	SB-O8-4-01 through SB-O8-4-03	SB-O8-4-02 SB-O8-4-01	Sampling location SB-O8-4-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-O8-4-01.	No New Jersey Soil Cleanup Criteria Exceedances
O8-5	Septic Tank	Minimal evidence of former septic tank. Location determined from map. No evidence of a release.			Septic Tank could not be located, no evidence of tank exists	No New Jersey Soil Cleanup Criteria Exceedances

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls

TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector

XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot

" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-35

A-Line Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
E10-11	A-Line Acetone Pipeline	Acetone feed to bldg 2169 from A-Line acetone piping; No evidence of release			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
E10-20	Catch Tank Discharge Pipe	A 3" PVC pipe encased in fiberglass pipe runs from E10-2288; A 3" PVC pipe runs from F10-12; Both pipes unite and enter ground; No evidence of release	SB-E10-20-01		No visual evidence of release; For safety reasons, one E&E screening sample was collected per 100 linear feet of pipe. No positive detections were found using an Expray test kit.	No New Jersey Soil Cleanup Criteria Exceedances
E10-2097/2098/2099	Premix House # 1	Wooden construction over concrete block foundation; catch tank to rear-floor drains lead into it; loading area to NW; walkway to 2169; internal controls to separator tank, neutralizer, flush tank.	SB-E10-2097-01 through SB-E10-2097-12	SB-E10-2097-02 SB-E10-2097-07	Sampling location SB-E10-2097-07 was determined using professional judgement. Group B E&E materials were detected at SB-E10-2097-02 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E10-2101C	Unknown	Wooden and steel construction with sheet metal second floor gutter from 2098 enters W corner; stainless steel tank present on first floor W side; No evidence of release	SB-E10-2101C-01 through SB-E10-2101C-05	SB-E10-2101C-01 SB-E10-2101C-05	Sampling location SB-E10-2101C-01 was determined using professional judgement. Group B E&E materials were detected at SB-E10-2101C-05 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E10-2159	Heater House	Wooden construction over concrete foundation; steam pipe enters SE corner; steam pipe vent along W side; minor area, 5' x 5' of reduced vegetation	SB-E10-2159-01 through SB-E10-2159-05	SB-E10-2159-02 SB-E10-2159-05	Group B E&E materials were detected at SB-E9-2159-02 and SB-E9-2159-05 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E10-2160	Heater House	Wooden construction over concrete foundation; area of stressed vegetation on NW side leading to adjacent stream.	SB-E10-2160-01 through SB-E10-2160-05	SB-E10-2160-03 SB-E10-2160-05	Sampling location SB-E10-2160-05 was determined using professional judgement. Group B E&E materials were detected at SB-E10-2160-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E10-2288	Catch Tank House	6' diameter catch tank from E10-2198; gutter collected from floor drains of 2098; gutter leads out to F10-12	SB-E10-2288-01 through SB-E10-2288-05	SB-E10-2288-03 SB-E10-2288-05	Group B E&E materials were detected at SB-E9-2288-03 using an Expray Test Kit A confirmation sample was taken at SB-E10-2288-05. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E10-23	NG Gutters	Two gutters;one flows out of F10-12 and ends just S of the catch tank house; other flows out of 2098 downhill to F10-12; identical path along upper gutter until lower gutter bends just S of Catch Tank House. No evidence of release.			Gutter removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
E10-606	Unknown	Bldg demolished-minimal evidence of former bldg; area currently paved over. No evidence of release (area=100 sq ft).	SB-E10-606-01 through SB-E10-606-03	SB-E10-606-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E10-A1	Breaker Scrap Shed	Bldg demolished -only gravel area remains; No evidence of release (area=100 sq ft)	SB-E10-A1-01 through SB-E10-A1-03	SB-E10-A1-02	Group B E&E materials were detected at SB-E10-A1-02 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E10-PA12	Waste Water Pit	4' diameter wastewater collection sump; fiberglass pipe enters ground on SE side. No evidence of release.	TP-E10-PA12-01	TP-E10-PA12-01	Test Pit location placed downgradient from sump	No New Jersey Soil Cleanup Criteria Exceedances
E9-2296A	Unknown Tank	Probable air receiver tank; tag on tank (1961) lists tank as "formerly spent acid"; air vent on bottom NW side; discolored soil underneath NW side	SB-E9-2296A-01 through SB-E9-2296A-03	SB-E9-2296A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E9-2296B	Slurry Coat Chiller Shed	Recently constructed-wooden shed with asphalt roof built on concrete block; piping removed; No evidence of release (area=100 sq ft)	SB-E9-2296B-01 through SB-E9-2296B-04	SB-E9-2296B-03 SB-E9-2296B-04	Sampling location SB-E9-2296B-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-E9-2296B-04	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-35

A-Line Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
E9-2296C	Recycling Tank	Concrete pad formerly held a recycling tank; tank removed; Former connections to 2" steel pipes evident No evidence of release	SB-E9-2296C-01 through SB-E9-2296C-04	SB-E9-2296C-01	Group B E&E materials were detected at SB-E9-2296C-01 using an Expray Test Kit SVOCs were not analyzed but should have been. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E9-2296D	Control House	Concrete bldg; conduit leads away to bldg 2337, slurry coat house; No evidence of release	SB-E9-2296D-01 through SB-E9-2296D-04	SB-E9-2296D-01 SB-E9-2296D-03	Group B E&E materials were detected at SB-E9-2296D-01 using an Expray Test Kit. A confirmation sample was collected at SB-E9-2296D-03. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E9-556	Cotton Blend	Bldg demolished-only concrete foundation remains; No evidence of release (area=300 sq ft)	SB-E9-556-01 through SB-E9-556-04	SB-E9-556-04	Group B E&E materials were detected at SB-E9-556-04 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E9-560	Block Breaker	Bldg demolished; E corner foundation evident; No evidence of release (area=100 sq ft)	SB-E9-560-01 through SB-E9-560-03	SB-E9-560-03	Group B E&E materials were detected at SB-E9-560-03 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
E9-6	Control House	Recent construction-aluminum siding over wood with concrete foundation; electrical controls present inside; transformer pair on SW side. No evidence of a release.	SB-E9-6-01 through SB-E9-6-04	SB-E9-6-01 SB-E9-6-03 SB-E9-6-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
E9-A7	Cont. Dryer Scrap Shed	Bldg demolished; former evidence removed; No evidence of a release (area=100 sq ft)	SB-E9-A7-01 through SB-E9-A7-03	SB-E9-A7-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F08-7	Unknown Name	Unknown pit or culvert; Steel plate over sandy sides-no concrete block present; No evidence of release			Pit determined to be hydraulic access pit, no evidence of release, therefore no samples taken	No New Jersey Soil Cleanup Criteria Exceedances
F10-18	Alcohol/Acetone Feed Line	Runs along A Line; dual feeds which lead to bldgs from two tank storage areas: F10-9116/G9-9107 No evidence of release			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
F10-21	Concrete Sumps	Concrete sump with float switch, electrical alternator; piping leads from pumps into ground at W corner No evidence of release	SB-F10-21-01	SB-F10-21-01	Test Pit loacation was placed downgradient from the sump	No New Jersey Soil Cleanup Criteria Exceedances
F10-2162	Caustic Storage	Small corrugated sheet metal and wooden construction over concrete foundation; indicated on front as caustic-strong alcohol	SB-F10-2162-01 through SB-F10-2162-04	SB-F10-2162-04 SB-F10-2162-02	Sampling location SB-F10-2162-04 was determined using XRF screening; Results indicated an lead concentration of 1442 ppm. A confirmation sample was collected at SB-F10-2162-02. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
F10-2289	Catch Tank House	Corrugated sheet metal and wood construction over concrete foundation; gutter from 2101; No evidence of release	SB-F10-2289-01 through SB-F10-2289-04	SB-F10-2289-01	Group B E&E materials were detected at SB-F10-2289-01 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
F10-2356	NC Block Breaker	Concrete constructed breaker house-concrete floors and walls; Two associated control houses with >7 lines of conduit running from each bldg; floor drains drain to sump at SW loading area; No evidence of a release	SB-F10-2356-01 through SB-F10-2356-12	SB-F10-2356-04 SB-F10-2356-06 SB-F10-2356-07 TP-F10-2356-12	Sampling location SB-F10-2356-04 determined using professional judgement; Group B E&E materials were detected at SB-F10-2356-06/07 using and Expray Test Kit. Test Pit location downgradient from sump. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
F10-2356A	NC Block Breaker Control Room	Control Room associated with Block Breaker House; Location determined from historical maps			This AOC has been sampled as part of F10-2356	No New Jersey Soil Cleanup Criteria Exceedances
F10-4	Waste Water Pit	Recently installed concrete block culverts with 12" corrugated pipe storm drains; connects path from PA6 to PA9; water becomes orange-red downstream of former tank storage area.			Pit to be sampled during surface water and sediment sampling phase	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-35

A-Line Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
F10-462	Dehydration House	Bldg demolished-evidence largely destroyed; No evidence of release (area=100 sq ft)	SB-F10-462-01 through SB-F10-462-03	SB-F10-462-01	Group B E&E materials were detected at SB-F10-462-01 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
F10-464	Dehydration House	Bldg demolished-only concrete foundation remains; 2 -3" diameter pipes extend into foundation at SW corner. No evidence of release.	SB-F10-464-01 through SB-F10-464-05	SB-F10-464-01 SB-F10-464-05	Group B E&E materials were detected at SB-F10-464-01/05 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
F10-5	Solvent Recovery Air Dryer Shed	Currently empty; wooden construction; 1" pipe enters E side exits on W. No evidence of a release.	SB-F10-5-01 through SB-F10-5-03	SB-F10-5-01	Group B E&E materials were detected at SB-F10-5-01 using an Expray Test Kit. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
F10-8	Control House	Small wooden house over concrete foundation; >15 conduit lines lead in from 2356; small empty wooden shed on SE side. No evidence of release.	SB-F10-8-01 through SB-F10-8-04	SB-F10-8-01 SB-F10-8-04	Sampling location SB-F10-8-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-F10-8-04	No New Jersey Soil Cleanup Criteria Exceedances
F10-8274	Pump House	Bldg demolished-concrete pad and associated piping remains; small catch cylinder present on S side No evidence of release	SB-F10-8274-01 through SB-F10-8274-04	SB-F10-8274-02 SB-F10-8274-04	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F10-8564	Chlorinator House # 3	Concrete block construction; chlorine feed line from adjacent F10-8569. No evidence of release.	SB-F10-8564-01 through SB-F10-8564-04	SB-F10-8564-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F10-8569	Chlorinator Feed House	Wooden storage shed; chlorinator feed to 8564; one of four tanks indicated as leaking.	SB-F10-8569-01 through SB-F10-8569-04	SB-F10-8569-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F10-9	Transformer	Black housing with some brown discoloration towards the bottom. No evidence of release.	SB-F10-9-01	SB-F10-9-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F10-PA9	Waste Water Pit	Collection sump; 6" stainless pipe enters from PA8; fiberglass pipe exits-enters adjacent culvert; float switches, pumps present			Test Pit location placed between F10-PA8 and F10-PA9. Sampled as F10-PA8	No New Jersey Soil Cleanup Criteria Exceedances
F8-1	Unknown	Bldg demolished; corners of foundation evident the rest covered by soil; 4" pipe into ground at S corner. No evidence of release.	SB-F8-1-01 through SB-F8-1-06	SB-F8-1-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F8-11	Process Water/Slurry Lines	Stainless steel process water lines; labeled "slurry lines" from E9-2296 to E9-2338 and "process lines" from E9-2338 to F8-2107 Discharged to a catch box.			Pipeline removed, no evidence of release, therefore no samples were collected	No New Jersey Soil Cleanup Criteria Exceedances
F8-2	Unknown	Bldg. demolished; old concrete foundations evident in S and E; remainder covered by soil; sheet metal debris present possibly due to adjacent F8-2117	SB-F8-2-01 through SB-F8-2-05	SB-F8-2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F8-2151	Heater House	Wooden and corrugated steel covering over concrete foundation; large footers inside for supporting mechanical equipment; stressed vegetation to NE and E of bldg	SB-F8-2151-01 through SB-F8-2151-06	SB-F8-2151-01 SB-F8-2151-06	Sampling location SB-F8-2151-06 was determined using professional judgement; Sampling location SB-F8-2151-01 was determined using XRF screening; Results indicated a copper concentration of 1,235 ppm at SB-F8-2151-01. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
F8-2208	Mix House # 2	Corrugated metal house overlain by soil; concrete gutter in front leads to adjacent 8562 A; large berm to W; No evidence of release	SB-F8-2208-01 through SB-F8-2208-04	SB-F8-2208-01 SB-F8-2208-03	Sampling locations were determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-35

A-Line Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
F8-3	Stressed Vegetation	Pile of green anti-static material; no vegetation present (area=100 sq ft)	SB-F8-3-01 through SB-F8-3-03	SB-F8-3-01	Sampling location SB-F8-3-01 was determined using XRF screening; Results indicated a copper concentration of 622 ppm at SB-F8-3-01. Analytical results did not detect elevated metal concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
F8-4	Unknown Foundations	Concrete pads; W pad has cast-in-place rebar. Bldgs demolished. No evidence of release (area=200 sq ft).	SB-F8-4-01 through SB-F8-4-03	SB-F8-4-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F8-5	Transformer	Dark gray colored transformer; housing-slight discoloration, minor staining on soil/stone beneath; No evidence of release	SB-F8-5-01	SB-F8-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F8-567	Final Mix House	Bldg demolished; concrete rubble at N end; No evidence of release	SB-F8-567-01 through SB-F8-567-05	SB-F8-567-05	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F8-8	Transformer	Mounted to telephone pole; gray discoloration on black housing; No evidence of release in soil beneath	SB-F8-8-01	SB-F8-8-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F8-8562A	C-Line Sump	Concrete sump with wooden shed built over top; currently filled with water. No evidence of a release.	TP-F8-8562A-01	TP-F8-8562A-01	Test Pit location was placed downgradient from the Pit.	No New Jersey Soil Cleanup Criteria Exceedances
F8-A5	Mix House Scrap Shed	Bldg demolished-evidence of shed largely removed; No evidence of release (area=100 sq ft)	SB-F8-A5-01 through SB-F8-A5-03	SB-F8-A5-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F8-A9	Scrap Shed	Clearly defined area of aggregate where bldg formerly stood. Bldg demolished. No evidence of a release (area=100 sq ft).	SB-F8-A9-01 through SB-F8-A9-03	SB-F8-A9-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F8-PA1/PA2	Waste Water Pit	Concrete culvert with 4" outlet pipe on SE side; Unable to view circular structure; No evidence of release	TP-F8-PA1/PA2-01	TP-F8-PA1/PA2-01	Test Pit location was placed downgradient from the Pit.	No New Jersey Soil Cleanup Criteria Exceedances
F9-2104	Premix Rest House	Wooden and corrugated sheet metal construction; steam pipe enters E corner; drum of potassium sulfate inside; No evidence of release	SB-F9-2104-01 through SB-F9-2104-06	SB-F9-2104-03	Group B E&E materials were detected at SB-F9-2104-03 using an Expray Test Kit	No New Jersey Soil Cleanup Criteria Exceedances
F9-2276	Control House	Steel walls on front and cylindrical structures on SE corners; corrugated sheet metal "bunkers" overlain by soil; No evidence of a release	SB-F9-2276-01 through SB-F9-2276-03	SB-F9-2276-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F9-2279	Air Compressor/Dryer House	Sheet metal and fiberglass over wood; air compressor/dryer evident in fiberglass enclosed SW half of structure; No evidence of release	SB-F9-2279-01 through SB-F9-2279-04	SB-F9-2279-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F9-3	Transformer	Gray colored transformer housing; minor area of dark-brown to red discolored soil at base of telephone pole. Transformer housing appears intact	SB-F9-3-01	SB-F9-3-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F9-4	Alcohol Tanks	Tanks/tank cradles removed; No evidence of a release	SB-F9-4-01 through SB-F9-4-03	SB-F9-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-35

A-Line Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
F9-558A	Dehydrator	Bldg demolished-minimal evidence of former bldg; No evidence of release (area=500 sq ft)	SB-F9-558A-01 through SB-F9-558A-04	SB-F9-558A-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F9-7	Unknown Concrete Pad	Recently constructed concrete pad with pressure valves, pressure indicator and 1" piping; possible former tank present; possibly not completed or barely used. No evidence of release.	SB-F9-7-01 through SB-F9-7-04	SB-F9-7-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F9-A10	Press House Scrap Shed	Bldg demolished; No evidence of release (area=100 sq ft)	SB-F9-A10-01 through SB-F9-A10-03	SB-F9-A10-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F9-A3	New Premix Scrap Shed	Bldg demolished-minimal evidence of former shed; No evidence of release (area=100 sq ft)	SB-F9-A3-01 through SB-F9-A3-03	SB-F9-A3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
F9-PA3	Collection Pit	Culvert leads in from A1/A2 and out to A4; feed in from 2106; No evidence of release			This AOC has not yet been sampled	No New Jersey Soil Cleanup Criteria Exceedances
F9-PA5	Waste Water Pit	4' x 4' concrete block box; collection from N and W; drainage to PA6; No evidence of release	TP-F9-PA5-01	TP-F9-PA5-01	Test Pit location was placed downgradient from the Pit.	No New Jersey Soil Cleanup Criteria Exceedances
G7-2	Unknown	Bldg demolished; largely vegetated somewhat wooded area; debris present-wood, concrete, steel, 1" diameter pipe; area cut out of hill. No evidence of release.	SB-G7-2-01 through SB-G7-2-05	SB-G7-2-04 SB-G7-2-01	Sampling location SB-G7-2-04 was determined using XRF screening Results indicated a lead concentration of 638 ppm. A confirmation sample was collected at SB-G07-2-01	No New Jersey Soil Cleanup Criteria Exceedances
G8-2148	Unknown	Bldg demolished-evidence of former bldg removed; No evidence of release (area=100 sq ft)	SB-G8-2148-01 through SB-G8-2148-03	SB-G8-2148-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
G8-2204	AP Pulverizer	Bldg demolished; rebar present indicates location of former berm. No evidence of release.	SB-G8-2204-01 through SB-G8-2204-05	SB-G8-2204-05 SB-G8-2204-03	Sampling location SB-G8-2204-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G8-2204-03	No New Jersey Soil Cleanup Criteria Exceedances
G8-2260	Unknown	Bldg demolished-evidence largely removed; No evidence of release (area=100 sq ft)	SB-G8-2260-01 through SB-G8-2260-03	SB-G8-2260-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
G8-5	A-Line Substation	A-Line/Finishing Area substation. Switches listed for each area; minimal vegetation present within fence area.	SB-G8-5-01 through SB-G8-5-04	SB-G8-5-01 SB-G8-5-02	Sampling location SB-G8-5-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-G8-5-02	No New Jersey Soil Cleanup Criteria Exceedances
G8-8562	C-Line Sumps	Concrete sump with wooden shed over top; currently filled with water. No evidence of release.	TP-G8-8562-01	TP-G8-8562-01	Test Pit location was placed downgradient from sump	No New Jersey Soil Cleanup Criteria Exceedances
G8-C3	C-Line Scrap Shed	Bldg demolished-minimal evidence of shed; No evidence of release (area=100 sq ft)	SB-G8-C3-01 through SB-G8-C3-03	SB-G8-C3-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
G8-F7	Dry House 1 & 2 Scrap Shed	Bldg demolished-evidence largely removed; No evidence of release (area=100 sq ft)	SB-G8-F7-01 through SB-G8-F7-03	SB-G8-F7-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-35

Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sampling IDs	Analytical Sampling IDs	Sampling Selection Justification	Unrestricted Use Exceedances
G9-14	Transformer	Black housing with minor weathering and discoloration evident; No staining at base of pole. No evidence of release.	SB-G9-14-01	SB-G9-14-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Abbreviations:
AOC = Area of Concern
VOCs = Volatile Organic Compounds
SVOCs = Semi-Volatile Organic Compounds
E&E = Explosives and Energetics
PCBs = Polychlorinated Biphenyls
TNT = 2,4,6-Trinitrotoluene
NG = Nitroglycerin
NC = Nitrocellulose
PETN = Pentaerythritol Tetrnitrate
PID = Photoionization Detector
FID = Flame-Ionization Detector
XRF = X-ray Fluorescence
PPM = Parts Per Million
Bldg = Building
WWTP = Wastewater Treatment Plant
AST = Aboveground Storage Tank
EQ = Equilization Tank
RR = Railroad
Sq Ft = Square Foot
" = Inch
= Foot
HVAC = Heating Ventilation and Air Conditioning
AC = Air Conditioning
PVC = Polyvinyl Chloride
SS = Stainless Steel
SV = Stressed Vegetation
Gal = Gallon

Group A explosives include TNT, TNB, Picric Acid and Comp B
Group B explosives include RDX, PETN, dynamite, SEMTEXT, nitrocellulose and nitroglycerin
Group C explosives include those containing nitrates such as ANFO and black powder

Table 5-36

Finishing Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
H7-2172A	Heater House	Wooden structure on concrete foundation; asbestos-covered vent on W side; steam drain on NW corner	SB-H7-2172A-01 through SB-H7-2172A-05	SB-H7-2172A-03 SB-H7-2172A-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H7-642B	Unknown	Bldg demolished; no evidence of its existence except some unleveled ground. No evidence of a release (area =100 sq ft).	SB-H7-642B-01 through SB-H7-642B-03	SB-H7-642B-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H8-2171	PETN Lactose Dryer	Wood and ceramic structure; foundation larger than bldg. Floor drain with old foundation to NW corner and pipe into ground off of foundation to NW; loading door to E and two potential loading doors to the S; duct from heater house to the N; surrounded by a berm; No evidence of a release	SB-H8-2171-01 through SB-H8-2171-06	SB-H8-2171-01 SB-H8-2171-03 SB-H8-2171-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
H8-2291	PETN Lactose Dryer Heater House	Wooden bldg. on a concrete foundation; Drain in SW corner that has stained the ground brown; Duct from W corner to PETN lactose dryer; Lab and dryer bldgs. are within a berm	SB-H8-2291-01 through SB-H8-2291-04	SB-H8-2291-02 SB-H8-2291-04	Sampling location SB-H8-2291-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H8-2291-04.	No New Jersey Soil Cleanup Criteria Exceedances
H8-558	Blender House	Bldg. Demolished-no evidence of existence	SB-H8-558-01 through SB-H8-558-05	SB-H8-558-03 SB-H8-558-04	Sampling location SB-H8-558-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-H8-558-04.	No New Jersey Soil Cleanup Criteria Exceedances
H8-564	Rest House	Bldg. Demolished and area regraded; No evidence of a release (area=100 sq ft)	SB-H8-564-01 through SB-H8-564-03	SB-H8-564-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I10-1	Heater House	Three concrete footers with protruding rebar adjacent to I10-550; largely vegetated area. No evidence of a release (area=100 sq ft).	SB-I10-1-01 through SB-I10-1-03	SB-I10-1-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I10-2121	Dry House	Vegetation present; No evidence of a release (area=100 sq ft)	SB-I10-2121-01 through SB-I10-2121-03	SB-I10-2121-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-36

Finishing Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I10-2122	Dry House	Bldg demolished; only concrete foundation remains; minor amounts of sheet metal, wood, rebar; old steam pipe. Minor evidence of a release- green concrete covered at SE corner (area=100 sq ft).	SB-I10-2122-01 through SB-I10-2122-03	SB-I10-2122-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I10-2155	Dry House	Only vegetation present; No evidence of a release	SB-I10-2155-01 through SB-I10-2155-03	SB-I10-2155-02 SB-I10-2155-03	Sampling location was determined using an Expray Test Kit; Group B E&E materials were detected at SB-I10-2155-02. A confirmation sample was collected at SB-I10-2155-03. Analytical results did not detect elevated E&E concentrations.	No New Jersey Soil Cleanup Criteria Exceedances
I10-2156	Dry House	Vegetated area; No evidence of a release (area=100 sq ft)	SB-I10-2156-01 through SB-I10-2156-03	SB-I10-2156-03	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I7-12	Transformer	Telephone pole mounted; looks intact; No evidence of a release	SB-I7-12-01	SB-I7-12-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I7-13	Electric Transformers	Two electric transformers on a telephone pole; transformers intact. No evidence of a release.	SB-I7-13-01 through SB-I7-13-02	SB-I7-13-01 SB-I7-13-02	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I7-2124A	Rest House	Wooden structure on concrete foundation; berm on the E and W. Loading area on NE corner. No evidence of a release.	SB-I7-2124A-01 through SB-I7-2124A-05	SB-I7-2124A-03 SB-I7-2124A-05	Sampling locations were determined using professional judgement. Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I7-4	Unknown	Bldg. Demolished; No evidence of a release (area=100 sq ft)	SB-I7-4-01 through SB-I7-4-03	SB-I7-4-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I7-567	Rest House	Bldg demolished; only broken foundations remain and old scrap metal. No evidence of a release.	SB-I7-567-01 through SB-I7-567-05	SB-I7-567-01 SB-I7-567-02	Sampling location SB-I7-567-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I7-567-02.	No New Jersey Soil Cleanup Criteria Exceedances
I8-2299	Glaze House	Mostly vegetated; some concrete rubble present; No evidence of release	SB-I8-2299-01 through SB-I8-2299-05	SB-I8-2299-05 SB-I8-2299-03	Sampling location SB-I9-2299-05 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-2299-03.	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-36

Finishing Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I8-2332	Unknown	Steel earth covered bldg. Associated with I8-2328; use unknown. No evidence of a release.	SB-I8-2332-01 through SB-I8-2332-03	SB-I8-2332-02 SB-I8-2332-01	Sampling location SB-I8-2332-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-2332-01.	No New Jersey Soil Cleanup Criteria Exceedances
I8-2405A	Ribbon Blender Rotoclone Room	Building associated with with 2405, Ribbon Blender Location determined from historic maps	SB-I8-2405A-01 through SB-I8-2405A-04	SB-I8-2405A-02 SB-I8-2405A-01	Sampling location SB-I8-2405A-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-2405A-01.	No New Jersey Soil Cleanup Criteria Exceedances
I8-2409	Ribbon Blender Control Room	Control house-conduit enters corrugated steel cylindrical bldg. from S side. No evidence of release.	SB-I8-2409-01 through SB-I8-2409-04	SB-I8-2409-01 SB-I8-2409-04	Sampling location SB-I8-2409-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-2409-04.	No New Jersey Soil Cleanup Criteria Exceedances
I8-525	Unknown	Mostly vegetated-evidence of former bldg removed; No evidence of release	SB-I8-525-01 through SB-I8-525-04	SB-I8-525-03 SB-I8-525-04	Sampling location SB-I8-525-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-525-04.	No New Jersey Soil Cleanup Criteria Exceedances
I8-560	Blender	Bldg. demolished; sparse evidence available; Several pieces of wood and one piece of scrap metal	SB-I8-560-01 through SB-I8-560-05	SB-I8-560-03 SB-I8-560-01	Sampling location SB-I8-560-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I8-560-01.	No New Jersey Soil Cleanup Criteria Exceedances
I8-F2	Glaze Barrel Scrap Shed	Bldg demolished; No evidence of release (area=100 sq ft)	SB-I8-F2-01 through SB-I8-F2-03	SB-I8-F2-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I9-2329	Unknown	New bldg built in location of former dry house; multiple loading areas; catch tank; concrete and wood construction. No evidence of a release. Sump associated with the building.	SB-I9-2329-01 through SB-I9-2329-06 TP-I9-2329-07	SB-I9-2329-04 SB-I9-2329-05 SB-I9-2329-06 TP-I9-2329-07	Sampling locations SB-I9-2329-04/06 were determined using professional judgement; Sampling location SB-I9-2329-05 was determined using XRF screening. Results indicated a lead concentration of 1,311 ppm at SB-I9-2329-05. Test Pit location placed downgradient of the sump.	No New Jersey Soil Cleanup Criteria Exceedances

Finishing Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
I9-2329A	Unknown	Wooden construction over concrete foundation. Possible storage for 2112; possible electric control house; grinders indicated on conduit. No evidence of a release.	SB-I9-2329A-01 through SB-I9-2329A-04	SB-I9-2329A-01 SB-I9-2329A-04	Sampling location SB-I9-2329A-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-2329A-04.	No New Jersey Soil Cleanup Criteria Exceedances
I9-3	Debris Area	Miscellaneous debris which may have been decontaminated at 2311; pumps, section of PVC cable, electrical insulators, wire mesh screens, catch tanks, process equipment, mixing tanks, electrical induction motors, wooden cable spools (area=5,600 sq ft).	SB-I09-3-01 through SB-I09-3-13	SB-I9-3-01 SB-I9-3-03 SB-I9-3-05 SB-I9-3-07 SB-I9-3-09 SB-I9-3-11 SB-I9-3-13	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I9-5	Rest House	Largely vegetation and disturbed soil; berm on E side; foundation and bldg demolished. No evidence of release.	SB-I9-5-01 through SB-I9-5-05	SB-I9-5-01 SB-I9-5-05	Sampling location SB-I9-5-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-5-05.	No New Jersey Soil Cleanup Criteria Exceedances
I9-515	Spent Acid Recovery	Bldg demolished; pine grove planted in former location; No evidence of a release	SB-I9-515-01 through SB-I9-515-05	SB-I9-515-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
I9-516	Unknown	Mostly vegetation, minor amounts of rubble, sheet metal present. No evidence of a release.	SB-I9-516-01 through SB-I9-516-05	SB-I9-516-04 SB-I9-516-02	Sampling location SB-I9-516-04 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-516-02.	No New Jersey Soil Cleanup Criteria Exceedances
I9-520	Unknown	Mostly vegetation, minor amounts of rubble present, two concrete footers. No evidence of a release.	SB-I9-520-01 through SB-I9-520-05	SB-I9-520-03 SB-I9-520-05	Sampling location SB-I9-520-03 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-I9-520-05.	No New Jersey Soil Cleanup Criteria Exceedances
J7-2281B	Heater House for J7-2281	Wooden structure on a concrete foundation; multiple electric conduits and a vent pipe to J7-2281; stream drain in SW corner;potential stressed vegetation immediately W of the door.	SB-J7-2281B-01 through SB-J7-2281B-05	SB-J7-2281B-01 SB-J7-2281B-03 SB-J7-2281B-05	Sampling locations SB-J7-2281B-01/05 were determined using professional judgement; Screening results did not warrant biased sampling; Sampling location SB-J7-2281B-03 was determined using an Expray Test Kit. Group B E&E materials were detected at SB-J7-2281B-03. Analytical results did not detect elevated E&E concentrations	No New Jersey Soil Cleanup Criteria Exceedances

Table 5-36

Finishing Area NFA Justification
Phase I - Site Investigation
Kenvil Works Facility, New Jersey

AOC Designation	Name	Description	Screening Sample IDs	Analytical Sample IDs	Sample Selection Justification	Unrestricted Use Exceedances
J7-2282	Blender/Packer	Earth covered with thick steel door; rain pipe on SW corner feeds to a 12" diameter corrugated pipe to a ditch for graphite pond. No evidence of a release except for the discharge pipe.	SB-J7-2282-01 through SB-J7-2282-06	SB-J7-2282-03 SB-J7-2282-06	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J7-5	Transformer	1,000 kV to 35 kV substation; recent construction; new insulators; No evidence of a release	SB-J7-5-01	SB-J7-5-01	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J7-8240	Store House	Bldg. demolished - only two concrete footers remain (area=800 sq ft)	SB-J7-8240-01 through SB-J7-8240-04	SB-J7-8240-02 SB-J7-8240-01	Sampling location SB-J7-8240-02 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J7-8240-01.	No New Jersey Soil Cleanup Criteria Exceedances
J7-F1	Main Shaker Scrap Shed	Bldg. demolished with no evidence of its existence; center estimated. No evidence of a release.	SB-J7-F1-01 through SB-J7-F1-03	SB-J7-F1-01 SB-J7-F1-02	Sampling location SB-J7-F1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J7-F1-02.	No New Jersey Soil Cleanup Criteria Exceedances
J8-1	Canister Shipping	Wooden construction on concrete footers. Rail and truck loading areas. No evidence of a release.	SB-J8-1-01 through SB-J8-1-05	SB-J8-1-01 SB-J8-1-02	Sampling location SB-J8-1-01 was determined using professional judgement; Screening results did not warrant biased sampling. A confirmation sample was collected at SB-J8-1-02.	No New Jersey Soil Cleanup Criteria Exceedances
J8-2	Transformers	Mounted to telephone pole; not discolored; No evidence of release	SB-J8-2-01 through SB-J8-2-02	SB-J8-2-01 SB-J8-2-02	Sampling locations were determined using professional judgement; Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
J8-2339	Glaze House # 3 Rotoclone	Bldg demolished-little evidence of its existence; No evidence of release (area=100 sq ft)	SB-J8-2339-01 through SB-J8-2339-03	SB-J8-2339-02	Sampling location was determined using professional judgement Screening results did not warrant biased sampling	No New Jersey Soil Cleanup Criteria Exceedances
