11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols
" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels
ESB = Ecological Screening Benchmarks

Kennedy Jenks

11 Detected concentr

Abbreviations and Symbols
" - -" denotes not measured, i
" < " denotes not detected at
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels
ESB = Ecological Screening

Abbreviations and Symbols
" - -" denotes not measured, i
" < " denotes not detected at
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels
ESB = Ecological Screening

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols

" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels

ESB = Ecological Screening Benchmarks

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols
" **-**" denotes not measured, not available, or not applicable.
" **<** " denotes not detected at or above the indicated method reporting limit.
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels
ESB = Ecological Screening Benchmarks

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols

" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
"J" indicates an estimated concentration based on either the being less than the laboratory reporting limit or data validation findings.
deg c = degrees Celsius
mg/l = milligrams per liter
ntu = nephelometric turbidity units
SU = standard units
µg/L = micrograms per liter
µS/cm = microsiemens per centimeter

Action Levels

ESB = Ecological Screening Benchmarks

11 Detected concentr

Abbreviations and Symbols
" - -" denotes not measured, r
" < " denotes not detected at
"J" indicates an estimated co
deg c = degrees Celsius
mg/l = milligrams per liter
ntu = nephelometric turbidity
SU = standard units
µg/L = micrograms per liter
µS/cm = microsiemens per ce

Action Levels
ESB = Ecological Screening

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols

" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
"J" indicates an estimated concentration based on either the being less than the laboratory reporting limit or data validation findings.
deg c = degrees Celsius
mg/l = milligrams per liter
ntu = nephelometric turbidity units
SU = standard units
µg/L = micrograms per liter
µS/cm = microsiemens per centimeter

Action Levels

ESB = Ecological Screening Benchmarks

11 Detected concentr

Abbreviations and Symbols

" - -" denotes not measured, r
" < " denotes not detected at
"J" indicates an estimated co
deg c = degrees Celsius
mg/l = milligrams per liter
ntu = nephelometric turbidity
SU = standard units
µg/L = micrograms per liter
µS/cm = microsiemens per ce

Action Levels

ESB = Ecological Screening

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols
" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter
Action Levels
ESB = Ecological Screening Benchmarks

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols
" **- -**" denotes not measured, not available, or not applicable.
" **<** " denotes not detected at or above the indicated method reporting limit.
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels
ESB = Ecological Screening Benchmarks

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols

" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
"J" indicates an estimated concentration based on either the being less than the laboratory reporting limit or data validation findings.
deg c = degrees Celsius
mg/l = milligrams per liter
ntu = nephelometric turbidity units
SU = standard units
µg/L = micrograms per liter
µS/cm = microsiemens per centimeter

Action Levels

ESB = Ecological Screening Benchmarks

11 Detected concenti

Abbreviations and Symbols

" - -" denotes not measured,
" < " denotes not detected at
"J" indicates an estimated co
deg c = degrees Celsius
mg/l = milligrams per liter
ntu = nephelometric turbidity
SU = standard units
µg/L = micrograms per liter
µS/cm = microsiemens per c

Action Levels

ESB = Ecological Screening

Abbreviations and Symbols
" - -" denotes not measured,
" < " denotes not detected at
"J" indicates an estimated co
deg c = degrees Celsius
mg/l = milligrams per liter
ntu = nephelometric turbidity
SU = standard units
µg/L = micrograms per liter
µS/cm = microsiemens per c

Action Levels
ESB = Ecological Screening

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols

" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
"J" indicates an estimated concentration based on either the being less than the laboratory reporting limit or data validation findings.
deg c = degrees Celsius
mg/l = milligrams per liter
ntu = nephelometric turbidity units
SU = standard units
µg/L = micrograms per liter
µS/cm = microsiemens per centimeter

Action Levels

ESB = Ecological Screening Benchmarks

11 Detected concentr

Abbreviations and Symbols

" - -" denotes not measured, r
" < " denotes not detected at
"J" indicates an estimated co
deg c = degrees Celsius
mg/l = milligrams per liter
ntu = nephelometric turbidity
SU = standard units
µg/L = micrograms per liter
µS/cm = microsiemens per c

Action Levels

ESB = Ecological Screening

11 Detected concentr

Abbreviations and Symbols

" - -" denotes not measured, r
" < " denotes not detected at
"J" indicates an estimated co
deg c = degrees Celsius
mg/l = milligrams per liter
ntu = nephelometric turbidity
SU = standard units
µg/L = micrograms per liter
µS/cm = microsiemens per ce

Action Levels

ESB = Ecological Screening

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols
" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
"J" indicates an estimated concentration based on either the being less than the laboratory reporting limit or data validation findings.
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels
ESB = Ecological Screening Benchmarks

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols

" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
"J" indicates an estimated concentration based on either the being less than the laboratory reporting limit or data validation findings.
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels

ESB = Ecological Screening Benchmarks

11 Detected concentr

Abbreviations and Symbols
" - -" denotes not measured, i
" < " denotes not detected at
"J" indicates an estimated co
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels
ESB = Ecological Screening

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols
" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
"J" indicates an estimated concentration based on either the being less than the laboratory reporting limit or data validation findings.
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels
ESB = Ecological Screening Benchmarks

11 Detected concentrations above the screening level are shaded

Abbreviations and Symbols

" - -" denotes not measured, not available, or not applicable.
" < " denotes not detected at or above the indicated method reporting limit.
"J" indicates an estimated concentration based on either the being less than the laboratory reporting limit or data validation findings.
mg/l = milligrams per liter
SU = standard units
µg/L = micrograms per liter

Action Levels

ESB = Ecological Screening Benchmarks

Gamma GOF Tests on Detected Observations Only

A-D Test Statistic	12.11	**Anderson-Darling GOF Test**
5% A-D Critical Value	0.853	Detected Data Not Gamma Distributed at 5% Significance Level
K-S Test Statistic	0.251	**Kolmogorov-Smirnov GOF**
5% K-S Critical Value	0.0955	Detected Data Not Gamma Distributed at 5% Significance Level

Detected Data Not Gamma Distributed at 5% Significance Level

Gamma Statistics on Detected Data Only

k hat (MLE)	0.36	k star (bias corrected MLE)	0.356
Theta hat (MLE)	14975	Theta star (bias corrected MLE)	15144
nu hat (MLE)	74.17	nu star (bias corrected)	73.34
Mean (detects)	5392		

Gamma ROS Statistics using Imputed Non-Detects

GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs

GROS may not be used when kstar of detects is small such as <1.0, especially when the sample size is small (e.g., <15-20)

For such situations, GROS method may yield incorrect values of UCLs and BTVs

This is especially true when the sample size is small.

For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates

Minimum	0.01	Mean	724
Maximum	350000	Median	0.01
SD	12713	CV	17.56
k hat (MLE)	0.0856	k star (bias corrected MLE)	0.0861
Theta hat (MLE)	8457	Theta star (bias corrected MLE)	8405
nu hat (MLE)	131.3	nu star (bias corrected)	132.1
Adjusted Level of Significance (β)	0.0497		
Approximate Chi Square Value (132.15, α)	106.6	Adjusted Chi Square Value (132.15, β)	106.5

UCL Statistics for Data Sets with Non-Detects

User Selected Options	
Date/Time of Computation	ProUCL 5.2 7/28/2025 11:17:21 AM
From File	sediment_duck pond
Full Precision	OFF
Confidence Coefficient	95%
Number of Bootstrap Operations	2000

RDX (Cyclonite)

General Statistics

Total Number of Observations	45	Number of Distinct Observations	34
		Number of Missing Observations	19
Number of Detects	1	Number of Non-Detects	44
Number of Distinct Detects	1	Number of Distinct Non-Detects	33

Warning: Only one distinct data value was detected! ProUCL (or any other software) should not be used on such a data set!

It is suggested to use alternative site specific values determined by the Project Team to estimate environmental parameters (e.g., EPC, BTV).

The data set for variable RDX (Cyclonite) was not processed!

Arsenic

Gamma ROS Statistics using Imputed Non-Detects

68	GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs											
69	GROS may not be used when kstar of detects is small such as <1.0, especially when the sample size is small (e.g., <15-20)											
70	For such situations, GROS method may yield incorrect values of UCLs and BTVs											
71	This is especially true when the sample size is small.											
72	For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates

721	**Gamma ROS Statistics using Imputed Non-Detects**											
722	GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs											
723	GROS may not be used when kstar of detects is small such as <1.0, especially when the sample size is small (e.g., <15-20)											
724	For such situations, GROS method may yield incorrect values of UCLs and BTVs											
725	This is especially true when the sample size is small.											
726	For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates

UCL Statistics for Data Sets with Non-Detects

User Selected Options	
Date/Time of Computation	ProUCL 5.2 7/28/2025 11:44:22 AM
From File	sediment_eastern tributary
Full Precision	OFF
Confidence Coefficient	95%
Number of Bootstrap Operations	2000

2,4,6-Trinitrotoluene

General Statistics

Total Number of Observations	8	Number of Distinct Observations	7
		Number of Missing Observations	10
Number of Detects	1	Number of Non-Detects	7
Number of Distinct Detects	1	Number of Distinct Non-Detects	6

Warning: Only one distinct data value was detected! ProUCL (or any other software) should not be used on such a data set!

It is suggested to use alternative site specific values determined by the Project Team to estimate environmental parameters (e.g., EPC, BTV).

The data set for variable 2,4,6-Trinitrotoluene was not processed!

Arsenic

General Statistics

Total Number of Observations	8	Number of Distinct Observations	7
		Number of Missing Observations	10
Minimum	1.17	Mean	3.584
Maximum	11.7	Median	2.7
SD	3.346	Std. Error of Mean	1.183
Coefficient of Variation	0.934	Skewness	2.604

Note: Sample size is small (e.g., <10), if data are collected using incremental sampling methodology (ISM) approach,
refer also to ITRC Tech Reg Guide on ISM (ITRC 2020 and ITRC 2012) for additional guidance,
but note that ITRC may recommend the t-UCL or the Chebyshev UCL for small sample sizes (n < 7).
The Chebyshev UCL often results in gross overestimates of the mean.
Refer to the ProUCL 5.2 Technical Guide for a discussion of the Chebyshev UCL.

Normal GOF Test

Shapiro Wilk Test Statistic	0.613	**Shapiro Wilk GOF Test**
1% Shapiro Wilk Critical Value	0.749	Data Not Normal at 1% Significance Level
Lilliefors Test Statistic	0.4	**Lilliefors GOF Test**
1% Lilliefors Critical Value	0.333	Data Not Normal at 1% Significance Level

Data Not Normal at 1% Significance Level

Assuming Normal Distribution

95% Normal UCL		**95% UCLs (Adjusted for Skewness)**	
95% Student's-t UCL	5.825	95% Adjusted-CLT UCL (Chen-1995)	6.693

871											

Benzo[g,h,i]perylene

General Statistics

Total Number of Observations	6	Number of Distinct Observations	6
		Number of Missing Observations	13
Number of Detects	1	Number of Non-Detects	5
Number of Distinct Detects	1	Number of Distinct Non-Detects	5

Warning: Only one distinct data value was detected! ProUCL (or any other software) should not be used on such a data set!

It is suggested to use alternative site specific values determined by the Project Team to estimate environmental parameters (e.g., EPC, BTV).

The data set for variable Benzo[g,h,i]perylene was not processed!

Benzo[k]fluoranthene

General Statistics

Total Number of Observations	6	Number of Distinct Observations	6
		Number of Missing Observations	13
Number of Detects	1	Number of Non-Detects	5
Number of Distinct Detects	1	Number of Distinct Non-Detects	5

Warning: Only one distinct data value was detected! ProUCL (or any other software) should not be used on such a data set!

It is suggested to use alternative site specific values determined by the Project Team to estimate environmental parameters (e.g., EPC, BTV).

The data set for variable Benzo[k]fluoranthene was not processed!

Chrysene

General Statistics

Total Number of Observations	6	Number of Distinct Observations	6
		Number of Missing Observations	13
Number of Detects	2	Number of Non-Detects	4
Number of Distinct Detects	2	Number of Distinct Non-Detects	4
Minimum Detect	41	Minimum Non-Detect	27.5
Maximum Detect	110	Maximum Non-Detect	2600
Variance Detects	2381	Percent Non-Detects	66.67%
Mean Detects	75.5	SD Detects	48.79
Median Detects	75.5	CV Detects	0.646
Skewness Detects	N/A	Kurtosis Detects	N/A
Mean of Logged Detects	4.207	SD of Logged Detects	0.698

Warning: Data set has only 2 Detected Values.

This is not enough to compute meaningful or reliable statistics and estimates.

Note: Sample size is small (e.g., <10), if data are collected using incremental sampling methodology (ISM) approach,

refer also to ITRC Tech Reg Guide on ISM (ITRC 2020 and ITRC 2012) for additional guidance,

but note that ITRC may recommend the t-UCL or the Chebyshev UCL for small sample sizes (n < 7).

The Chebyshev UCL often results in gross overestimates of the mean.

Refer to the ProUCL 5.2 Technical Guide for a discussion of the Chebyshev UCL.

k hat (MLE)	0.89	k star (bias corrected MLE)	0.79
Theta hat (MLE)	16.52	Theta star (bias corrected MLE)	18.62
nu hat (MLE)	35.62	nu star (bias corrected)	31.61
Mean (detects)	14.71		

Gamma ROS Statistics using Imputed Non-Detects

GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs

GROS may not be used when kstar of detects is small such as <1.0, especially when the sample size is small (e.g., <15-20)

For such situations, GROS method may yield incorrect values of UCLs and BTVs

This is especially true when the sample size is small.

For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates

Minimum	0.01	Mean	13.37

Warning: This data set only has 2 observations!

Data set is too small to compute reliable and meaningful statistics and estimates!

The data set for variable 2-Methylnaphthalene was not processed!

It is suggested to collect at least 8 to 10 observations before using these statistical methods!

If possible, compute and collect Data Quality Objectives (DQO) based sample size and analytical results.

Benzo[a]anthracene

General Statistics

Warning: Only one distinct data value was detected! ProUCL (or any other software) should not be used on such a data set!

It is suggested to use alternative site specific values determined by the Project Team to estimate environmental parameters (e.g., EPC, BTV).

The data set for variable Benzo[a]anthracene was not processed!

Benzo[a]pyrene

General Statistics

Warning: Data set has only 2 Detected Values.

This is not enough to compute meaningful or reliable statistics and estimates.

Note: Sample size is small (e.g., <10), if data are collected using incremental sampling methodology (ISM) approach,

refer also to ITRC Tech Reg Guide on ISM (ITRC 2020 and ITRC 2012) for additional guidance,

but note that ITRC may recommend the t-UCL or the Chebyshev UCL for small sample sizes (n < 7).

The Chebyshev UCL often results in gross overestimates of the mean.

Refer to the ProUCL 5.2 Technical Guide for a discussion of the Chebyshev UCL.

884												
885	**Gamma ROS Statistics using Imputed Non-Detects**											
886	GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs											
887	GROS may not be used when kstar of detects is small such as <1.0, especially when the sample size is small (e.g., <15-20)											
888	For such situations, GROS method may yield incorrect values of UCLs and BTVs											
889	This is especially true when the sample size is small.											
890	For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates

Gamma ROS Statistics using Imputed Non-Detects

GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs
GROS may not be used when kstar of detects is small such as <1.0, especially when the sample size is small (e.g., <15-20)
For such situations, GROS method may yield incorrect values of UCLs and BTVs
This is especially true when the sample size is small.
For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates

3430	Note: Suggestions regarding the selection of a 95% UCL are provided to help the user to select the most appropriate 95% UCL.											
3431	Recommendations are based upon data size, data distribution, and skewness using results from simulation studies.											
3432	However, simulations results will not cover all Real World data sets; for additional insight the user may want to consult a statistician.

3476												
3477	**Gamma ROS Statistics using Imputed Non-Detects**											
3478	GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs											
3479	GROS may not be used when kstar of detects is small such as <1.0, especially when the sample size is small (e.g., <15-20)											
3480	For such situations, GROS method may yield incorrect values of UCLs and BTVs											
3481	This is especially true when the sample size is small.											
3482	For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates
